Otis Elevators

Sustain Architects' Endorsement

The Architect who specifies Otis Elevators identifies himself and his client with the most thorough Elevator organization in the world---an organization with fifty-seven years' experience and success in building Elevators.

Our Elevators --- of every type---from the simplest Hand-power Elevators to the most elaborate Electric and Hydraulic Installations---are the world's most finished Elevator products

We maintain Branches in eighty-one cities in the United States the distribution of which offers to users of Otis Elevators an inspection and Repair Service unapproached by any other Elevator Company.

Your clients and their engineers who use Otis Elevators will receive the benefit of our broad engineering experience and the unequalled facilities of our "Service Department." We are always glad to co-operate with them and with you to the fullest extent.

We Make

Gearless Traction Elevators. Worm Gear Traction Elevators. Drum Type Elevators. All Types of Hydraulic Elevators. Freight Elevators of Every Description. Automatic Residence Elevators. Electric Dumbwaiters. Incline Railway Hoists. Blast Furnace Hoists. Escalators. Inclined Freight Elevators. Gravity Conveyors, Etc.

Let us send you our latest books giving detail description of Otis Elevator products.

Editorial Comment.

Rather curiously there came, almost coincidentally, to the United States last April the tidings that the new capitol of the commonwealth of Australia had been christened Canberra, after long discussion; that the foundation stone of the capitol building had been laid with imposing ceremonies; and that the premiated design for the city, which was made by the young American architect, Walter Burley Griffin of Chicago, had been abandoned in favor of a sort of compromise plan worked out by a local Departmental Board. It is explained that the Board studied the various prize winning designs on the contemplated site of the city, and finding itself unable to recommend the adoption of any one of these designs, resolved, as an official statement naively expresses it, "to approve of the plan for the lay-out of the city as prepared by itself." This plan, the statement frankly admits, is made up of suggestions from many plans. Such an outcome, it may well be imagined, has infuriated our English cousins, whose patience had already been severely tried by the failure of the High Commissioners of Australia to amend the terms of the competition, and then by the capture of the prize by an American. The Town Planning Review editorially describes the now adopted design as "entirely outside the pale of serious criticism," and says that the perspective sketch which accompanies the plan is a reminder "of a third rate Luna Park." A study of the detail of the plan shows that this criticism is hardly too severe, but there is some gratification for America in noting that it has led to a better and fairer appreciation of Mr. Griffin's work by the sorrowful architects over the sea. —Architectural Record.

J. Pierpont Morgan was a great financier. That is about all that can be said of him. He thought he had religion. But if he did it was principally that of the self righteous pharisee. For his life was principally spent in gratifying his selfish pleasures and the charities that he performed were limited in this extent.

Lord Avebury, who died in England recently, who was better known as Sir John Lubbock, was also a great banker and financier. The later years of his life were devoted to charities and he was noted for his broad humanity, showing that to be a successful financier does not necessarily ostracize one from the humanities. Among other things he made himself famous for his pithy maxims which were distilled from the richness of experience. Some of these are:

"Economy for the mere sake of economy is no doubt mean, but economy for the sake of independence is right and manly.

Save something, however little, every year.

We often hear of riches not honestly come by, but the fact is that poverty is seldom honestly come by either.

No one need have much anxiety about the real necessities of life. Nature needs little and gives much.

Do not put too many eggs in one basket. However well you may be advised, however carefully you may have looked into the matter, so nothing may occur to upset all calculations.

To buy in the cheapest and sell in the dearest market is not only the necessary rule of trade, but is best for all.

The miser is the man who loves money for its own sake; who carries economy to excess; who is a mere covetous machine. One lesson we have to learn in life is to keep ourselves free from mean and petty cares—and love of money is one of the meanest."

The occasion has arisen which was to be expected when the test will be given as to whether or not the Wilson administration is susceptible to political influences or whether it is genuinely progressive and the sincere advocate of reform.

That occasion has been brought about by the tendering of the resignation of John L. McNab, U. S. District Attorney for the Northern District of California. McNab's telegrams to the President and to the Attorney General state the grounds on which he asks that his resignation be immediately accepted. He states his position plainly in unmistakable English. The cases of Caminetti and Diggs, indicted by the federal grand jury on charges of white slavery, have been continued from Washington over his protest and the prosecution against two members of the Western Fuel Company have been ordered stayed. The case is a clear one. It is up to President Wilson to investigate the case and demand an explanation of Attorney General McReynolds.

McNab undoubtedly does not want to continue as United States District Attorney. He has been hurt by the attitude of his superiors at Washington and under present circumstances he could not work in harmony with the department. But above the wishes of McNab are the rights and interests of the People of this States, which demand that he be retained, at least till the Diggs, Caminetti and the Western Fuel cases be determined.

President Wilson should be informed of the situation. When he is properly informed it will be up to him to choose between McNab and McReynolds and the people will know what to expect. If McReynolds is open to "influence," political or otherwise, in this case he will be open to influence in other cases.

What Should Be Included In Mill Work.

(By Charles Cloukey in the Wood-Worker)

We all know it is a fact that some of the easiest questions are the hardest to answer, and the longer we think about the answer the harder it is to make. And so it is with the question of mill work. We can name hundreds of items which unquestionably belong in this category, but in every building of consequence there are several items which may or may not be included in the list of mill work.

Now and then we run across an architect who makes an honest effort to set out the specifications for his mill work in such a manner as to cover it all. How well he succeeds or not, does not alter the fact that a great majority of architects make no effort to separate the mill work from other obligations of the carpenter or contractor.

Planing mills that are asked for bids on mill work per plans and specifications are compelled to make long lists of the work they include and to make other lists of the work they do not include. Many mills have a printed form of proposal for bids, with these notations and exceptions printed, but even with that apparent short cut they have the disadvantage of disagreeing with their neighbors, making it very hard for a contractor to really determine just what his various figures stand for.

The mills doing a lumber yard business in connection are apt to figure on some classes of materials usually left out by other mills, and sometimes they are able to secure contracts by including some of these materials by way of concessions. But however foolish it may seem, there is a tendency on the part of contractors to favor the lowest bidder, regardless of the inclusion of a lot of minor material by the higher man. If it is a blanket bid, he thinks that the mill man will furnish it all anyway under his contract, and there is where the lack of definition for the term "mill work" causes trouble.

Taking up some of the items in question, we find that in figuring mill work for the outside of houses and other buildings, a large number of mills will include all of the finishing lumber except siding, matched and beaded ceiling for the porches, and floors and decks for same. Other mills will also exclude the matched and beaded ceiling for the porches, while still others will include only the moldings for the cornices, the columns and balustrades for balconies and porches.

Nearly all the mills include sawed rafter ends and cornice brackets, and ornamental lookouts, but do not include sawed sweeps and brackets used to furr out curves in roof or siding, presumably because they are not finished materials. The same is true of all grounds, backs and floor strips, used in the later style of construction, although there is a growing effort on the part of contractors to have these items included in the mill work, as they should be. Quite a percentage of the specifications call for the backs to be mortised and tenoned together and grooved for electric light and telephone wires; the grounds have to be

ripped to width, and in many cases planed to uniform thickness, and the floor strips that are laid in cement or concrete have to be beveled. This is work that has to be done in a mill of some kind, and if the lumber has to be bought new it might be of advantage to have it included in the mill-work bid. If the contractor has second-hand lumber that he desires to use up in this way, of course he would not want these items included in the bid, but this is generally the exception.

Unless otherwise mentioned, stair work is considered as mill work, yet many mills will not include anything but the main stairs in a residence. Perhaps there is a fine stair of hardwood, a basement stair, a rear stair and an attic stair, but the mill will figure only the main stairway, considering the others as carpenter work. The flooring for stair platforms is another item about which various mills differ. Some mills never include it at all, and other mills when the platform flooring and stair are of different kind of wood from the floor below. The last position seems the most logical one, for it is a lot of bother for a builder to go out and get just enough flooring of a certain wood for one or two platforms.

Another item of controversy is that of matched and beaded partition work, for inside work. While some mills figure all of it all the time, other mills include it only when it is of some special wood to match the finish and is not to be bought in the lumber market ready-made. Some mills draw the dividing line at the materials that are required to be sanded, stained or varnished, in the way of ceiling and partition stuff.

The exclusion of flooring is quite general, and if even if no mention were made of it, it could not be forced under a blanket bid for mill work. However, in the case of show windows, where the flooring is different from the other floors, and has to be prepared for a fire finish, it is usually included.

The question of including glass in mill work bids is one of the most perplexing the estimator has to face, as regards policy. In the first place, the difference in price between glazed and open sash is so considerable that when the contractor gets a price on the glass and on the open sash, he thinks he can have the glass set himself for less money, thus giving a bidding advantage to the man who has excluded the glass from his bid. Other contractors who have had experience along this line with outside glaziers and broken glass, want the glass included all the time. But sometimes the architect puts his glazing specification in such a way that it is not practical for the mill to figure it at all.

Another item of much controversy is that of metal covered work of various kinds, ranging from store fronts and doors to interior trim. Many parts of store fronts and cornices are covered with sheet metal bent and broken to conform to the face of the wood molds underneath. In such cases it is the

policy of most wood-working mills to exclude such items from the mill work lists and let the metal contractors furnish the fillers for their sheet metal moldings. The question of wood trim for metal doors and windows is often an open one. In many cases the trim is metal, in others wood, while in many of the best buildings the plaster returns to the iron frame with only a small plaster mold in the angle. So it becomes very apparent that if nothing is said in the plans and specifications about the trim for metal windows, it is up to the mill to exclude them from a blanket bid.

Reverting again to the matter of stairs, it is the custom of mills in big cities to exclude stair work from the mill work bids for local jobs and for jobs handled by union labor. The reason for this is that in stair work it is the custom for the stair-builder who gets the work out to go out and set it up, but the carpenters' union objects to the wood-workers going outside to put up their own work. On account of this hitch the stair work in the big cities is done in carpenter shops, where the wood-workers are not wood-workers, but carpenters.

Since the development of fireproof buildings the wood work in stairs is confined mostly to residences, and does not effect the mill in bids on the big work. Nearly all of the iron railings have wood handrail, and this is generally included in mill work, but is occasionally specified to be furnished by the maker of the stairs. So it is very expedient to watch the specifications very closely.

The question as to what includes a cabinet trim job is very apt to provoke argument between contractor and mill man, for it is easy to claim inclusions on the one hand and exclusions on the other hand. To put up the trim complete and attach it to the jambs is considered by most mills as cabinet trim, but it might be made to include mortising the doors for locks, fitting same, hanging the doors and sash and applying all hardware possible, in the mill. It might include one, two or three coat work or complete finish and back painting.

The absence of adequate details at the time of figuring a job will cause the bidder to note many inclusions and exclusions that seem unnecessary to the contractor who is in possession of more information than he has furnished the mill man, but in these days of close competition we cannot afford to make our blanket cover too much indefinite work. If we include too much we lose the work altogether, and if we don't include enough we wish we had lost the job. As an old experienced mill man said a short time ago: "It is a matter of error and not of estimate, who gets the work. The man who makes the biggest blunder gets the job." And when an estimator limits a contract he has a sort of worried feeling until he has a chance to check his figures over again.

So it may be seen that some uniform idea of what really is mill work would

be of great convenience to the trade, would simplify estimates, eliminate many controversies and make mill work as distinct a class as that of hardware, tile or plaster.

WOOLWORTH BUILDING GREATEST ON EARTH.

The highest habitable structure on earth is the Woolworth building in New York. So much interest attaches to this remarkable structure, and so widely known is it, that now it is completed, after two and one-half years' construction work, we will give our readers a description of it.

This building is the most wonderful and marvelous piece of constructive engineering ever conceived or undertaken by man. Nearly 20,000 tons of steel were required in erecting the framework. It is said that not a single steel beam that went into this structure remained on the site of the building an hour after its arrival, before it was put in place. It was all brought to the building site practically on the minute, as it was impossible to store the material in the busy streets of lower New York.

Seventeen million bricks were required in the walls. Over 80,000 electric bulbs are used in the lighting of this structure. Strung less than three feet apart, these bulbs would light the entire 40 miles of water front around Manhattan Island.

The building has a total weight of 266,000,000 pounds. The engineers figured that at times this weight is increased by wind pressure to 250,000,000 pounds. It is designed to withstand a wind pressure of 250 miles an hour, a velocity which, if ever attained, would blow every building off Manhattan Island.

No other building since the creation of the earth has reached such a height as 910 feet, which is the height of the Woolworth building from its foundation at bed rock to the top of the tower. The Woolworth tower is 76 feet square and 55 stories high. The roof of the main building is 356 feet above the street. This main structure is 29 stories in height and covers a plot of ground approximately 150 by 200 feet.

The building contains 27 acres of rentable office space, and about 13 acres more is taken up with elevators and corridors. There is a battery of 28 elevators, 12 of which serve the tower above the main building. Every safety device known is provided, including air cushions, so that there is absolutely no danger, even though the average tenant will be able to get to his office from the street within 30 seconds. It takes just about one minute to go from the ground floor to the top office floor in one of the express elevators.

Some other features which give an idea of the work involved for the architect to plan the building are as follows: 3,600 hollow steel doors, 12 miles of marble trim, 43 miles of plumbing pipe, 7,500 tons of architectural terra cotta trim, 28,000 tons of hollow tile, 28,000 tons of terra cotta partitions.

The expression "absolutely fireproof" is often used in connection with the modern office buildings, but is rarely true. In the case of the Woolworth building, however, it is true. There is not a particle of wood in its construc-

tion. The doors, partitions and trim are all of steel, terra cotta and glass.

One of the most interesting features of the building is the tower, which contains an immense electric light, and which may be seen for many miles around New York. On the fifty-fourth story is a spacious observatory, which will soon be the Mecca for thousands of visitors of the metropolis of the country.

The exterior of the building is of creamy white stone and terra cotta design, a combination of the Italian, French and modern renaissance throughout the main part, with Gothic steeples at the roof. The grounds and buildings are said to have cost Frank Woolworth, the owner, about \$24,000,000, and experts in New York office building profits affirm that he will never be able to get in excess of 3 per cent per annum on his investment.

GAS APPLIANCE SALES CO. OF AMERICA AND ITS VARIED LINES.

The Gas Appliance Sales Co., of America is a new firm in name only. It was incorporated under the laws of New Jersey, January 1, 1912, and acts as a selling agency for a number of gas appliance factories, among them being the John Wood Mfg. Co., manufacturers of the E. W. Gas Water Heater line. Among their other prominent lines are Advanced Gas Steam Radiators, the Advanced System of copper coil radiation for general house heating. In independent gas water heaters they are agents for the Glover Triumph heater, manufactured by the Philadelphia Stove Co. and approved by the United Gas Improvement Company of Philadelphia Stove Co. and approved by the United Gas Improvement Co. of Philadelphia and sold by them and by all of their subsidiary companies throughout the United States. They are also agents in all Pacific Coast States for the Lawson Manufacturing Co. of Homestead, Pa., manufacturers of gas water heaters, gas stoves, etc. They are also agents for the Robertshaw Heat Regulators and Thermostats. Also among their numerous other lines should be mentioned the Modern Safety Gas Sad Iron. It is claimed for this device that it can be operated for at least one-half the cost of any other gas sad iron thus far produced and at a very small fraction of the cost of operation of electric sad irons. Its popularity is evidenced by the fact that during the year 1912, 58,000 of them were sold in the city of Chicago alone. The Western division of the Gas Appliance Sales Co. of America is under the management of Mr. James Hambly, with offices in the Pacific Building, San Francisco, and branch offices in Los Angeles and Oakland.

CALIFORNIA ARCHITECTURAL COMMISSION.

A commission to consider the improvement of the architecture and surroundings of all public buildings, whether state, county, municipal, or school, has been created by the adoption of Senator Birdall's concurrent resolution by the State Legislature. Three legislators from each house, and an advisory committee of sculptors,

painters and architects are to constitute the commission. The bill provides as follows:

Senate Concurrent Resolution No. 10. Relative to the Appointment of a Committee of the Legislature to Consist of Three Senators and Three Assemblymen, Which Committee Shall Have Power to Appoint an Advisory Committee of Architects, Sculptors and Painters to Constitute a Commission with a View of Reporting to the Governor Ways and Means of Improving the Standard of Architecture and Painting in the Furnishing, Decoration, Repair and Construction of All State, County, School and Municipal Buildings, Grounds and Public Works Throughout This State.

Whereas, The state and various counties, municipality and school districts thereof have from time to time expended large sums of public moneys for the furnishing, decorating, repairing and construction of various public buildings, structures, works, and grounds; and

Whereas, Said expenditures have in the past been made without reference to maintaining a definite high standard of architecture, sculpture, and painting; and

Whereas, The results obtained for such expenditures in many instances, from lack of proper advice or complete investigation, are inadequately planned and much below what the people of this civilized state are entitled to receive; and

Whereas, The State of California, with its rich heritage of climate and all inspiring scenery is pregnant with an art that should rival ancient Greece and Italy; and

Whereas, The citizens of this state by their labor and industry, and by the early establishment of an unequalled educational system have advanced to a culture which decries the unprofitable and unsightly perpetuation of the makeshifts and temporary and hasty structures which in pioneer times were necessary; and

Whereas, The citizens of this state are entitled to the development of standards of architecture, sculpture and painting equal to, if not better, than those existing in the eastern and middle western sections of these United States; and

Whereas, The State of Illinois, the City of New York and other states and municipalities have by the establishment of art commissions and other regulating bodies definitely taken steps to elevate and maintain such standards of architecture, sculpture and painting; now, therefore, be it

Resolved by the Senate of the State of California, the Assembly concurring, that a committee of three senators and three members of the Assembly be appointed by the president pro tem. of the Senate and by the speaker of the Assembly, which committee shall have power and it shall be its duty to appoint as advisory members thereof, three architects, a painter, a sculptor, and a lawyer, all of whom are known for their desire to improve standard of architecture, sculpture and painting, which committee shall constitute a commission to investigate and report to the governor, ways and means of improving and elevating throughout this state, the standard of architecture, sculpture and painting on all state.

county, school district and municipal buildings, grounds and public works; and the furnishing, decorating and embellishment thereof; and be it further

Resolved, That said report, together with the recommendations of said commission, shall be filed with the

governor at least forty days prior to the convening of the forty-second session of the California State Legislature; and be it further

Resolved, That the investigations and report of said commission shall be conducted and made without expense to the state.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$35,000. Architect, Miss Sutro, 2400 Van Ness Ave., S. F. Owner, Mrs. Clara Sutro, 2400 Van Ness Ave., S. F. The building will be erected on Pine street between Jones and Leavenworth and covers a considerable area. Apartments will be arranged in suites of two and three rooms with bath and wall beds. Interior finish will be of pine and elm. Hardwood floors will be used in the principal rooms. There will be steam heat, an automatic elevator and vacuum cleaning system. Bath rooms will have cement floors. Exterior of the building will be covered with cement plaster and brick veneer. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$25,000. Architect, none. Owner, Louis Lee, 5 Le Roy Place, S. F. The building will be erected on Pine street between Jones and Leavenworth streets. Interior will be arranged for two and three room apartments. There will be steam heat and an automatic elevator. All suites will have private bath rooms and wall beds. Interior finish will be of pine and elm panels. Some hardwood floors will be used. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with cement plaster. Plans are being prepared and when complete the work will be done by Dry Lubor.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$25,000. Architect, W. G. Hind, 16 Kearny St., S. F. Owner's name withheld. The building will be erected on the south side of Clay street between Jones and Leavenworth, and has been designed to contain six three-room apartments and six five-room suites. Interior will be finished in pine and hardwoods. A large entrance lobby, finished in the style of Louis XV, will be one of the features of the building. There will be a central heating system, vacuum cleaning plant and hot water supply. Hardwood floors will be used. All apartments will have private baths and will be equipped with wall beds. Marble and tile will be used in the vestibule. Exterior of the building will be covered with cement plaster. Plans are complete and segregated figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and a c. frame, \$15,000. Architect, O. E. Evans, 2367 Mission St., S. F. Owner's name withheld. The building will be erected on 8th avenue between Clement and Geny streets. There will be a number of three-room apartments. Interior will be finished in pine with some hardwood floors. Plans provide for a central heating system. All suites will have private

baths and wall beds. Exterior of the building will be covered with brick veneer and cement plaster on metal lath. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 5 story and base, reinforced concrete, \$50,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner's name withheld. This building will be erected on Filbert street, and will be designed in the Gothic style. Apartments will range from five to seven rooms, the larger suites having servants' rooms and more than one bath. Interior finish will meet the requirements of the lessees. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water plant. Bath rooms will have composition floors and tile wainscot. All suites will be equipped with wall beds. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 2 story and base, frame, \$15,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner's name withheld. The building will be erected in the Western Addition and has been designed to contain six apartments of four rooms and bath each. Interiors will be finished in pine with some elm panels and hardwood floors. A central heating system will be installed. All suites will be equipped with wall beds and will have private baths. Bath rooms will be finished in cement plaster. Exterior of the building will be covered with cement plaster on metal lath. Plans are now nearly completed.

SAN FRANCISCO—Apartment house, 2 story and base, frame. Cost not stated. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected on Filbert street in the rear of a large five-story reinforced concrete apartment house. Suites will contain two and three rooms and bath. Interior finish will be of pine with some elm panels. All apartments will be equipped with wall beds and will have private bath rooms. The exterior of the building will be covered with rustic and cement plaster. Plans are now being prepared.

OAKLAND, CAL.—Apartment house, 3 story and base, brick and steel, \$70,000. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. This building was mentioned here recently when the architect was first commissioned to prepare plans. The structure will be erected at the corner of 12th and Grove streets and will have a complete steel frame. Interior will be arranged for two and three room suites with wall beds and private baths. Interior finish will be of pine and hardwoods. Bath rooms

will be finished in tile and composition. There will be steam heat, elevator service, a vacuum cleaning system and other modern conveniences. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken on the work.

LONG BEACH, LOS ANGELES CO., CAL.—Apartment house, 3 story and base, frame, \$35,000. Architect, Leonard L. Jones, 1. W. Hellman Bldg., L. A. Owner, Mr. Myers. The building will be erected on Atlantic street near Ocean avenue and has been designed in the Mission style. There will be a total of 112 rooms besides a large lobby and parlor. Suites will contain two and three rooms with private baths and wall beds. Interior finish will be of pine and hardwoods. Plans provide for steam heat and a hot water system. Exterior of the building will be faced with cement plaster on metal lath. Some clay tile will be used on the roofs. Plans are now being prepared.

Contracts Awarded.

LONG BEACH, LOS ANGELES CO., CAL.—Apartment house, 4 story and base. Class C construction, \$16,750. Architect, Leonard L. Jones, 1. W. Hellman Bldg., L. A. Owner, Fred L. Demmie. Contractor, J. H. Pence, Stimson Bldg., L. A. Contract price, \$46,750.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick and steel, \$40,000. Architect, M. S. Yeager & Co. Trust and Savings Bldg., L. A. Owner, Anna Baker. Contractors, Pacific States Investment Co., 107 South Broadway, L. A. Contract price, \$40,000.

SEATTLE, WASH.—Apartment house, 3 story and base, brick and frame, \$25,000. Architect James H. Schack, Lippy Bldg., Seattle. Owner, C. D. Stinson. Contractor, H. F. Allen, 1421 East Valley street, Seattle. Contract price, \$25,000.

BANKS.

Contracts Awarded.

REDLANDS, SAN BERNARDINO CO., CAL.—Bank, 2 story and base. Class A construction, \$75,000. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, First National Bank of Redlands. Contractors, Los Angeles Paving Mill Co., 1812 Industrial St., L. A. Contract price, \$60,000. Note: This contract does not include plumbing, heating, electric work or vault work. These portions of the work will be awarded later.

BRIDGES, DAMS AND HARBOR WORK.

Contracts Awarded.

SEATTLE, WASH.—Reconstructing power dam, reinforced concrete, \$500,000. Engineer, Daniel W. Meade, Seattle. Owner, Olympia Power Co. Contractor, James E. Heyworth, Chicago. Contract price, \$500,000.

ASTRO, CAL.—Trestle bridge, reinforced concrete, \$100,000. Engineer, Engineering Department Santa Fe R. R. Co. Owners, Santa Fe R. R. Co. Contractor, Charles W. Corbaley, H. W. Hellman Bldg., L. A. Contract price, \$100,000.

CHURCHES.

SAN PEDRO, LOS ANGELES CO., CAL.—Church, 4 story and base, reinforced concrete, \$100,000. Architect, Thornton Fitzhugh, Pacific Electric Bldg., L. A. Owners, First Methodist Church of San Pedro. This building is designed for a combination church and institutional building. The structure will cover an area of 120x120 feet. There will be a main auditorium seating 700 people, Sunday school rooms, social halls, a completely equipped educational department and about 70 rooms and baths. Construction will be practically fireproof. Interior will be finished in pine and hardwoods. There will be steam heat and elevator service. Exterior of the building will be faced with cement plaster. Plans are being prepared.

RICHMOND, CONTRA COSTA CO., CAL.—Church, brick and frame. Cost not stated. Architect, J. B. Ogborn, Richmond. Owners, Presbyterian Church. This work has been mentioned here before. The excavating and concrete foundation work has been completed by Day Labor. Construction of the main portion of the building will be undertaken as soon as funds can be raised. Plans for this work have been approved by the Building Committee.

FACTORIES & WAREHOUSES.

SEATTLE, WASH.—Factory, 4 story and base, frame, \$150,000. Architect, none. Owner, Restmore Mfg. Co., Seattle. The building will cover an area of 252x80 feet and is to be erected at the corner of Napier and Boundary avenue. The Restmores are well known mattress manufacturers. The building will be carried on a pile foundation. There will be steel rolling doors, an automatic sprinkler system and elevator service. The building will be covered with shiplap. Fire escapes are specified. Plans will be completed as rapidly as possible and bids will be taken by the owners.

VANCOUVER, B. C.—Factory, 4 story and base, brick construction, \$150,000. Engineer, Engineering Department American Can Co. Owners, American Can Co. Plans have been completed and work will be started within a short time on a four story factory building covering an area of 160x124 feet. Specifications include fireproof doors, metal window sash and frames, automatic sprinkler system, fire escapes, elevator service and a boiler plant. Concrete stairways will be used throughout. Exterior of the building will be faced with stock brick. Plans are in the hands of the owners and the work will be done by Day Labor.

SEATTLE, WASH.—Factory, 5 story and base, reinforced concrete, \$250,000. Architect John Graham, Lyon Bldg., Seattle. Owners Ford Motor Car Co. Contractor, Hans Pederson, Madison Bldg., Seattle. Contract price, \$250,000. This contract does not include plumbing heating or electric work. The Evans-Almoral Co., New York, has a contract for the heating and figures will be taken shortly for the electric work and plumbing.

Contracts Awarded.

WENATCHEE, WASH.—Warehouse, 2 story and base, brick, \$40,000. Architects Bebb & Mendel, Seattle. Own-

ers, Wenatchee Fruit Growers Exchange. Contractors, Far West Clay Co., Tacoma, hollow tile work, and Dennison Block Construction Co., Tacoma, general construction. Contract price, \$40,000.

VANCOUVER, B. C.—Ice and cold storage plant, 4 story and base, mill construction, \$150,000. Architects, Gould & Wood Rogers Bldg., Vancouver. Owners, Mainland Ice and Cold Storage Co. Contractors, Bayles & Horie, Davis Chambers Bldg., Vancouver. Contract price, \$150,000.

FIRE HOUSES.

GLENDALE, LOS ANGELES CO., CAL.—Firehouse, 2 story and base, brick. Cost not stated. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, City of Glendale. The building will cover an area of 50x70 feet. The first floor will be arranged for four pieces of apparatus and will have a cement floor. Upper floor will be divided into three rooms, with bath and showers, library and chief's office. Interior will be finished in pine and hardwood. There will be steam heat. Exterior of the building will be faced with ruffled brick. Special electrical work will be let in another contract. Plans are now being prepared.

Contracts Awarded.

SAN FRANCISCO—Police station, 2 story, brick and stone, \$33,480. Architect, City Department of Architecture. Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractor, O. C. Holt, S. F. Contract price, \$33,480. Note: This contract is for the construction of the new Harbor Police station.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$9,000. Architect, O. E. Evans, 2367 Mission St., S. F. Owner's name withheld. The building, which has been designed to contain four modern flats, will be erected on Harper street near 30th. Interiors will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. Flats will contain five and six rooms and bath. There will be an open fire place in each living room. Mantels will be of brick. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with brick veneer and shiplap. Plans are now nearly complete for this work.

SAN FRANCISCO—Flats, 2 story and base, frame, \$12,000. Architect, E. H. Denke, 1317 Hyde St., S. F. Owner, Mrs. J. Fieley. The building has been designed to contain four flats and a doctor's office. The building will be located on Sutter street west of Webster. Flats will contain four and five rooms. Interiors will be finished in pine and hardwood with hardwood floors in the principal rooms. All living rooms will have open fire places and brick or tile mantels. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Flats, 2 story and base, frame, \$3,500. Architect, none.

Owner, I. C. Conner, 578 10th Ave., S. F. The building will be erected on 5th avenue south of Clement street and will cover an area of 25x56 feet. There will be two flats of five and six rooms each. Interiors will be finished in pine throughout. Hardwood floors will be used in some of the rooms. Each flat will have a bath finished in tile and cement plaster. Tile will also be used in the kitchens. Large open fire places with brick or tile mantels will be used in the living rooms. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

OAKLAND, CAL.—Flats, 2 story and base, frame, \$3,500. Architect, none. Owner, Harry Wicks, 579 27th street, Oakland. The building has been designed to contain two modern flats of five and six rooms each. Interior finish will be of pine throughout. Some hardwood floors will be used. There will be an open fire place in each living room. Mantel will be of brick or tile. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with cement plaster on metal lath. Plans are in the hands of the owner who is now taking figures on the work.

GARAGES.

SAN FRANCISCO—Garage and social hall, 2 story and base, Class B, \$50,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner's name withheld. This building will cover a large ground area and is to be erected on Golden Gate avenue near Van Ness. The first floor will be arranged for an automobile sales room and is to be handsomely finished in pine, hardwoods ornamental plaster and tile. Upper floor will be fitted up for social and lodge halls and will be finished in pine with a maple floor. There will be considerable structural steel used. Exterior will be faced with pressed brick. Marble and tile will be used extensively. There will be a cement first floor and patent store fronts. Metal window sash and frames will be specified. Plans are being prepared.

SAN FRANCISCO—Garage, 1 story and base, reinforced concrete. Cost not stated. Architect, none. Owner, Mr. Reese. Plans have been prepared by a contractor for this work. The building is designed for a commercial garage and will contain, besides the storage space, a completely equipped machine shop. There will be a cement floor, metal window sash and frames and special gasoline storage tanks. Exterior of the building will be faced with cement plaster. The work will probably be done by Day Labor.

PORTLAND, ORE.—Garage and dance hall, 3 story and base, brick and steel, \$60,000. Architect, Robert F. Tegen, Sweetland Bldg., Portland. Owners, Ringler Dancing Academy. The building will be erected at the corner of 14th and Burnside streets and will cover an area of 60x200 feet. The basement, first and second floors will be used for a commercial garage and machine shop. Third floor will be fitted up for a dancing academy and will be finished in pine and ornamental plaster. There will be metal window sash and frames. Plans provide for

steam heat and elevator service. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

PATTERSON, STANISLAUS CO., CAL.—Garage, 1 story and base, reinforced concrete, \$12,000. Architects, Swartz, Hotchkiss & Swartz, Fresno. Owner, Thomas Patterson. The building has been designed for a commercial garage, and is to be in the Mission style, covering an area of 60x178 feet. The front portion of the building, occupying a space of 24 feet square, will be arranged for sales rooms and will have a tile floor, hardwood trim and plate glass display windows in patent store fronts. Metal window sash and frames are specified throughout. A tile roof will be used. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

Contracts Awarded.

SEATTLE, WASH.—Garage, 2 story and base, reinforced concrete. Cost not stated. Architect, W. Marbury Somerville. White Bldg., Seattle. Owners, Harvard Building Co. Contractor, Otto Roseleaf, Lowman Bldg., Seattle. Contract price not stated. Note: The building will cover an area of 120x146 feet.

Transformers, Reclamation Service.

The following bids were opened at Los Angeles, Cal., for San River project, transformers, adv. No. 202:

Item 1 (2 7½ Kv-a), price T. & P. of Del.; item 2 (1 5 Kv-a), price T. & P. of Del.; item 3 (2 1 Kv-a), price T. & P. of Del.

Crocker-Wheeler Co., Los Angeles, Cal., item 1, \$125.50, 10 days, Ampere, N. J.; 2, \$50.40, 10 days, Ampere, N. J.; 3, \$10, 10 days, Ampere, N. J.

Wagner Electric and Machine Co., Los Angeles, Cal., item 1, \$128.16, 20 days, St. Louis, Mo.; 2, \$16.60, 2 days, St. Louis, Mo.; 3, \$38.88, 2 days, St. Louis, Mo.

Allis-Chalmers Machine Co., Los Angeles, Cal., item 1, \$140, 10 working days, East Norwood, Ohio; 2, \$55, 10 working days, East Norwood, Ohio; 3, \$44, 10 working days, East Norwood, Ohio.

Maloney Electric Co., St. Louis, Mo., item 1, \$135.02, 30 days, St. Louis, Mo.; 2, \$50.90, 30 days, St. Louis, Mo.; 3, \$11.56, 30 days, St. Louis, Mo.

General Electric Co., Los Angeles, Cal., item 1, \$150.48, 3 days, Pittsfield, Mass.; 2, \$26.86, 3 days, Pittsfield, Mass.; 3, \$46.18, 3 days, Pittsfield, Mass.

Westinghouse Electric and Manufacturing Co., Los Angeles, Cal., item 1, \$155.54, 10 days, East Pittsburgh; 2, \$51.10, 10 days, East Pittsburgh; 3, \$15.57, 10 days, East Pittsburgh.

B. P. Kierulff & Co., Los Angeles, Cal., item 1, \$142.56, 7 days, Fort Wayne; 2, \$52.87, 7 days, Fort Wayne; 3, \$43.74, 7 days, Fort Wayne.

HALLS AND SOCIETY BUILDINGS.

PORTLAND, ORE.—Lodge hall, 2 story and base, brick and steel, \$60,000. Architects, Clausen & Clausen, Maybay Bldg., Portland. This building has been mentioned here when the architects were first commissioned to prepare the plans. The building will be erected on a corner site and covers a large area. Basement will contain a racketeal, janitor's apartments, billiard and pool rooms, bowling alleys and a large swimming tank. First floor will be arranged for an auditorium seating 750 people, with stage, ladies' and gentlemen's parlors and refreshment room. Second floor will be given over to the gymnasium and rest rooms. Interior finish will be of pine and hardwoods. There will be steam heat and special plumbing. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

PASADENA, LOS ANGELES CO., CAL.—Lodge hall, 3 story and base, brick and steel, \$65,000. Architects, Foss Designing and Building Co., 100 East Colorado St., Pasadena. Owners, Odd Fellows Hall Association. All bids received at the meeting of the Building Committee on June 27th were rejected as being above the amount available. Plans will be revised and new figures will be called for at once.

The structure will be of semi-fireproof construction and will be arranged for a lodge room on the first floor, library and social rooms on the second floor and living apartments on the third floor. Interior finish will be of pine and hardwood. There will be a steam heating system and vacuum cleaning system. Exterior of the building will be faced with pressed brick.

TILLAMOOK, ORE.—Lodge hall, 2 story and base, brick and steel. Cost not stated. Architect, E. E. McClaran, Lumber Exchange Bldg., Portland. Owners, Masonic Temple Association. This building has been mentioned here before when the architect was first commissioned to prepare plans. The building will cover an area of 78x105 feet. First floor will contain a number of stores, while the second floor will be arranged for a lodge room, offices and a number of living apartments. Interior will be finished in pine and hardwoods. There will be disappearing beds, private baths and steam heat. Exterior will be faced with pressed brick. Plans are complete and figures have been taken. A contract will be awarded shortly.

LOS ANGELES, CAL.—Lodge hall, 4 story and base. Class B construction, \$62,593. Architect, Alfred C. Martin, Higgins Bldg., L. A. Owners, Knights of Columbus. Contractor, Los Angeles Planing Mill Co., 1812 Industrial St., L. A. Contract price, \$62,593.

HOSPITALS.

JUNEAU, ALASKA—Hospital, 4 story and base, reinforced concrete, \$60,000. Architect, Julian Everett, Walker Bldg., Seattle. Owners, Sisters Hospital. This is the first unit of a large project which will be erected in Juneau. This building will cover an area of 40x110 feet and will contain public and private wards, private rooms, nurses' quarters and operating rooms. Interior will be finished in pine and hardwoods. Plans provide for steam heat, elevator service and hot water plant. Considerable tile and marble will be used. Exterior of the building will be faced with cement plaster. Plans are now being prepared and when complete the work will be done by Day Labor under the personal direction of the architect.

SEATTLE, WASH.—Hospital group, 9, 1 story frame buildings, \$22,050. Architect, Ben F. Smith, Building Department, Seattle. Owners City of Seattle. This group of buildings is to be known as the Louis Rescue Home, and will consist of an administration building, ward buildings, dormitory, kitchen and dining room. Construc-

tion will be of frame throughout. Interior finish will be of pine. There will be a central heating system. Operating rooms will be finished in tile and white enamel. Exterior of the group will be covered with rustic. Preliminary plans only have been prepared and construction will not be assured until bonds have been voted.

HOTELS.

SAN FRANCISCO—Hotel, 5 story and base, brick and steel. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on the south side of Post street between Larkin and Polk streets, and has been designed to contain a total of sixty guest rooms and thirty baths. Interior will be finished in pine with some hardwood. Plans provide for steam heat, elevator service and a hot water system. Bath rooms will have composition floors and tile wainscot. Wall beds will be used. Exterior of the building will be faced with pressed brick. Tile and marble will be used in the entrance vestibule and lobby. Plans are being prepared.

SAN FRANCISCO—Hotel and stores, 3 story and base, brick and steel. Cost not stated. Architect, Charles C. Frye, 20 Montgomery St., S. F. Owners, Hop Wo Enevolent Society. This building will be erected on Clay street and has been described in these columns before when plans contemplated a four-story structure. There will be stores on the first floor and a number of single rooms above. Interior finish will be of pine throughout. Several baths will be located on each of the upper floors. Running water will be supplied to all rooms. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

SAN FRANCISCO—Hotel, 7 story and base, brick and steel, \$30,000. Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owner's name withheld. The building will be erected on Turk street near Taylor and will cover an area of 24-4½x137½ feet. There will be a store besides the hotel lobby on the first floor. Upper floors will be divided into 108 guest rooms, 75 per cent of which will have private baths. Interior will be finished in blue gum and other hardwoods. Ornamental plaster and tile will be used in the lobby and parlors. Plans provide for steam heat, elevator service, a vacuum cleaning system, wall beds and hot water system. Electric curling irons will be used in all rooms. Bath rooms will be finished in tile. Marble and tile will be used in the lobby. There will be metal window sash and frames. Exterior of the building will be faced with pressed brick and terra cotta. Plans are nearly complete and segregated bids will be taken.

SAN FRANCISCO—Hotel, 2 story and base, brick. Cost not stated. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner's name withheld. The building will be erected in Chinatown and has been designed for a store and entrance on the first floor. Upper floor will be arranged for a number of single rooms. Interior finish will be of pine throughout. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

OAKLAND, CAL.—Hotel, 8 story and base. Class A construction, \$110,000. Architect, William Wilde, Albany Bldg., Oakland. Owner, O. J. Mead. A site at the southeast corner of 10th and Clay streets has been secured and a building covering 50x100 feet will be erected as soon as plans can be prepared. There will be stores on the first floor besides a large hotel lobby and offices. Upper seven floors will be arranged for single rooms, a large proportion of which will have connecting baths. There will be a complete steel frame and exterior walls of brick, faced with pressed brick and terra cotta. Interior partitions will be of hollow tile and metal lath and plaster. Floors will be of concrete. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot and cold running water. Interior finish will be of pine and hardwoods with tile and marble wainscot. Bath rooms will be finished in tile. Metal window sash and frames will be used. Plans are now being prepared.

OAKLAND, CAL.—Hotel, 6 story and base, brick and steel, \$60,000. Architect, William Wilde, Albany Bldg., Oakland. Owner, Charles Street. The building will be erected at the northeast corner of 10th and Franklin streets and covers a large area. There will be stores on the first floor besides the hotel lobby. Upper floors will be arranged for single rooms and baths. Interior finish will be of pine and hardwoods. There will be steam heat and elevator service, a vacuum cleaning system and hot water plant. Patent store fronts will be specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and stone. Cost not stated. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owner, William Neuer. The building will be erected at the corner of Gladys and 6th streets. There will be stores on the first floor besides a large hotel lobby and office. Upper floors will be divided into about 100 guest rooms and 40 baths. Interior finish will be of pine and hardwoods. Bath rooms will be finished in tile with composition floors. Plans provide for steam heat, elevator service and a vacuum cleaning system. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owner, Jacob Joseph. The building will be erected on 6th street near Hope, and will cover an area of 100x120 feet. There will be a number of stores besides the lobby on the first floor. Upper floors will be arranged for 69 guest rooms and a number of baths. Interior will be finished in pine throughout. Plans provide for steam heat, elevator service and a hot water plant. Bath rooms will have composition floors and tile wainscot. There will be metal window sash and frames. Considerable structural steel will be used. Exterior will be faced with pressed brick. Patent store fronts are specified. Plans are complete and figures will be called for at once.

PORTLAND, ORE.—Hotel, 3 story and base, brick. Cost not stated. Architect, W. B. Bell, Worcester Bldg., Portland. Owners, Messrs Fisher and

Thorsen. The building will be erected on a corner lot and will cover an area of 100 feet square. Interior will be arranged for stores on the first floor and about 100 guest rooms on the upper two floors. There will be steam heat and a hot water supply. Interior finish will be of pine with some ornamental plaster used in the lobby. Exterior of the building will be faced with pressed brick. Patent store fronts are specified. Plans are complete and figures are now being taken.

Owners, Panama-Pacific International Exposition Co. Three separate bids will be received on July 10th for the following work in connection with the removal of Quartermaster Store Houses Nos. 1, 2, 3 and 4: (a) removing and resetting, (b) constructing roadway, excavating and grading and (c) concrete foundations piers and timber drains. Plans can be secured from the Director of Works, Service Bldg. Official proposal for this work appears under the heading Official Advertising in this issue.

RESIDENCES.

SAN FRANCISCO—Residences, 3, 1½ story and base, frame, \$2,000 each. Architect, none. Owners, Oscar Heyman & Bros, 712 Market St., S. F. These dwellings will be erected on Pennsylvania north of 20th street. Each house has been designed for a six-room dwelling with bath. Interior finish will be of pine throughout. Hard-

wood floors will be used in the living and dining rooms. Large open fire places with brick and tile mantels will be used in the living and dining rooms. Tile will be used in the baths and kitchens. Exteriors will be covered with rustic and shiplap. Plans are complete and in the hands of the owners who will do the work by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, F. Nelson, 20 Presidio Terrace, S. F. The dwelling will be erected on 16th avenue south of Clement street and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood with some oak floors. There will be a large open fire place with brick or tile mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Bungalow, 1½ story and base, frame, \$2,400. Architect, O. E. Evans, 2375 Mission St., S. F. Owner, Mrs. Brown. The dwelling has been designed for a six-room house and will be erected in the Crocker Amazon Tract. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place with brick mantel in the living room. Bath room will have cement plaster wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with shiplap and rustic. Plans are complete and figures are now being taken.

SAN FRANCISCO—Residence, 1 story and base, frame, \$3,000. Architect, Creighton Withers, Stanford Court, S. F. Owner, M. F. Caries. The dwelling will be erected at the corner of Alma and Schrader streets and has been designed to contain seven rooms and bath. Interior will be finished in pine and hardwoods with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, William P. Lange, 543 27th avenue, S. F. The dwelling has been designed for a six-room house with bath. Interior finish will be of pine with some redwood. Hardwood floors will be used in the principal rooms. There will be an open fire place in the living room with brick mantel. Exterior of the house will be covered with cement plaster on metal lath. Tile will be used in the bath room and kitchen. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame. Cost not stated. Architects, Bakewell & Brown, 25 Kearny St., S. F. Owner, Linda C. Avenall. This dwelling has been mentioned here before. Plans are now complete and figures are being taken. The house will contain in the neighborhood of

eight rooms, baths and a laundry. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath rooms and kitchen. Exterior of the house will be covered with cement plaster on metal lath and brick veneer.

SAN FRANCISCO—Residence, 2 story and base, frame, \$4,500. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, Mrs. John Birmingham. The dwelling will be erected on Pine street near Stockton and has been designed to contain eight rooms and bath. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with rustic. Plans are complete and a contract will be awarded shortly.

OAKLAND—Residence, 2 story and base, frame, \$4,500. Architects, Hutchinson Bros., 470 12th St., Oakland. Owner, Mrs. Chamberlain. The house will be erected on Valle Vista avenue, and has been designed for an eight-room dwelling with baths and sleeping porch. Interior will be finished in pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath rooms and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$8,000. Architect, William H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner, Prof. C. L. Cory. The dwelling will be erected on Waring street near Dwight Way, and has been designed to contain ten rooms, baths and sleeping porch. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

SAN LEANDRO, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$6,000. Architect, Louis M. Upton, Mutual Bank Bldg., S. F. Owner, James Dalziel. This house will be erected on the Foothill Boulevard, and is to contain in the neighborhood of ten rooms, baths and sleeping porch. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath rooms and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, A. H. Gerits. The

house will contain eight rooms, bath and sleeping porch. Interior finish will be of pine with some hardwood veneer. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Bath room will have the wainscot. An automatic water heater will also be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$1,000. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, Mr. Knight. The house will be erected in Northbrae, and has been designed to contain eight rooms, bath and sleeping porch. All interior finish will be of pine or redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared for the work and bids will be called for shortly.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,600. Architect, none. Owner, George D. Ellis, 1929 24th Ave., Oakland. The dwelling will be erected at the corner of 7th avenue and East 23rd street, and will contain seven rooms and bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with shingles. Plans are complete and in the hands of the owner, who will do the work by Day Labor. He is now in the market for all materials.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, George P. Baxter. WENDEROTH, supervising architect.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 415 in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 11:30 A. M., Thursday, July 10th, 1913, for constructing a Roadway and Plumber Drain in connection with Rerecting Quartermaster's Stores Nos. 1, 2, 3, and 4 in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made.

The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$5.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee,

WILLIAM H. CROCKER,
Chairman. (*)

A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 267 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$5.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (*)

NOTICE TO CONTRACTOR.

TREASURY DEPARTMENT, Office of the Supervising Architect, Washington, D. C., June 9, 1913.—Sealed proposals will be received at this office until 2 o'clock P. M. on July 21, 1913, and then opened, for new heating boilers, etc., at the United States postoffice, Port Townsend, Wash., in accordance with the specifications copies of which may be obtained at this office, at the discretion of the Supervising Architect. O. W. PENDEROTH, Supervising Architect. (*)

complete and figures are now being taken.

RESIDENCE — 1 story and base, frame, \$3,000. San Francisco. Architect, Creighton Withers, Stanford Court, S. F. Owner, M. F. Caries. The dwelling will be erected at the corner of Alma and Schrader streets, and has been designed to contain seven rooms and bath. Interior will be finished in pine and hardwoods with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 1 story and base, frame, \$2,000. San Francisco. Architect, none. Owner, William F. Lange, 513 37th avenue, S. F. The dwelling has been designed for a six-room house with bath. Interior finish will be of pine with some redwood. Hardwood floors will be used in the principal rooms. There will be an open fire place in the living room with brick mantel. Exterior of the house will be covered with cement plaster on metal lath. Tile will be used in the bath room and kitchen. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE — 2 story and base, frame. Cost not stated. San Francisco. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owner, Linda C. Avenali. This dwelling has been mentioned here before. Plans are now complete and figures are being taken. The house will contain in the neighborhood of eight rooms, baths and laundry. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath rooms and kitchen. Exterior of the house will be covered with cement plaster on metal lath and brick veneer.

RESIDENCE — 2 story and base, frame, \$4,500. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, Mrs. John Birmingham. The dwelling will be erected on Pine street near Stockton, and has been designed to contain eight rooms and bath. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with rustic. Plans are complete and a contract will be awarded shortly.

APARTMENT HOUSE—3 story and base, frame, \$35,000. San Francisco. Architect, Miss Sutro, 2460 Van Ness Ave., S. F. Owner, Mrs. Clara Sutro, 2460 Van Ness Ave. The building will be erected on Pine street between Jones and Leavenworth, and covers a considerable area. Apartments will be arranged in suites of two and three rooms with bath and wall beds. Interior finish will be of pine and elm. Hardwood floors will be used in the principal rooms. There will be steam heat, an automatic elevator and vacuum cleaning system. Bath rooms

Firms dealing with certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO

RESIDENCES—3, 1½ story and base, frame, \$2,000 each. San Francisco. Architect, none. Owners, Oscar Heyman & Bros., 742 Market St., S. F. These dwellings will be erected on Pennsylvania north of 26th street. Each house has been designed for a six-room dwelling with bath. Interior finish will be of pine throughout. Hardwood floors will be used in the living and dining rooms. Large open fire places with brick and tile mantels will be used in the living rooms. Tile will be used in the baths and kitchens. Exteriors will be covered with rustic and shiplap. Plans are complete and in the hands of the owners who will do the work by Day Labor.

RESIDENCE — 2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. The dwelling will be erected on 16th avenue south of Clement, and has been designed to

contain six rooms and bath. Interior will be finished in pine and redwood with some oak floors. There will be a large open fire place with brick or tile mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RETAIL STORE—1½ story and base, frame, \$2,100. San Francisco. Architect, O. E. Evans, 2576 Mission St., S. F. Owner, Mrs. Brown. The dwelling has been designed for a six-room house and will be erected in the Crocker Amazon Tract. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place with brick mantel in the living room. Bath room will have cement plaster wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with shiplap and rustic. Plans are

will have cement floors. Exterior of the building will be covered with cement plaster and brick veneer. Plans are now being prepared.

APARTMENT HOUSE—3 story and base, frame, \$25,000. San Francisco. Architect, none. Owner, Louis Lee, 6 Le Roy Place, S. F. The building will be erected on Pine street between Jones and Leavenworth streets. Interior will be arranged for two and three room apartments. There will be steam heat and an automatic elevator. All suites will have private bath room and wall beds. Interior finish will be of pine and elm panels. Some hardwood floors will be used. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with cement plaster. Plans are being prepared and when complete the work will be done by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$25,000. San Francisco. Architect, W. G. Hind, 46 Kearny St., S. F. Owner's name withheld. The building will be erected on the south side of Clay street between Jones and Leavenworth, and has been designed to contain six three room apartments and six five-room suites. Interior will be finished in pine and hardwoods. A large entrance lobby, finished in the style of Louis XV, will be one of the features of the building. There will be a central heating system, vacuum cleaning plant and hot water supply. Hardwood floors will be used. All apartments will have private bath and will be equipped with wall beds. Marble and tile will be used in the vestibule. Exterior of the building will be covered with cement plaster. Plans are complete and segregated figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$15,000. San Francisco. Architect, O. E. Evans, 2367 Mission St., S. F. Owner's name withheld. The building will be erected on 8th avenue between Clement and Geary streets. There will be a number of three-room apartments. Interior will be finished in pine with some hardwood floors. Plans provide for a central heating system. All suites will have private bath and wall beds. Exterior of the building will be covered with brick veneer and cement plaster on metal lath. Plans are now being prepared.

APARTMENT HOUSE—5 story and base, reinforced concrete, \$50,000. San Francisco. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner's name withheld. This building will be erected on Filbert street, and will be designed in the Gothic style. Apartments will range from five to seven rooms, the larger suites having servants' rooms and more than one bath. Interior finish will meet the requirements of the various lessees. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water plant. Bath rooms will have composition floors and the wainscot. All suites will be equipped with wall beds. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

APARTMENT HOUSE—3 story and base, frame, \$15,000. San Francisco. Architects, Edick & Knoll, Hearst Bldg., S. F. Owner's name withheld. The building will be erected in the Western Addition, and has been designed to contain six apartments of

four rooms and bath each. Interiors will be finished in pine with some elm panels and hardwood floors. A central heating system will be installed. All suites will be equipped with wall beds and will have private baths. Bath rooms will be finished in cement plaster. Exterior of the building will be covered with cement plaster on metal lath. Plans are now nearly completed.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. San Francisco. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected on Filbert street in the rear of a large five-story reinforced concrete apartment house. Suites will contain two and three rooms and bath. Interior finish will be of pine with some elm panels. All apartments will be equipped with wall beds and will have private bath rooms. The exterior of the building will be covered with rustic and cement plaster. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$14,000. San Francisco. Architect, Thompson, 2440 16th St., S. F. Owner, Louis Glass, Shreve Bldg. The dwelling will be erected at Baker's Beach, and has been designed to contain twelve rooms, sleeping porch and bath. Interior will be finished in pine and hardwood. Hardwood floors will be used throughout. There will be a central heating system, probably hot water, and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile. An automatic water heater will be installed and perhaps a vacuum cleaning system. Exterior of the dwelling will be covered with cement plaster. Plans are complete.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, Samuel I. Depew, 710 Broadway, S. F. The house will be erected on 33th avenue near Fulton, and has been designed for a six-room dwelling. Interior finish will be of pine throughout. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room with a brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with shiplap and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

FLATS—2 story and base, frame, \$9,000. San Francisco. Architect, O. E. Evans, 2367 Mission St., S. F. Owner's name withheld. The building, which has been designed to contain four modern flats, will be erected on Harper street near 20th. Interiors will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. Flats will contain five and six rooms and bath. There will be an open fire place in each living room. Mantel will be of brick. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with brick veneer and shiplap. Plans are now nearly complete for this work.

FLATS—3 story and base, frame, \$12,000. San Francisco. Architect, E. H. Denke, 1317 Hyde St., S. F. Owner, Mrs. J. McLeay. The building has been designed to contain four flats and a doctor's office. The building will be

located on Sutter street west of Webster. Flats will contain four and five rooms. Interiors will be finished in pine and hardwood with hardwood floors in the principal rooms. All living rooms will have open fire places and brick or tile mantels. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with brick veneer and cement plaster on metal lath. Plans are complete and figures are being taken.

FLATS—2 story and base, frame, \$3,500. San Francisco. Architect, none. Owner, I. C. Conner, 578 10th Ave., S. F. The building will be erected on 5th avenue south of Clement street, and will cover an area of 25x56 feet. There will be two flats of five and six rooms each. Interiors will be finished in pine throughout. Hardwood floors will be used in some of the rooms. Each flat will have a bath finished in tile and cement plaster. Tile will also be used in the kitchens. Large open fire places with brick or tile mantels will be used in the living rooms. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

GARAGE AND SOCIAL HALL—2 story and base, Class B, \$50,000. San Francisco. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner's name withheld. This building will cover a large ground area and is to be erected on Golden Gate avenue near Van Ness. The first floor will be arranged for an automobile sales room, and is to be handsomely finished in pine, hardwoods, ornamental plaster and tile. Upper floor will be fitted up for social and lodge halls, and will be finished in pine with a maple floor. There will be considerable structural steel used. Exterior will be faced with pressed brick. Marble and tile will be used extensively. There will be a cement first floor and patent store fronts. Metal window sash and frames will be specified. Plans are being prepared.

GARAGE—1 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, none. Owner, Mr. Reese. Plans have been prepared by a contractor for this work. The building is designed for a commercial garage and will contain, besides the storage space, a completely equipped machine shop. There will be a cement floor, metal window sash and frames and special gasoline storage tanks. Exterior of the building will be faced with cement plaster. The work will probably be done by Day Labor.

HOTEL—5 story and base, brick and steel. Cost not stated. San Francisco. Architects, Roussau & Roussau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on the south side of Post street between Larkin and Polk streets, and has been designed to contain a total of sixty guest rooms and thirty baths. Interior will be finished in pine with some hardwood. Plans provide for steam heat, elevator service and a hot water system. Bath rooms will have composition floors and tile wainscot. Wall beds will be used. Exterior of the building will be faced with pressed brick. Tile and marble will be used in the entrance vestibule and lobby. Plans are being prepared.

HOTEL AND STORES—Brick and steel, cost not stated. San Francisco. Architect, Charles C. Frye, 20 Montgomery St., S. F. Owners, Hop Wo Renovation Society. This building will be erected on Clay street, and has been described in these columns before when plans contemplated a four-story structure. There will be stores on the first floor and a number of single rooms above. Interior finish will be of pine throughout. Several baths will be located on each of the upper floors. Running water will be supplied to all rooms. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

HOTEL—7 story and base, brick and steel, \$90,000. San Francisco. Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owner's name withheld. The building will be erected on Turk street near Taylor, and will cover an area of 34-4½x137½ feet. There will be a store besides the hotel lobby on the first floor. Upper floors will be divided into 108 guest rooms, 75 per cent of which will have private baths. Interior will be finished in blue gum and other hardwoods. Ornamental plaster and tile will be used in the lobby and parlors. Plans provide for steam heat, elevator service, a vacuum cleaning system, wall beds and hot water system. Electric curling irons will be used in all rooms. Bath rooms will be finished in tile. Marble and tile will be used in the lobby. There will be metal window sash and frames. Exterior of the building will be faced with pressed brick and terra cotta. Plans are nearly complete and segregated bids will be taken.

HOTEL—2 story and base, brick. Cost not stated. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner's name withheld. The building will be erected in Chinatown and has been designed for a store and entrance on the first floor. Upper floor will be arranged for a number of single rooms. Interior finish will be of pine throughout. Exterior of the building will probably be faced with cement plaster. Plans are now being prepared.

STORES—1 story and base, brick. Cost not stated. San Francisco. Architect, L. Mastropasqua, 550 Washington St., S. F. Owner, Giovanni Cuneo. The building will be erected on Sansome street south of Pacific, and will have a frontage of 40 feet and a depth of 90 feet. There will be two stores. Interior finish will be of pine throughout. Plans provide for plate glass display windows in patent store fronts. Exterior of the building will be faced with cement plaster and pressed brick. Plans are complete and figures are being taken.

ROCK SURFACE AND DRAINAGE SYSTEM FOR DRILL GROUND AND RACE TRACK—San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened by the Buildings and Grounds Committee on July 3rd for laying rock surface and installing a drainage system in the drill grounds and race track. Separate bids will be received for the rock surfacing and the drainage system. Plans can be secured from the Director of Works. An official proposal appears in another column of this issue.

REMOVING, RESETTING AND CONSTRUCTING FOUNDATIONS AND DRAINS FOR QUARTERMASTER STORES 1, 2, 3 AND 4—San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners Panama-Pacific International Exposition Co. Three separate bids will be received on July 10th for the following work in connection with the removal of Quartermaster Store Houses Nos. 1, 2, 3 and 4. (a) removing and resetting, (b) constructing roadway, excavating and grading and (c) foundations, piers and timber drains. Plans can be secured from the Director of Works, Service Bldg. Official proposal for this work appears under the heading of Official Advertising in this issue.

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 2 story and base,
 frame, \$1,500. Oakland, Cal. Archi-
 tects, Hutchinson Bros., 470 13th St.,
 Oakland. Owner, Mrs. Chamberlain.
 The house will be erected on Valle
 Vista avenue, and has been designed
 for an eight-room dwelling with bath
 and sleeping porch. Interior will be
 finished in pine and hardwood. Hard-
 wood floors will be used in the living
 room, dining room and reception hall.
 There will be furnace heat and open
 fire places. Mantels will be of brick.
 Tile will be used in the bath rooms
 and kitchen. Exterior of the dwell-
 ing will be covered with cement plas-
 ter on metal lath. Plans are complete
 and figures are being taken.

RESIDENCE — 2 story and base,

frame, \$8,000. Berkeley, Alameda Co.,
 Cal. Architect, William H. Ratcliff,
 Jr., First National Bank Bldg., Berke-
 ley. Owner, Prof. C. L. Cory. The
 dwelling will be erected on Waring
 street near Dwight Way, and has been
 designed to contain ten rooms, bath
 and sleeping porch. Interior finish
 will be of pine and hardwood. Hard-
 wood floors will be used in the prin-
 cipal rooms. There will be furnace
 heat and open fire places. Mantels
 will be of brick and tile. An auto-
 matic water heater will be installed.
 Exterior of the dwelling will be cov-
 ered with cement plaster on metal
 lath. Plans are complete and figures
 are now being taken.

RESIDENCE — 2 story and base,
 frame, \$6,000. San Leandro, Alameda
 Co., Cal. Architect, Louis M. Upton,
 Mutual Bank Bldg., S. F. Owner,
 James Dalziel. This house will be
 erected on the Foothill Boulevard, and
 is to contain in the neighborhood of
 ten rooms, bath and sleeping porch.
 Interior finish will be of pine and
 hardwood. Hardwood floors will be
 used in the principal rooms. Plans
 provide for furnace heat and open fire
 places. Mantels will be of brick. Tile
 will be used in the bath rooms and
 kitchen. Exterior of the dwelling
 will be covered with cement plaster
 on metal lath. Plans are complete
 and figures are now being taken.

RESIDENCE — 2 story and base,
 frame. Cost not stated. Berkeley,
 Alameda Co., Cal. Architect, John
 Hudson Thomas, First National Bank
 Bldg., Berkeley. Owner, A. H. Gerds.
 The house will contain eight rooms,
 bath and sleeping porch. Interior
 finish will be of pine with some hard-
 wood veneer. Hardwood floors will be
 used in the principal rooms. Plans
 provide for furnace heat and open fire
 places. Mantels will be of brick or
 tile. Bath room will have tile wains-
 cot. An automatic water heater will
 also be installed. Exterior of the
 dwelling will be covered with cement
 plaster on metal lath. Plans are now
 being prepared.

RESIDENCE — 2 story and base,
 frame, \$4,000. Berkeley, Alameda Co.,
 Cal. Architect, Olin S. Grove, 2911
 Telegraph Ave., Berkeley. Owner,
 Mr. Knight. The house will be erect-
 ed in Northbrae, and has been de-
 signed to contain eight rooms, bath
 and sleeping porch. All interior fin-
 ish will be of pine or redwood. Hard-
 wood floors will be used in the living
 room, dining room and reception hall.
 There will be furnace heat and open
 fire places. Mantels will be of brick.
 Tile will be used in the bath room and
 kitchen. Exterior of the dwelling
 will be covered with cement plaster on
 metal lath. Plans are being prepared
 for the work and bids will be called
 for shortly.

RESIDENCE — 2 story and base,
 frame, \$3,600. Oakland, Cal. Archi-
 tect, none. Owner, George C. ENIS,
 1929 24th Ave., Oakland. The dwelling
 will be erected at the corner of 7th
 avenue and East 23rd street, and will
 contain seven rooms and bath. Inter-
 ior will be finished in pine and red-
 wood. Hardwood floors will be used
 in the principal rooms. There will be
 furnace heat and open fire places.
 Mantels will be of brick and tile. Tile

will be used in the bath room and kitchen. Exterior of the dwelling will be covered with shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, George P. Baxter. The dwelling will be erected in Claremont, and is designed to contain eight rooms, bath and sleeping porch. Interior finish will be of pine with some hardwood veneer. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will be wainscoted with tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

APARTMENT HOUSE—6 story and base, brick and steel, \$70,000. Oakland, Cal. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. This building was mentioned here recently when the architect was first commissioned to prepare plans. The structure will be erected at the corner of 12th and Grove streets and will have a complete steel frame. Interior will be arranged for two and three room suites with wall beds and private baths. Interior finish will be of pine and hardwoods. Bath rooms will be finished in tile and composition. There will be steam heat, elevator service, a vacuum cleaning system and other modern conveniences. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken for the work.

RESIDENCE—2 story and base, frame, \$15,000. Oakland, Cal. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owner, Edward Beck. The dwelling will be erected on Lee street east of Monticello, and has been designed to contain twelve rooms, bath, laundry and sleeping porches. Interior finish will be of pine and hardwoods. Hardwood floors will be used throughout. Plans provide for a central heating system, probably hot water, and open fire places. Mantels will be of brick and tile. All bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures will be taken at once.

FLATS—2 story and base, frame, \$3,500. Oakland, Cal. Architect, none. Owner, Harry Wicks, 579 27th street, Oakland. The building has been designed to contain two modern flats of five and six rooms each. Interior finish will be of pine throughout. Some hardwood floors will be used. There will be an open fire place in each living room. Mantels will be of brick or tile. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with cement plaster on metal lath. Plans are in the hands of the owner who is now taking figures on the work.

HOTEL—8 story and base. Class A construction, \$110,000. Oakland, Cal. Architect, William Wilde, Albany Bldg., Oakland. Owner, O. J. Mead. A

site at the southeast corner of 10th and Clay streets has been secured and a building covering 50x100 feet will be erected as soon as plans can be prepared. There will be stores on the first floor besides a large hotel lobby and offices. Upper seven floors will be arranged for single rooms, a large proportion of which will have connecting baths. There will be a complete steel frame and exterior walls of brick, faced with pressed brick and terra cotta. Interior partitions will be of hollow tile and metal lath and plaster. Floors will be of concrete. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot and cold running water. Interior finish will be of pine and hardwoods with tile and marble wainscot. Bath rooms will be finished in tile. Metal window sash and frames will be used. Plans are now being prepared.

HOTEL—6 story and base, brick and steel, \$60,000. Oakland, Cal. Architect, William Wilde, Albany Bldg., Oakland. Owner Charles Street. The building will be erected at the northeast corner of 10th and Franklin streets and covers a large area. There will be stores on the first floor besides the hotel lobby. Upper floors will be arranged for single rooms and baths. Interior finish will be of pine and hardwoods. There will be steam heat and elevator service, a vacuum cleaning system and hot water plant. Patent store fronts will be specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

OFFICES—1 story, frame, \$3,000. Oakland, Cal. Architect, Frederick Soderberg, Union Savings Bank Bldg., Oakland. Owners, Howard Co. The building will be erected at the corner of First and Market streets, and has been designed to contain the offices of the Howard Company. Interior will be finished in pine with some hardwoods. The exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures are being taken.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

SCHOOL—1 story and base, brick, \$11,990. Hanford, Kings Co., Cal. Architect, J. Carl Thayer, Forsyth Bldg., Fresno. Owners Hanford School District. The building has been mentioned here before when the architect was first commissioned to prepare plans. There will be four class rooms. Interior finish will be of pine throughout. Stoves will be used for heating. Exterior will be faced with cement plaster. Plans are complete and figures will be opened by the Board of

School Trustees on July 7th. Plans can be had from the architect or from the Clerk of the School Board.

PASSENGER STATIONS—1 story and base, brick, \$15,000 each. Dinuba and Lone Star, Tulare Co., Cal. Engineer, Engineering Department Santa Fe R. R. Co. Owners Santa Fe R. R. Co. Contractors, Yard & Hichborn, 811 Trust and Savings Bldg., L. A. Contract price, \$15,000 each.

GARAGE—1 story and base, reinforced concrete, \$12,000. Patterson, Stanislaus Co., Cal. Architects, Swartz, Hotcukin & Swartz, Fresno. Owner, Thomas Patterson. The building has been designed for a commercial garage and is to be in the Mission style, covering an area of 60x178 feet. The front portion of the building, occupying a space of 24 feet square, will be arranged for a sales room and will have a tile floor, hardwood trim and plate glass windows in patent store fronts. Metal window sash and frames are specified throughout. A tile roof will be used. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

SCHOOLS—Brick construction. Cost not stated. Fresno, Fresno Co., Cal. Architects not selected. Owners, City of Fresno. Bonds to the amount of \$100,000 will shortly be voted on to provide new school buildings for the city. The present Hawthorne School will be replaced with a new brick building and a number of other school buildings will be erected if the bonds carry.

DEPARTMENT STORE—4 story and base. Class A construction, \$160,000. Fresno, Fresno Co., Cal. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owners, E. Gottschalk & Co. Plans for this building, which has been mentioned here before, have been out for figures. Bids are now being tabulated in the offices of the architect. About 126 bids for the general construction and on segregated parts of the work were received. Further mention of the awards will be made next week.

LOS ANGELES AND SOUTH-CALIFORNIA.

CHURCH—4 story and base, rein-
forced concrete, \$100,000. San Pedro,
Los Angeles Co., Cal. Architect, Thorn-
ton Fitzhugh, Pacific Electric Bldg.,
L. A. Owners, First Methodist Church
of San Pedro. This building is de-
signed for a combination church and
institutional building. The structure
will cover an area of 120x120 feet.
There will be a main auditorium seat-
ing 700 people, Sunday school rooms,
social halls, a completely equipped
educational department and about 70
rooms and baths. Construction will
be practically fireproof. Interior will
be finished in pine and hardwoods.
There will be steam heat and elevator
service. Exterior of the building will
be faced with cement plaster. Plans
are being prepared.

APARTMENT HOUSE—3 story and
base, frame, \$35,000. Long Beach, Los
Angeles Co., Cal. Architect Leonard
L. Jones, I. W. Hellman Bldg., L. A.
Owner, Mr. Myers. The building will
be erected on Atlantic street near
Ocean avenue, and has been designed
in the Mission style. There will be a
total of 112 rooms besides a large
lobby and parlor. Suites will contain
two and three rooms with private
baths and wall beds. Interior finish
will be of pine and hardwoods. Plans
provide for steam heat and a hot water
system. Exterior of the building will
be faced with cement plaster on metal
lath. Some clay tile will be used on
the roofs. Plans are now being pre-
pared.

FIREHOUSE—2 story and base,

brick. Cost not stated. Glendale, Los Angeles Co., Cal. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, City of Glendale. The building will cover an area of 50x70 feet. The first floor will be arranged for four pieces of apparatus and will have a cement floor. Upper floor will be divided into three rooms with bath and showers, library and chief's office. Interior will be finished in pine and hardwood. There will be steam heat. Exterior of the building will be faced with ruffled brick. Special electric work will be let in another contract. Plans are now being prepared.

HOTEL—1 story and base, brick and stone. Cost not stated. Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owner, William Xener. The building will be erected at the corner of Gladys and 6th streets. There will be stores on the first floor besides a large hotel lobby and office. Upper floors will be divided into about 100 guest rooms and 40 baths. Interior finish will be of pine and hardwoods. Bath rooms will be finished in tile with composition floors. Plans provide for steam heat, elevator service and a vacuum cleaning system. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

LODGE HALL—3 story and base, brick and steel, \$65,000. Pasadena, Los Angeles Co., Cal. Architects, Foss Designing and Building Co., 100 East Colorado St., Pasadena. Owners, Odd Fellows Hall Association. All bids received at the meeting of the Building Committee on June 27th were rejected as being above the amount available. Plans will be revised and new figures will be called for at once. The structure will be of semi-fireproof construction and will be arranged for lodge room on the first floor, library and social rooms on the second floor and living apartments on the third floor. Interior finish will be of pine and hardwood. There will be a steam heating system and vacuum cleaning system. Exterior of the building will be faced with pressed brick.

HOTEL—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owner, Jacob Joseph. The building will be erected on 6th street near Hope, and will cover an area of 100x120 feet. There will be a number of stores besides the hotel lobby on the first floor. Upper floors will be arranged for 69 guest rooms and a number of baths. Interior will be finished in pine throughout. Plans provide for steam heat, elevator service and a hot water plant. Bath rooms will have composition floors and tile wainscot. There will be metal window sash and frames. Considerable structural steel will be used. Exterior will be faced with pressed brick. Patent stone fronts are specified. Plans are complete and figures will be called for at once.

STORES AND OFFICES—4 story and base, reinforced concrete. Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Architect, J. Corbely Poole, Santa Barbara. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A. Owner, John S. Hawley. The building will cover an area of 100x250 feet. The first floor has been arranged for ten stores and upper floors for a total of 102 offices. Plans provide for steam heat two elevators, metal window

sash and frames and considerable marble and tile. Construction will be practically fireproof. Exterior of the building will be faced with cement plaster. Plans have been completed and the work will be done by Day Labor. Excavation is now complete.

STORES AND OFFICES—2 story and base, reinforced concrete. Cost not stated. Riverside, Riverside Co., Cal. Architects, Kysor & Biggar, Wright and Callender Bldg., L. A. Owners, Riverside Abstract Co. The building will be erected on a corner lot and will cover an area of 10x140 feet. The entire building will be devoted to the use of the owners. Interior finish will be of pine and hardwoods. There will be a central heating system. Marble, tile and ornamental iron and plaster will be used extensively. Exterior of the building will be faced with either imitation stone or Utah stone. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, reinforced concrete, \$25,000. Capistrano, Orange Co., Cal. Architects, Walker & Vawter, Hibernian Bldg., L. A. Owner, Grace Dolph. The building will be of fireproof construction and will contain a music room, library, living rooms, dining room and kitchen department on the first floor and five bedrooms and five baths on the second floor. There will be a central heating system, vacuum cleaning plant and hot water supply. Interior will be finished in pine and hardwoods. Exterior of the dwelling will be faced with cement plaster. Plans are now being prepared.

PORTLAND AND OREGON.

LODGE HALL—2 story and base, brick and steel, \$60,000. Portland, Ore. Architects, Claussen & Claussen, Macleay Bldg., Portland. Owners, Turn Verein Society of Portland. This building has been mentioned here when the architects were first commissioned to prepare the plans. The building will be erected on a corner site and covers a large area. Basement will contain a rathskellar, janitor's apartments, billiard and pool rooms, bowling alleys and a large swimming tank. First floor will be arranged for an auditorium seating 750 people with stage, ladies' and gentlemen's parlors and refreshment room. Second floor will be given over to the gymnasium and rest rooms. Interior finish will be of pine and hardwoods. There will be steam heat and special plumbing. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

GARAGE AND DANCE HALL—3 story and base, brick and steel, \$60,000. Portland, Ore. Architect, Robert F. Tegen, Swetland Bldg., Portland. Owners, Ringier Dancing Academy. The building will be erected at the corner of 14th and Burnside streets and will cover an area of 60x200 feet. The basement, first and second floors will be used for a commercial garage and machine shop. Third floor will be fitted up for a dancing academy, and will be finished in pine and ornamental plaster. There will be metal window sash and frames. Plans provide for steam heat and elevator service. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

SCHOOL—1 story and base, frame and concrete, \$15,000. Myrtle Point, Ore. Architect, Newton C. Gaunt, Chamber of Commerce Bldg., Portland. Owners, Myrtle Point School District, Coos County. The building will contain four class rooms. Interior will be finished in pine with maple floors. A steam heating system will be installed. Exterior of the building will be faced with cement plaster. Plans will be completed within a week and forwarded to S. D. Bulford, Clerk of School District No. 41 Coos County.

STORES AND THEATRE—2 story and base, brick, \$25,000. Portland, Ore. Architect, none. Owner, C. M. Barnes, Portland. The building will be erected on 20th street at the corner of Hawthorne and will cover an area of 95x119 feet. One section of the building will be but one story high and this will contain the theatre. The rest of the building will be two stories high with stores on the first floor and offices above. Interior will be finished in pine throughout. A cement floor will be used in the theatre. Exterior will be faced with cement plaster and pressed brick. Plans are complete and the work will be done by Day

Labor under the direction of A. O. Walters, 42 East 79th street.

LODGE HALL—2 story and base, brick and steel. Cost not stated. Tillamook, Ore. Architect, E. E. McClaran, Lumber Exchange Bldg., Portland. Owners, Masonic Temple Association. This building has been mentioned here before when the architect was first commissioned to prepare plans. The building will cover an area of 78x105 feet. First floor will contain a number of stores, while the second floor will be arranged for a lodge room, offices and a number of living apartments. Interior will be finished in pine and hardwoods. There will be disappearing beds, private baths and steam heat. Exterior will be faced with pressed brick. Plans are complete and figures have been taken. A contract will be awarded shortly.

HOTEL—3 story and base, brick. Cost not stated. Portland, Ore. Architect, W. B. Bell, Worcester Bldg., Portland. Owners, Messrs. Fisher & Thorsen. The building will be erected on a corner lot and will cover an area of 100 feet square. Interior will be arranged for stores on the first floor and about 100 guest rooms on the upper two floors. There will be steam heat and a hot water supply. Interior finish will be of pine with some ornamental plaster used in the lobby. Exterior of the building will be faced with pressed brick. Patent store fronts are specified. Plans are complete and figures are now being taken.

COLLEGE BUILDINGS—3 story and 4 story, brick construction, \$55,000 and \$60,000 respectively. Portland, Ore. Architects, Bennes & Hendricks, Henry Bldg., Portland. Owners, Oregon Agriculture College. This work has been mentioned in a recent issue. The three-story structure will be designed for a domestic science building and will contain cafe, kitchen, dining first floor and laboratories on the second and serving department on the upper two floors. The gymnasium, only one wing of which will be erected at this time, will cover an area of 90x150 feet. There will be a swimming tank 50x100 feet, hand ball courts, running track and gallery. Plans for these buildings are complete and figures are being taken.

MUNICIPAL LIGHT AND POWER PLANT—\$25,000. Baker City, Ore. Engineers, Standard & Richardson, Henry Bldg., Portland. Owners, Baker City. The equipment will consist of a 60 K. W. generator, 150 H. P. engine, and a distributing system together with the necessary equipment to complete a general system, such as transformers, etc. Plans will be ready for figures within the next week or ten days.

Contracts Awarded.

SCHOOL—2 story and base, brick. Cost not stated. North Bend, Ore. Architect's name not given. Owners, North Bend School District. Contractor, J. B. Fish, North Bend, general construction, \$16,800. This contract does not include plumbing and heating.

POWER HOUSE—1 story, reinforced concrete construction, \$20,000. Portland, Ore. Architect, none. Owners, Hood Samaritan Hospital. Contractor, J. Bingham, Portland. Contract price, \$20,000.

SEATTLE AND WASHINGTON.

FACTORY—4 story and base, frame, \$150,000. Seattle, Wash. Architect, none. Owner, Restmore Mfg. Co., Seattle. The building will cover an area of 252x80 feet, and is to be erected at the corner of Napier and Boundary avenue. The Restmores are well known mattress manufacturers. The building will be carried on a pile foundation. There will be steel rolling doors, an automatic sprinkler system and elevator service. The building will be covered with shiplap. Fire escapes are specified with shiplap. Plans will be completed as rapidly as possible and bids will be taken by the owners.

FACTORY—4 story and base, brick construction, \$150,000. Vancouver, B. C. Engineer, Engineering Department American Can Co. Owners, American Can Co. Plans have been completed and work will be started within a short time on a four-story factory building covering an area of 160x124 feet. Specifications include fireproof doors, metal window sash and frames, automatic sprinkler system, fire escapes, elevator service and a boiler plant. Concrete stairways will be used throughout. Exterior of the building will be faced with stock brick. Plans are in the hands of the owners and the work will be done by Day Labor.

FACTORY—5 story and base, reinforced concrete, \$250,000. Seattle, Wash. Architect, John Graham, Lyon Bldg., Seattle. Owners, Ford Motor Car Co. Contractor, Hans Pederson, Madison Bldg., Seattle. Contract price, \$250,000. This contract does not include plumbing, heating or electric work. The Evans-Almoral Co., New York, has a contract for the heating, and figures will be taken shortly for the electric work and plumbing.

HOSPITAL—4 story and base, reinforced concrete, \$60,000. Juneau, Alaska. Architect, Julian Everett, Walker Bldg., Seattle. Owners, Sisters' Hospital. This is the first unit of a large project which will be erected in Juneau. This building will cover an area of 40x110 feet and will contain public and private wards, private rooms, nurses' quarters and operating rooms. Interior will be finished in pine and hardwoods. Plans provide for steam heat, elevator service and hot water plant. Considerable tile and marble will be used. Exterior of the building will be faced with cement plaster. Plans are now being prepared and when complete work will be done by Day Labor under the personal direction of the architect.

HOSPITAL GROUP—9, 1 story frame buildings, \$22,050. Seattle, Wash. Architect, Ben F. Smith, Building Department, Seattle. Owners, City of Seattle. This group of buildings is to be known as the Louis Rescue Home, and will consist of an administration building, wards building, dormitory, kitchen and dining room. Construction will be of frame throughout. Interior finish will be of pine. There will be a central heating system. Operating rooms will be finished in white enamel. Exterior of the group will be covered with rustic. Preliminary plans only have been prepared, and construction will not be assured until bonds have been voted.

THEATRE—3 story and base, reinforced concrete, \$125,000. Victoria, B. C. Architect, Jesse M. Warren, Victoria. Owner, Alex. Pantages, Seattle. This building has been mentioned here before when plans were first started. The structure will be erected on Government street, and will contain a main auditorium with a seating capacity of 1,000 people. Besides the main auditorium there will be a large balcony. Construction will be fireproof throughout. Plans provide for a modern system of heating and ventilation. Interior will be finished in ornamental plaster, marble and tile. Exterior will be faced with cement plaster. Plans are complete and work on the excavation has been started by Day Labor.

Contracts Awarded.

WAREHOUSE—2 story and base, brick, \$10,000. Wenatchee, Wash. Architects, Fells & Mendel, Seattle. Owners, Wenatchee Fruit Growers Exchange. Contractors, Far West Clay Co., Tacoma, hollow tile work, and Dennison Block Construction Co., Tacoma, general construction. Contract price, \$10,000.

ICE AND COLD STORAGE PLANT—4 story and base, mill construction, \$150,000. Vancouver, B. C. Architects, Gould & Wood, Rogers Bldg., Vancouver. Owners, Mainland Ice and Cold Storage Co. Contractors, Baynes & Horie, Davis Chambers Bldg., Vancouver. Contract price, \$150,000.

RECONSTRUCTING POWER DAM—Reinforced concrete, \$500,000. Seattle, Wash. Engineer, Daniel W. Meade, Seattle. Owners, Olympia Power Co. Contractor, James E. Heyworth, Chicago. Contract price, \$500,000.

HOTEL—2 story and base, frame and cement, \$15,000. Tolt, Wash. Architects, W. P. White and O. F. Nelson, Walker Bldg., Seattle. Owner, R. Cress Contractor, G. F. Wentzell, 1905 16th St., Seattle. Contract price, \$15,000.

SCHOOL—2 story and base, brick, \$21,350. Stanwood, Wash. Architect, none. Owners, Stanwood School District. Contractor, T. N. Morgan, Everett. Contract price, \$21,350.

GARAGE—2 story and base, reinforced concrete. Cost not stated. Seattle, Wash. Architect, W. Marbury Somerville, White Bldg., Seattle. Owners, Harvard Building Co. Contractor, Otto Rosleaf, Lowman Bldg., Seattle. Contract price not stated. Note: The building will cover an area of 120x146 feet.

THEATRE—2 story and base, brick and steel, \$150,000. Seattle, Wash. Architect, none. Owners, Metropolitan Building Co. Contractors, Grant Smith & Co., Henry Bldg., Seattle. Contract price, \$150,000.

APARTMENT HOUSE—3 story and base, brick and frame, \$25,000. Seattle, Wash. Architect, James H. Schack, Lippy Bldg., Seattle. Owner, C. D. Stimson. Contractor, H. F. Allen, 1421 East Valley street, Seattle. Contract price, \$25,000.

BASE, BRICK, \$20,000. Wenatchee, Wash. Architect, C. Ferris White, Spokane. Owner Paul Wiegand. Contractor, C. E. Young, Halget Bldg., Seattle. Contract price, \$20,000.

THE CITY OF PORTLAND, OREGON, THE COMMISSION OF PUBLIC DOCKS Public Dock No. 1. Advertisement.

NOTICE IS HEREBY GIVEN that The Commission of Public Docks of the City of Portland, Oregon, will receive sealed proposals until 10:00 o'clock A. M., July 21, 1913, at its office, 502 Worcester Building, Portland, Oregon, for the construction of a Public Dock, with appurtenances, between 15th and 18th Streets, on the West Side of the Willamette River.

Plans, specifications, proposal blank, form of contract and other information for proposers, will be on file in the office of The Commission of Public Docks. A complete set of plans and specifications may also be obtained by prospective bidders by depositing with the Commission a certified check in the sum of \$50.00, which will be returned upon receipt of the plans in good condition.

All tenders to be sealed and marked on the outside "Proposal for construction of Public Dock No. 1."

No proposal or bid will be considered unless accompanied by a check payable to the order of The City of Portland, certified by a responsible bank in the City of Portland, Oregon, for an amount equal to ten per cent of the proposal, to be forfeited as fixed and liquidated damages in case the bidder neglects or refuses to enter into contract and provide a suitable bond for the faithful performance of said work in the event the contract is awarded him.

ATTENTION of all bidders is respectfully called to Chapter 61, Laws of Oregon, 1912, (Session Laws 1913, p. 96).

The Commission of Public Docks reserves the right to reject any and all proposals.

Dated Portland, Oregon, this 20th day of June, 1913.

THE COMMISSION OF PUBLIC DOCKS
By G. B. HEARST, Secretary.

(3--July 1, 9, 16)

STATES APPROPRIATE MONEY FOR FAIR.

Sixteen of the thirty-four states that have accepted the invitation to participate in the Panama-Pacific International Exposition, have appropriated \$2,515,000. This money will be expended in constructing pavilions and for entertainments by the various states during the Exposition. Following is a list of the states and the amounts appropriated:

Idaho	\$100,000
Indiana	90,000
Kansas	40,000
Missouri	100,000
Nevada	100,000
North Dakota	35,000
New Jersey	200,000
New York	700,000
Oregon	175,000
Utah	50,000
Washington	175,000
West Virginia	75,000

Wisconsin	75,000
Hawaii	100,000
Philippines	250,000
Massachusetts	250,000

There is now pending before the Illinois Legislature a bill for the appropriation of \$300,000 and before the Pennsylvania Legislature an appropriation of \$450,000.

Vice President R. B. Hale, of the Panama-Pacific International Exposition, received a telegram from Commissioner W. D. Egilbert, making application for thirty thousand square feet of space in the California Building on behalf of the Sacramento Valley Commission.

This reservation, in the Counties display section of the California Building of the Panama-Pacific International Exposition makes the total reservation of space up to date, 87,500 square feet.

This demonstrates conclusively that the hundred thousand square feet available will be largely over-subscribed, and the success of the plan adopted by the Counties Committee at the Santa Cruz Convention is now thoroughly assured.

All the prolific wildness and the enduring, natural beauty of the State of California will be presented in tabloid form in the model California canyon which is to be built between Baker and Lyon Streets, and which will be one of the many wonderful features of the Panama-Pacific International Exposition. Great progress has been made since the plans for the canyon were first announced and the detailed plans are now known.

The canyon will measure about 800 feet in length and a little less than 400 feet in breadth. It will be constructed by the staff of expert gardeners under the supervision of John C. McLaren, Chief of the Department of Floral Decoration to the Exposition. The ground on which the canyon will be built is now occupied by the old Pacific nurseries, where, for some months, hundreds of trees and plants have been nurtured for use in the general decorative scheme of the Exposition grounds. In the past few days, these trees have been removed to the Presidio nurseries where most of the flowers of the Exposition gardens are being tended and made ready for transplanting as soon as the palaces are erected.

The prospective canyon area lends itself naturally to transformation into a real canyon. The ground rises from the level of the main group of exhibit palaces in a mound, of which the altitude is about 50 or 60 feet. The summit of this mound, or hillock, will be the

top of the canyon, from which a roaring torrent will leap over rocks and huge boulders, winding through gulleys and bounding over chasms in a white, foaming stream to the lagoon that is to lie in front of the Palace of Fine Arts.

There seems to be an attempt to drag the matter of the resignation of John L. McNab to the low level of political intrigue. To the average person this seems to be about the same attempt as was made in the Ballinger cases, but all the talk did not change the material facts and the result was the public condemnation of the former Secretary of the Interior.

McNab publicly charges that Assistant Attorney General Harr interfered and prevented the deportation of immoral women after being ordered deported and after an attempt had been made to bribe the United States District Attorney's office. These and other facts together with the postponement of the Diggs-Cammittet and the Western Fuel cases are the questions at issue. As to whether or not there was any necessity for these actions on the part of the Attorney General's office is the main question in which the People of California and the country generally are interested.

It is said by the Democratic party that McNab seeks to be governor of California and is trying to make political capital out of the circumstance. And the politicians generally are getting in on one side or the other. With these accusations the public has little concern. But it is vitally interested in whether or not the Attorney General is guilty of such star chamber methods as are charged, for the experience of Taft's administration has been sufficient.

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

The Electric Weld

Automatic Storage Gas Water Heaters.

An automatic gas water heater controlled by a movement temperature thermovalue using gas at the rate of 50 feet per hour when in operation, with no limit to the amount of hot water that can be drawn per minute.

A single extremely simple valve controls the entire heater, insuring permanent service with no cost for upkeep.

This heater is absolutely guaranteed, leaving the decision entirely with the consumer.

Otis Elevators

Sustain Architects' Endorsement

The Architect who specifies Otis Elevators identifies himself and his client with the most thorough Elevator organization in the world---an organization with fifty-seven years' experience and success in building Elevators.

Our Elevators --- of every type---from the simplest Hand-power Elevators to the most elaborate Electric and Hydraulic Installations---are the world's most finished Elevator products

We maintain Branches in eighty-one cities in the United States the distribution of which offers to users of Otis Elevators an inspection and Repair Service unapproached by any other Elevator Company.

Your clients and their engineers who use Otis Elevators will receive the benefit of our broad engineering experience and the unequalled facilities of our "Service Department." We are always glad to co-operate with them and with you to the fullest extent.

We Make

Geerless Traction Elevators. Worm Gear Traction Elevators. Drum Type Elevators. All Types of Hydraulic Elevators. Freight Elevators of Every Description. Automatic Residence Elevators. Electric Dumbwaiters. Incline Railway Hoists. Blast Furnace Hoists. Escalators. Inclined Freight Elevators. Gravity Conveyors, Etc.

Let us send you our latest books giving detail description of Otis Elevator products.

Editorial Comment.

Reports from Washington state that the appointment of Hayden to succeed McNab is not viewed with approval by the people of the State in Washington, in that he is a personal and political friend of Senator Caminetti. The general impression is that a political appointment has been made just to give a man a job when the public demands that a vigorous prosecutor skilled in particular lines of the law be appointed to fill a position made vacant by the resignation of an able and fearless district Attorney.

Sneers have been uttered that McNab's resignation was for political effect. That is the only answer that can be made to his charges. It is said that McNab seeks to be Governor. He has publicly stated that he does not. If he did it would be a laudable ambition and would not in any way change the merits of the case so far as the public is concerned. For that matter most of the people who support McNab in this situation are desirous of seeing Hiram W. Johnson succeed himself as Governor of the State.

The only reason that McNab is spoken of in the capacity of Governor is that he has displayed the same qualities as are possessed by Governor Johnson. He is fearless and able and is a finished public speaker and can go out and talk to the people in spite of all that the subsidized press may say against him.

The Watsonville Register says that California will one day be the playground of the nation.

California is that now to all who have visited the State and have any appreciation of scenery and the beauties of nature. While her sandy beaches stretch in unbroken line along the western sea and her mountains reach into the regions of the snow, there is no place that can be found that has the infinite variety of charm that is possessed by the State. The trout streams beckon in the everlasting hills. The century old forests invite with their cooling shades. The waves of the Western Sea caress the sands of a thousand beaches and tempt the wanderer to embark on the boundless blue. There is no climate in the world like California at any season of the year for with its infinite variety any temperature can be found and in vacation there is always a certain of clear skies and an abundance of fruit and flowers that makes living a delight.

Among the progressive measures enacted at the last session of the legislature one of the most important

is what is known as the Water Commission Act.

This Act provides for a Commission, to consist of five members, as follows: The Governor of the State and the State Engineer, ex-officio, and three appointive, who, in the language of the Act, shall be men of practical knowledge or experience in the application and use of water for irrigation, mining and municipal purposes, and shall be so appointed that at least one thereof shall have had practical knowledge and experience in the use of water for agricultural purpose, and one thereof shall have had practical knowledge and experience in the use of water for mining purposes, and one thereof shall have had practical knowledge and experience in the use of water for municipal purposes.

The purpose of the law is to provide a State agency for the control and distribution of the waters of the State on practically the same lines as the State Railroad Commission controls public utility corporations.

This Act was one of what the Chronicle called the Administration's Ten Commandments and was most bitterly opposed.

Among the first duties of this commission will be to take the stock of the waters of the State, the uses to which they are put and the services they should perform. The object of this commission is to conserve the waters of the State to the real bearers of the burden of irrigation charges, the farmer. California is just entering upon the great era of irrigation. It is natural that the Administration should be opposed by those who wish to exploit its great resources. The Water Commission Act will give to the prospective farmer the protection to which he is entitled. The State is starting in upon a great era of development. One of the greatest elements of that development will be the use of its natural waters in irrigation. The State Commission will conserve these resources and insure the farmer a reasonable rate.

Investigating Railroad Accidents.

A careful study of all accidents, no matter what their nature, has been made by the Pennsylvania Railroad, during the past year, and it has been found that probably 75 per cent of them could have been prevented if the employees had exercised special caution. This has led to the publication of a booklet entitled "Safety Hints and Suggestions for the Prevention of Personal Injury Accidents," by which it is hoped to educate the employees to a disposition to be careful, and to develop in each individual a sense of personal responsibility, not only for his own safety, but for that of his fellow employee as well.

Architecture And Its Interpretation To Men.

By W. R. B. Willcox, F. A. I. A.

Address delivered during the annual banquet at the third annual convention of the Architectural League of the Pacific Coast, Portland, Ore., June 9-11, 1913.

The talk one evening had turned upon the character and elements of appeal in works of art and nature; in architecture, music, the drama, sculpture and the landscape and how they are interpreted to men.

The day following I strolled out towards the hills. It was a warm and fragrant day in early summer. The foliage of trees and shrubbery was rich and colorful. The lawns, woven thick with the year's new life, rolled away between banks of verdure. Afar in one direction lay a gently rolling country through which a winding river coiled a silver thread, and miles away, glistening like a floor of burnished metal, lay the clear waters of a mountain lake, from which low foothills climbed to rock-topped peaks beyond.

The glowing sun drew from the earth a pungent springtime moisture and distant outlines were softened by a haze, while clouds of fleecy whiteness came and went in the wonderful depths of the sky. How pale the blue of distant mountains! How bright the sun-flashed meadows! How cool and still, and deep the green, where shadows stretched beneath the nearby groves!

Oh, what a day! And what a vision! Though vaguely conscious that the city yonder seemed a scar upon the landscape, that its factory stacks poured forth great clouds of black-brown smoke and the barren reaches of its mills of somber brick outtruded, yet, even so, I caught the glint from flashing windows and marked the coils of smoke revolve upon the breeze.

It was a gala day, a day of festival, and people, pleasure bound, strolled round about; some sought out flower bordered paths; while others chose half hidden lanes beneath the trees. But a steady throng, in groups and singly, passed up the hill over a broad, grass-carpeted thoroughfare. Many stopped, from time to time, to gaze in silence on the scene, or to voice a deep contentment in its harmony.

Moving with this happy company, in shade of high over-arching trees, I climbed the gentle slope and presently approached a park. The entrance, through a shrubbery wall, was flanked by granite pedestals on which two bronze equestrian groups were raised. Alike in character, a youthful rider sat hard-back on a charging horse, whose prancing, plunging mate he strove to hold in check. "What power! What action! How true the poise! How fearlessly the young man lunged upon the saddle of his wilder charge! How confident of mastery! And passing people paused to contemplate. What was it seized their interest? Was it modelled bronze or molded granite die; or the tale they told with strength of line and grace of form, the power of those frantic horses, the calm determined courage of the boy?

Inside the park the way led towards

a forest's edge and there within the grateful shade, framed in by rising ground, were circling tiers of marble seats and down between their curving ends an open stage. The seats were filled and on the stage a play progressed. There was a battlefield and struggling armies, and in their midst two champions met and fought. The audience was hushed an tense; it followed the rush of passions. Lifted to a share in the combatants' emotions it felt the spirit of the play; forgot the tinsel armor in the rhythm of the vanquished's dying words:

"Oh, Harry, thou has robbed me of youth!

I letter brook the loss of brittle life
Than those proud titles thou hast won of me;

They wound my thoughts worse than thy sword my flesh;
But thought's the slave of life, and life time's fool;

And time, that takes survey of all the world,

Must have a stop. O, I could prophecy
But that the earth and cold hand of death

Lies on my tongue!"

Soon the play was over and with those who, like myself, had loitered for a time, I joined the number who were seeking recreation farther on, reflecting the while how, whenever the great thing is done, or the little thing with seriousness, it is not the means employed, the phraseology, that stirs the deep emotions, but the meaning conveyed.

As I turned these fancies in my mind my attention was diverted by the faint notes of distant music. Quickening my pace in their direction I soon came within view of a pavilion far across a spacious common, whence came the sounds. As I drew near the humming noises of an intermission ceased, the deep wood instruments gave out old familiar theme of the overture to Tannhauser and over the silent audience swept the well-known strains. With what tinkling satisfaction did one hear the oft-recurring voices of first one, and then another instrument, as their mingling tones wove the wondrous fabric. And when, at last, like rich embroidery of gold against a bright, clear field of blue, the blaring horns set forth the mighty pattern on the trembling background of the violins, the very soul of music seemed revealed.

The day was now quite well advanced and with a wish for one broad outlook over the country, ere the shadows grew too long, I turned my steps toward a not far distant headland. From the plain great flights of steps, between successive terraces, led upwards to the summit. At every higher level a wider prospect spread, while restful seats beneath the trees invited one to tarry. The upper terrace was elaborated with an imposing central stairway with statuary at its foot and head. It clearly marked approach to a formal landscape scheme

above and gently led the mind from contemplation of the distant view to speculate upon the hidden scenes beyond.

So with eager anticipation I gained the topmost steps, but as the picture burst upon me I stopped in wonderment. Imagination had failed to conjure up a scene of such magnificence. A spacious avenue led straight away for many hundred yards; great trees in formal rows closed in the sides and cast their dark reflections on the placid surface of a shallow pool, which, bordered with cool, white marble walks, stretched from end to end. On either side, outside the walks, lay turf, like long green bands of velvet, and on its outer edges, just within the rows of trees, as if jewelled hem, were narrow beds of many colored flowers.

Yet this was but a setting, a concentrating framework. Far down the narrowing perspective the eye beheld what seemed an apparition. There, terminating the marvelous vista, arose in dazzling splendor a snow white marble structure and in the waters of the pool its stately form was mirrored. Its polished surface shimmered in the sunlight, its glistening, curving dome against a clear blue sky seemed floating in mid-air and like gray mists transparent shadows hung beneath its cornices. Its like I'd never seen.

Forward I walked along the path before the pool, fascinated by the sight. So perfectly did its lines and masses balance, so delicately proportioned to each other were its several parts, so beautifully the sunlight played upon its varied surfaces, it seemed instinct with life. It seemed to lift itself and soar above the broad, white marble table on which it stood and yet it left no sense of insecurity. With all its seeming conscious power it stood there calm and self-contained.

As I drew near I saw that many of its parts were unfamiliar shapes; strange carvings and mosaics embellished them; their colors, outlines, sizes and positions resolved into an appealing harmony. The pleasurable emotions which the sight occasioned were interrupted by a near-by conversation which stirred my interest: "A strange structure," the speaker was saying, "it does not seem to conform to any of the accepted models of architecture. Why do some artists, some architects, presume to attempt originally when it is futile to try to surpass the perfection of the ancient Grecian architecture—why depart from the old types?" Because no artist is truly an artist who does not depart from the rigidity of accepted types, who does not stir us from inert acquiescence in habit and custom, who does not invite us to revolt from the tyranny of the standards of the past."

"Why, pray, concern oneself with an archeological diagnosis of architectural symptoms? Do you think to discover its spirit by such a process? Is the soul of man to be revealed by a review of the conventionalities of his manner and speech. Must these very flowers here be subjected to a botanical analysis before their charm of deli-

cacy, fragrance and color may regale our senses? Think you, forsooth, the spirit of the overture we have heard is impossible of interpretation because to the orchestration of Beethoven is added the timber of instruments unknown to him? Did not Beethoven, himself, break the rules and was he not a dreadful radical in his day while today he is a classic?

"Were the sculptures of the boy and the horses, surcharged as they are with the strenuousness of our own day, dumb to you because they do not counter-part the figures of a Praxiteles or a Donatello? Is the spirit of the drama, its message to our day, found in the historical accuracy of the garments worn, the mimicry of weapons of the olden days? Is it an intimate knowledge of the flora, or the geologic formation of this country about us that makes all these people respond to the beauty and the glory of the landscape? Is it any more likely that the spirit of manufacture, its power and purity, is to be felt only as we come to know its obvious, historical associations; that the latter are, as we say, consistent, true to some particular period, true to some particular racial manner?

"Would you have the spirit of architecture communicate only with those who may have critical knowledge of its outward manifestations; with the educated and cultured? Must it be silent for the uninformed majority? And you fail to catch the spirit of this building although it speaks in flowing rhythms and measured cadences because, familiar as you may be with the full catalogue of architectural precedents, your knowledge does not embrace the forms and features which supply its media of expression! Could you know that it was, in fact, the consistent flower of some distant architectural culture of a strange, yet virile race, would you open your heart to its emotional appeal? Must sympathy and understanding wait, always, upon knowledge? If so, how shall the spirit of architecture speak to all people, to the untutored public; and if it shall not speak to them why should the untutored public be expected to give heed to it? Why should it interest them and why should we waste our efforts in trying to educate the ordinary citizen, who has neither time nor inclination to inform himself upon the evolution of architectural styles, if an understanding and appreciation depends upon a broad knowledge of precedents?"

"Why, we have tried to build an architecture largely out of forms; we have looked abroad and beholding some lovely manner of building have seized upon the forms there used and thought to build a new and vital architecture out of them, whatever in the foreign land has been the motive for their use. We've tackled every foreign style in turn and sometimes to an ancient style returned a second time. But only now and then our buildings seemed to have the breath of life within them. For the most part we have set these oft-used shapes up side by side and hoped that by some chance the spark of life would enter them and make them live.

"Why do we always hope? Because, from time to time, some man appears who is more intent upon the freshness and verity of an idea he would express than he is concerned with a conscientious and painstaking reproduction of a vehicle used long since for the conveyance of an idea of a differ-

ent sort. He imbues his structures with the spirit, not the forms necessarily, of the ancients; he sees that life is in the union rather than in the category of shapes employed; has felt down in his heart the rhythm of such union and has liberated its spirit to live on and on forever.

"Others, mistaking substance for soul, have foolishly concluded that the abode of the spirit of architecture has been discovered, that it dwelt in the forms he used and that by their use alone it could be invoked at will. An attempt so to do, however, revealed what an elusive, wraithlike wanderer that spirit is.

"The years pass by and then another man beholds the light of that spirit and lets it shine for us and while he lives to do so, we think we add to its lustre, when the truth is we supply only reflections—sometimes quite perfect, but still only reflections. Consider the case of a man like Richardson; despite what we are assured was a barbarous medium of expression, many of his buildings live and sing. Surely it was not the forms that produced the effect, for soon a hundred others grouped them in a thousand buildings and yet, in them, there was no life, no song.

"Again, a man imbues with life the forms of ancient Grecian architecture and soon the classic style becomes the vogue. A bank, a school, a church or library, a club, a depot, or a house, or any other structure, need only have its front a row of columns, a pediment or attic stage, and there, behold, is architecture. Alas! Such forms are all too often lifeless, masks, or shrouds, appropriate perhaps for things so dead; they lack that vital thing, the living spirit of architecture, which awakens only at the call of truth, of frankness, of courage, of individuality. If we would find that spirit we must rid ourselves of shame, of indirectness, of timidity, of servility and with unwavering faith, undismayed by many failures, press on toward the future, for at any given time the spirit of architecture, of any art, dwells just beyond the present and concerns itself with the hopes, the aspirations of a people. It is the prophet of an ever-changing, ever-expanding appreciation of what is true, and noble and beautiful."

As the speaker paused, I awakened from my reverie. The setting sun was casting purple shadows round about and making deep the blue of distant mountain sides. The lake was pink with sunset clouds and evening stars began to dot the sky. It was drinking in the beauty of that scene that charged my thoughts and colored them. If we, as architects, would more and more cultivate that simple attitude of appreciation and receptivity for the larger qualities of architecture with which we approach the drama, sculpture, music, yes, even the landscape, we would be able the better to seize and imprison in our buildings the spirit of architecture to interpret to all who follow us the ideals of our people and our day.

THE TRUE SANDALWOOD OF INDIA.

From the Scientific American.

In the most ancient times the demand for the well-known sandalwood was very great as an incense for the idols. Its use dates back for more than 2,000 years, and all the records bespeak

its rarity and costliness; in fact it always was prized more highly than any other wood. But with the advance of civilization new uses and applications opened up by scientific research at once increased its consumption many fold. This is chiefly for carving and for manufacture of perfumery and medicine. It is obvious that wood with such a wide range of uses is in danger of being exhausted. As in the old days, so now, it is rare and on account of its scarcity very costly. And, unfortunately, sandalwood is rapidly becoming scarcer and more expensive, and the question is asked, How is the production and supply to be maintained proportionate to the demand? The importance of the question is shown by the efforts that are being made in India to cultivate this tree. It is consumed to some extent in India for incense and for wood carving, but a large part of the production is imported into China, where it is highly esteemed as an incense, the Chinese readily paying from two to four times more for the Indian sandalwood than for the less valuable substitutes from the South Sea Islands. The Indian species fully deserves to be designated the sandal tree proper, and the bulk of the sandal oil of commerce is produced from it.

The sandal tree (*Santalum album*) is an evergreen, a member of the sandal tree family. The best known related plant in the United States is the bastard toad-flax (*Comandra umbellata*). The term "sandal" or "sander's" wood as was the old English name of it, is probably derived from an East Indian name *chandana* or *sandana*, which is used very generally to indicate various kinds of so-called sandalwoods, and it is quite probable that the name is applied also to other aromatic woods.

The sandal tree is one of the small objects in the forests of India. Even in locations of its best development it attains dimensions that rarely exceeds 40 feet in height and varies from 8 to 12 inches in diameter, or sometimes as much as 15 inches. It is said to have been known to reach 22 inches in diameter at the base, but this can be the case with very old trees growing in very favored locations. As a rule they are only from 20 to 30 feet in height and from 6 to 8 inches in diameter when they are cut down.

The tree is a native of the mountainous districts of Southern India and is confined mainly to the dry regions. Its finest growth and development is reached in Mysore and Coorg, where the most oily and heavily scented wood is found between 2,000 and 3,000 feet elevation. While it is restricted to comparatively narrow limits the sandal tree has become naturalized in several countries, notably in certain districts in South Africa, where attempts have been made to plant it on a commercial scale.

It will endure a wide range of climatic and soil conditions, especially in protected places, but it will not respond to treatment like the majority of trees desirable for planting for revenue. The tree thrives best in a red or black loam or in fine gravelly soil with free drainage, especially where the soil is rocky. For the production of a large proportion of heartwood which yields the oil, the sandalwood tree must be grown under the most favorable conditions. The trees are seldom found in heavy timber forests,

but occur chiefly in light deciduous forests. Flat ground and gentle slopes are preferred and the greatest bulk and height are attained with a moderate heavy rainfall. Rich soil is required for rapid growth, but this does not necessarily add to the oil content of the wood. For most of the uses other than the commercial distillation of the oil, the tree may well be cultivated wherever it can be made to live.

The importance of its cultivation may be urged, inasmuch as every part is of use, from the roots to the young branches that have any heartwood developed. The chief commercial uses of sandalwood is for the extraction of sandal oil. The older, larger roots yield the greatest proportion of sandal oil. In India and Ceylon it is customary to dig up the trees by their roots and distill the oil from the stump and root wood as well. The best oil comes almost exclusively from the root wood. The proportion of the valuable scented heartwood is only about one-half of the log, while the sap wood has little or no value. Even the fragrant sawdust or powder is used for distilling the sandal oil and sells at the wood depots for from \$130 to \$165 per ton. Not all the sandalwood is employed for oil, but with its yellowish-brown color and susceptibility to a satin-like polish the wood is particularly adapted for making all sorts of ornamental wood, wood carving, engraving, and for cabinets, chests, and drawers proof against insects. The chief reputation for sandalwood in Europe rests upon its use for carving. It is also employed for making jewel and work boxes, cabinets, writing desks, walking sticks, picture frames, fan handles, pen holders, card cases, trays, and when powdered is used to scent clothes. Large quantities of the wood are shipped to China for making coffins for the rich.

The exploitation of a number of other closely related or even entirely unallied species in the South Sea Islands, and in parts of Africa was undertaken, but it has now practically ceased. It is said that several species of *Osyris* in East Africa will gradually supply the demand, but the wood is not only inferior to the true sandalwood, but the production in any considerable quantities is doubtful. The export of the substitute sandalwoods from Australia is generally decreasing, while the supply from the Hawaiian Islands is entirely exhausted. That the production has ceased at the established sources of supply is not to be wondered at. Sandalwood cutting has been carried on in the most recklessly extravagant manner possible. In Hawaii and Australia the substitute sandalwood trees have all been cut out, and in many parts of Australia the stumps of the trees felled fifteen or twenty years ago, are now being dug up and shipped to the large markets in China.

In India attempts have been made for a number of years to keep up the supply by artificially restocking the forest, but the rate of planting has thus far been totally inadequate. Laws have been enacted to prevent the wanton destruction of the trees. Other causes besides extravagant cutting contributed to the decrease of sandalwood in India. Frequent fires and unrestricted grazing destroyed enormous quantities of young trees, and after careful investigation it was determined that a government monopoly in Mysore

In Southern India was the only means of saving the most costly of all the India woods. This caused the quotations at home and abroad to rise. A good deal of the wood now brought to the market is cut in hedgerows and scrub-jungles, outside the areas marked as reserved forests. Since the monopoly is in force the sandalwood trade is more or less uniform from year to year, and the systematic exploitation of mature trees in the forest reserves will tend to keep the regular supply of the wood in the world's market.

NEW STATE LAWS.

There are many new State laws that will go into effect on August 10 unless specially provided for, several of which are of interest to the general building trades:

CAPTER 48.

An act to regulate certain scaffolding or staging for the protection of workmen; requiring that in addition to the duties imposed by law upon employers using or directing or permitting the use of scaffolding or staging swung or suspended from an overhead support such employers shall be subject to the provisions of this act; fixing penalties for a violation hereof to be the same as provided in section 402c of the Penal Code; and providing for the enforcement of this act by the commissioner of the bureau of labor statistics.

(Approved April 23, 1913.)

Section 1. All scaffolding or staging, swung or suspended from an overhead support which is more than twenty feet from the ground or floor, shall have a safety rail of wood or other equally rigid material of sufficient strength to bear any sudden strain there against equal to four times the weight of an ordinary man, such rail to be properly secured and braced in a manner to withstand a sudden strain as hereinbefore prescribed; such rail to rise at least thirty-four inches above the floor or floors or main portions of such scaffolding or staging, and extending along the entire length of the outside and the ends thereof, and properly attached thereto to withstand any strain as hereinbefore provided; and such scaffolding or staging shall be fastened so as to prevent the same from swaying from the building or structure, or place of work where such scaffolding or staging is being used. Any and all parts of such scaffolding or staging shall be of sufficient strength to support, bear, or withstand, with safety, any weight of persons, tools, appliances, or materials that may be placed thereupon or that are to be supported thereby while such scaffolding or staging is being used for any of the purposes thereof.

Sec. 2. In addition to the duties imposed upon an employer by any law regulating or relating to scaffolding or staging, it shall be the duty of such employer who uses or permits the use of scaffolding or staging, as defined in section one of this act, in connection with construction, alteration, repairing, painting, cleaning or the doing of any other kind of work upon any building structure, or other thing or place of work, to furnish safety lines to tie all hooks and hangers back on the roof of such building, structure, or other thing or place of work, and to provide safety lines hanging from the roof, securely tied thereto, and one

such line to be provided between each pair of hangers or falls and near the ends of all such scaffolding or staging. When planks are used for the platforms or floors of such scaffolding or staging, they shall be not less than fourteen inches in width, and not less than one and one-half inches in thickness, and shall be of wood free from knots or fractures impairing the strength of such planks. Not more than two men shall be allowed or placed to work between two hangers or falls upon such scaffolding or staging.

Sec. 3. Any violation of the provisions of this act shall be punishable as provided in section four hundred and two (c) of the Penal Code, and shall be in addition to the penalties provided therein for the violation of any of the provisions of the said section.

Sec. 4. It shall be the duty of the commissioner of the bureau of labor statistics to enforce the provisions of this act.

Building for June in San Francisco went along at a comparatively prosperous rate of speed, all things considered. Private construction alone amounted to \$1,798,601 divided as follows: Brick and fireproof buildings, \$993,856; frame construction, \$755,508; alterations and additions, \$229,240. To this may properly be added Exposition work to the amount of \$335,633 which brings the total of private work up to \$2,134,237.

During the month there was also let Government work to the extent of \$73,892 and the City and County of San Francisco entered into contracts to the extent of \$605,413 for building construction and \$16,764 for street improvements, so that there was a grand total of work contracted for during the month of \$2,830,306.

Business generally throughout the country is dull. The above statistics show that San Francisco is more than holding its own. Building construction always shows the expenditure of real money. It is not a balance of credits, but it represents permanent improvement going into the land and lower close the margin of profit to the contractor or material man, the mere fact that so much money is being expended shows that at least half of it is going for labor and will be expended within the city limits.

As a matter of comparison taking private construction for the month of June it shows up with the same month in preceding years in the following manner:

June, 1904	\$1,516,533
June, 1905	2,376,928
June 1906	687,391
June, 1907	3,937,589
June, 1908	3,475,506
June 1909	1,398,446
June, 1910	1,458,464
June, 1911	2,625,740
June 1912	2,058,224
June, 1913	2,134,237

Last month showed a total of \$2,816,335 covering the same items of construction which this month amounted to \$2,830,306, so that all in all the grand total for June is greater than for May 1913.

Owing to the general stagnation of business throughout the country resulting from "God knows what kind of a combination of circumstances," building operations do well to show the activity that has been evidenced by the record of last month.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$7,000. Architect, none. Owner, S. J. Sterner, 3328 19th Ave., S. F. The building will be erected on the west side of 7th avenue south of California street and will cover an area of 27x80 feet. Plans provide for six large apartments all of which will be equipped with private bath rooms and wall beds. There will be a central heating system and open fire places. Mantels will be of brick. Composition floors and cement plaster wainscot will be used in the bath rooms. Exterior of the building will be covered with cement plaster on metal lath and brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$12,000. Architect, A. J. Bain, Phelan Bldg., S. F. Owner, Charles C. Terrill Estate. This building has been mentioned here when plans were first started. The building will be erected on Haight street east of Pierce and will cover a ground area of 36x84 feet. There will be twelve modern apartments of two, three and four rooms. All suites will have private bath rooms and will be equipped with wall beds. Interior finish will be of pine with some elm panels. Bath rooms will be finished in cement plaster. There will be steam heat and a hot water system. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor under the personal direction of the architect.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, W. H. Kelley. The building will be erected on the south side of Pine street west of Jones, and has been designed to contain 14 apartments of two, three and four rooms. Interior will be finished in pine and hardwoods. Plans provide for a central heating system, probably steam, elevator service, and a hot water supply. All suites will have private bath rooms and will be equipped with wall beds. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with cement plaster on metal lath and rustic and brick veneer. Marble and tile will be used in the entrance vestibule. Plans are now being prepared.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$16,000. Architect, Clay N. Burrell, Albany Block, Oakland. Owner, Miss L. G. Smonson. The building will be erected on 2nd avenue near 16th street. Interior has been arranged for two and three room suites with private bath rooms. Interiors will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. Plans provide for steam heat. Bath rooms will be finished in cement plaster. All suites will have open fire places and

tile or brick mantels. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

FRESNO, FRESNO CO., CAL.—Apartment house, 2 story and base, brick. Cost not stated. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, C. J. Craycroft. The building will be erected on Blackstone street and has been designed to contain four suites of four rooms and bath each. Interior finish will be of pine with some hardwoods. All suites will have wall beds. Bath rooms will be finished in cement plaster and tile. A central heating system will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Apartment house, 3 story and base, frame. Cost not stated. Architect, L. L. Jones, I. W. Hellman Bldg., L. A. Owner, Mrs. A. G. Tompkins. The building will cover an area of 56x116 feet, and has been designed to contain 56 rooms which will be arranged in two and three room suites. All apartments will have private baths and wall beds. Interior finish will be of pine. There will be a central heating system and vacuum cleaning plant. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

LOS ANGELES, CAL.—Apartment house, 3 story and base, frame. Cost not stated. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owner, Mrs. Margaret Collier. The building will be erected on a corner site and will cover an area of 58x118 feet. Interior will contain 69 rooms arranged in two and three room suites with private baths. Interior finish will be of pine. Some hardwood floors will be used. Plans provide for steam heat, elevator service, a vacuum cleaning system and wall beds. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with brick veneer and cement plaster. Plans are complete and figures are now being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick, \$40,000. Architect, E. C. Thorne, Reahly Board Bldg., L. A. Owner, I. I. Dehail. Contractors, Miller-Stahl Construction Co., Hibernian Bldg., L. A. Contract price, \$40,000.

LOS ANGELES, CAL.—Apartment house, 3 story and base, frame, \$40,000. Architect, B. Cooper Corbett, Union Square Bldg., L. A. Owner, Charles H. Louis. Contractor, E. H. MacGibbon, Los Angeles Investment Bldg., L. A. Contract price, \$40,000.

LOS ANGELES, CAL.—Apartment house, 3 story and base, frame, \$21,000. Architect, C. Gault, L. A. Owner, Mrs. A. Burgwald. Contractor R. T. Laughlin, Lissner Bldg., L. A. Contract price, \$21,000.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick, \$54,750.

Architect's name not given. Owners, Hackel & Gutterman, Contractor, A. E. Harshman, Story Bldg., L. A. Contract price, \$54,750. Work will not be started until July 22nd.

BANKS.

FILLMORE, VENTURA CO., CAL.—Bank, 1 story and base, reinforced concrete. Cost not stated. Architects, Withey & Davis, Story Bldg., L. A. Owners, Farmers' and Merchants' Bank of Fillmore. The building will cover an area of 25x60 feet and has been designed in the classic style. Interior finish will be of hardwoods, tile and marble. There will be safe deposit vaults and coin vaults. Considerable steel will be used. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

Contracts Awarded.

TEMECULA, RIVERSIDE CO., CAL.—Bank, 2 story and base, reinforced concrete. Cost not stated. Architects, Koerner & Paul, Broadway Central Bldg., L. A. Owners, Citizens' Bank of Temecula, Contractors, Earl Remington Co., Broadway Central Bldg., L. A. Contract price not stated. Note: This contract includes bank fixtures.

LOS ANGELES, CAL.—Bank vaults, etc., \$98,000. Architects, William Curlett & Son, Phelan Bldg., S. F., and Title Insurance Bldg., L. A. Owners, Merchants' National Bank. Contractors, Mosler Safe Co. Contract price, \$98,000.

REDLANDS, SAN BERNARDINO CO., CAL.—Bank, 2 story and base. Class A construction, \$50,000. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, First National Bank of Redlands. Contractors, Los Angeles Planing Mill Co., 1812 Industrial St., L. A., general construction only. Contract price, \$46,650. This contract does not include plumbing, electric work, heating or vault work.

BRIDGES, DAMS AND HARBOR WORK.

PORTLAND, ORE.—Dock construction, timber and concrete. Cost not stated. Engineer, Engineering Dept. Commission of Public Docks, Worcester Bldg., Portland. Owners, City of Portland. The Commission of Public Docks, Portland, Ore., is now calling for bids for the construction of Dock No. 1, a pile and timber dock, which is to be erected on the west side of the Willamette River, between 15th and 16th streets. Bids will be opened on July 21st for the work. An official proposal will be found in another column of this issue. Plans show a structure 1975 feet over all and 112 feet wide. A portion of the dock, 303 feet long, will be constructed in two levels and the balance in but one level. A one-story shed covering the entire length of the dock will also be erected, having a clean span of 100 feet. The two-level section will be provided with six mechanical ramps and the one-level section with one power ramp. Dock will be of heavy mill construction with concrete fire walls and ends and will be equipped with automatic sprinklers. Also included in the work will be the construction of a massive concrete bulkhead wall running the full length of the dock with retaining walls at the ends. The contract also covers the

construction of a new ferry boat landing. Complete plans and specifications together with full instructions to bidders may be obtained on application to the Commission of Public Docks, 503 Worcester Bldg., Portland, Ore.

SEATTLE, WASH.—Bridge, frame construction. Cost not stated. Engineer, Engineering Department Great Northern R. R. Co., Seattle. Owners, Great Northern R. R. Co. Plans have been completed by this company for a frame bridge 65 feet long which will carry its tracks over Government Way between Gilman avenue and 27th avenue. Bids will be called for at once. Plans can be secured from the Engineering Department of the Great Northern.

ROSEBURG, ORE.—Bridge, steel construction. Cost not stated. Engineer, County Engineer, Roseburg. Owners, Douglas County. Bids are now being taken and will be opened on July 12th by the County Supervisors for the construction of a steel bridge over the Umpqua River. The bridge will consist of four 175-foot spans and is of the Curved Chord Pratt Truss design. The bridge will have a clear roadway of 20 feet and a clear head room of 15 feet. E. H. Lenox is the County Clerk. Plans can be secured from that office.

PORT ANGELES, WASH.—Sea wall construction. Cost not stated. Engineer, City Engineer Port Angeles. Owners, Port Angeles. The City Council has passed an ordinance calling for the construction of a sea wall 100 feet wide and over a mile in length. Bids will be called for at once. Full particulars can be secured from the City Clerk, Port Angeles.

Contracts Awarded.

SEATTLE, WASH.—Dam, concrete and steel, \$687,110. Engineer's name not given. Owners, City of Seattle. Contractors, Nettleton, Bruce & Eeachbach, American Bank Bldg., Seattle. Contract price, \$687,110. This contract is for the construction of the Cedar River dam.

CHURCHES.

LONG BEACH, LOS ANGELES CO., CAL.—Church, 1 story and towers, brick. Cost not stated. Architects, Frank T. Kogley and T. Foster Ena, associated, Consolidated Realty Bldg., L. A. Owners, Roman Catholic Church. This work has been mentioned here before when the architects were first commissioned. Plans provide for a building 84x128 feet with two high towers of steel construction. The main auditorium will have a seating capacity of 220 people. Interior finish will be of pine and ornamental plaster. Exterior of the building will be faced with cement plaster and pressed brick. Plans are complete and figures are now being taken.

GLENDALE, LOS ANGELES CO., CAL.—Church, 2 story and base, reinforced concrete, \$25,000. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, Methodist Episcopal Church of Glendale. The building will cover an area of 76x169 feet and is designed in the classic style. There will be a main auditorium with a seating capacity of 550 people. Adjoining this there will be a large lecture room with a seating capacity of 220 people. Plans also provide for

Sunday school rooms, pastor's study and social rooms. Interior finish will be of pine and ornamental plaster. A central heating system will be installed. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

Contracts Awarded.

AZUSA, LOS ANGELES CO., CAL.—Church, 1 story and base, frame, \$11,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Presbyterian Church. Contractor, Gottfried Hanson, 1414 Vermont Ave., L. A. Contract price, \$11,000.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Factory, 2 story and base, brick and steel, \$35,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The building will be erected on Howard street near Fourth, and will cover a ground area of 165x155 feet. The entire building will be occupied by a large fruit preserving plant. Waterproof floors will be used in a number of places. There will be steam heat, freight elevators, and a number of large vats. Interior finish will be of pine throughout. A portion of the building will be used for stables. Exterior on two street frontages will be faced with pressed brick. Plans have been completed and figures taken. A general contract will be awarded shortly.

LONG BEACH, LOS ANGELES CO., CAL.—Factory, 2 story and base, reinforced concrete. Cost not stated. Engineer, George W. Harding, Washington Bldg., Long Beach. Owners, The Long Beach Improvement Co. The building will cover an area of 75x150 feet. The building has been designed for a planing mill and interior finish will be used only in the front portion. Plans have been completed and the work will be done by Day Labor.

Contracts Awarded.

LOS ANGELES, CAL.—Warehouse, 5 story and base, reinforced concrete, \$17,000. Architect, A. H. Daun, care of Board of Education, L. A. Owners, Board of Education. Contractors, Davidson Construction Co., 16th and Tennessee Sts., L. A. Contract price, \$17,000.

FIRE HOUSES.

SACRAMENTO, CAL.—Fire house, 2 story and base, brick and concrete. Cost not stated. Architect's name not given. Owners, City of Sacramento. Plans for the construction of a fire house in Oak Park have been completed and approved by the Fire Commission. Bids are now being taken and will be opened on July 10th. The building will be located on Cypress avenue between 34th and 35th streets. There will be space on the first floor for three pieces of apparatus and upper floor will be arranged for sleeping quarters, reading room and chief's office. Interior will be finished in pine and hardwood. Special plumbing and electrical equipment will be installed. Exterior of the building will be faced with pressed brick. Plans can be secured from the City Clerk, City Hall Bldg., Sacramento. An official proposal appears in another column of this issue.

SEATTLE, WASH.—Police and fire station, 2 story and base, brick. Cost not stated. Architect, Daniel Huntington,

ton, Seattle. Owners, City of Seattle. Plans are being prepared for a combination police and fire station which will be erected on 44th avenue near West Alaska street. Interior will be arranged for two pieces of apparatus besides the police quarters. Interior finish will be of pine and hardwoods. A central heating system will be installed. There will be special plumbing and electrical apparatus. Exterior of the building will be faced with pressed brick. Plans are being prepared.

ANAHEIM, ORANGE CO., CAL.—Fire house, 2 story and base, brick. Cost not stated. Architect, City Engineer Steward, Anaheim. Owners, City of Anaheim. Plans for a two-story brick building have been completed and figures are now being called for by the City Clerk. Bids will be opened on July 24th. The building will be arranged to contain three pieces of apparatus on the first floor and sleeping quarters and reading room on the upper floor. Interior finish will be of pine throughout. A central heating system will be installed. Exterior of the building will be faced with pressed brick. Plans can be secured from the City Clerk.

GLENDALE, LOS ANGELES CO., CAL.—Fire house, 2 story and base, brick. Cost not stated. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, City of Glendale. The building will cover an area of 50x75 feet and will contain four pieces of apparatus on the first floor. Upper floor will be divided into three rooms, baths and reading room. Interior will be finished in pine and hardwood. The exterior of the building will be faced with pressed brick. Plans are being prepared.

FLATS.

SAN FRANCISCO—Flat alterations, 3 story and base, frame, \$6,000. Architect, Charles Edward Hodges, Bankers' Investment Bldg., S. F. Owner, Prof. Holifield. The building now located on Lake street near 4th avenue will undergo extensive alterations. There are at present three large flats contained in the building which will be rearranged for six modern apartments. The work will include new plastering, plumbing, painting and electrical work as well as new interior finish. The exterior of the building will also be altered. Plans are being prepared.

SAN FRANCISCO—Flats, 3 story and base, frame, \$5,000. Architect, O. E. Evans, 2367 Mission St., S. F. Owner, A. V. Dovenalo. The building, which has been designed to contain six flats, will be erected on Miguel street near Arlington. The lot has a frontage of 25 feet by a depth of 80 feet. Flats will consist of four rooms and bath each. Interior will be finished in pine with some hardwood floors. Bath rooms will be finished in cement plaster. All living rooms will have a large open fire place with brick mantel. The will be used in the kitchens. Exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor. The owner is now in the market for all kinds of materials.

GARAGES.

LOS ANGELES, CAL.—Garage, 1 story and base, reinforced concrete. Cost not stated. Architect, none. Owners, City of Los Angeles. Plans have been completed for a municipal garage which is to be erected on Pearl street near Marengo. The building will be large enough to house twenty-five machines. Interior will be finished in pine. A cement floor will be used. Metal window sash and frames are specified. Exterior of the building will be faced with cement plaster. Bids will be called for shortly.

GOVERNMENT WORK AND SUPPLIES.

Puget Sound, Wash., Travelling Cranes. Bids for furnishing electric travelling cranes for delivery at the U. S. navy yard, Puget Sound, Wash., were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., as follows:

Item 1, price for 4 cranes complete; 2, deduct from item 1 if the 5-ton 1-motor hand traversing bridge crane is omitted; 3, add to item 1 for one additional 5-ton wall crane; 4, add to item 1 for one additional 3-ton 1-motor hand traversing bridge crane.

Cyclops Iron Works, 537 Folsom street, San Francisco, Cal., item 1, \$18,400; 2, \$1,900; 3, \$4,400; 4, \$1,900. Pauling & Harnischfeger, 29th and National avenue, Milwaukee, Wis., item 1, \$16,925; 2, \$2,725; 3, \$3,950; 4, \$2,675.

Grand Junction Colo., Construction.

The following bid was received by the supervising architect, Treasury Department, Washington, D. C., for the construction, complete, of the U. S. post office at Grand Junction, Colo.: J. J. Lusden, Grand Junction, Colo. For using light colored limestone for all exterior stonework, except where granite or bluestone is required, \$116,367.

For using light-colored Colorado marble for all exterior stonework, except where granite is required, \$121,453.

For using Colorado sandstone for all exterior stonework, except where granite or bluestone is required, \$117,482.

For alternate C (substituting tile for slate on slopes of main roof), add \$54.

For alternate F (painting plastered surfaces of finished rooms in the first and second story), add \$1,200.

For furnishing and installing of all lighting fixtures, \$1,250.

Screens, Camp Yosemite, Cal.

The contract for installing screens at Camp Yosemite, Cal., has been awarded to the Thurman-Door Co., of Madera, Cal., at \$685.48.

San Francisco, Cal., Vault Protection.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for an electric vault-protection system in the U. S. subtreasury building, San Francisco, Cal.:

American Bank Protection Co., Minneapolis, Minn., \$975; time September 20, 1913.

American District Telegraph Co., of San Francisco, New York city, \$1-

\$210,300; time September 30, 1913.

Butte Engineering & Electric Co., San Francisco, Cal., \$1,800; time August 30, 1913.

Lettermann Hospital, Turbine Sets.

The Standard Electrical Construction Co., of 60 Natoma street, San Francisco, Cal., has the contract at \$3,370 for furnishing two 75-K. W. turbine sets at the Lettermann General Hospital, Cal.

Fort McDowell, Rock-Crusher Plant.

Awards have been made as follows by the quartermaster general for furnishing a rock-crushing plant at Fort McDowell, Cal.: Allis-Chalmers Co., \$1,388.60 for item 1, lots 1 and 2; Pacific States Electric Co., \$194.75 for item 1, lots 3 to 5; Orenstein-Arthur-Koppel Co., item 2, \$699.50; Davis-Rogers Co., items 3 and 4, under alternate E, \$11,929. All bidders are of San Francisco.

Water System, Fort Flagler.

The contract for extending the present water-distributing system at Fort Flagler, Wash., has been awarded to James A. Coyne, of Port Townsend, Wash., at \$1,700.

Amount included in lump-sum proposal for part III, as specified—Bid 1, \$10,939; 2, \$13,150.

Amount to be added to lump-sum proposal for each 6 inches additional depth more than shown on plan for lowering purification tanks—Bid 1, \$250; 2, \$200.

Amount to be added to the lump-sum proposal for riprap per foot of length of discharge pipe as specified—Bid 1, \$12; 2, \$2.77.

Time to complete—Bid 2, 180 days; 1, 7 months.

HALLS AND SOCIETY BUILD.

McMINNVILLE, ORE.—Lodge hall, 3 story and base, brick, \$50,000. Architect, C. C. Robbins, Alsworth Bldg., Bldg., Portland. Owners, McMinnville Masonic Hall Association. An architect has just been selected to prepare plans for this work and details of the building are not yet available. There will probably be stores on the first floor and offices and lodge rooms on the second and third floors. Plans will provide for a central heating system. Interior finish will be of pine and hardwoods. Exterior will be faced with pressed brick. Further mention will be made of the work as the plans progress.

BREMERTON, WASH.—Lodge hall, 3 story and base, reinforced concrete,

\$30,000. Architect's name not given. Owners, Bremerton Eagles' Hall Association. All bids received for this work have been rejected and plans will be revised. The building was designed with stores on the first floor and offices and lodge rooms on the upper floors. Plans provide for steam heat. Interior will be finished in pine and hardwoods. Exterior of the building will be faced with cement plaster. New figures will be taken as soon as the revision of the plans is complete.

SAN FRANCISCO—Foundation work City Hall. Class A construction. Cost not stated. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owners, City and County of San Francisco. Plans for the foundation work, concrete footing and finishing excavation for the City Hall Building have been approved by the Board of Public Works. Bids are now being called for and will be opened on July 11th. Plans can be secured from the architects. An official proposal appears in another column of this issue.

FRESNO, FRESNO CO., CAL.—Lodge hall, 6 story and base, reinforced concrete and steel, \$125,000. Architect's name withheld. Owners, Fresno Elks' Hall Association. Preliminary plans have been accepted by the Fresno Elks for a lodge hall and commercial building which will be erected on their property on Tulare street opposite the Rowell building. No details of construction have been given out. Further mention of the work will appear in these columns as the plans progress.

Contracts Awarded.

Bids were opened for the Tuberculosis Sanitarium project at Richmond Heights, and bids have been referred to the Superintendent of Buildings. The following were low on the administration building and hospital. Administration Building—(a) interlocking tile walls; (b) brick walls; (c) concrete walls. Jenkins & Jones, Hineckley Block, (a) \$73,900; (b) \$74,130; (c) \$73,570. Hospital Building—M. J. Hursen Co., Globe Block, (a) \$52,500; (b) \$52,800; (c) \$52,900.

HOTELS.

SAN FRANCISCO—Hotel, 3 story and base. Class C construction, \$25,000. Architect, Charles E. J. Rogers, 24 California St., S. F. Owner's name withheld. The building will be erected on Golden Gate avenue near Hyde street, and will have a frontage on Golden Gate avenue of 48 feet and a depth of 68 feet 9 inches. The first floor will be arranged for stores and the upper floors for hotel purposes. Plans provide for a total of 30 guest rooms and a number of baths. Interior finish will be of pine and hardwood. There will be steam heat and a hot water system. Bath rooms will have cement floors and tile wainscot. Mar-

ble, tile and terrazzo will also be used. Exterior of the building will be faced with cement plaster. Store will have plate glass windows in patent store fronts. Plans are now being prepared.

SAN FRANCISCO—Hotel, 7 story and base. Class A construction, \$125,000. Architect, A. R. Denke, Humboldt Bank Bldg., S. F. Owners, George Haas Realty Co. The building will be erected at the southwest corner of 5th and Stevenson streets and will cover a large area, the owners having recently secured additional property. There will be a number of stores on the first floor besides the hotel entrance, lobby and offices. Upper floors will be arranged for a total of 114 guest rooms, a number of which will have private baths. There will be a complete steel frame with brick exterior walls, faced with pressed brick and terra cotta. Plans provide for steam heat, elevator service, hot water system, vacuum cleaning plant and metal window frames and sash. Interior will be finished in pine and hardwoods and ornamental plaster. Bath rooms will have cement floors and tile wainscot. There will be sidewalk doors, lifts and lights and patent store fronts. Plans are complete and figures are now being taken.

PORTLAND, ORE.—Hotel, 3 story and base, brick. Cost not stated. Architect, W. B. Bell, Worcester Bldg., Portland. Owners, Fisher & Thorsen. The building will be erected at the southwest corner of Lownsdale and Washington streets and will cover a considerable area. The first floor will be arranged for stores and upper floors for hotel rooms. Plans provide for steam heat and a hot water plant. Interior finish will be of pine throughout. Bath rooms will have cement floors and tile wainscot. There will be plate glass display windows and patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

FRESNO, FRESNO CO., CAL.—Hotel, 2 story and base, brick, \$18,000. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. Owner, C. W. Musick. The building will be erected on J street near Merced and will cover an area of 50x102 feet. There will be stores on the first floor besides the entrance to the hotel. Upper floor will be arranged for 19 guest rooms and four baths. Interior finish will be of pine throughout. Considerable marble and tile will be used on the first floor. There will be plate glass store windows and patent store fronts. Hot and cold running water will be supplied to all rooms. Exterior of the building will be faced with pressed brick. Plans are now nearly complete and figures will be called for shortly.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel, \$40,000. Architect, A. Featherstonhaugh, Ferguson Bldg., L. A. Owner, Joseph H. Call. The building will be erected on South Hope street and will have a street frontage of 60 feet and a depth of 165 feet. The first floor will be arranged for a large lobby, offices and store. Upper floors will be subdivided into 99 guest rooms, 21 private baths and 9 public baths. Interior finish will be of pine and hardwoods. There will be steam heat and elevator service. Bath rooms will be finished in tile and will

have cement floors. A hot water system will also be installed. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owner who will let sub-contracts on all parts of the work.

Contracts Awarded.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel, \$44,500. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. F. W. Sabich. Contractors, Alpetter, Hall & Alpetter, Ferguson Bldg., L. A. Contract price, \$44,500. Thomas Haverly Co., plumbing and heating. Contract price, \$8,400.

SAN DIEGO, CAL.—Hotel, 3 story and base, reinforced concrete, \$162,270. Architect, Harrison Albright, L. A. Owners, J. D. and A. B. Spreckels Securities Co. Contractors, The Wurster Construction Co., Spreckels Bldg., San Diego. Contract price, \$162,270.

LIBRARIES.

ALHAMBRA, LOS ANGELES CO., CAL.—Library, 1 story and base, brick. Cost not stated. Architect, Frederick L. Roehrig, American Bank Bldg., L. A. Owners, City of Alhambra. Plans for this building, which was mentioned here when the architect was first commissioned to prepare plans, have been accepted and are now out for figures. Bids will be opened on July 12th. The building covers an area of 90x100 feet, and is in the classic style. Interior finish will be of hardwood, marble and tile. Hardwood floors will be used throughout. There will be a central heating system. Metal shelves and metal window sash and frames are also specified. Exterior of the building will be faced with enamel brick. Plans are complete and figures are being taken.

PANAMA -- PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Furnishing and fabricating structural steel and iron, cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. SEWERS, STREET WORK AND WATER SYSTEMS.

CALIFORNIA—State Highway work, Cost not stated. Engineer State Highway Commission, Sacramento. Owners, State of California. The following are the low men on the six pieces of State Highway Work, bids for which were opened on June 30th. Contracts have not been awarded:

El Dorado County—State highway between S. Single Springs and El Dorado, five miles, water-bound macadam; Arthur S. Lyons and Ira N. Burke, Smith's Plt., lowest bidder, \$21,786.90; engineer's estimate, \$19,372.33.

San Mateo County—Grading two-mile strip between Cypress Lawn Cemetery and South San Francisco, lowest bid, Maboney Bros., San Francisco, \$17,112.05; engineer's estimate, \$25,289.77.

Santa Clara County—Constructing road between Morganhill and Gilroy, seven and a half miles; E. O. Burge, Sacramento, lowest bidder; \$23,860.60; engineer's estimate, \$11,136.23.

Santa Barbara County—Constructing twelve miles of highway between Los Alamos and a point one and a

quarter miles north of Bicknell Station; lowest bid \$91,148.50, by Mayer & Lewis of Venice; engineer's estimate, \$96,550.95.

San Luis Obispo County—Construction of highway between San Luis Obispo and Santa Margarita, six and a half miles; E. O. Burge, Sacramento, lowest bidder, \$52,335; engineer's estimate, \$16,211.82.

San Bernardino County—Construction of highway between the westerly boundary of the county and running by way of Ontario, six and a half miles; Benton & Pennabaker, Los Angeles, lowest bidder, \$37,851.10; engineer's estimate, \$49,266.12.

No road work is being ordered by the Commission until the money for its completion is available for use by the Commission.

YERBA BUENA ISLAND, CAL.—Water pipe line, \$10,000. Engineer, Department of Yards and Docks, Washington, D. C. Owners, United States Government. Plans have been complete and figures are now being taken for the construction of a pipe line from Yerba Buena Island to Oakland. Bids will be opened on August 2nd. Plans can be secured from the Commandant of the Naval Training Station, San Francisco, or from the Department of Yards and Docks, Washington, D. C. An official proposal appears in another column of this issue.

KITTITS IRRIGATION DISTRICT, WASH.—Irrigation work, \$5,000,000. Engineer, Frank C. Kelsey, Journal Bldg., Portland. Owners, Kittits Irrigation District. Plans and specifications have been completed by Frank C. Kelsey, consulting engineer, Journal Bldg., Portland, for the irrigation project for the Kittits Reclamation District. The work will require an expenditure of \$5,000,000, and bids for the construction work will be let in one general contract when the bonds for the work can be sold. The project will require over 100,000 yards of concrete, 1500 tons of steel and the construction of several bridges will be required; one of these will be 600 feet long and will have three steel spans, this bridge will carry one of the 12 siphons. This siphon will be eight feet in diameter and one mile long. The total length of the 12 siphons will be over three miles, while a large tunnel is also included which will be 2½ miles long. The Government has already completed one dam at Lake Keechelus and another is in course of construction at Lake Keechelus. These dams will furnish the district with water. The headworks is about one-half mile east of Easton, Wash., and will cover a large area in and around Ellensburg. The estimated cost of the construction work is placed at \$4,000,000, making an additional \$1,000,000 for other work. The plans and surveys have already been completed. Mr. Kelsey stated that he thought no action would be taken until after the first of the year on account of the poor market for the bonds.

Contracts Awarded.

COALINGA, FRESNO CO., CAL.—Oil reservoir, reinforced concrete. Cost not stated. Engineer, Engineering Dept. California Oilfields Co., Coalinga. Owners, California Oilfields Co. Contractors, Healy-Tillett Construction Co., S. F. Contract price not stated.

STORES & OFFICE BUILDINGS

SAN FRANCISCO—Stores and loft, 2 story and base. Class C construction. Cost not stated. Architect, Theo. Lenz, Humboldt Bank Bldg., S. F. Owner, Mr. McGovern. This building will be erected on upper Market street near Van Ness avenue, and will cover a considerable area. The entire structure has been leased to A. Freed, a dealer in motor cycles. Interior will be finished in pine. There will be patent store fronts and plate glass windows. Metal window frames and sash will be used. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

SAN FRANCISCO—Office additions, 2, 3 story wings. Class A construction, \$125,000. Architects, Miller & Colmesnil, Lick Bldg., S. F. Owners, Metropolitan Life Insurance Co. This work has been mentioned here before. At that time it was proposed to add to the height of the building, but this plan has since been abandoned and two wings each 22½x94 feet will be constructed, one at each end of the building. There will be a complete steel frame with exterior walls of concrete and brick, faced with mat glazed terra cotta. Interior will be handsomely finished in hardwoods, marble and metal trim. There will be a basement and sub-basement. Plans will be complete and ready for figures within a month.

SAN JOSE, SANTA CLARA CO., CAL.—Office, 1 story, reinforced concrete, \$6,000. Architect, none. Owners, San Jose Water Co., 372 West Santa Clara avenue, San Jose. Plans are complete for an addition to the company's office. Interior will be finished in pine and hardwoods. A tile floor will be used. Plans provide for metal window sash and frames and modern plumbing. Exterior will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

FRESNO, FRESNO CO., CAL.—Department store, 3 story and base. Class A construction, \$165,000. Architect, C. A. Meussdorfer, Humboldt Bank Bldg., S. F. Owners, Gottschalk Department Store. All bids for this work which were opened a week ago have been rejected. Plans will be slightly revised and new figures will be called for at once.

BAKERSFIELD, KERN CO., CAL.—Stores, 2 story and base, brick, \$20,000. Architect, none. Owner, Alfred Harrell, Bakersfield. The building on I street between 19th and 20th streets, recently destroyed by fire, will be rebuilt at once. Plans for this work are now in the hands of the owner who will let all contracts.

FRESNO, FRESNO CO., CAL.—Stores and offices, 4 story and base, reinforced concrete. Cost not stated. Architect, R. F. Felchlin, Fresno. Owners, Holland & Holland. The building will be erected at the corner of Reno and L streets and will cover an area of 79x110 feet. The first floor will contain stores and a banking room. Second and third floors will be arranged for 59 modern offices. The fourth floor will contain a large lodge room. Interior finish will be of pine and hardwoods. A maple floor will be used in the lodge room. There will be steam heat and elevator service. Metal window sash and frames are specified. Exterior of

the building will be faced with cement plaster. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Stores and lofts, 5 story and base, reinforced concrete. Cost not stated. Architects, Barnett, Haynes & Barnett, Wright and Callender Bldg., L. A. Owner's name withheld. The building will be erected on Central avenue and will cover an area of 126x125 feet. Plans provide for five stores on the first floor and lofts above. There will be reinforced concrete floors and roof slabs. Two electric freight elevators will be installed, steam heat, metal window sash and frames and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

RIVERSIDE, RIVERSIDE CO., CAL.—Stores and offices, 2 story and base, reinforced concrete. Cost not stated. Architects, Kysor & Biggar, Wright and Callender Bldg., L. A. Owners, Riverside Abstract Co. The building will cover an area of 40x140 feet. The entire structure will be occupied by the owners. Interior will be finished in pine, hardwood, marble and ornamental plaster. Plans include steam heat, metal window sash and frames and fireproof vaults. Exterior will be faced with Utah stone and cement plaster. Plans are complete and figures are being taken.

SAN PEDRO, LOS ANGELES CO., CAL.—Stores and offices, 4 story and base, brick. Cost not stated. Architect, E. H. Dorr, 1811 South Main St., L. A. Owner, N. O. Anderson. The building will cover an area of 25x75 feet and will be arranged for one store on the first floor and 27 offices on the upper floors. Interior finish will be of pine and hardwoods. There will be steam heat and elevator service. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken by the architect.

LOS ANGELES, CAL.—Stores and offices, 14 story and base. Class A construction. Cost not stated. Architects, J. Martyn Haenke and W. J. Dodd, Story Bldg., L. A. Owners, Home Builders. This work has been mentioned here a number of times before. Plans for the general construction of the building have been completed and figures are now being taken. The structure will be erected at the corner of 8th and Spring streets, and will cover an area of 117x108 feet. Construction will be fireproof throughout. There will be a complete steel frame, reinforced concrete walls and floors. Metal interior trim and metal window sash and frames will be used.

Contracts Awarded.

LOS ANGELES, CAL.—Stores and offices, 12 story and base. Class A construction, \$200,000. Architects, William Curlett & Son, Phelan Bldg., S. F., and Title Insurance Bldg., L. A. Owners' Merchants' Fireproof Building Co. Contractors, C. J. Kuhach Co., Van Nuys Bldg., L. A. Contract price, \$200,000.

LOS ANGELES, CAL.—Lofts, 5 story and base, reinforced concrete, \$120,399. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. F. W. Sabichi. Contractor, Carl Leonardt, H. W. Hellman Bldg., L. A. Contract price, \$120,399.

PHOENIX, ARIZ.—Department store, 4 story and base, reinforced concrete, \$72,900. Architects, Trost & Trost and

Royal W. Lescher, Phoenix. Owners, New York Store. Contractors, Arizona Construction Co., Mesa. Contract price, \$72,900.

LOS ANGELES, CAL.—Newspaper offices, 2 story and base. Class A construction, \$400,000. Architects, J. Martyn Haenke and W. J. Dodd, Story Bldg., L. A. Owner, William Randolph Hearst. Contractors, Alta Planing Mill Co., 830 McGarry St., L. A., general construction only. Contract price, \$270,000.

THEATRES.

VICTORIA, B. C.—Theatre, 3 story and base. Class B construction, \$125,000. Architect, J. N. Warren, Victoria. Owner, Alex. Pantages. The building will be erected on a corner site and covers a large area. A main auditorium seating 1,000 people is provided besides a large balcony and 14 boxes. Construction will be of brick and steel. An exceedingly ornamental elevation has been designed. Interior will be finished in hardwoods and ornamental plaster. There will be steam heat and a modern system of ventilation. Indirect system of lighting will be used. Considerable metal work is specified. Exterior of the building will be faced with cement plaster and pressed brick. Plans are being prepared.

SEALED PROPOSALS.

PROPOSALS FOR CANAL SUPPLIES.—CANAL CIRCULAR 783.—Proposals for Motor-Driven Lathe, Chain, Steel Cable, Rivets, Nails, Nuts, Steel Washers, Bronze Bars, Sheet Copper, Sheet Zinc, Claw Bars, Chisels, Files, Wheelbarrows, Drawer Locks, Lanterns, Tool Handles, Marline, Linseed Oil, Paper and Cardboard.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. July 17, 1913, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 783) may be obtained from this office or the office of the assistant purchasing agent, 1066 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR SCREENS.

SCREENS.—Treasury Department, office of the Supervising Architect, Washington, D. C.—Sealed proposals will be received at this office until July 10, 1913, for installing screens in the U. S. public building at Sacramento, Cal. For further information address O. WENDEROTH, supervising architect.

PROPOSALS FOR WATER PIPE.

WATER PIPE.—Sealed proposals in-dorsed "Proposals for Pipe Line" will be received at the bureau of yards and docks, Navy Department, Washington, D. C. until 11 o'clock a. m. August 2, 1913, and then and there publicly opened, for water pipe from Yerba Buena Island to Oakland, Cal. Amount available \$10,000. Plans and specifications can be obtained on application to the bureau or to the commandant of the naval training station, San Francisco, Cal. H. R. STANFORD, chief of bureau.

PROPOSALS FOR CITY HALL WORK.—OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 10 o'clock a. m. and 4 o'clock p. m. on Friday, the 18th day of July, 1913, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

BUILDING AND INDUSTRIAL NEWS

The foundation and footing concrete work and finishing of excavation for the City Hall to be located on City property bounded by McAllister, Polk and Grove streets and Van Ness avenue.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works, and be completed within sixty (60) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$12,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Proposal forms will be furnished gratuitously upon application to the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids. By order of the Board of Public Works, F. J. CHURCHILL, Secretary.

PROPOSALS FOR FIRE HOUSE.

BIDS will be received by the City Commission in the Council Chamber, City Hall Building, on I street between Ninth and Tenth streets in the City of Sacramento, between the hours of 9:30 o'clock a. m. and 1:30 o'clock p. m. on Thursday, July 10, 1913, for furnishing all labor and materials required in the erection of a fire station at Oak Park on south side Cypress avenue between Thirty-fourth and Thirty-fifth streets, Sacramento, California, in accordance with plans and specifications heretofore adopted, and said plans and specifications now being on file in the office of the City Clerk and open to the inspection of the public at all times during office hours.

All such proposals must comply with the requirements of the new Charter of the City of Sacramento, effective July 1, 1912, and bidders are hereby cautioned that no bid which fails to comply therewith can be considered.

Bids must be submitted upon printed forms prepared by the City, copies of which, together with a circular of instructions, will be supplied free upon application to the undersigned.

The successful bidder must give bond to the City of Sacramento, conditioned for the faithful performance of the contract and containing the stipulations prescribed in Section 463 of the said new Charter, a certified check made payable to the City Clerk for not less than ten (10) per cent of the aggregate of the proposal must accompany each bid. The right to reject any and all bids is reserved to the City by the provisions of said Charter.

M. J. DESMOND, City Clerk of the City of Sacramento, Office: City Hall Building, Sacramento, California.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 415 in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 11:30 A. M. Thursday, July 25th, 1913, for the following: **Excavating and Piling, Foundation, Fabricating and Erecting Structural Steel and Iron Work of The Fine Arts Building** in accordance with the plans and specifications on file in the office of the Director of Works.

A bond in the sum of fifty (\$50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 207 Service Building.

Fillmore and Chestnut Streets, San Francisco, by depositing \$10.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER, Chairman. (*)

NOTICE TO CONTRACTORS.

SEALED BIDS will be received at the office of the Comptroller, University of California, Berkeley, at 10 A. M. Wednesday, July 10th, on **Ornamental Metal Work for the Sather Campanile** on the Grounds of the University of California, Berkeley.

Plans and specifications are on file in said office and may be obtained upon the payment of a deposit of \$5.00.

No bids will be received unless accompanied by a certified check or bond, equal to 10% of the bid, to secure execution of the contract by the successful bidder. The right is reserved to reject any or all bids.

THE REGENTS OF THE UNIVERSITY OF CALIFORNIA.

THE CITY OF PORTLAND, OREGON, OFFICE OF THE COMMISSION OF PUBLIC DOCKS, Public Dock No. 1, Advertisement.

NOTICE IS HEREBY GIVEN that The Commission of Public Docks of the City of Portland, Oregon, will receive sealed proposals until 10 o'clock A. M. July 10, 1913, at its office, 502 Worcester Building, Portland, Oregon, for the construction of a **Public Dock**, with appurtenances, between 15th and 16th Streets, on the West Side of the Willamette River.

Plans, specifications, proposal blank, form of contract and other information for proposals, will be on file in the office of The Commission of Public Docks. A complete set of plans and specifications may also be obtained by prospective bidders by depositing with the Commission a certified check in the sum of \$50.00, which will be returned upon receipt of the plans in good condition.

All tenders to be sealed and marked on the outside "Proposal for construction of Public Dock No. 1."

No proposal or bid will be considered unless accompanied by a check payable to the order of The City of Portland, certified by a responsible bank in the City of Portland, Oregon, for the amount equal to ten per cent of the proposal, to be forfeited as fixed and liquidated damages in case the bidder neglects or refuses to enter into contract and provide a suitable bond for the faithful performance of said work in the event the contract is awarded him.

ATTENTION of all bidders is respectfully called to Chapter 61, Laws of Oregon, 1913, (Session Laws 1913, p. 99).

The Commission of Public Docks reserves the right to reject any and all proposals.

Dated Portland, Oregon, this 20th day of June, 1913.

THE COMMISSION OF PUBLIC DOCKS.

By G. B. HEGARDT, Secretary.

(24-July 1, 9, 16)

NOTICE TO CONTRACTOR.

TREASURY DEPARTMENT, Office of the Supervising Architect, Washington, D. C. June 9, 1913.—Sealed proposals will be received at the Treasury Department, until 11 o'clock A. M. M. on July 21, 1913, and then opened, for new heating boilers, etc., at the United States post office, Port Townsend, Wash., in accordance with the specification, copies of which may be obtained at this office at the discretion of the supervising architect. O. WENDEROTH, supervising architect.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 415 in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 11:30 A. M. Thursday, July 25th, 1913, for the following: **Excavating and Piling, Foundation, Fabricating and Erecting Structural Steel and Iron Work of The Fine Arts Building** in accordance with the plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (\$50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$5.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER, Chairman. (*)

Firms dealing news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

APARTMENT HOUSE—3 story and base, frame, \$7,000. San Francisco. Architect, none. Owner, S. J. Sterner, 3828 19th Ave., S. F. The building will be erected on the west side of 7th avenue south of California street and will cover an area of 27x80 feet. Plans provide for six large apartments all of which will be equipped with private bath rooms and wall beds. There will be a central heating system and open fire places. Mantels will be of brick. Composition floors and cement plaster wainscot will be used in the bath rooms. Exterior of the building will be covered with cement plaster on metal lath and brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

APARTMENT HOUSE—3 story and base, frame, \$12,000. San Francisco. Architect, A. J. Bain, Phelan Bldg., S. F. Owner, Charles C. Terrill Estate. This building has been mentioned here when plans were first started. The building will be erected on Haight street east of Pierce and will cover a ground area of 36x84 feet. There will be twelve modern apartments of two, three and four rooms. All suites will have private bath rooms and will be equipped with wall beds. Interior finish will be of pine with some elm panels. Bath rooms will be finished in cement plaster. There will be steam heat and a hot water system. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor under the personal direction of the architect.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, W. H. Kelley. The building will be erected on the south side of Pine street west of Jones, and has been designed to contain 14 apartments of two, three and four rooms. Interior will be finished in pine and hardwoods. Plans provide for a central heating system, probably steam, elevator service, and a hot water supply. All suites will have private bath rooms and tile wainscot. Exterior of the building will be covered with cement plaster on metal lath and rustic and brick veneer. Marble and tile will be used in the entrance vestibule. Plans are now being prepared.

FACTORY—2 story and base, brick and steel, \$35,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The building will be erected on Howard street near Fourth, and will cover a ground area of 165x155 feet. The entire building will be occupied by a large fruit preserving plant. Waterproof floors will be used in a number of places. There will be steam heat, freight elevators and a number of large vats. Interior finish will be of pine throughout. A portion of the building will be used for stables. Exterior on two street frontages will be faced with pressed

brick. Plans have been completed and figures taken. A general contract will be awarded shortly.

FLAT ALTERATIONS—3 story and base, frame, \$6,000. San Francisco. Architect, Charles Edward Hodges, Bankers' Investment Bldg., S. F. Owner, Prof. Hohfeldt. The building now located on Lake street near 4th avenue will undergo extensive alterations. There are at present three large flats contained in the building which will be rearranged for six modern apartments. The work will include new plastering, plumbing, painting and electric work as well as new interior finish. The exterior of the building will also be altered. Plans are being prepared.

FLATS—3 story and base, frame, \$5,000. San Francisco. Architect, O. E. Evans, 2367 Mission St., S. F. Owner, A. V. Dovenalo. The building, which has been designed to contain six flats, will be erected on Miguel street near Arlington. The lot has a frontage of 25 feet by a depth of 80 feet. Flats will consist of four rooms and bath each. Interiors will be finished in pine with some hardwood floors. Bath rooms will be finished in cement plaster. All living rooms will have a large open fire place with brick mantel. Tile will be used in the kitchens. Exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor. The owner is the market for all materials.

HOTEL—3 story and base. Class C construction, \$25,000. San Francisco. Architect, Charles E. J. Rogers, 24 California St., S. F. Owner's name withheld. The building will be erected on Golden Gate avenue near Hyde street, and will have a frontage on Golden Gate avenue of 48 feet and a depth of 68 feet 9 inches. The first floor will be arranged for stores and upper floors for hotel purposes. Plans provide for a total of 30 guest rooms and a number of baths. Interior finish will be of pine and hardwood. There will be steam heat and a hot water system. Bath rooms will have cement floors and tile wainscot. Marble, tile and terrazzo will also be used. Exterior of the building will be faced with cement plaster. Store will have plate glass display windows in patent store fronts. Plans are now being prepared.

HOTEL—7 story and base. Class A construction, \$125,000. San Francisco. Architect, A. R. Denke, Humboldt Bank Bldg., S. F. Owners, George Haas Realty Co. The building will be erected at the southwest corner of 5th and Stevenson streets and will cover a large area, the owners having recently secured additional property. There will be a number of stores on the first floor besides the hotel entrance, lobby and offices. Upper floors will be arranged for a total of 114 guest rooms, a number of which will have private baths. There will be a complete steel frame with brick exterior walls, faced with pressed brick and terra cotta. Plans provide for steam heat, elevator service, hot water system, vacuum cleaning plant and metal window

frames and sash. Interior will be finished in pine and hardwoods and ornamental plaster. Bath rooms will have cement floors and tile wainscot. There will be sidewalk doors, lifts and lights and patent store fronts. Plans are complete and figures are now being taken.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, F. L. McDowell, 630 40th Ave., S. F. The dwelling will be erected on 40th avenue and has been designed for a seven-room house with bath. All interior finish will be of pine. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

BUNGALOWS—3, 1 story and base, frame, \$1,400 each. San Francisco. Architect, none. Owner, James F. Hefferman, 59 Santa Marina avenue, S. F. These houses have been designed to contain six rooms and bath. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be large open fire places in the living rooms. Brick mantels are specified. Bath rooms will be finished in cement plaster. Some tile will be used in the kitchens. Exteriors will be covered with rustic and shingles. Plans are in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, Edward E. Young, 251 Kearny St., S. F. Owner, E. Glinley, 131 5th Ave., S. F. This dwelling has been designed for an eight-room house with bath and sleeping porch, and will be erected on 9th avenue north of Clement street. Interior finish will be of pine and hardwoods. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. Automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner. Work will be done by Day Labor.

STATE HIGHWAY WORK—Cost not stated. California. Engineer, State Highway Commission, Sacramento. Owners, State of California. The following are the low men on the six pieces of State Highway Work, bids for which were opened on June 30th. Contracts have not been awarded:

El Dorado County—State highway between Shingle Springs and El Dorado, five miles, water-bound macadam; Arthur S. Lyons and Ira N. Burke, Smith's Flat, lowest bidder, \$31,786.90; engineer's estimate, \$19,372.33.

San Mateo County—Grading two-mile strip between Cypress Lawn Cemetery and South San Francisco, lowest bid, Mahoney Bros., San Francisco, \$17,412.05 engineer's estimate, \$25,285.77.

Santa Clara County—Constructing road between Morganhill and Gilroy, seven and a half miles; E. O. Burge, Sacramento, lowest bidder; \$33,860.60; engineer's estimate, \$44,436.23.

Santa Barbara County—Construction of twelve miles of highway between Los Alamos and a point one and a quarter miles north of Bicknell Station; lowest bid \$91,148.50; by Mayer & Lewis of Venice; engineer's estimate, \$96,550.95.

San Luis Obispo County—Construction of highway between San Luis Obispo and Santa Margarita, six and a half miles, E. O. Burge, Sacramento, lowest bidder, \$53,333; engineer's estimate, \$46,211.53.

San Bernardino County—Construction of highway between the westerly boundary of the county and running by way of Ontario, six and a half miles; Benton & Pennebaker, Los Angeles, lowest bidder, \$37,851.10; engineer's estimate, \$49,266.12.

No road work is being ordered by the Commission until the money for its completion is available for use by the Commission.

WATER PIPE LINE—\$10,000. Yerba Buena Island, Cal. Engineer, Dept. of Yards and Docks, Washington, D. C. Owners, United States Government. Plans have been completed and figures are now being taken for the construction of a pipe line from Yerba Buena Island to Oakland. Bids will be opened on August 2nd. Plans can be secured from the Commandant of the Naval Training Station, San Francisco, or from the Dept. of Yards and Docks, Washington, D. C. An official proposal appears in another column of this issue.

STORES AND LOFT—2 story and base. Class C construction. Cost not stated. San Francisco. Architect, Theo Lenzen, Humboldt Bank Bldg., S. F. Owner, Mr. McGovern. This building will be erected on upper Market street near Van Ness avenue, and will cover a considerable ground area. The entire structure has been leased to A. Freed, a dealer in motor cycles. Interior will be finished in pine. There will be patent store fronts and plate glass windows. Metal window frames and sash will be used. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

OFFICE ADDITIONS—2, 3 story wings. Class A construction, \$125,000. San Francisco. Architects, Miller & Colmesnil, Lick Bldg., S. F. Owners, Metropolis Life Insurance Co. This work has been mentioned here before. At that time it was proposed to add to the height of the building, but this plan has since been abandoned, and two wings each 22½x94 feet will be constructed, one at each end of the building. There will be a complete steel frame with exterior walls of concrete and brick, faced with mat glazed terra cotta. Interior will be handsomely finished in hardwoods, marble and metal trim. There will be a basement and sub-basement. Plans will be completed and ready for figures within a month.

FURNISHING AND FABRICATING STRUCTURAL STEEL AND IRON—Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans and specifications for the furnishing and fabricating of the structural steel and iron work in connection with the construction of the Fine Arts Building have been completed and are now out for figures. Bids will be opened by the Buildings and Grounds Committee on

July 24th. Plans can be secured from the office of the Director of Works. An official proposal appears in another column of this issue.

FOUNDATION WORK—City Hall. Class A construction. Cost not stated. San Francisco. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owners, City and County of San Francisco. Plans for the foundation work, concrete footings and finishing excavation for the City Hall Building have been approved by the Board of Public Works. Bids are now being called for and will be opened on July 11th. Plans can be secured from the architects. An official proposal appears in another column of this issue.

Grass Valley P. O. Bids Are Opened.

Two Local Firms and One Sacramento Firm Bid on Work. Campbell & Turner Low Men.

(By Special Wire.)

Only three bids were received on June 30th by the Supervising Architect, Oscar Wenderoth at Washington, D. C., for the construction of the Grass Valley Post Office. All three bids were received from California contractors, two local firms and one Sacramento firm bidding. Alternative propositions were asked for, one for facing the building with limestone and the other for sandstone facing. Campbell & Turner of Sacramento were low at \$77,480. The following is a list of bids received by wire from Washington:

Grass Valley Post Office.

Gallagher & Wygant, S. F., Limestone, \$89,000; Sandstone, —
Campbell & Turner, Sacramento, Limestone, \$77,480; Sandstone, \$77,480.
B. J. Duffy, S. F., Limestone, \$89,189; Sandstone, \$89,189.

No contracts have been awarded.

OAKLAND AND ALAMEDA

APARTMENT HOUSE—3 story and base, frame, \$16,000. Oakland, Cal. Architect, Clay N. Burrell, Albany Block, Oakland. Owner Miss L. G. Simonsen. The building will be erected on 2nd avenue near 16th street. Interior has been arranged for two and three room suites with private bath rooms. Interiors will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. Plans provide for steam heat. Bath rooms will be finished in cement plaster. All suites will have open fire places and tile or brick mantels. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$6,000. Oakland, Cal. Architect, William J. Wilkinson, 809 Alleen St., Oakland. Owner, Mrs. M. J. S. Chase. The dwelling will be erected on Keith avenue west of Broadway, and has been designed to contain 10 rooms, baths, and sleeping porch. Interior finish will be of pine and hardwoods. Hardwood floors will be used throughout. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile and tile will be used in the kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$3,400. Oakland, Cal. Architect, none. Owner, George B. Davis, 2043 Rosedale Ave., Oakland. The dwelling will be erected on Linwood street near 38th, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be largely of pine with some hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

RESIDENCE—2 story and base, frame, \$10,000. Piedmont, Alameda Co., Cal. Architect, none. Owner, Dr. Fenton, 678 14th St., Oakland. This dwelling will be erected on Mace avenue, and has been designed to contain eight rooms, bath and sleeping porch. A garage will be erected on the rear of the lot. Interior finish will be of pine and hardwoods. Hardwood floors will be used in the principal rooms. Plans provide for a central heating system and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile with composition floors. Tile will also be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who is now taking figures on the work.

RESIDENCE—2 story and base, frame, \$3,500. Piedmont, Alameda Co., Cal. Architect, none. Owners, Western Union Home Builders, Oakland. The dwelling will be erected on Sunny-side avenue, and has been designed for a seven-room house with bath and

sleeping porch. Interior finish will be largely of pine. Hardwood floors will be used in the living room, dining and reception hall. There will be open fire places and furnace heat. Bath room will have tile wainscot. Mantel will be of brick. Tile will also be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Owners are now letting subcontractors.

BUNGALOW—1 story and base, frame, \$2,500. Piedmont, Alameda Co., Cal. Architect, none. Owners, United Home Builders 1762 Broadway, Oakland. The bungalow has been designed to contain six rooms and bath. Interior finish will be of pine with some hardwood veneer. Hardwood floors will be used in the main living rooms. There will be a large open fire place with brick or tile mantel. Bath room will be finished in cement plaster. Tile will be used in the kitchen. Exterior of the bungalow will be covered with rustic and shingles. Plans are complete and the work will be done by Day Labor.

BUNGALOW—1½ story and base, frame, \$3,000. Oakland, Cal. Architect, C. S. Schwartz, Hayward. Owner, M. V. Rogers. The dwelling has been designed for a seven-room house with bath and sleeping porch, and will be erected on 19th avenue between 23rd and 24th streets. Interior finish will be of pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

BUNGALOW—1 story and base, frame, \$2,500. Piedmont, Alameda Co., Cal. Architect, none. Owners, United Home Builders, 1762 Broadway, Oakland. The bungalow will contain five rooms and bath, and is to be erected at the southwest corner of Lake and Greenbank streets. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be a large open fire place in the living room with a brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic. Plans are complete and the work will be done by Day Labor.

ORNAMENTAL METAL WORK FOR CAMPANILE—Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Galen Howard, 602 Mission St., S. F. Owners, Regents of the University of California. Bids for the ornamental metal work on the Sather Campanile are being readvertised. New bids will be opened on July 16th. The official proposal appears in another column of this issue. No contracts on the other parts of this work have yet been awarded by the Regents.

SAN JOSE AND THE SANTA CLARA VALLEY.

RESIDENCES—1 and 2 story and base, frame. Cost not stated. San Jose, Santa Clara Co., Cal. Architect, none. The following Day Labor jobs are reported as about to be started in San Jose: W. M. Lewis, Mountain View, 1 story six-room frame cottage, cost, \$2,900; George Canguable, 225 North 32nd street, 1 story four-room cottage, \$1,000, and J. E. Weldon, 645 Ashbury, 1 story five-room cottage, \$2,300.

RESIDENCE—2 story and base, frame, \$40,000. Woodside, San Mateo Co., Cal. Architect, Henry C. Smith. Humboldt Bank Bldg., S. F. Owner's name withheld. The dwelling will be designed for a country home and will contain in the neighborhood of fourteen rooms, bath and sleeping porch. A garage will also be erected on the

property. Interior finish will be of pine and hardwoods. There will be a central heating system, probably steam. Open fire places will be used in several of the rooms. Hardwood floors are specified throughout. Bath rooms will be finished in tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be taken within a short time.

RESIDENCES—1 story and base, frame. Cost not stated. San Jose, Santa Clara Co., Cal.—Architect, none. The following Day Labor jobs, in addition to those previously mentioned, are about to be started in San Jose: L. A. Datto, Oak street, 1 story and base, frame, six-room cottage, \$1,750; J. H. Sullivan, 129 9th street, 1 story, frame cottage, \$1,900.

OFFICE—1 story, reinforced concrete, \$6,000. San Jose, Santa Clara Co., Cal. Architect, none. Owners, San Jose Water Co, 372 West Santa Clara Ave., San Jose. Plans are complete for an addition to the company's office. Interior will be finished in pine and hardwoods. The floor will be used. Plans provide for metal window sash and frames and modern plumbing. Exterior will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

CONTRACTORS EQUIPMENT.

Telephone Sutter 1675

38-40 NATOMA ST., S. F.

There will be space on the first floor for three pieces of apparatus, and upper floor will be arranged for sleeping quarters, reading room and chief's office. Interior will be finished in pine and hardwood. Special plumbing and electrical equipment will be installed. Exterior of the building will be faced with pressed brick. Plans can be secured from the City Clerk, City Hall Bldg., Sacramento. An official proposal appears in another column of this issue.

POST OFFICE WORK—Screens. Cost not stated. Sacramento, Cal. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids will be opened by the Supervising Architect in Washington, D. C. on July 10th for furnishing and installing screens in the Post Office building at Sacramento. Plans can be secured from the Supervising Architect, Oscar Wenderoth.

POST OFFICE—1 story and base, brick and stone, \$65,000. Grass Valley Nevada Co., Cal. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Only three bids were received on June 30th by the Supervising Architect, Oscar Wenderoth, at Washington, D. C., for the construction of the Grass Valley Post Office. All three bids were received from California contractors, two local firms and one Sacramento firm bidding. Alternative propositions were asked for, one for facing the building with limestone and the other for sandstone facing. Campbell & Turner of Sacramento were low at \$77,180. A complete list of these bids will be found under the heading of Sacramento,

Stockton and Northern California in this issue.

RESIDENCES—1 and 2 story, frame. Cost not stated. Sacramento, Cal. Architect, none. The following Day Labor jobs are reported as about to be started in Sacramento: E. A. Pierce, 35th and Park avenue, 3, 2 story, frame, \$7,500; Max Smith, 2821 Spagford avenue, 1 story, frame, \$2,400; Mrs. L. Zangerle 722 J street, frame garage, \$1,800; L. H. Jacob, 2212 L street, frame cottage, \$600, and G. C. Snyder, 2310 31st street, frame cottage, \$1,000.

Contracts Awarded.

H Stewart and James Geddes to

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

APARTMENT HOUSE—2 story and base, brick. Cost not stated. Fresno, Fresno Co., Cal. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, C. J. Craycroft. The building will be erected on Blackstone street and has been designed to contain four suites of four rooms and bath each. Interior finish will be of pine with some hardwoods. All suites will have wall beds. Bath rooms will be finished in cement plaster and tile. A central heating system will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LODGE HALL—6 story and base, reinforced concrete and steel, \$125,000. Fresno, Fresno Co., Cal. Architect's name withheld. Owners, Fresno Elks' Hall Association. Preliminary plans have been accepted by the Fresno Elks for a lodge hall and commercial building which will be erected on their property on Tulare street opposite the Rowell Building. No details of construction have been given out. Further mention of the work will appear in these columns as the plans progress.

HOTEL—2 story and base, brick, \$18,000. Fresno, Fresno Co., Cal. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. Owner, C. W. Musick. The building will be erected on J street near Merced and will cover an area of 50x102 feet. There will be stores on the first floor besides the entrance to the hotel. Upper floors will be arranged for 19 guest rooms and 4 baths. Interior finish will be of pine throughout. Considerable marble and tile will be used on the first floor. There will be plate glass store windows and patent store fronts. Hot and cold running water will be supplied to all rooms. Exterior of the building will be faced with pressed brick. Plans are now nearly complete and figures will be called for shortly.

SCHOOL—1 story and base, brick. Cost not stated. Laton, Fresno Co., Cal. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. Owners, Harwick School District. The building will contain four class rooms and an assembly hall. Interior finish will be of pine with some maple floors. A central heating system will be installed. A clay tile roof is specified. Exterior of the building will probably be faced with cement plaster. Plans are now being prepared.

SCHOOL—1 story, concrete, \$10,000. Chowchilla, Merced Co., Cal. Architect, William E. Redesen, Merced. Owners, Chowchilla School District. The building has been designed to contain 3 standard sized class rooms. Interior finish will be of pine throughout. No heat will be installed. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

DEPARTMENT STORE—2 story and base. Chas A construction, \$165,000. Fresno, Fresno Co., Cal. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owners, Gottschalk Department Store. All bids for this work which were opened a week ago have been rejected. Plans will be slightly revised and new figures will be called for at once.

STORES—2 story and base, brick, \$20,000. Bakersfield, Kern Co., Cal. Ar-

chitect, none. Owner, Alfred Harrell, Bakersfield. The building on I street between 19th and 20th streets, recently destroyed by fire, will be rebuilt at once. Plans for this work are now in the hands of the owner who will let all contracts.

STORES AND OFFICES—4 story and base, reinforced concrete. Cost not stated. Fresno, Fresno Co., Cal. Architect, R. E. Felchlin, Fresno. Owners, Holand & Holland. The building will be erected at the corner of Reno and L streets and will cover an area of 78x110 feet. The first floor will contain stores and a banking room. Second and third floors will be arranged for 59 modern offices. The fourth floor will contain a large lodge room. Interior finish will be of pine and hardwoods. A maple floor will be used in the lodge room. There will be steam heat and elevator service. Metal window sash and frames are specified. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

Contracts Awarded.

CLUB ROOMS—2 story and base, brick, \$31,000. Bakersfield, Kern Co., Cal. Architect, T. B. Wiseman, Bakersfield. Owners, Bakersfield Club. Contractor, D. A. Evans, Fresno. Contract price, \$34,000.

SCHOOL—1 story frame, \$5,777. Walnut School District, Fresno Co., Cal. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. Owners, Walnut School District. Contractor, J. H. Peak, Selma. Contract price, \$5,777.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, L. L. Jones, I. W. Hellman Bldg., L. A. Owner, Mrs. A. G. Tompkins. The building will cover an area of 56x115 feet and has been designed to contain 56 rooms, which will be arranged in two and three room suites. All apartments will have private baths and wall beds. Interior finish will be of pine. There will be a central heating system and vacuum cleaning plant. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owner, Mrs. Margaret Collier. The building will be erected on a corner site and will cover an area of 58x148 feet. Interior will contain 69 rooms arranged in two and three room suites with private baths. Interior finish will be of pine. Some hardwood floors will be used. Plans provide for steam heat, elevator service, a vacuum cleaning system and wall beds. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with brick veneer and cement plaster. Plans are complete and figures are now being taken.

BANK—1 story and base, reinforced concrete. Cost not stated. Fillmore, Ventura Co., Cal. Architects, Wiley & Davis, Story Bldg., L. A. Owners, Farmers' and Merchants' Bank of Fillmore. The building will cover an area of 150x60 feet and has been designed in the classic style. Interior finish will be of hardwoods, tile and marble.

There will be safe deposit vaults and coin vaults. Considerable steel will be used. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

CHURCH—1 story and towers, brick. Cost not stated. Long Beach, Los Angeles Co., Cal. Architect, Frank T. Klegley and T. Foster Ena, associated. Consolidated Realty Bldg., L. A. Owners, Roman Catholic Church. This work has been mentioned here before when the architects were first commissioned. Plans provide for a building 84x128 feet with two high towers of steel construction. The main auditorium will have a seating capacity of 220 people. Interior finish will be of pine and ornamental plaster. Exterior of the building will be faced with cement-plaster and pressed brick. Plans are complete and figures are now being taken.

CHURCH—2 story and base, reinforced concrete, \$25,000. Glendora, Los Angeles Co., Cal. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, Methodist Episcopal Church of Glendora. The building will cover an area of 76x100 feet and is designed in the classic style. There will be a main auditorium with a seating capacity of 550 people. Adjoining this there will be a large lecture room with a seating capacity of 220 people. Plans also provide for Sunday school rooms, pastor's study and social rooms. Interior finish will be of pine and ornamental plaster. A central heating system will be installed. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

FIRE HOUSE—2 story and base, brick. Cost not stated. Anaheim, Orange Co., Cal. Architect, City Engineer Steward, Anaheim. Owners, City of Anaheim. Plans for a two-story brick building have been completed and figures are now being called for by the City Clerk. Bids will be opened on July 24th. The building will be arranged to contain three pieces of apparatus on the first floor and sleeping quarters and reading room on the upper floor. Interior finish will be of pine throughout. A central heating system will be installed. Exterior of the building will be faced with pressed brick. Plans can be secured from the City Clerk.

FIRE HOUSE—2 story and base, brick. Cost not stated. Glendale, Los Angeles Co., Cal. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, City of Glendale. The building will cover an area of 50x76 feet and will contain four pieces of apparatus on the first floor. Upper floor will be divided into three rooms, baths and reading room. Interior will be finished in pine and hardwood. The exterior of the building will be faced with pressed brick. Plans are being prepared.

FACTORY—2 story and base, reinforced concrete. Cost not stated. Long Beach, Los Angeles Co., Cal. Engineer, George W. Harding, Washington Bldg., Long Beach. Owners, The Long Beach Improvement Co. The building will cover an area of 75x150 feet. The building has been designed for a planing mill and interior finish will be used only in the front portion. Plans have been completed and the work will be done by Day Labor.

GARAGE—1 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, none. Own-

ers, City of Los Angeles. Plans have been completed for a municipal garage which is to be erected on Pearl street near Marengo. The building will be large enough to house twenty-five machines. Interior will be finished in pine. A cement floor will be used. Metal window sash and frames are specified. Exterior of the building will be faced with cement plaster. Bids will be called for shortly.

HOTEL—1 story and base, brick and steel, \$10,000. Los Angeles, Cal. Architect, A. Featherstonhaugh, Ferguson Bldg., L. A. Owner, Joseph H. Call. The building will be erected on South Hope street and will have a street frontage of 50 feet and a depth of 165 feet. The first floor will be arranged for a large lobby, offices and store. Upper floors will be subdivided into 90 guest rooms, 21 private baths and 9 public baths. Interior finish will be of pine and hardwoods. There will be steam heat and elevator service. Bath rooms will be finished in tile and will have cement floors. A hot water system will also be installed. Plans are complete and in the hands of the owner who will let subcontracts on all parts of the work.

LIBRARY—1 story and base, brick. Cost not stated. Alhambra, Los Angeles Co., Cal. Architect, Frederick L. Roehrig, American Bank Bldg., L. A. Owners, City of Alhambra. Plans for this building, which was mentioned here when the architect was first commissioned to prepare plans, have been accepted and are now out for figures. Bids will be opened on July 12th. The building covers an area of 90x100 feet and is in the classic style. Interior finish will be of hardwood, marble and tile. Hardwood floors will be used throughout. There will be a central heating system. Metal shelves and metal window sash and frames are also specified. Exterior of the building will be faced with enamel brick. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, brick and frame, \$30,000. Beverly Hills, Los Angeles Co., Cal. Architects, C. H. Russell and F. Singluff, associated. Securities Bldg., L. A. Owner, Roland Bishop. The dwelling will contain 20 rooms, 5 baths and sleeping porches. Interior finish will be of pine, birch and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile. Exterior of the dwelling will be covered with brick veneer and rustic. Plans are nearly complete and figures will be called for shortly.

RESIDENCE—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, F. M. Tyler, Black Bldg., L. A. Owner, D. T. Althouse. The dwelling has been designed for a fourteen-room house with several bath rooms and sleeping porch. Interior finish will be of pine and hardwoods. Hardwood floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath rooms and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

PASSENGER STATION—1 and 2 story and base, Class A and C construction, \$250,000. Architects, Par-

kinson & Bergstrom, Security Bldg., L. A. Owners, Southern Pacific Co. The time for opening these bids has been extended from the 1st to the 8th. A complete list of the figures received for this work will appear in the next issue of the Building and Industrial News.

SCHOOL—1 story and base, brick and frame. Cost not stated. Bardsdale, Ventura Co., Cal. Architect, Honer W. Glidden, Wright and Callender Bldg., L. A. Owners, Willow Grove School District. The building will cover an area of 40x60 feet and will contain two class rooms, office and separate toilets. Interior finish will be of pine with some maple floors. A central heating system will be installed. Exterior of the building will be faced with brick veneer. Plans are being prepared.

SCHOOL—2 story and base, reinforced concrete. Cost not stated. Lancaster, Los Angeles Co., Cal. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Lancaster School District. The building will cover an area of 60x92 feet and will contain four class rooms, library and principal's office on the first floor. Upper floor will contain an assembly hall seating 300 people and domestic science rooms. Manual training department will occupy the greater portion of the basement. There will be a central heating system, pine and hardwood interior finish and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans are complete and bids will be opened on July 12th. Robert B. Cameron is Clerk of the School Board.

SCHOOL—2 story and base, reinforced concrete. Cost not stated. Fullerton, Orange Co., Cal. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Fullerton School District. All bids for the construction of this building have been rejected. Plans will be revised and new figures will be called. The lowest bid received was from the Sawtelle Construction Co. and was for \$50,990. This amount is above the amount available.

STORES AND LOFTS—5 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Barnett, Haynes & Barnett, Wright and Callender Bldg., L. A. Owner's name withheld. The building will be erected on Central avenue and will cover an area of 126x125 feet. Plans provide for five stories on the first floor and lofts above. There will be reinforced concrete floors and roof slabs. Two electric freight elevators will be installed, steam heat, metal window sash and frames and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

STORES AND OFFICES—2 story and base, reinforced concrete. Cost not stated. Riverside, Riverside Co., Cal. Architects, Kysor & Biggar, Wright and Callender Bldg., L. A. Owners, Riverside Abstract Co. The building will cover an area of 40x140 feet. The entire structure will be occupied by the owners. Interior will be finished in pine, hardwood, marble and ornamental plaster. Plans include steam heat, metal window sash and frame and fireproof vaults. Exterior will be faced with Utah stone and cement plaster. Plans are complete and figures are being taken.

STORES AND OFFICES—1 story and base, brick. Cost not stated. San Pedro, Los Angeles Co., Cal. Architect, E. H. Dorr, 1811 South Main St., L. A. Owner, N. O. Anderson. The building will cover an area of 25x75 feet and will be arranged for one store on the first floor and 27 offices on the upper floors. Interior finish will be of pine and hardwoods. There will be steam heat and elevator service. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken by the architect.

STORES AND OFFICES—14 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, J. Martyn Haenke and W. J. Dodd, Story Bldg., L. A. Owners, Home Builders. This work has been mentioned here a number of times before. Plans for the general construction of the building have been completed and figures are now being taken. The structure will be erected at the corner of 8th and Spring streets, and will cover an area of 117x105 feet. Construction will be fireproof throughout. There will be a complete steel frame, reinforced concrete walls and floors. Metal interior trim and metal window sash and frames will be used.

Contracts Awarded.

APARTMENT HOUSE—4 story and base, brick, \$40,000. Los Angeles, Cal. Architect, E. C. Thorne. Realty Board Bldg., L. A. Owner I. I. Dehail. Contractors, Miller-Stahl Construction Co., Hibernian Bldg., L. A. Contract price, \$40,000.

APARTMENT HOUSE—3 story and base, frame, \$40,000. Los Angeles, Cal. Architect, B. Cooper Corbett, Union Square Bldg., L. A. Owner, Charles H. Louis. Contractor, E. H. MacGibbon, Los Angeles Investment Bldg., L. A. Contract price, \$40,000.

APARTMENT HOUSE—3 story and base, frame, \$21,000. Los Angeles, Cal. Architect, C. Gault, L. A. Owner, Mrs. A. Burgwald. Contractor R. T. Laughlin, Lissner Bldg., L. A. Contract price, \$21,000.

APARTMENT HOUSE—4 story and base, brick, \$54,750. Los Angeles, Cal. Architect's name not given. Owners, Hackel & Gutterman. Contractor, A. E. Harshman, Story Bldg., L. A. Contract price, \$54,750. Work will not be started until July 22nd.

BANK—2 story and base, reinforced concrete. Cost not stated. Temecula, Riverside Co., Cal. Architects, Koerner & Paul, Broadway Central Bldg., L. A. Owners, Citizens' Bank of Temecula. Contractors Earl Remington Co., Broadway Central Bldg., L. A. Contract price not stated. Note: This contract includes bank fixtures.

BANK VAULTS, ETC.—\$98,000. Los Angeles, Cal. Architects, William Curlett & Son, Phelan Bldg., S. F., and Title Insurance Bldg., L. A. Owners, Merchants' National Bank. Contractors, Mosler Safe Co. Contract price, \$98,000.

BANK—2 story and base. Class A construction, \$50,000. Redlands, San Bernardino Co., Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, First National Bank of Redlands. Contractors, Los Angeles Planing Mill Co., 1812 Industrial St., L. A., general construction only. Contract price, \$16,650. This contract does not include plumbing, electric work, heating or vault work.

CHURCH—1 story and base, frame,

HOTEL—4 story and base, brick and steel, \$44,500. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. F. W. Sabich. Contractors, Alpeter, Hall & Alpeter, Ferguson Bldg., L. A. Contract price, \$44,500. Thomas Haverly Co., plumbing and heating. Contract price, \$8,400.

HOTEL—3 story and base, reinforced concrete, \$162,270. San Diego, Cal. Architect, Harrison Albright, L. A. Owners, J. D. and A. B. Spreckels Securities Co. Contractors, The Wurster Construction Co., Spreckels Bldg., San Diego. Contract price, \$162,270.

WAREHOUSE—5 story and base, reinforced concrete, \$47,000. Los Angeles, Cal. Architect, A. H. Daun, care of Board of Education, L. A. Owners, Board of Education. Contractors Davidson Construction Co., 16th and Tennessee Sts., L. A. Contract price, \$47,000.

RESIDENCE—2 story and base, frame, \$18,000. Montecito, Santa Barbara Co., Cal. Architect, A. B. Benton, 114 North Spring St., L. A. Owner, J. Langdon Erving Contractors, Kling Co., Union League Bldg., L. A. Contract price, \$18,000.

RESIDENCE—2 story and base, concrete and hollow tile, \$25,000. Los Angeles, Cal. Architect, Irving J. Gill, 913 South Figueroa St., L. A. Owner, Mary A. Banning. Contractors, Concrete Building and Investment Co., 913 South Figueroa St., L. A. Contract price, \$25,000.

ROUNDHOUSE—1 story and base, reinforced concrete, \$60,000. Los Angeles, Cal. Architect, none. Owners, Santa Fe Railroad Co. Contractors, Unit Construction Co., S. F. Contract price, \$60,000.

SCHOOL ADDITION—Brick construction, \$11,633. Santa Monica, Los Angeles Co., Cal. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Santa Monica School District. Contractor, J. L. Harrod, 1425 Berkeley St., Santa Monica. Contract price, \$11,633. Conroy & Winterbottom, Alhambra, plumbing, \$1,018.

SCHOOL—2 story and base, brick, \$34,000. Santa Monica, Los Angeles Co., Cal. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Santa Monica School District. Contractor, Leonard Shaff, Santa Monica, general construction, \$29,283. W. J. England, Santa Monica, plumbing, \$3,550. Bids for the heating were taken under advisement.

OIL RESERVOIR—Reinforced concrete. Cost not stated. Coalinga, Fresno Co., Cal. Engineer, Engineering Department California Oilfields Co., Coalinga. Owners, California Oilfields Co. Contractors, Healy-Tibbets Construction Co., S. F. Contract price not stated.

STORES AND OFFICES—12 story and base. Class A construction, \$200,000. Los Angeles, Cal. Architects, William Curlett & Son, Phelan Bldg., S. F., and Title Insurance Bldg., L. A. Owners, Merchants' Fireproof Building Co. Contractors, C. J. Kubach Co., Van Nuys Bldg., L. A. Contract price, \$200,000.

LOTS—1 story and base, reinforced concrete, \$120,399. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. F. W. Sabich. Contractor, Carl Leonard, H. W. Hellman Bldg., L. A. Contract price, \$120,399.

DEPARTMENT STORE—4 story and base, reinforced concrete, \$72,900. Phoenix, Ariz. Architects, Trost & Trost and Royal W. Lescher, Phoenix, Owners, New York Store. Contractors, Arizona Construction Co., Mesa. Contract price, \$72,900.

NEWSPAPER OFFICES—2 story and base. Class A construction, \$400,000. Los Angeles, Cal. Architects, J. Martyn Haenke and W. J. Dodd, Story Bldg., L. A. Owner, William Randolph Hearst. Contractors, Alta Planing Mill Co., 850 McGarry St., L. A., general construction only. Contract price, \$170,000.

SEATTLE AND WASHINGTON.

POLICE AND FIRE STATION—2 story and base, brick. Cost not stated. Seattle, Wash. Architect, Daniel Huntington, Seattle. Owners, City of Seattle. Plans are being prepared for a combination police and fire station which will be erected on 4th avenue near West Alaska street. Interior will be arranged for two pieces of apparatus besides the police quarters. Interior finish will be of pine and hardwoods. A central heating system will be installed. There will be special plumbing and electrical apparatus. Exterior of the building will be faced with pressed brick. Plans are being prepared.

RESIDENCE—2 story and base, stone and concrete, \$100,000. Eburne, B. C. Architect, Raphael A. Nicolais, Rogers Bldg., Vancouver. Owner's name withheld. The dwelling has been designed for a country home and will contain in the neighborhood of sixteen rooms, a number of baths and conservatory. Interior finish will be of hardwoods. A steam heating system, vacuum cleaning plant and hot water heater will be installed. Bath rooms will be finished in tile. Hardwood floors will be used throughout. There will be open fire places and brick and marble mantels. Exterior of the house will be faced with stone. Plans are nearly complete and figures will shortly be called.

IRRIGATION WORK—\$5,000,000. Kittitas Irrigation District, Wash. Engineer, Frank C. Kelsey, Journal Bldg., Portland. Owners, Kittitas Irrigation District. Plans and specifications have been completed by Frank C. Kelsey, consulting engineer, Journal Bldg., Portland, for the irrigation project for the Kittitas Reclamation District. The work will require an expenditure of \$5,000,000 and bids for the construction of the work will be let in one general contract when the bonds for the work can be sold. The project will require over 100,000 yards of concrete, 4,500 tons of steel and the construction of several bridges will be required; one of these will be 600 feet long and will have three steel spans, this bridge will carry one of the twelve siphons. This siphon will be eight feet in diameter and one mile long. The total length of the twelve siphons will be over three miles, while a large tunnel is also included which will be 2½ miles long. The Government has already

completed one dam at Lake Kachess and another is in course of construction at Lake Keechelus. These dams will furnish the district with water. The headworks is about one-half mile east of Easton, Wash., and will cover a large area in and around Ellensburg. The estimated cost of the construction work is placed at \$4,000,000, making an additional \$1,000,000 for other work. The plans and surveys have already been completed. Mr. Kelsey stated that he thought no action would be taken until after the first of the year on account of the poor market for the bonds.

THEATRE—3 story and base. Class B construction, \$125,000. Victoria, B. C. Architect, J. M. Warren, Victoria. Owner, Alex. Pantages. The building will be erected on a corner site and covers a large area. A main auditorium seating 1,000 people is provided besides a large balcony and fourteen boxes. Construction will be of brick and steel. An exceedingly ornamental elevation has been designed. Interior will be finished in hardwoods and ornamental plaster. There will be steam heat and a modern system of ventilation. Indirect system of lighting will be used. Considerable metal work is specified. Exterior of the building will be faced with cement plaster and pressed brick. Plans are being prepared.

BRIDGE—Frame construction. Cost not stated. Seattle, Wash. Engineer, Engineering Department Great Northern R. R. Co., Seattle. Owners, Great Northern R. R. Co. Plans have been completed by this company for a frame bridge 65 feet long which will carry its tracks over Government Way between Gilman avenue and 27th avenue. Bids will be called for at once. Plans can be secured from the Engineering Department of the Great Northern.

SEA WALL CONSTRUCTION—Cost not stated. Port Angeles, Wash. Engineer, City Engineer Port Angeles. Owners, Port Angeles. The City Council has passed an ordinance calling for the construction of a sea wall 100 feet wide and over a mile in length. Bids will be called for at once. Full particulars can be secured from the City Clerk, Port Angeles.

LODGE HALL—3 story and base, reinforced concrete, \$30,000. Bremerton, Wash. Architect's name not given. Owners, Bremerton Eagles' Hall Association. All bids received for this work have been rejected and plans will be revised. The building was designed with stores on the first floor and offices and lodge rooms on the upper floors. Plans provide for steam heat. Interior will be finished in pine and hardwoods. Exterior of the building will be faced with cement plaster. New figures will be taken as soon as the revision of the plans is complete.

HOSPITAL BUILDINGS—Brick and concrete construction. Cost not stated. Seattle, Wash. Architect's name not given. Owners, City of Seattle. Bids were opened for the Tuberculosis Sanitarium project at Richmond Heights, and bids have been referred to the Superintendent of Buildings. The following were low on the administration building and hospital. Administration Building: (a) Interlocking walls; (b) brick walls; (c) concrete walls. Jenkins & Jones, Hankley Block, (a) \$73,300; (b) \$71,129; (c) \$73,576. Hospital—M. J. Hansen Co., Glace Block, (a) \$52,500; (b) \$52,500; (c) \$52,500.

Contracts Awarded.

DAM—Concrete and steel, \$687,110. Seattle, Wash. Engineer's name not given. Owners, City of Seattle. Contractors, Nettleton, Bruce & Eachbach, American Bank Bldg., Seattle. Contract price, \$687,110. This contract calls for the construction of the Cedar River Dam.

PORTLAND AND OREGON.

DOCK CONSTRUCTION—Timber and concrete. Cost not stated. Portland, Ore. Engineer, Engineering Department Commission of Public Docks, Worcester Bldg., Portland. Owners, City of Portland. The Commission of Public Docks, Portland, Ore., is now calling for bids for the construction of Dock No. 1, a pile and timber dock, which is to be erected on the west side of the Willamette River, between 15th and 18th streets. Bids will be opened on July 21st for the work. An official proposal will be found in another column of this issue. Plans show a structure 1075 feet over all and 112 feet wide. A portion of the dock, 303 feet long, will be constructed in two levels and the balance in but one level. A one-story shed covering the entire length of the dock will also be erected, having a clean span of 100 feet. The two-level section will be provided with six mechanical ramps and the one level section with one power ramp. Dock will be of heavy mill construction with concrete fire walls and ends and will be equipped with automatic sprinklers. Also included in the work will be the construction of a massive concrete bulkhead wall running the full length of the dock with retaining walls at the ends. The contract also covers the construction of a new ferry boat landing. Complete plans and specifications together with full instructions to bidders may be obtained on application to the Commission of Public Docks, 503 Worcester Bldg., Portland, Ore.

LODGE HALL—3 story and base, brick, \$50,000. McMinnville, Ore. Architect, C. C. Robbins, Ainsworth Bldg., Portland. Owners, McMinnville Masonic Hall Association. An architect has just been selected to prepare plans for this work and details of the building are not yet available. There will probably be stores on the first floor and offices and lodge rooms on the second and third floors. Plans will provide for a central heating system. Interior finish will be of pine and hardwoods. Exterior will be faced with pressed brick. Further mention will be made of the work as the plans progress.

HOTEL—3 story and base, brick. Cost not stated. Portland, Ore. Architect, W. B. Bell, Worcester Bldg., Portland. Owners, Fisher & Thorsen. The building will be erected at the southwest corner of Lowndale and Washington streets and will cover a considerable area. The first floor will be arranged for stores and upper floors for hotel rooms. Plans provide for steam heat and a hot water plant. Interior finish will be of pine throughout. Bath rooms will have cement floors and the wainscot. There will be plate glass display windows and patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being given.

BRIDGE—Steel construction. Cost not stated. Roseburg, Ore. Engineer, County Engineer, Roseburg. Owners, Douglas County. Bids are now being taken and will be opened on July 12th by the County Supervisors for the construction of a steel bridge over the South Umpqua River. The bridge will consist of four 175-foot spans, and is of the Curved Chord Pratt Truss design. The bridge will have a clear roadway of 20 feet and a clear headroom of 15 feet. E. H. Lenox is the County Clerk. Plans can be secured from that office.

Bids Wanted For Portland Docks.

Public Dock Commission Will Open Bids on July 21st for First of Extensive Improvements.

The Commission of Public Docks, Portland, Oregon, are now calling for bids for the construction of Dock No. 1, a pile and timber dock, which is to be erected on the west side of the Willamette River, between 15th and 18th streets. Bids will be opened on July 21st for the work. An official proposal will be found in another column of this issue.

Plans show a structure 1075 feet over all and 112 feet wide. A portion of the dock, 303 feet long, will be constructed in two levels and the balance in but one level. A one-story shed covering the entire length of the dock will also be erected, having a clean span of 100 feet. The two level sections will be provided with six mechanical ramps and the one level section with one power ramp. Dock will be of heavy mill construction with concrete fire walls and ends and will be equipped with automatic sprinklers. Also included in the work will be the construction of a massive concrete bulkhead wall running the full length of the dock with retaining walls at the ends. The contract also covers the construction of a new ferry boat landing.

Complete plans and specifications together with full instructions to bidders may be obtained on application to the Commission of Public Docks, 503 Worcester Building, Portland, Oregon.

Theodore Hardee As Head Liberal Arts.

Chief of Department is a Man of Wide Experience in Exposition Matters And Competent.

The appointment of Theodore Hardee as the head of the Liberal Arts Department of the Exposition has met with general approval. As it contains the widest field of all the exhibits to be given at the Exposition it is highly important that the chief of that division be a man skilled in his particular line of work.

Liberal Arts is one of the most attractive departments of the division of exhibits and will occupy all of one of the main exhibit palaces and comprise such interesting groups as the various printing processes, engraving and

Veneered Panels that
ARE good-----order

Good Pane's are always cheaper

When you buy panels you naturally expect to pay a reasonable price for them.

WYBRO panels are not alone reasonable in price, but you can depend upon their **absolute quality** and everlasting goodness. Ask for our list of 168 varieties of WYBRO panels.

lithographing, books and publications, manufacture of paper, photography, maps and geographical apparatus, instruments of precision, scales and measures, coins and medals, medicine and surgery, chemical and pharmaceutical arts, musical instruments, theatrical appliances and equipment, electrical methods of communication, telegraphy and telephony, civil and military engineering, models, plans, and designs for public works, architecture, and architectural engineering. These fifteen groups are divided into 121 classes, and each class covers a distinct feature of the group in which it is placed.

HAS WIDE EXPERIENCE.

Hardee has enjoyed a wide experience in exposition practice. He was principal assistant to Walter B. Stevens, who was the general secretary and also director of exploitation for the St. Louis World's Fair of 1904. Prior to the opening Hardee spent considerable time abroad for that great undertaking, circling the globe as special commissioner with John Barrett, the commissioner-general to foreign countries.

While in St. Louis Hardee also acted as St. Louis representative of the Lewis and Clark Exposition of Portland, where he subsequently became assistant to the president. In this capacity he planned and directed all the special events and entertained at that very successful exposition.

Hardee first became associated with the Panama-Pacific International Exposition in a voluntary capacity during the spring of 1910. As secretary for the executive council of the finance committee he was of material assistance in that active campaign which resulted in raising the exposition subscription fund. He entered the exposition's employ in September, 1911, and last winter acted as secretary to President Moore during that official's visit to Washington. Upon their return Hardee was appointed executive officer of the commission extraordinary to Europe and accompanied that important mission to the fifteen European capitals.

Liberal Arts Exhibit.

Architecture and Engineering to be
Feature of Exposition.

The Panama-Pacific International Exposition in 1915 will display in a most comprehensive manner the achievements and activities of mankind during the last decade. The ex-

hibits covered by the Official Classification for the Department of Liberal Arts will be notably interesting and significant.

The advance in Architecture, its allied arts and Engineering, has excelled a potent influence upon the improvement of conditions in economic life, and the exhibits portraying these advances should be especially complete and characteristic. They comprise drawings, models and photographs of Architecture and Engineering in their various branches, plans followed in the improvement of rivers and harbors, waterworks and sanitation, irrigation and road making methods, specimens of artificial stone and kindred building material, processes used in testing structural materials, and special contrivances for safety, comfort and convenience in buildings.

Among the most interesting exhibits in modern architecture for study and admiration here in 1915 will be the splendid structures and landscaping of the Exposition itself and the remarkable construction of the City of San Francisco. In engineering the crowning achievement is the Panama Canal which will be illustrated by working models. These exhibits will be housed in the Palace of Liberal Arts. They must of necessity be **SELECTIVE** in character because of the comparative limitation of space which, by reason of wider participation and the world's more extended productivity, will be more restricted than at previous International Expositions. This will emphasize the advisability of applying immediately for exhibit space which is free.

We should be glad to know that you will give serious consideration to the desirability of your participation. The keen interest manifested by both American exhibitors and foreign governments, assures an Exposition of the most representative international character. Twenty-six foreign countries have already accepted the invitation of the President of the United States to participate, and thirty-five States have likewise signified their intention to take part.

The opening of the Panama Canal means the development of new avenues of commerce, the extent of which it is impossible to overestimate. The Universal Exposition at San Francisco in 1915 will afford a rare opportunity to bring the skill of the Architect and the Engineer, and the structural materials utilized by them, to the world's particular notice. Blank applications for space and other information prepared for the guidance of exhibitors, will be forwarded on request.

MOVING TO LARGER QUARTERS.

Simpson Bros., proprietors of the Phoenix Sidewalk Light Company, have been doing such a successful business that larger and better quarters were necessary for the transaction of their business and are now located at 221 Ritch street near Third and Bryant. Telephone Sutter 4829.

This firm has just finished the California Tool Works on Beale street near Howard, and about to start the large job on Fillmore street from Turk to Eddy. They have just secured the job for the Pacific Gas and Electric Company Building at Sacramento. They are practical workmen and work entrusted to their care will be properly attended to.

GOLDEN GATE BRICK COMPANY SECURE CONTRACT FOR CLAY PARTITION TILE FOR STATE ARMORY.

The Lewis A. Hicks Company yesterday let a contract to the Golden Gate Brick Company to supply the clay partition tile which will be used in the San Francisco State Armory at Fourteenth and Mission Streets.

The contract calls for approximately one hundred thousand square feet of tile with a rapid delivery of the material. The Golden Gate Brick Company will place the tile on the job within six weeks time.

This contract is noteworthy when the amount of material and short delivery time are considered. The Golden Gate Brick Company is supplying the Standard Oil Company and the Lindgren Construction Company with their tile as well as minor jobs about the city and the interior towns. Their factory has a large capacity.

Bind your copies of the Building and Industrial News in PERMANENT BOOK FORM

We have succeeded at last in securing a really practical binder. The Building and Industrial News contains a great deal of technical and statistical information that many of our readers find worth saving for future reference. There is no better way of preserving it than using the

"BIG BEN" BINDER

which preserves the magazine in permanent book form. This binder is handsome and durable, and makes the permanent filing of magazines as easy as filing ordinary papers. It opens flat like a regular book, and comes in fine art cloth with the name of our Journal stamped in gold on the front cover and back. For persons who desire to

Save These Valuable Articles

this binder is just the thing, as it holds several numbers of our Journal and can be used again indefinitely year after year, simply by taking out the old Journals and inserting the new ones as they come to you.

By making special arrangement with the manufacturers of this best binder that has ever been put on the market, we are able to furnish them to you for **ONLY \$1.00 EACH.**

Merely send us your name and address and say: "Send us your binder. I enclose \$1.00," and we will send the binder promptly all charges prepaid.

Send in your orders now and begin saving the statistical and technical information, articles and valuable data, that will be published in The Building and Industrial News this year.

BOOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking. **IS YOUR ADVERTISEMENT AMONG THESE?**

Otis Elevators

Sustain Architects' Endorsement

The Architect who specifies Otis Elevators identifies himself and his client with the most thorough Elevator organization in the world--- an organization with fifty-seven years' experience and success in building Elevators.

Our Elevators --- of every type---from the simplest Hand-power Elevators to the most elaborate Electric and Hydraulic Installations--- are the world's most finished Elevator products

We maintain Branches in eighty-one cities in the United States the distribution of which offers to users of Otis Elevators an inspection and Repair Service unapproached by any other Elevator Company.

Your clients and their engineers who use Otis Elevators will receive the benefit of our broad engineering experience and the unequalled facilities of our "Service Department." We are always glad to co-operate with them and with you to the fullest extent.

We Make

Gearless Traction Elevators. Worm Gear Traction Elevators. Drum Type Elevators. All Types of Hydraulic Elevators. Freight Elevators of Every Description. Automatic Residence Elevators. Electric Dumbwaiters. Incline Railway Hoists. Blast Furnace Hoists. Escalators. Inclined Freight Elevators. Gravity Conveyors, Etc.

Let us send you our latest books giving detail description of Otis Elevator products.

Eliminate Form Work in your concrete construction

The cost of form work doubtless has often caused you to make alterations in plans you would have liked to carry out. It is especially so in curved or arched construction—admittedly the strongest and most pleasing type.

Self-Sentering will enable you to plan roofs, floors, ceilings, walls, partitions, etc., without form work of any kind. It is adapted with equal facility to flat, inclined or curved surfaces. Concrete roofs of any character may be constructed with it. Floors can be planned with arched slab construction on spans up to 12' in width. Partitions built with it need be only 2" thick—a great saving of floor space in large lofts.

Self-Sentering is a new reinforcement and centering combined. It is manufactured in sheets 28" wide and up to 12' long, or curved in the factory to any desired radius. It is made up of a series of cold-drawn heavy ribs connected with the most efficient form of expanded metal, all cut and drawn from one sheet of special steel.

Write for our Fireproofing Handbook

We shall be glad to send you a complimentary copy on request. It is a handsome 80-page illustrated book, published for Architects, Engineers and Contractors. It will give you concisely all the facts you want to have on file regarding Self-Sentering.

Editorial Comment.

One warm Sunday since the completion of the Geary Street road from the Ferry to the Cliff House Beach and that road's receipts for the day amount to practically \$2000. This looks like municipal ownership is not such a bad thing after all. And added to that the public has a little comfort in riding on its own line. For the cars are built with some regard for the comfort of the passengers. The cane upholstering provides comfortable seats. The contrivances for holding on to the straps are comfortable conveniences for those who must stand. There are ample and spacious platforms for entrance and exit. There are open compartments where one can ride and get the open air and where a man can finish his cigar, if he happens to be smoking. The car is lighted with Tungsten lights and if one desires to read at night there is abundance of light.

So also the cars make good time on the trip as the wide aisles, exits and entrances permit the crowds to be handled expeditiously. If there were nothing else to be gained it would pay to have a municipal line just to demonstrate what can be done when the interests of the public are at all considered.

The Pay-as-you-enter cars of the United Railroads are about as comfortable as a cattle car. Passengers are admitted about as conveniently as crawling through a knothole and are discharged about as rapidly as going through a window. There is no place to smoke. There is a single side seat running the length of the car. The whole thing is made to compel people to stand up, about four deep, the entire length of the car. In such a packed condition a person in the center attempts to get off at a cross street and it takes him about fifteen minutes to effect his escape. So it takes him about three times as long to get to or from his work as the case may be, in order that he may help to pay the dividend on about 50 millions of watered capital of the United Railroads.

The Geary street road has compelled the United Railroads to imitate the style of its cars. They are poor imitations. It is true, but they furnish a great many more comforts than the old ones. So that even now the good effect of having a practical demonstration is felt.

The bond issue election next month should meet with the unqualified approval of the electorate. We need more municipal lines. If we are to handle any part of the exposition crowds or get any consideration at all from the trolley trust we must have a

means of fighting them. The municipal road is the thing. Vote for the extension at the next election.

The Architectural Review for April, 1913, is a Special Hotel number. It contains 178 pages, principally pictures of the most important hostilities of the country and is an important addition to the architectural publications of the country and is a splendid example of the printers' art. The halftones are particularly good.

Among the illustrations are views of the Palace, Fairmont, and St. Francis Hotels in San Francisco and the Hotel Oakland in Oakland, both in perspective and detail. Considering the important notice which these local hotels receive in this New York publication the local builders may feel some just pride in their work.

The encampment at Gettysburg has come and gone. Fifty years have elapsed since that memorable three days' battle. But a handful of the survivors of the great struggle remained to meet upon the memorable battlefield and the coming years will soon claim even those few. The address of President Wilson at the encampment was a forcible reminder of the change of history and the rapid succession of events in everyday life. July 3, 1863, was fought the greatest battle of the Civil War on the field of Gettysburg, Pennsylvania. It marked the northern limit of Lee's invasion of the North. Four months later the immortal Lincoln delivered on the field the greatest memorial address ever given. Then the country was in the throes of a civil war. Differences of opinion and the question of African slavery had caused the different partisans to resort to the barbarous use of arms to settle a dispute. The result was one of the greatest wars in history, an unprecedented loss of life and treasure.

The generation that fought the battle of the Civil War has passed. Some of the scars of battle still remain. The South is still "solid" in its political vote. But on the field of Gettysburg, the North and the South have met in friendly commemoration and a Democratic President has appealed to the people to meet the new duties that a new time demands. In this there is a lesson to the thinking man and a fulfillment of Lincoln's prayer. The men who fell at Gettysburg did not die in vain, and those who survived Gettysburg have not lived in vain; for, by the sacrifice of the one part and the devotion of the other, this nation, under God, has had its new birth of freedom, and government of the people, by the people, and for the people, has not perished from the earth.

Consideration Of Highway Construction Methods.

By F. N. Bingham, C. E.*

*Consulting Engineer, Portland, Ore.
Written for Pacific Municipalities.

There is probably no subject before the American people that is of such vast importance as that of permanent highway construction; that this fact is being recognized is everywhere in evidence. Legislative bodies are appropriating large sums of money for roads, civic bodies are everywhere discussing roads, and the press of the entire country is devoting pages to this problem. It is the great problem of today, the building of successful highways that will embody those standard forms of construction that have proven their worth by actual tests of time and traffic and that will combine the following essential features named in the reverse order of their importance: non-slipperiness, low first cost, sanitation, ease of traction, low cost of maintenance. The principal reason for this problem presenting so many difficulties is the wide range in local conditions, which are climatic, nature and amount of the traffic, the availability of materials, drainage problems, and last, to my mind the most important, the lack of standardization in methods of roadway construction.

Manufacturers and producers of materials that can be used in roadway construction have for a long time realized this immense outlet for their materials, with the result that almost every conceivable theory upon which a cheap roadway might be built has been advanced. This has naturally resulted in great confusion relative to the merits of the different types of roadway and a still greater lack of standardization in methods of roadway construction which leads to experimenting, and thus we have types of roadways being built that are not based upon standard forms of construction. It is no longer a question of getting the taxpayers to stand the expense but it is a serious question as to the type of roadway to select and the manner in which it is built.

A permanent hard surface roadway is necessarily an expensive improvement, but, in considering this expense, too often the first cost is given the most serious consideration, when, in view of the fact that a hard surface roadway must be considered as a permanent improvement, the cost of maintenance must, to be in accordance with ordinary good judgment, be given the chief consideration, and no type of roadway building should be adopted, except in a small, experimental way, that is not based on standard forms of construction that have proven their value by actual tests of time and traffic. The principles involved in the economic construction and maintenance of highways and railroads may be considered as being the same. A chief engineer of a modern railroad system looks, first of all, to the cost of maintenance in the building of his work, and will expend vast sums in crossing his ties in building immense culverts and drainage systems to protect his roadbed, all with a view

of decreasing maintenance cost and lengthening the life of his road, and any class of construction which is any class as being in the experimental stages, he does not adopt to any extent until he has proven to him beyond a doubt, by practical tests of time and traffic, that these experiments are worthy of general adoption.

It is to be regretted that in highway construction there is often a tendency to disregard the proven standard forms of construction, and, in order to increase the number of miles improved, the most absurd theories will be adopted for their construction, not in a small, experimental way, but many miles of roadway wearing surface will be put down that, to say the least, are in the experimental stages. When a county, district or state adopts a type of construction that eventually proves unsatisfactory, it reflects on highways and highway engineers in general, and seriously hurts this great project.

It seems to me that it would be far more rational to construct a smaller number of miles of roadway, and build them according to what we know by long experience has proven satisfactory, than to make an appropriation stretch over a large number of miles and, in so doing, adopt a type of wearing surface that has not proven itself, and has little to commend it but a low first cost.

It is perhaps true that the ideal roadway has not been reached, but we have had proven to us beyond a doubt that certain principles are necessary in the ideal roadway wearing surface, namely: resilience, elasticity, noiselessness, sanitation, stability, wearing qualities, ease of maintenance and a reasonable first cost cost, and the sacrifice of any of these fundamental principles of successful roadway building in order to reduce the first cost is poor economy; therefore, these principles should be constantly borne in mind when considering the cheap, experimental types of roadway wearing surface that as yet have little to recommend them aside from their low first cost.

In searching the records of highway construction, both in this country and in Europe, for data on standard types of construction, we find that the macadam type of roadway, with several variations, has been used more than any other, and it has answered the purpose of a cheap type of roadway for a long time; but with the advent of the power driven vehicles, roadway engineers were quick to realize that something besides the ordinary macadam wearing surface was required to stand that rapidly increasing class of traffic, as it was readily seen that a rapidly moving pneumatic tire created sufficient action to first loosen and then remove the finer mineral particles in the wearing surface. This destroys the fundamental principle of the pavement by leaving the remaining wearing surface with a high percentage of voids, which decreases its stability to such an extent that disintegration rapidly takes place.

Among the first to recognize this fact was the Massachusetts State Highway Commission. In their report of 1905 they say: "Since the advent of the automobile the macadam type of roadway construction is a thing of the past," and in their report of 1906 they emphasize this fact stronger than before. The high cost of maintenance each year was making this heretofore cheap type of road the most expensive. Data collected from 37 counties show that in the period of less than five years, during which the automobile came into general use, the cost of the yearly maintenance on macadam roads increased almost 100 per cent, and these are conservative figures. This high yearly maintenance, which added to the first cost, makes the macadam type of construction more expensive than a permanent hard surface pavement. At a recent meeting of the American Society of Civil Engineers, Col. James W. Howard, the well-known road expert, called attention to the fact that states had been borrowing money on 20-year bonds to build macadam roads, when the roads would be worn out long before the bonds were paid.

The use of heavy asphaltic oil in the construction of macadam roadways has been tried extensively, with the hope that the oil would bind or cement the material particles together, and thus have the stress of traffic come upon the several surfaces of the stone, the action of the oil, it is hoped, would be to keep the particles of stone from being dislodged.

Practice has shown that the results obtained by the use of heavy oil in the construction of macadam roadways has been more or less of a failure in producing a permanent hard surface roadway. The reason for this is, in the first place, there is very little cementing value to an oil. Its real value is to take the place of water and keep the stone moist and, while we speak of an oil containing 80 per cent of asphalt, the percentage of asphalt as it applies to the cementing value of the oil, does not mean much, because the remaining 20 per cent acts as a solvent for the 80 per cent asphalt, and the ratio between the cementing value of asphaltic oil and an asphaltic cement is not in the same proportion as the percentage of asphalt in the oil.

Aside from the lack of cementing value in asphaltic oils, another reason for the failure of this type of construction is the difficulty of applying the oil in definite and uniform quantities.

It is essential that any cementing material be applied in definite uniform quantities, and should reach all surfaces of each and every particle of the mineral aggregate. This is practically an impossibility in oil macadam construction when we consider that the oil is applied to the stone by sprinkling or pouring. The amount of oil is usually ununiform, and does not thoroughly coat the stone. As stated before, the various sizes of stone and mineral matter must be in such proportion as will produce the densest possible mass in itself before the ad-

dition of the oil, and if this is attempted in the macadam type of construction there is great difficulty in getting the oil to penetrate into the stone, which sometimes accounts for an excess of oil on the surface, which is known as bleeding; however, this condition is more apt to follow an ununiform application of oil; the unsatisfactory and ununiform results obtained by this method of construction force us to turn to the asphalt or bituminous concrete wearing surface, where the mixture is properly graded, treated and mixed in accurate, definite proportions before it is laid.

It is the writer's belief, and this belief is shared by many of the most prominent roadway engineers in this country and in Europe, that a bituminous concrete wearing surface with certain variations in thickness and foundation is the best type of roadway construction known today, and will eventually be adopted as a standard for roadway construction.

In the construction of this type of roadway the usual standard methods of preliminary grading and drainage is applicable, and we have first to consider the base or foundation that will support the wearing surface.

The first principle to be considered in any class of construction is a suitable foundation to carry the load imposed upon it. Different types of wearing surface demand different types of base or foundation. What is known as the standard asphalt mixture, which is composed largely of sand, with a large percentage of voids, is naturally unstable in itself, and must depend on a rigid concrete base for its support, while in the case of a true bituminous concrete wearing surface composed largely of broken stone of sufficient size to support the traffic in itself, so graded as to eliminate the voids, we have a mixture that has strength and stability within itself and does not demand so rigid a base; in fact, we have millions of yards of bituminous concrete wearing surface laid on a bituminous base withstanding all sorts of conditions of climate and traffic, year after year, with highly satisfactory results.

A portland cement concrete base is undoubtedly a standard form of base under all types of wearing surface, regardless of the fact that some types of wearing surface may not demand it. However, the practice of using a temporary or inadequate wearing surface on a concrete base is not in accordance with good construction principles, and must necessarily result in much disappointment and very high maintenance.

An erroneous idea is often advanced in justification of a heavy expenditure for a base and the use of temporary or experimental wearing surface, with the idea that, after the wearing surface is gone the base still remains as good as ever. Theoretically, this is true, but in the case of the ordinary concrete base with a temporary wearing surface, we find that after the wearing surface is gone and it comes to resurface it, the experience has been in the past that by the time the money is available for resurfacing, the concrete is badly worn, so that it is necessary to spend a large amount of money in repairing the base. Repairs on pavements are never made until the road is in such bad condition that repairs are demanded, and in this type

of construction it is then too late, so far as saving the base without expensive repairs is concerned, and repairs to a concrete base is very expensive in proportion to its first cost, as it is a well-known fact that concrete is hard to repair. A badly disintegrated spot has to be entirely cut out and a new section put in, as a so-called skin patch or plaster will not bond or unite to the old surface, and, even when a new section is put in, the joints do not unite, and thus we have an opening allowing water to get in between the base and wearing surface. The idea has been advanced that it is not necessary to repair the worn spots on the concrete base, but, in resurfacing with the permanent bituminous concrete wearing surface, let the new wearing surface fill the holes. The fallacy of this argument lies in the fact that uniform and maximum compression is essential to a perfect bituminous concrete pavement, and it is apparent that if the bituminous wearing surface were two inches in some places and three or four inches thick in others, the compression would be neither uniform or sufficient in the thicker spots.

Now, in considering a wearing surface that will have the qualifications heretofore mentioned, we must realize that no hit-or-miss methods will produce such a bituminous concrete wearing surface.

It has been demonstrated by past experience that no bituminous wearing surface less than two inches in thickness will successfully withstand traffic, and even at this thickness it must be carefully and scientifically prepared and put down, as a variance from whatever formula is necessary to meet local conditions will produce poor results.

Municipal engineers and others interested in the scientific laying of bituminous concrete pavements maintain chemists and well-equipped laboratories, and by this method keep constant watch on the mixtures and materials, and are repaid by uniform and highly satisfactory results. They have established, beyond a doubt, that to produce a stable, elastic, waterproof, traffic-resisting wearing surface, either on a concrete or bituminous base, it is necessary to heat and mix the bituminous cement and mineral aggregate, be it sand, gravel or crushed rock, in definite proportions in a mechanical mixer, and then spread while hot over the base to such a depth that, after compression, the resulting wearing surface will be of uniform thickness from one and one-half to three inches, as the conditions may require. Even the time and manner of rolling are very important. That the desired bituminous wearing surface can be obtained by painting a base with a thin coating of asphalt, or other bitumen, which in itself has no traffic resisting qualities, into which has been incorporated approximately 50 per cent of the mineral filler, or by sifting uncertain quantities of sand into it until it shall have a thickness of one-quarter to three-quarters of an inch, is a mistake, and not in accordance with scientific methods of construction.

In properly constructed bituminous concrete wearing surface the mineral aggregate is so proportioned, ranging from particles of the larger size to that of the finest powder, so that the voids or spaces between the larger

size are filled with the mineral particles of the next smaller size, and so on, until the mineral matter in itself reaches the greatest possible degree of density, and they in reality withstand the strain and stress of traffic, the asphalt cement merely binding or holding the various mineral particles together.

This type of wearing surface can be put down on either a concrete or bituminous base, as the case may demand, with every assurance that it will be as near perfection as we know how to build roads, and at a cost, maintenance considered, in accordance with the most economical practices; and, most important of all, it is not an experiment, but has proven its worth by years of actual wear.

In searching for expert opinion on the ideal type of road construction, I have been forcibly impressed by the fact that, out of a large number of engineers and paving chemists interviewed on this subject, I found none but what said: "A well-constructed bituminous concrete wearing surface, all things considered, is probably the best type of hard surface roadway in existence today."

Few men are better qualified to speak on that subject of highway construction than Mr. Otto Klien, director of the testing laboratory, and roadway expert for the city of New York. Mr. Klien spent several months in investigating pavement and roadway building on the Pacific Coast. He says in effect: "My experience on the Pacific Coast teaches me that it would be difficult to improve on the bituminous concrete pavements I saw in Portland. They are among the finest I have ever seen in the world."

There is no one man in this country who has done more toward perfecting the science of pavement and roadway building than the well-known chemist, engineer and author Mr. Clifford Richardson of New York. For years his opinion has been considered, both in this country and in Europe, authority on roadway building, and his books and writings on this subject are to be found in all well-equipped libraries. To those of us who are interested in the study of roadway building along its most scientific lines, the following extract from a letter the writer recently received from Mr. Richardson cannot but help but have great weight: "During the twenty-five years that I have been engaged in the paving industry, bituminous pavements and roadways have grown consistently in favor, notwithstanding all the attacks that have been made upon them, and it is my opinion that this growth will continue in the future, as far as standard forms of construction are concerned. Naturally, mushroom growths will appear from year to year, which are not based on standard forms of construction, and these eventually disappear. It is astonishing to what a small degree our highway engineers benefit by the experience of the past and continue to chase phantom and impossible forms of construction."

The art of building bituminous roadways is rapidly becoming an exact science. The experimental stages are a thing of the past. We have examples of this type of construction that have given satisfaction for over thirty years, and many improvements have been made during that time. There has been discovered certain underly-

ing principles regarding both the mineral aggregate and the asphalt, or bituminous cement, that govern the life and behavior of the bituminous pavements under varying conditions of climate and traffic.

We of the Pacific Coast are exceptionally fortunate in having at our hands large quantities of all the materials to build bituminous concrete pavements. The vast deposits of oil in California, with its heavy asphaltic base, makes the production of an asphaltic cement under proper supervision that is now well understood, the equal of any asphaltic cement to be found in the world. This, with waterway competition in regard to transportation, makes this asphalt available at economical prices to all Pacific Coast districts. Large deposits of sand, gravel and rock are to be found in almost every locality. These materials combined with climatic conditions that are ideal for bituminous concrete, makes this type of construction the logical solution for the problem of roadway construction, especially

when we must continually bear in mind the all-important problem of maintenance.

When we look with pride at some particular pavement or roadway that has successfully withstood the wear and tear of traffic for many years, how little thought we usually give to its first cost. What concerns us most is the manner and methods of its construction, the class of materials used, and what has been its maintenance cost.

The old saying, "Quality is remembered long after cost is forgotten," applies most directly to pavements and roadway building, and nothing will retard this great movement so much as to adopt types of construction that are in the experimental stages, and upon which the cost of proper maintenance will be so high as to soon equal that of a standard bituminous concrete wearing surface laid on a suitable base, which time has proved to be a thing of beauty and a joy forever.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$17,000. Architect, Frank S. Holland, 100 Haight St., S. F. Owner's name withheld. The building will be erected on Fillmore near Hayes street, and has been designed to contain fifteen suites of two, three and four rooms. All apartments will have private bath and wall beds. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the principal rooms. Plans provide for Hector gas steam grates. Bath rooms will be finished in cement plaster. Exterior of the building will be faced with cement plaster on metal lath. Some tile and mosaic will be called for in the specifications. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$20,000. Architects, Rousseau & Rousseau, Monarch Bldg., S. F. Owners, David E. and William H. Kelley, 609 14th St., San Rafael. This building has been mentioned here before when plans were first started. The structure will be erected on Pine street west of Jones and has been arranged for a number of two and three room apartments with private bath. Interior finish will be of pine and redwood. Some elm panels will be used. There will be steam heat and a hot water supply. An automatic elevator will be installed. All suites will be equipped with wall beds. Entrance of vestibule will be finished in marble and mosaic. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will let all contracts.

SAN FRANCISCO—Apartment house, 3, 3 story and base, frame, \$8,000 to \$11,000. Architect, Albert Farr, Foxcroft Bldg., S. F. Owners, Metropolitan Investment Co., 333 Bush St., S. F. These buildings have been mentioned here before. Working drawings have been completed and work is about to

be started under the Day Labor system. One apartment house will be erected on Hyde street, 92 feet north of Sacramento, and will cost \$9,000. It will cover a lot 28x90 feet and contain six suites. Another building will be erected on Washington street, 148 feet east of Van Ness avenue, and will cover an area of 35x100. This building will cost \$11,000, and will contain six apartments. The third building will have a frontage of 25 feet and a depth of 74 feet, and will be erected on Sacramento, 77 feet west of Hyde. This building will also contain six apartments and will cost \$8,000. Interior finish in all the buildings will be of pine and redwood with some elm panels. Hardwood floors will be used. There will be central heating systems and hot water plants. Wall beds are specified for all apartments. Exteriors will be covered with rustic metal lath and plaster and shiplap. Plans are now in the hands of the owners who will do the excavating, concrete work and carpentry by Day Labor, and will sublet all other parts of the work. Materials for the work are now being purchased.

Contracts Awarded.

SEATTLE, WASH.—Apartment house alterations, 3 story and base, brick, \$30,000. Architect, J. Merrill Brown, Northern Bank Bldg., Seattle. Owners, Nebraska Investment Co. Contractor, John Kauffman, 605 8th avenue, Seattle. Contract price, \$30,000.

BANKS.

FOREST GROVE, ORE.—Bank, 3 story and base, brick and stone. Cost not stated. Architect, W. B. Bell, Worcester Bldg., Portland. Owners, First National Bank of Forest Grove. The building will be erected on a corner and will cover an area of 50x62 feet. There will be one small store besides the banking rooms on the first floor. Upper two floors will be arranged for modern offices. Interior of

the banking rooms will be finished in pine, hardwood, marble and ornamental plaster. Plans provide for special bank fixtures, coin and safe deposit vaults. There will be steam heat. Marble and tile will be used in the halls on the upper floors. The exterior of the building will be faced with a local stone. Plans are being prepared and will be out for figures in a few weeks. Further mention of the work will be made at that time.

BRIDGES AND DAMS.

TACOMA, WASH.—Bridge, steel construction, \$300,000. Engineer, Engineering Dept. O. W. Ry and Navigation Co. Owners, Oregon-Washington Railway and Navigation Co. President Farrell has announced that plans are nearly complete for a large steel constructed bridge over the tide flats waterway to connect with the company's present depot. The president's announcement also carried with it the news of extensive track and freight yard improvements, and the construction of a reinforced concrete freight depot.

CHURCHES.

LOS ANGELES, CAL.—Mission house, 3 story and base, brick. Cost not stated. Architect, Robert Orr, Van Nuys Bldg., L. A. Owners, Christian Woman's Board of Missions. The building will be erected on Wall street and has been designed for a Japanese Mission. First floor will contain offices, class rooms and chapel. Second floor has been arranged for 20 sleeping rooms and the third floor for six three room apartments with private bath. Basement will contain kitchen and dining room. There will be steam heat. Interior finish will be of pine throughout. Exterior of the building will be faced with pressed brick. Plans are being prepared.

ROSEBURG, ORE.—Church, 1 story and base, concrete and frame, \$15,000. Architects, Tourtellotte & Hummel, Rothenick Bldg., Portland. Owners, First Methodist Church of Roseburg. The building will contain a large main auditorium, Sunday school rooms, pastor's study, social hall and banquet room. Interior finish will be of pine and ornamental plaster. Art glass windows will be used. There will be a central heating system. Exterior of the building will be covered with cement plaster on metal lath. Plans will be complete and ready for figures within a week or ten days.

Contracts Awarded.

WHITTIER, CAL.—Church, 1 story and base, brick and concrete, \$15,000. Architect's name not stated. Owners, Roman Catholic Church. Contractor, J. H. Linkletter, 102 West Philadelphia St., Whittier. Contract price, \$15,000.

PHOENIX, ARIZ.—Church, 2 story and base, steel and stone, \$90,000. Architects, Geugler Construction Co., Phoenix. Owners, St. Mary's Catholic Church. Contractor, Ridley, Phoenix. Contract price, \$90,000.

COURT HOUSES.

SAN FRANCISCO—City Hall, Class A construction, \$1,500,000. Architects, Bakewell & Brown, 251 Kearny St., S.

F. Owners, City and County of San Francisco. Bids for the foundation work, concrete piers and additional excavating were opened at the Friday meeting of the Board of Public Works. Bids of the three lowest men will probably be considered. These bids were as follows: Sound Construction Co., \$14,882; Richard Doering, \$15,827, and B. T. Owsley, \$17,500. Besides the general bid seven unit prices were asked for. A complete list of these bids will be found under the heading of San Francisco in this issue.

FACTORIES & WAREHOUSES.

SACRAMENTO, CAL.—Packing plant, 1 and 2 story, reinforced concrete, \$310,000. Architects, Seidler & Hoen, Sacramento. Owners, Swanton & Son, Sacramento. The owners have just announced their intention of building a large plant on the north bank of the American River north of Sacramento. The present plant, together with the bams and corrals will be removed and the site subdivided for city lots. Details of the construction have not been announced. Mr. Swanton has returned from a trip to Chicago where arrangements for special machinery were completed. Further mention of the work will be made in these columns at an early date.

LOS ANGELES, CAL.—Factory, 1 and 3 story and base, reinforced concrete. Cost not stated. Architects, H. J. Knauer and A. R. Hutchinson, 159 So. Western Ave., L. A. Owners, Homer Motors Co. The building will be erected on San Fernando Road and will cover an area of 150x200 feet. A portion of the building will be one story high and the balance three stories. There will be a concrete first floor, elevators and metal window sash and frames. Interior of the front portion will be finished in pine. Exterior will be faced with cement plaster. The industry is being financed by the sale of stock. Only preliminary plans have been prepared.

LOS ANGELES, CAL.—Brew house, 4 story and base, mill construction. Cost not stated. Architect, Griesser, 1014 Schiller Bldg., Chicago. Owners, Maler Brewing Co. The building will be an addition to the company's present plant, and will cover an area of 60x100 feet. Interior will be largely finished in tile and glazed brick. Exterior will be faced with red repressed brick. Special brewing machinery and equipment will be ordered in the east. Plans and specifications for the building will be completed and forwarded to Los Angeles within a week or ten days.

SEATTLE, WASH.—Warehouses, 2 3 story and base, reinforced concrete, \$175,000 each. Engineer, Paul P. Whitman, Port of Seattle Commission, Central Bldg., Seattle. Owners, Port of Seattle Commission. One of the warehouses will be erected on Lander street and will be 90x223 feet, and the other will be erected on Stacey street, covering an area of 90x201 feet. A third temporary warehouse of frame construction will be erected on Whatcom street, and will be 300 feet long. Plans will be completed for the buildings early in August. Exteriors will be faced with brick.

Contracts Awarded.

LOS ANGELES, CAL.—Warehouse, 5 story and base, reinforced concrete,

\$147,000. Architect's name not given. Owners, Los Angeles Board of Education. Contractors, Davidson Construction Co., 16th and Tennessee Sts., L. A. Contract price, \$147,000.

FIRE HOUSES.

SACRAMENTO, CAL.—Fire house, 1 story, brick and frame, \$7,000. Architect's name not given. Owners, City of Sacramento. Bids for the construction of the Oak Park fire house opened by the Commissioners, show W. C. Keating of Sacramento low at \$6,150. A contract has not been awarded. A list of the other bidders follows: Murrell & Haley bid \$6,739, and Robert Pondee asked \$11,000.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$6,000. Architect, J. Devenenzil, 1069 Union St., S. F. Owner, Carmelo Arieta. The building will be erected on Union street east of Grant avenue and will have a street frontage of 24 feet 10 inches and a depth of 53 feet. Interior has been arranged for six apartment flats of three and four rooms. The interior finish will be of pine and redwood. Some hardwood floors will be used. Entrance will be finished in mosaic and tile. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with shiplap and rustic. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,000. Architect, Charles Fantoni, 916 Kearny St., S. F. Owner, W. W. Jameson. The building will contain two modern flats and is to be erected at the southwest corner of Washington and Priest streets. It will have a frontage of 21½ feet on Washington street and 37½ feet on Priest. Flats will consist of five and six rooms and bath. Interior finish will be of pine and redwood with some hardwood floors. There will be open fire places and tile mantels. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with rustic and shiplap. Entrance will be finished in tile and mosaic. Plans are complete and the work will be done by Day Labor.

BERKELEY ALAMEDA CO., CAL.—Flats, remodel and additions, 3 story, frame, \$8,000. Architect, F. D. Voorhees, Central Bank Bldg., Oakland. Owner's name withheld. The work will consist of remodeling the present building and adding one story. A store will occupy the first floor. Upper floors will be arranged for five flats. Interior finish will be of pine and redwood with some hardwood floors. New plumbing, plastering, electric work and trim will be used in the old portion of the building. Exterior will be covered with rustic. Mosaic and terrazzo will be used. Plans are complete and figures are being taken.

GARAGES.

SEATTLE, WASH.—Garage, 3 story and base, reinforced concrete, \$250,000. Architects, Haynes & Cantin, Melhorn Bldg., Seattle. Owners, Madison Square Building Co. The building will cover an area of 240x360 feet. Construction will be fireproof throughout, with reinforced concrete walls and

floors and metal lath and plaster par- will be used for storage purposes. titions. The first floor and basement Upper floors will contain the offices, machine shops and a body and painting factory. There will be large elevators, sprinkler system and metal window sash and frames. Exterior of the building will be faced with cement plaster. Plans are now being prepared. Further mention will be made of this work as the plans progress.

LOS ANGELES, CAL.—Garage, 1 and 2 story and base, brick. Cost not stated. Architect, none. Owner, C. Will Riden, 210 West Eighth St., L. A. The building will be erected on Olive street and will cover an area of 50x163 feet. There will be sales rooms in the front portion of the building and storage space and a machine shop in the rear. Interior finish will be of pine and hardwood. Metal window sash and frames will be used. Floor will be of cement. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owner who is now taking figures on the work.

Contracts Awarded.

SANTA BARBARA, SANTA BARBARA CO., CAL.—Garage, 1 story and base, steel and reinforced concrete, \$21,000. Architect, none. Owners, El Camino Real Garage. Contractors, Magnus Johnson and H. E. Bohlin, Santa Barbara. Contract price, \$21,000.

GOVERNMENT WORK AND SUPPLIES.

Pearl Harbor, H. T., Hospital Building.

The bid of the Spaulding Construction Co., Portland, Ore., \$256,607 in amount, has been accepted for the construction of naval hospital buildings at Pearl Harbor under bids opened June 10.

A Bascule Bridge on Isthmus.

The Isthmian Canal Commission will soon call for bids to cover the design, fabrication, delivery, and erection of a bridge piers to be constructed by the commission) of a single-track, single-leaf, movable-span or bascule bridge over the French canal. The point where the bridge is to be erected is on the railroad connecting Cristobal coal terminal freight yard with Cristobal coal dock.

Extending Water System, Fort Worden.

The contract for furnishing 5,993 lin ft galvanized water pipe for extending the water distributing system at Fort Worden, Wash., has been awarded to James H. Coyne, of Port Townsend, Wash., at \$1,700.

Pearl Harbor, H. T., Gunners' Quarters.

The following bids were received by the chief, bureau of yards and docks, Navy Department, Washington, D. C., June 28 for constructing two gunners' quarters at the U. S. naval magazine, Island of Kahuia, Pearl Harbor, H. T.:

Item 1, price for building complete, 2, deduct from item 1 if under floors be omitted from building.

Lord-Young Engineering Co., Honolulu, H. T., item 1, \$13,880; 2, \$210.

B. F. Duffey, 3673 15th street, San Francisco, Cal., item 1, \$15,810; 2, \$900.

Spaulding Construction Co., Chamber of Commerce, Portland, Ore. Item 1, \$16,700; 2, \$55.

W. N. Concannon Co., San Francisco, Cal., item 1, \$18,600; 2, \$140.

Grass Valley, Cal., Construction.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., June 26, for the construction, complete, of the U. S. post office at Grass Valley, Cal.:

Bid 1. B. J. Duffey, San Francisco, Cal.

2. Campbell & Turner, Sacramento, Cal.

3. Gallagher & Wygant, San Francisco, Cal.

For using limestone for all stonework, except where granite or marble is specified—Bid 1, \$89,989; 2, \$77,480; 3, \$89,600.

For using sandstone for all stonework, except where granite or marble is specified—Bid 1, \$89,989; 2, \$77,489.

For alternate A (substituting terra cotta for reinforced concrete for floor construction, as specified), add—Bid 1, \$1,000; 2, \$1,480.

For alternate B (substituting reinforced concrete for plank roof of main building), add—Bid 1, \$3,000; 2, \$920.

For alternate C (substituting Keene's cement for plastering all walls, piers, etc., in first story, as specified), add—Bid 1, \$300; 2, \$310.

For alternate D (painting all plastered surfaces in finished rooms of basement, first story and mezzanine, as specified), add—Bid 2, \$726.

For alternate E (omitting cast-iron grilles from entrance doors and transoms as specified), deduct—Bid 2, \$150.

A Five-Hundred-Ton Forging Press.

The Isthmian Canal Commission will soon purchase a 500-ton high-speed forging press, capable of working down an 18-inch billet, designed to operate normally with compressed air at a pressure of from 85 to 95 pounds per square inch. The press must be designed so it will operate with steam at 100 pounds pressure per square inch instead of air should such action be desired at any time. The press shall be piped for both air and steam operation. It shall be of the four-column type and shall include the press proper, together with an intensifier and low-pressure tank, necessary valves, pipe, etc. The total stroke of the forging die shall be not less than 30 inches, with a power of forging strokes of not less than 5 inches for the maximum. It must be possible to obtain the full-pressure stroke at any point of the 30-inch travel. Simplicity of operation, reliability of control, and rapidity of adjustment and operation will be given special weight in making the award, economy of operation is essential, as well as accessibility of all parts for examination, adjustment and repair. The specifications, which will be ready in the course of a few days, will give full details.

Light House Service Lumber.

The following bids were received by the light house inspector, eighteenth district, San Francisco, Cal., on May 18, for furnishing lumber:

J. W. Schouten & Co., \$2,182.30.

Hart-Wood Lumber Co., San Francisco, Cal., \$2,076.55, accepted.

Olson-Mahony Lumber Co., \$2,662.50.

J. H. Kruss, \$2,250.70.

Santa Fe Lumber Co., \$2,144.03.

Fort D. A. Russell, Bakery.

The contract for remodeling bakery, building No. 266, Fort D. A. Russell, Wyo., has been awarded to R. M. La Fontaine, of Cheyenne, Wyo., at \$1,889.

Pearl Harbor, Officers' Quarters.

The following bids were received by: chief, bureau of yards and docks, Navy Department, Washington, D. C., June 28 for the construction of two officers' quarters, Nos. G and H, at the naval station, Pearl Harbor, H. T.:

Item 1, work complete; 2, deduct from item 1 for omitting screens; 3, deduct from item 1 for omitting bay windows in libraries and installing triple windows, omitting bookcases from libraries, omitting towel closets; 4, add to item 1 for two coats of stain instead of one; 5, add to item 1 if all joints between widths of compo board be covered with selected fir strip.

Spaulding Construction Co., Portland, Ore., item 1, \$19,875; 2, \$600; 3, \$150; 4, \$100; 5, \$150.

W. N. Concannon Co., Monadnock Building, San Francisco, Cal., item 1, \$25,95; 2, \$428; 3, \$160; 4, \$260; 5, \$300.

R. J. Duffey, San Francisco, Cal., item 1, \$21,990; 2, \$100; 3, \$200; 4, \$350; 5, \$220.

Lord-Young Engineering Co., Honolulu, H. T., item 1, \$19,440; 2, \$756; 3, \$300; 4, \$400; 5, \$400.

Purchase of an Extension Planer.

Isthmian canal circular No. 784 calls for bids for furnishing one extension planer, open side. The planer is to be installed in the permanent shops at Balboa and is to be of sufficient size to handle work 96 inches high, 132 inches wide between housings, and 24 feet long. The machine shall have a main housing on the right-hand side and an outer housing on the left-hand side. The outer housing shall be adjustable to and from the planer cable and so arranged that it can be entirely removed, the cross rail run back in its housing, and the machine operated open-sided on work that will not pass between the housings. With the outer housings removed, the machine must have a planing capacity of 96 inches high and 96 inches wide from the main housing. The motor shall be direct geared to the motor without the use of belting. The specifications contain further necessary details.

—HALLS & SOCIETY BLDGS.—

SAN FRANCISCO.—Lodge hall, 3 story and base, steel and concrete, \$75,000. Architects, Charles Paff & Co., Merchants' Exchange Bldg., S. F. Owners Marline Hall Association. Architect Paff has just been commissioned to prepare plans for a lodge hall for the Marline Association, which will be erected on their property on Clay street east of Drumm. The building has been designed with a complete steel frame and foundations and walls heavy enough to support several additional stories. The building will have a frontage on Clay street of 50 feet and will extend through to Commercial street, a distance of 120 feet. There will be stores on the first floor and lodge halls, social rooms, banquet hall and offices on the upper floors. Plans provide for elevator service, steam heat, a vacuum cleaning system and metal window sash and frames. Exterior will be faced with mat glazed

and polyerome terra cotta. Plans are now being prepared.

SAN FRANCISCO.—Carpenter's hall, 3 story and base. Class C construction, \$40,000. Architects, Charles Paff & Co., Merchants' Exchange Bldg., S. F. Owners, Carpenters' Hall Association. This organization has just sold their holdings together with their building in the Civic Center, and have purchased a new site at the corner of McCoppin and Valencia streets. The new building will cover an area of 75x90 feet and will be of the Class C type of construction. There will be three stores on the first floor, second floor will be arranged for an assembly room, office of the locals, card rooms, billiard hall and social rooms. The third floor will contain two large lodge rooms and committee rooms. Special features will be installed for the storing of tools, etc. Interior finish will be of pine and hardwoods. There will be a central heating system and elevator service. Exterior of the building will probably be faced with pressed brick. An estimated cost of \$40,000 is placed on the work. Plans are now being prepared for the work.

AUBURN, PLACER CO., CAL.—Club house, 2 story and base, reinforced concrete, \$12,000. Architect, Frank S. Holland, 100 Haight St., S. F. Owners, Tahoe Club. The building will be erected on one of the principal corners of the town of Auburn and will cover an area of 34x100 feet. There will be stores on the first floor and club rooms above. Interior of the second floor will be finished in pine and hardwoods. There will be a hot water heating system. Hardwood floors will be used. Exterior of the building will be faced with cement plaster. Stores will have large display windows in patent store fronts. Plans are nearly complete and figures will be taken within a few days.

MEDFORD, ORE.—Lodge hall, 2 story and base, brick. Cost not stated. Architect, Clark, Medford, care of Elks' Hall Association. The building will contain stores on the first floor and offices and lodge rooms on the upper floors. Mr. Clark has only just been commissioned to prepare the plans and details of the work are not yet available. Mr. Clark is not a practicing architect and correspondence with him will have to be carried on in care of the owners.

Contracts Awarded.

TILLAMOOK, ORE.—Lodge hall, 2 story and base, brick, \$20,000. Architect, E. E. McClaran, Lumber Exchange Bldg., Portland. Owners, Tillamook Masonic Hall Association, Contractors, French & Parelius, Builders' Exchange, Portland. Contract price, \$20,000.

HOSPITALS.

ASTORIA, ORE.—Hospital, 2 story and base, brick and concrete, \$25,000. Architects, Sutton & Whitney, Lewis Bldg., Portland. Owners, Town of Astoria. The plans call for a T shape building 40x75, with a wing in the rear 10x10. The ground floor will be used for a laundry, kitchen, dining room and large store room. The first floor will contain three dormitories, two lavatories and the superintendent's quarters. The second floor will contain sick wards, operating room, bath, doctors' rooms and quarters for ma-

trons and nurses. Interior finish will be of pine and hardwood. Steam heat and a hot water system will be installed. Considerable marble and tile are specified. Exterior of the building will be faced with pressed brick and cement plaster. Plans are complete and figures are now being taken. Bids will be opened on August 4th. Plans can be secured from the architects or from the City Clerk of Astoria.

SPRINGFIELD, ORE.—Hospital, 3 story and base, reinforced concrete. Cost not stated. Architect not selected. Owner, Mrs. R. M. Baker, Springfield. Preliminary arrangements are being made for the construction of a modern hospital 38x60 feet. Interior will be arranged for twelve private rooms, four wards, operating room and office. The four wards will have a total of 50 beds. Interior finish will be of pine. There will be a central heating system. Exterior will probably be faced with cement plaster. Only preliminary sketches have been made.

SEATTLE, WASH.—Isolation hospital, 2 story, frame, \$15,000. Architect, Huntington, Seattle. Owners City of Seattle. The building is to form a part of the institution at Richmond Heights. The building will be composed of two wings each 32x15 feet, and an administration building 37x55 feet. One wing will contain two wards and separate room, and the other four wards. Plans will be ready for figures by August 10th.

SANTA ANA, ORANGE CO., CAL.—Hospital, 2 story and base, reinforced concrete, \$45,000. Architect, Frederick H. Eley, Harvey-Finley Bldg., Santa Ana, Owners, Orange County. The building will cover an area of 48x92 feet. Construction will be fireproof throughout, with reinforced concrete walls, floors and roof slabs. Interior will be arranged for wards and private rooms. Interior finish will be of pine. Tile will be used extensively in the operating room. There will be steam heat and elevator service. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken. Bids will be opened on August 5th. Plans can be secured from the architect or from the County Clerk.

Contracts Awarded.

SEATTLE, WASH.—Hospital administration building, 4 story and base, reinforced concrete, \$73,900. Architect, Huntington, Seattle. Owners, City of Seattle. Contractors, Jenkins & Jones, Hinkley Bldg., Seattle. Contract price, \$73,900. This is the administration building for the Richmond Heights group.

SEATTLE HARBOR, W. T.—Naval hospital, 3 story and base, reinforced concrete, \$256,607. Architect, Department of Yards and Docks, Washington, D. C. Owners, United States Government. Contractors, Spaulding Construction Co., Portland, Ore. Contract price, \$256,607.

HOTELS.

SAN FRANCISCO—Hotel, 6 story and base, steel and reinforced brick, \$65,000. Architect, G. Albert Lansburgh, 709 Mission St., S. F. Owner, A. Elsenberg. The building will be erected on the north side of Sutter street

between Jones and Leavenworth. Plans provide for a total of 90 guest rooms, 65 per cent of which will have private baths. Besides the guest rooms there will be a large lobby, office and ladies' parlor on the first floor. Interior will be finished in pine and hardwoods with tile, marble and ornamental plaster used in the office and lobby. There will be steam heat, elevator service, vacuum cleaning system and hot water system. Exterior of the building will be faced with pressed brick and terra cotta. Bath room will have cement floors and tile wainscot. Plans are now being prepared.

STOCKTON, SAN JOAQUIN CO., CAL.—Hotel, 2 story and base, brick, \$10,000. Architect, Walter King, Elks' Bldg., Stockton. Owners, Simon Jacobs & Co. The present brick building at the corner of San Joaquin and Church streets will be entirely remodeled. There will be stores on the first floor and upper floor will be subdivided into hotel rooms. Work will require new plastering, painting, plumbing and electric work. A hot water system will be installed. Exterior of the building will be faced with cement plaster. A new steam heating system will also be installed. Plans are being prepared.

SUSANVILLE, LASSEN CO., CAL.—Hotel and stores, 1 story and base, reinforced concrete, \$100,000. Architect, none. Owner, B. A. Carpenter, Susanville. The completion of the new railroad through Susanville has caused a demand for better hotel facilities. The new building will be erected on a corner site and will cover an area of 120x120 feet. There will be a number of stores besides the hotel office, lobby and dining room on the first floor. Upper floors will contain in the neighborhood of 120 guest rooms and baths. Interior finish will be of pine and redwood. Tile will be used in the bath rooms. There will be steam heat and elevator service. Metal window sash and frames will be used. Exterior of the hotel will be faced with cement plaster. Plans will shortly be completed.

RIVERSIDE, RIVERSIDE CO., CAL.—Hotel additions, 2, 4 story and base, reinforced concrete. Cost not stated. Architect, Myron Hunt, Hibernian Bldg., L. A. Owner, Frank Miller, Glenwood Mission Inn. These additions have been mentioned here before. One building will be 48x100 feet and the other 40x70 feet. The first floors will contain dining rooms, exhibit rooms and curio rooms. Upper floors will be arranged for 27 guest rooms, all of which will have private baths. Steam heat will be furnished from the general plant. Exteriors will be faced with cement plaster. Clay tile roofs will be used. Work will be done by Day Labor under the direction of Stanley Wilson, Riverside.

BANNING, RIVERSIDE CO., CAL.—Hotel, 2 story and base, reinforced concrete. Cost not stated. Architects, J. Martyn Haenke and W. J. Dodd, Story Bldg., L. A. Owners, Mountain Inn Co. This company has just been incorporated with a capital of \$1,000,000. Only preliminary sketches of the building have been made. These show a structure containing 120 guest rooms. The incorporators of the company are Dr. Haas, 1169 West 37th St., Henry Waterman, Fred E. Zock, Valentine Kretz

and W. J. Wood, all of Los Angeles. Further mention of the work will be made in these columns as the plans progress.

LOS ANGELES, CAL.—Hotel, 12 story and base, Class A construction. Cost not stated. Architect, W. J. Saunders, International Bank Bldg., L. A. Owner, W. L. Blenkiron. The building is to be erected on West 6th street and will contain a total of 115 rooms and 50 baths. There will be a steel frame, reinforced concrete walls and floors. Two passenger elevators. Negotiations are now underway with a tenant. If a satisfactory lease can be drawn construction will be started at once.

LOS ANGELES, CAL.—Hotel, 6 story and base, reinforced concrete, \$500,000. Architect, A. S. Heineman, Fernando Bldg., L. A. Owners, Mutual Home Building Co. A site for this big structure has just been secured at the summit of Hill street east of Mt. Washington. Detail plans have not been prepared and a general description of the building cannot be given at this time. The owners announce that construction will not be started until the latter part of this year. Further details of the work will be given as the plans progress.

SEATTLE, WASH.—Hotel, 3 story and base, steel and concrete, \$100,000. Architect, A. Wickersham, Lyon Bldg., Seattle. Owners, Yesler Estate. This building has been mentioned here before. Pile foundation work is now complete and bids are being called for on the general construction. There will be stores on the first floor and a number of modern hotel rooms on the upper floors. Plans provide for steam heat, elevator service and metal window sash and frames. Exterior of the hotel will be faced with cement plaster.

LIBRARIES.

SEATTLE, WASH.—Library, 2 story and base, brick, stone and concrete, \$40,000. Architect, W. Marbury Somerville, White Bldg., Seattle. This work has been mentioned here before. The building will be known as the Yesler Memorial Library, and is to be erected at the corner of Yesler Way and 24th avenue. The design is in the classic style. Interior will be finished in pine, hardwoods and ornamental plaster. There will be steam heat and a vacuum cleaning plant. Exterior will be faced with stone and pressed brick. Plans are complete and figures are being taken.

LA GRANDE, ORE.—Library, 1 story and base, brick and concrete, \$12,500. Architect's name not given. Owners, Town of La Grande. The plans submitted to the Carnegie Library Association have been approved and construction will be started at once. Interior of the building will be finished in pine with hardwood floor. There will be a central heating system and metal stacks. Exterior will be faced with cement plaster. Bids will be called for at once.

Contracts Awarded.

ST. JOHNS, ORE.—Library, 1 story and base, brick and concrete, \$12,000. Architects, Johnson & Mayer, Commercial Club Bldg., Portland. Owners, City of St. Johns. Contractors, McHolland Bros., 669 Everett St., Portland. Contract price, \$12,000.

Plans are being prepared for a municipal car barn and office building which will be erected at the corner of Union and Third avenues. The building will be 87x260 feet. The first floor will be arranged for car barn and repair shop and upper floor for offices of the Municipal railroad. Plans will be completed with a month and figures called.

Contracts Awarded.

SPOKANE, WASH.—Freight depot, 1 and 2 story, reinforced concrete, \$104,000. Architect, Engineering Department Chicago, Milwaukee and Puget Sound R. R. Co. Owners, Chicago, Milwaukee and Puget Sound R. R. Co. Contractors, Hurley-Mason Co., Board of Trade Bldg., Seattle. Contract price, \$104,000.

HANFORD, KINGS CO., CAL.—School, 1 story and base, brick, \$10,350. Architect's name not given. Owners, Hanford School District. Contractors, Trewhitt & Shields, Fresno. Contract price, \$10,350.

BAKERSFIELD, KERN CO., CAL.—School, 2 story and base, brick, \$37,000. Architect, O. L. Clark, Bakersfield. Owners, City of Bakersfield. Contractors, P. J. Amweg Co., 244 Kearny St., S. F. Contract price, \$36,580.

LOS ANGELES, CAL.—Normal school buildings, concrete and steel construction, \$499,885. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, State of California. Contractors, Alta Planing Mill Co., 820 McGarry St., L. A. Contract price, \$499,885.

CAMAS, WASH.—School, 2 story and base, brick, \$25,723. Architects, Fred A. Legg and George A. Kingsbury, Ainsworth Bldg., Portland. Owners, Camas School District. Contractors, Dannison & McClaran, Salem, Ore. Contract price, \$25,723.

FULLERTON, ORANGE CO., CAL.—School, 1 story and base, brick, \$50,448. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Fullerton School District. Contractor, George C. Condon, Citizens' National Bank Bldg., L. A. Contract price, \$50,448.

STORES AND OFFICES.

SAN FRANCISCO—Stores and lofts, 2 story and base, Class C construction, \$17,500. Architect, O. R. Thayer, Merchants' National Bank Bldg., S. F. Owner, Jacob Zittis. The building will be erected on Mission street east of Ninth and will have a frontage of 24½ feet and a depth of 85 feet. There will be two stores on the first floor and light lofts above. Interior finish will be of glass throughout. There will be plate glass windows in patent store fronts. Elevator service will be installed. Exterior of the building will be faced with cement plaster. Plans are now being prepared and figures will be called for shortly.

OAKLAND, CAL.—Stores, 1 story and base, frame, \$5,000. Architect,

John Carson, Bacon Bldg., Oakland. Owners, Cunningham and Chamberlain. The building will be erected at the corner of 29th and Webster streets, and will contain ten offices. Interior finish will be of pine throughout. There will be plate glass windows and patent store fronts. Exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

LOS ANGELES, CAL.—Stores, 1 story and base, brick and steel. Cost not stated. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owner, David Hewes. The building will be erected on a corner and will cover an area of 260x140 feet. There will be twelve stores with large plate glass display windows set in patent store fronts. Interior will be finished in pine. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Offices, 12 story and base, Class A construction, \$200,000. Architect's name not given. Owners, Spring Street Investment Co., Los Angeles Investment Bldg., L. A. This company report that all arrangements have been completed for the construction of a building 60x128 feet on Spring street between 6th and 7th streets. The ground floor has been leased to the Gibraltar Investment Co. Further mention will be made of the work.

Contracts Awarded.

PORTLAND, OREG.—Office building, 11 story and base, steel and reinforced concrete, \$350,000. Architect, Engle St., S. F. Owners, Pacific Telephone and Telegraph Co., New Montgomery St., S. F. Owners, Pacific Telephone and Telegraph Co. Contractors, Sound construction and Engineering Co., Chamber of Commerce Bldg., Portland. Contract price not stated.

THEATRES.

Contracts Awarded.

FRESNO, FRESNO CO., CAL.—Theatre, 3 story and base, brick and steel, \$90,000. Architects, Thayer & Parker, Forsyth Bldg., Fresno and 244 Kearny St., S. F. Owner, J. B. Whittemore. Contractors, Brinkmeyer & Glahn, Fresno. Contract price, \$90,000.

RESIDENCES.

SAN FRANCISCO—Residences, 6, 2 story and base, frame, \$2,000 each. Architect, none. Owner, Theodore Gibson, 355 Fair Oaks St., S. F. These houses will be erected on property beginning at a point 60 feet south of Pacific street and 214 west of Taylor. Each of the houses has been designed to contain six rooms and bath. Interior finish will be of pine, redwood and some elm veneer. Hardwood floors will be used in the principal rooms. There will be open fire places in all living rooms. Mantels will be of brick and tile. Tile will also be used in the bath rooms and kitchens. Exteriors will be covered with rustic, shingle and cement plaster. Plans are in the hands of the owner and work will be done by Day Labor. It is now in the market for all materials.

SAN FRANCISCO—Bungalows, 2, 1½ story and base, frame, \$2,000 each. Architect, none. Owner, Emil Nelson, 550 Jersey St., S. F. These two houses will be erected on 22nd street west of

Sanchez, and each will contain six rooms and bath. Interiors will be finished in pine with hardwood floors in the living and dining rooms. Plans provide for large open fire places and brick mantels. Bath rooms will be finished in cement plaster. Exteriors will be covered with rustic. Plans are complete and work will be done by Day Labor.

SAN FRANCISCO—Residences, 7, 2 story and base, frame. Cost not stated. Architect, none. Owner, Harvey Klyce, Monadnock Bldg., S. F. These houses will be erected in the Richmond District on 35th and 36th avenues. The dwellings will be of a higher class than usually undertaken in groups. Each house has been designed to contain from six to eight rooms. Interiors will be finished in pine, redwood and hardwoods. Hardwood floors will be used in the principal rooms. Bath rooms will be finished in tile. Several of the dwellings will have furnace heat. Open fire places and tile or brick mantels have been provided for all living rooms. Tile will be used in the kitchens. Some automatic water heaters will be installed. Exteriors will be covered with rustic, shingles, cement plaster on metal lath and brick veneer. Work will be done by Day Labor as soon as plans can be completed.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$3,000. Architects, Smith & Stewart, 244 Kearny St., S. F. Owner, Dr. J. A. Stimpson. The houses are to be erected at the corner of Texas and 19th streets. Each of the dwellings will contain six rooms and bath. Interior finish will be of pine and redwood. There will be some hardwood floors. Open fire places and tile or brick mantels will be used in the living rooms. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

SAN FRANCISCO—Residence, 2 story and base, frame. Cost not stated. Architect, none. Owner, E. Stearns, 564 Castro street, S. F. The house will be built at the corner of 21th and Elizabeth streets, and has been designed to contain seven rooms and bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Bath room will be finished in cement plaster and tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

SAN FRANCISCO—Residence, 2 story and base, frame, \$10,000. Architect, Frank S. Holland, 100 Haight St., S. F. Owner's name withheld. The dwelling will be erected on one of the corners of Lake street, and has been designed in the Colonial style. There will be fourteen rooms and two baths. Interior finish will be of pine and hardwoods. Hardwood floors will be used throughout except in the bath rooms which will be finished in tile. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Exterior of

the dwelling will be covered with ship-lap and brick veneer. Plans are now being prepared.

SAN FRANCISCO—Duplex residence, 2 story and base, frame, \$11,000. Architect, Frank S. Holland, 100 Haight St., S. F. Owner, C. F. Krauss. The building will be erected on Palm avenue near Euclid, and has been designed to contain two seven-room dwellings. Interior finish will be of pine and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will have cement floors and wainscot. Automatic water heaters will be installed. Marble and tile will be used in the entrances. Exterior will be covered with cement plaster on metal lath. Plans are now being prepared and when complete work will be done by Day Labor.

PREMONT, ALAMEDA CO., CAL.—Residence, 2 story, attic and base, frame, \$20,000. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owner, Horace Miller. The dwelling will contain 14 to 16 rooms, several baths and sleeping porches. Interior finish will be of pine, redwood, hardwoods and white enamel. Hardwood floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile. A garage will be erected on the lot. Automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Roof will be of clay tile and shingles. Plans are complete and figures are now being taken.

OAKLAND, CAL.—Bungalow, 1½ story and base, frame, \$1,000. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner's name withheld. The dwelling will be erected on Mandana Boulevard, and has been designed for a seven room house with finish will be of pine and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick or tile. Bath room will be finished in tile. An automatic water heater will be installed. Tile will be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SARATOGA, SANTA CLARA CO., CAL.—Residence, 1 story and base, frame, \$10,000. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owner, Benj. Bazato. This dwelling has been designed for a country home and will contain eight rooms, baths and sleeping porch. Interior will be finished in pine and hardwoods. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick or tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

STOCKTON, SAN JOAQUIN CO., CAL.—Residence, 1½ story and base, frame, \$1,500. Architect, after King, Elks' Bldg., Stockton. Owner, C. C. Case. The house will be erected on Acadia street near Harrison, and has been designed to contain seven rooms and bath. Interior finish will be of

pine and hardwood. Hardwood floors will be used in the living room, dining room and den. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic. Plans are now being prepared and figures will be called shortly.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$5,000 each. Architects, Coats & Traver, Addison Head Bldg., S. F. Owner, H. P. Umberson. These houses will be erected on 12nd avenue north of Fulton street. Each house will contain seven rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the living and dining rooms and den. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile and cement plaster. An automatic water heater will be installed in each of the houses. Exteriors will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. T. H. Madden will superintend the work and purchase all materials.

ALAMEDA, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,500. Architect, Leonard H. Ford, 2125 Center St., Berkeley. Owner, W. D. Howe. The house has been designed for a seven-room dwelling with bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. Living room will have a large open fire place with brick mantel. Bath room will be finished in cement plaster and tile. Tile will also be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,500. Architect, none. Owners, Patrick-Nelson Co., 2011 Shattuck Ave., Berkeley. The dwelling has been designed for a nine-room house with two baths and sleeping porch and will be erected in Berkeley Square. Interior finish will be of pine and white enamel. There will be furnace heat and open fire places. Mantels will be of brick or tile. Hardwood floors will be used in the principal rooms. Bath rooms will be finished in tile and cement plaster. An automatic water heater will be installed. Tile will be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are nearly complete and the work will be done by Day Labor.

OAKLAND, CAL.—Bungalow, 1½ story and base, frame, \$3,000. Architect, none. Owners, Patrick-Nelson Co., 2011 Shattuck Ave., Berkeley. The dwelling has been designed for a seven-room house and will be erected at the corner of Clifton and Devon streets. There will be a large sleeping porch. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire place. Mantel will be of the brick. Bath room will be finished in cement plaster. Tile will be used in the kitchen. Exterior of the house will be covered with cement plaster. Plans

are nearly complete and the work will be done by Day Labor.

ALBANY, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owners, Patrick-Nelson Co., 2011 Shattuck Ave., Berkeley. The house will contain six rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be a large open fire place in the living room with brick mantel. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residences, 4, 2 story and base, frame, \$5,000 each. Architects, Coats & Traver, Addison Head Bldg., S. F. Owner's name withheld. These houses will be erected on 35th avenue and Fulton street. Each house will contain seven rooms and bath. Interiors will be finished in pine, redwood and some hardwood. Hardwood floors will be used in the principal rooms. There will be a large open fire place in each living room. Mantels will be of brick and tile. Tile will be used in the bath rooms and kitchen. Exteriors will be covered with cement plaster, rustic, shingles and brick veneer. Plans are now being prepared.

LOS ANGELES, CAL.—Residence, 2 story and base, frame, \$37,000. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, C. H. Warner. The dwelling will be erected at the corner of Santa Anita and Dobbins streets, and will contain eleven rooms, sleeping porch and several baths. Interior finish will be of hardwoods. There will be a central heating system, probably hot water, vacuum cleaning plant and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Work will be carried out by the Milwaukee Building Co.

FRESNO, FRESNO CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. Owner, George V. Martin. The dwelling will be erected at the corner of Tulare and T streets and has been designed for a ten-room house with two baths. Interior will be finished in pine and hardwoods. Hardwood floors will be used in the principal rooms. There will be a central heating system and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

FRESNO, FRESNO CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, Eugene Mathewson, Forsyth Bldg., Fresno. Owner, Edward Baldwin. The dwelling will be erected on the property just outside the city limits, and has been designed to contain eight rooms, sleeping porch and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and brick or tile mantels. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with

cement plaster on metal lath. Plans are nearly complete.

SCHOOLS.

HUNTINGTON PARK, LOS ANGELES CO., CAL.—School, 1 story and base, brick. Cost not stated. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Huntington Park School District. All bids received on June 27th for this work have been rejected. New plans are now being prepared which will provide for five class rooms instead of six. Exterior of the building will be faced with cement plaster. Plans will be completed at once and bids are to be opened on July 25th.

SEATTLE, WASH.—University buildings, reinforced concrete construction, \$1,000,000. Architect's name not given. Owners, University of the Puget Sound. It is stated on good authority that a million dollars will be expended by this institution within the next year on buildings. A part of this work, amounting to \$550,000, will be undertaken this year. Details of the project are not obtainable as yet.

MARCUS, WASH.—School, 1 story and base, reinforced concrete, \$15,000. Architects, Sweat & Levesque, Spokane. Owners, Marcus School District. The building will be constructed in three units, each of which will cost \$15,000. Plans for the first unit have been completed and are now out for figures. There will be four class rooms. Plans provide for a central heating system. Interior finish will be of pine with some maple floors. Exterior will be faced with cement plaster. Plans can be secured from the architects.

COTTAGE GROVE, ORE.—School, 2 story and base, brick. Cost not stated. Architects, Tourtellotte & Hummell, Rothchild Bldg., Portland. Owners, Cottage Grove School District. The building will cover an area of 145x60 feet. There will be sixteen class rooms and a large auditorium with a seating capacity of 300 people. Interior finish will be of pine. There will be a central heating system and vacuum cleaning system. Exterior will be faced with pressed brick. Plans are complete and figures will be called for next week.

Contracts Awarded.

BAKERSFIELD, KERN CO., CAL.—School, 1 story and base, frame, \$5,000. Architect, none. Owners, City of Bakersfield. Contractor, F. L. Cummings, Bakersfield. Contract price, \$5,000.

July 21, 1913, at which time they will be opened in public, for furnishing 1,911 pieces No. 1 common redwood lumber, and 1,600 pieces feet round redwood lumber. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition, Room 115 in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 11:30 A. M. Thursday, July 24th, 1913, for Furnishing Exhibits and Iron Work of The Fine Arts Building in accordance with the plans and specifications on file in the office of the Director of Works.

A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of

the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$10.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (*)

NOTICE TO CONTRACTORS.

SEALED BIDS will be received at the office of the Controller, University of California, Berkeley, at 10 A. M. Wednesday, July 10th, on Ornamental Metal Work for the Snith Campanile on the Grounds of the University of California, Berkeley.

Plans and specifications are on file in said office and may be obtained upon the payment of a deposit of \$5.00.

No bids will be received unless accompanied by a certified check or bond, equal to 10% of the bid, to secure execution of the contract by the successful bidder. The right is reserved to reject any or all bids.

THE REGENTS OF THE UNIVERSITY OF CALIFORNIA.

THE CITY OF PORTLAND, OREGON,
OFFICE OF
THE COMMISSION OF PUBLIC DOCKS
Public Dock No. 1.
Advertisement.

NOTICE IS HEREBY GIVEN that The Commission of Public Docks of the City of Portland, Oregon, will receive sealed proposals until 10:00 o'clock A. M., July 21, 1913, at its office, 502 Worcester Building, Portland, Oregon, for the construction of a Public Dock, with appurtenances between 15th and 18th Streets, on the West Side of the Willamette River.

Plans, specifications, proposal blank, form of contract and other information for proposers will be on file in the office of The Commission of Public Docks. A complete set of plans and specifications may also be obtained by prospective bidders by depositing with the Commission a certified check in the sum of \$50.00, which will be returned upon receipt of the plans in good condition.

All tenders to be sealed and marked on the outside "Proposal for construction of Public Dock No. 1."

No proposal or bid will be considered unless accompanied by a check payable to the order of The City of Portland, certified by a responsible bank in the City of Portland, Oregon, for an amount equal to ten per cent of the proposal, to be forfeited as fixed and liquidated damages in case the bidder neglects or refuses to enter into contract and provide a suitable bond for the faithful performance of said work in the event the contract is awarded him.

ATTENTION of all bidders is respectfully called to Chapter 61, Laws of Oregon, 1912, (Session Laws 1912, p. 90).

The Commission of Public Docks reserves the right to reject any and all proposals.

Dated Portland, Oregon, this 20th day of June, 1913.

THE COMMISSION OF PUBLIC DOCKS
By G. B. HERRDT,
Secretary.

(3-4-July 1, 9, 16)

Alterations	38	57,565.00
Total	69	\$232,552.00

RELEASE OF BUILDING CONTRACT.

July 8, 1913—NW BUSH & TAYLOR
127-6x127-6, California Monolithic
Steel Co. to Jones & Lubbe. Released..... July 2, 1913

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, meticulously classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCES—6, 2 story and base, frame, \$2,000 each. San Francisco. Architect, none. Owner, Theodore Gibson, 355 Oak Oaks St., S. F. These houses will be erected on property beginning at a point 60 feet south of Pacific street and 214 west of Taylor. Each of the houses has been designed to contain six rooms and bath. Interior finish will be of pine, redwood and some elm veneer. Hardwood floors will be used in the principal rooms. There will be open fire places in all living rooms and kitchens. Exteriors will be covered with rustic shiplap and cement plaster. Plans are in the hands of the owner and work will be done by Day Labor. It is now in the market for all materials.

RUNGAL WS—2, 1½ story and base, frame, \$2,000 each. San Francisco. Architect, none. Owner, Emil Nelson, 120 Jersey St., S. F. These two houses will be erected on 22nd street west of Sanchez, and each will contain six rooms and bath. Interiors will be finished in pine with hardwood floors in the living and dining rooms. Plans provide for large open fire places and brick mantels. Bath rooms will be finished in cement plaster. Exteriors will be covered with rustic. Plans are complete and work will be done by Day Labor.

RESIDENCES—7, 2 story and base, frame. Cost not stated. San Francisco. Architect, none. Owner, Harvey Klyse, Montadock Bldg., S. F. These houses will be erected in the Richmond District on 25th and 26th avenues. The dwellings will be of a higher class than usually undertaken in groups. Houses have been designed to contain from six to eight rooms. Interiors will be finished in pine, redwood and hardwoods. Hardwood floors will be used in the principal rooms. The rooms will be finished in tile. Several of the dwellings will have marble and open fire places and tile and brick mantels have been provided for all living rooms. There will be used in the kitchen. Some automatic water heaters will be installed. Exteriors will be covered with rustic shiplap and cement plaster on metal lath and brick veneer. Work will be done by Day Labor as soon as plans can be completed.

RESIDENCES—2, 2 story and base, frame, \$2,000 each. San Francisco. Architect, S. H. Stewart, 211 Kerry St., S. F. Owner, Dr. J. A. Stimpson. The houses will be erected at the corner of Taylor and 19th streets. Each of the dwellings will contain six rooms and bath. Interiors will be of pine and redwood. There will be some art deco. Plans show fire places and tile and brick mantels will be used in the living rooms. They will be used in the bath rooms and kitchens. Exteriors will be covered with cement shiplap on metal lath. Plans are nearly complete and owners will be called for soon.

RESIDENCES—2, 2 story and base, frame, \$2,000 each. San Francisco. Architect, none. Owner, E.

Stein, 561 Castro St., S. F. The house will be built at the corner of 21st and Elizabeth streets and has been designed to contain seven rooms and bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Bath room will be finished in cement plaster and tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. It is now in the market for all materials.

RESIDENCE—2 story and base, frame, \$10,000. San Francisco. Architect, Frank S. Holland, 100 Haight St., S. F. Owner's name withheld. The dwelling will be erected on one of the corners of Lake street and has been designed in the Colonial style. There will be fourteen rooms and two baths. Interior finish will be of pine and hardwoods. Hardwood floors will be used throughout except in the bath rooms which will be finished in tile. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with shiplap and brick veneer. Plans are now being prepared.

DETACH RESIDENCE—1 story and base, frame, \$10,000. San Francisco. Architect, Frank S. Holland, 100 Haight St., S. F. Owner, C. F. Krauss. The building will be erected on Palm avenue near Euclid and has been designed to contain two seven-room dwellings. Interior finish will be of pine and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will have cement floors and wainscot. Automatic water heaters will be installed. Marble and tile will be used in the entrances. Exterior will be covered with cement plaster on metal lath. Plans are now being prepared and when complete work will be done by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$17,000. San Francisco. Architect, Frank S. Holland, 100 Haight St., S. F. Owner's name withheld. The building will be erected on Fillmore near Hayes street, and has been designed to contain fifteen suites of two, three and four rooms. All apartments will have private bath and will beds. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the principal rooms. Plans provide for Rector rug steam grades. Bath rooms will be finished in cement plaster. Exterior of the building will be faced with cement plaster on metal lath. Some tile and mosaic work will be called for in the specifications. Plans are now being prepared.

RESIDENCE—2, 2 story and base, frame, \$5,000 each. San Francisco. Architect, E. C. C. and Traver, Add on Hill Bldg., S. F. Owner, H. P. Emb-

sen. These houses will be erected on 13rd avenue north of Fulton street. Each house will contain seven rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the living and dining rooms and den. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile and cement plaster. An automatic water heater will be installed in each of the houses. Exterior will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. T. H. Madden will superintend the work and purchase all materials.

APARTMENT HOUSE—3 story and base, frame, \$20,000. San Francisco. Architects, Rousseau & Rousseau, Montadock Bldg., S. F. Owners, David E. and Wm. H. Kelley, 609 4th St., San Rafael. This building has been mentioned here before when plans were first started. The structure will be erected on Pine street west of Jones, and has been arranged for a number of two and three room apartments with private bath. Interior finish will be of pine and redwood. Some elm panels will be used. There will be steam heat and a hot water supply. An automatic elevator will be installed. All suites will be equipped with wall beds. Entrance vestibule will be finished in marble and mosaic. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will let all contracts.

APARTMENT HOUSES—2, 3 story and base, frame, \$8,000 to \$11,000. San Francisco. Architect, Albert Farr, Foxcroft Bldg., S. F. Owners, Metropolitan Investment Co., 353 Bush St. These buildings have been mentioned here before. Working drawings have been completed and work is about to be started under the Day Labor system. One apartment house will be erected on Hyde street, 92 feet north of Sacramento, and will cost \$9,000. It will cover a lot 28x300 feet and contain six suites. Another building will be erected on Washington street, 118 feet east of Van Ness avenue, and will cover an area of 35x100 feet. This building will cost \$11,000 and will contain six apartments. The third building will have a frontage of 25 feet and a depth of 71 feet, and will be erected on Sacramento, 77 feet west of Hyde. This building will also contain six apartments and will cost \$8,000. Interior finish in all of the buildings will be of pine and redwood with some elm panels. Hardwood floors will be used. There will be central heating systems and hot water plants. Wall beds are specified for all apartments. Exteriors will be covered with rustic, metal lath and plaster and shiplap. Plans are now in the hands of the owners who will do the excavating, concrete work and carpentry by Day Labor, and will sublet all other parts of the work. Materials for the work are now being purchased.

CITY BLDG. Class A construction, \$150,000. San Francisco. Architects, Lakewell & Brown, 251 Kearny St., S. F. Owners, City and County of San Francisco. Bids for the foundation work, concrete piers and additional excavating were opened at the Friday meeting of the Board of Public Works. Bids of the three lowest men will

probably be considered. These bids were as follows: Sound Construction Co., \$14,882; Richard Doering, \$15,827, and E. T. Owsley, \$17,500. Besides the general bid seven unit prices were asked for. A complete list of these bids will be found under the heading of San Francisco in this issue.

FLATS—3 story and base frame, \$6,000. San Francisco. Architect, J. Devenenzl, 1069 Union St., S. F. Owner, Carmelo Arieta. The building will be erected on Union street east of Grant avenue, and will have a street frontage of 24 feet 10 inches and a depth of 59 feet. Interior has been arranged for six apartment flats of three and four rooms. The interior finish will be of pine and redwood. Some hardwood floors will be used. Entrance will be finished in mosaic and tile. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with shiplap and rustic. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

FLATS—2 story and base, frame, \$1,000. San Francisco. Architect, Charles Fantoni, 916 Kearny St., S. F. Owner, W. W. Jameson. The building will contain two modern flats, and is to be erected at the southwest corner of Washington and Priest streets. It will have a frontage of 2 1/2 feet on Priest. Flats will consist of 5 and 6 rooms and bath. Interior finish will be of pine and redwood with some hardwood floors. There will be open fire places and tile mantels. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with rustic and shiplap. Entrance will be finished in tile and mosaic. Plans are complete and the work will be done by Day Labor.

LODGE HALL—2 story and base, steel and concrete, \$75,000. San Francisco. Architects, Charles Paff & Co., Merchants' Exchange Bldg., S. F. Owners, Maritime Hall Association. Architect Paff has just been commissioned to prepare plans for a lodge hall for the Maritime Association, which will be erected on their property on Clay street east of Drumm. The building has been designed with a complete steel frame and foundations and walls heavy enough to support several additional stories. The building will have a frontage on Clay street of 50 feet and will extend through to Commercial street, a distance of 120 feet. There will be stores on the first floor and lodge halls, social rooms, banquet hall and offices on the upper floors. Plans provide for elevator service, steam heat, a vacuum cleaning system and metal window sash and frames. Exterior will be faced with mat glaze and polychrome terra cotta. Plans are now being prepared.

CARPENTERS' HALL—3 story and base, Class C construction, \$40,000. San Francisco. Architects, Charles Paff & Co., Merchants' Exchange Bldg., S. F. Owners, Carpenters' Hall Association. This organization has just sold their holdings together with their building in the Civic Center, and have purchased a new site at the corner of McCoppin and Valencia streets. The new building will cover an area of 75x90 feet and will be of the Class C type of construction. There will be three stores on the first floor, second

floor will be arranged for an assumed room, office of the locals, card rooms, billiard hall and social rooms. The third floor will contain two large lodge rooms and committee rooms. Special features will be installed for the storing of tools, etc. Interior finish will be of pine and hardwoods. There will be a central heating system and elevator service. Exterior of the building will probably be faced with pressed brick. An estimated cost of \$10,000 is placed on the work. Plans are now being prepared for the work.

HOTEL—6 story and base, steel and reinforced brick, \$65,000. San Francisco. Architect, G. Albert Lunsburg, 709 Mission St., S. F. Owner, A. Eisenberg. The building will be erected on the north side of Sutter street, between Jones and Leavenworth. Plans provide for a total of 90 guest rooms, 65 per cent of which will have private baths. Besides the guest rooms there will be a large lobby, office and ladies' parlor on the first floor. Interior will be finished in pine and hardwoods with tile, marble and ornamental plaster used in the office and lobby. There will be steam heat, elevator service, vacuum cleaning system and hot water system. Exterior of the building will be faced with pressed brick and terra cotta. Bath rooms will have cement floors and tile wainscot. Plans are now being prepared.

RESIDENCES—4, 2 story and base, frame, \$3,900 each. San Francisco. Architects, Coats & Traver, Addison Head Bldg., S. F. Owner's name withheld. These houses will be erected on 35th avenue and Fulton street. Each house will contain seven rooms and bath. Interiors will be finished in pine, redwood and some hardwood. Hardwood floors will be used in the principal rooms. There will be a large open fire place in each living room. Mantels will be of brick and tile. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster, rustic, singles and brick veneer. Plans are now being prepared.

STORES AND LOFTS—3 story and base, Class C construction, \$17,500. San Francisco. Architect, O. R. Tager, Merchants' National Bank Bldg., S. F. Owner, Jacob Zitts. The building will be erected on Mission street east of Ninth and will have a frontage of 3 1/2 feet and a depth of 85 feet. There will be two stores on the first floor and eight lofts above. Interior finish will be of pine throughout. There will be plate glass windows and patent storefronts. Elevator service will be installed. Exterior of the building will be faced with cement plaster. Plans are now being prepared and figures will be called for shortly.

DRAINAGE SYSTEM—San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on July 17th for constructing a drainage system on the Race Track. This work has been advertised for before. Plans can be secured from the Director of Works. An official proposal appears in another column of this issue.

FURNISHING ROCK—San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on July 24th by the Buildings and Grounds Committee for furnishing rock for roads in the Ex-

position Grounds. Plans can be secured from the Director of Works. Official proposal will be found under the heading of Official Advertising in this issue.

STRUCTURAL STEEL AND IRON WORK—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans are complete and bids will be opened on July 31st for furnishing, fabricating and erecting the structural steel and iron for the Main Entrance Tower of the Exposition. Plans can be secured from the Director of Works. An official proposal appears under the heading of Official Advertising in this issue.

MOVING GOVERNMENT WAREHOUSES, RESETTling AND CONSTRUCTING ROAD—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids opened for this work show the following low men: Moving warehouses, L. J. and T. Sullivan, \$11,540; constructing concrete foundations and pile work, O. Monson, \$5,325, and for constructing roadway, Daniel O'Day, \$1,550. A complete list of these figures will be found under the heading of San Francisco in this issue.

Contracts Awarded.

NAVAL HOSPITAL—2 story and base, reinforced concrete, \$266,607. Pearl Harbor, H. T. Architect, Dept. of Yards and Docks, Washington, D. C. Owners, United States Government. Contractors, Spaulding Construction Co., Portland, Ore. Contract price, \$266,607.

ROCK BREAKWATER—\$13,000. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Contractors, Healy-Thibault Construction Co., S. F. Contract price, \$13,000.

stalled. Exterior of the house will be covered with cement plaster on metal lath. Roof will be of clay tile and shingles. Plans are complete and figures are now being taken.

LUNGALOW—1½ story and base, frame, \$1,000. Oakland, Cal. Architect, A. W. Smith, 1019 Broadway, Oakland. Owner's name withheld. The dwelling will be erected on Mandana Boulevard, and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick or tile. Bath room will be finished in tile. An automatic water heater will be installed. Tile will be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$5,500. Alameda, Alameda Co, Cal. Architect, Leonard H. Ford, 2136 Center St., Berkeley. Owner, W. D. Howe. The house has been designed for a seven-room dwelling with bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. Living room will have a large open fire place with brick mantel. Bath room will be finished in cement plaster and tile. Tile will also be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$5,500. Berkeley, Alameda Co, Cal. Architect, none. Owners, Patrick-Nelson Co., 2011 Shattuck Ave., Berkeley. The dwelling has been designed for a nine-room house with two baths and sleeping porch, and will be erected in Berkeley Square. Interior finish will be of pine and white enamel. There will be furnace heat and open fire places. Mantels will be of brick or tile. Hardwood floors will be used in the principal rooms. Bath rooms will be finished in tile and cement plaster. An automatic water heater will be installed. Tile will be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are nearly complete and the work will be done by Day Labor.

LUNGALOW—1½ story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owners, Patrick-Nelson Co., 2011 Shattuck Ave., Berkeley. The dwelling has been designed for a seven-room house, and will be erected at the corner of Clifton and Devon streets. There will be a large sleeping porch. Interior will be finished on pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire place. Mantel will be of tile or brick. Bath room will be finished in cement plaster. Tile will be used in the kitchen. Exterior of the house will be covered with cement plaster. Plans are nearly complete and the work will be done by Day Labor.

LUNGALOW—1½ story and base, frame, \$2,000. Albany, Alameda Co, Cal. Architect, none. Owners, Patrick-Nelson Co., 2011 S. Shattuck Ave., Berkeley. The house will contain six rooms and bath. Interior finish will be of pine and hardwood. Hardwood

floors will be used in the living and dining rooms. There will be a large open fire place in the living room with brick mantel. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor.

FLATS—Remodel and additions, 3 story, frame, \$8,000. Berkeley, Alameda Co., Cal. Architect, P. J. Voorhees, Central Bank Bldg., Oakland. Owner's name withheld. The work will consist of remodeling the present building and adding one story. A store will occupy the first floor. Upper floors will be arranged for five flats. Interior finish will be of pine and redwood with some hardwood floors. New plumbing, plastering, electric work and trim will be used in the old portion of the building. Exterior will be covered with rustic. Mosaic and terrazzo will be used. Plans are complete and figures are being taken.

STORES—1 story and base, frame, \$5,000. Oakland, Cal. Architect, John Carson, Bacon Bldg., Oakland. Own-Cunningham and Chamberlain. The building will be erected at the corner of 29th and Webster streets, and will contain ten offices. Interior finish will be of pine throughout. There will be plate glass windows and patent store fronts. Exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

Censure Follows Award Of Contract.

Builders' Exchange of Alameda County Adopt Resolutions Censuring First Trust and Savings Bank.

Members Will Withdraw All Accounts

Charge Use of Unbusinesslike and Unfair Methods in Awarding Contract for Bank Building.

The award of contract for the construction of the First Trust and Savings Bank Building, in Oakland, to P. J. Walker on a percentage basis has brought forth a strong protest from members of the Builders' Exchange of Alameda County. The building is an eleven-story class "A" structure which is to be erected at the corner of 16th street and San Pablo avenue, Oakland, at a cost of approximately \$200,000.

Resolutions have been adopted by the Builders' Exchange of Alameda County censuring the President and Board of Directors of the First Trust and Savings Bank for their unbusinesslike conduct and further asking that all members of the Builders' Exchange of Alameda County withdraw their accounts with that institution.

The following is a copy of a letter sent by the Builders' Exchange to the President and Board of Directors of the First Trust and Savings Bank and also a copy of the Resolutions adopted:

Oakland, Cal., July 21, 1913.
President and Directors of the
First Trust & Savings Bank,
Oakland, Cal.

Gentlemen:—

The Directors of the Builders' Exchange of Alameda County, having carefully considered the matter, do

most earnestly protest against the manner in which you handled the letting of the contract for the erection of the building for the First Trust and Savings Bank at 16th street and San Pablo avenue.

We were informed by the officers of your Bank, as well as by Mr. Dutton, the Architect, that this contract was to go to the lowest responsible bidder and to that end our members figured conscientiously with a view to getting the work on the merits of the case and after taking up the time and money of nineteen General Contractors and innumerable sub-contractors and material men, they then used their combined time, energy and efforts to arrive at a proper figure, and then you turned this contract over to the P. J. Walker Company on percentage.

We do not attach any blame to Mr. Dutton or his office, as we feel he was actuated by the best business principles when he informed us that he was taking competitive bids. Neither do we attach any blame to P. J. Walker Company for they are in business to get all the work they can, but we do censure your Officers and Board of Directors for the unbusinesslike way in which they have handled this matter. There are two classes of men whom the contractors, sub-contractors and material men have to deal with, who deserve contempt and censure of all honorable men and that is, they who peddle bids and they who take bids and afterwards use them in their estimates to do the work on percentage or days work, and your action puts the Officers and Directors of the First Trust and Savings Bank in this latter class.

Yours, etc.,
BUILDERS' EXCHANGE OF ALAMEDA COUNTY.

By J. F. Dingwell, President.
By P. F. Bradford, Secretary.

WHEREAS, it having been forcibly brought to the attention of the undersigned, as well as all other members of this Exchange, that the officers and directors of the First Trust and Savings Bank of Oakland, having called for and accepted bids from nineteen responsible General Contractors for the construction of the First Trust and Savings Bank Building to be erected at 16th street and San Pablo avenue, Oakland, then afterwards asked for and accepted bids from the five lower bidders who were asked to re-figure the plans and then the said officers and directors gave the contract for the construction of said building to P. J. Walker Company on percentage, which was an unfair, unbusinesslike and reprehensible,

NOW, THEREFORE, Be It

RESOLVED, by the Board of Directors of the Builders' Exchange of Alameda County, that said action of the officers and directors of the First Trust & Savings Bank be condemned and they be censured for their unbusinesslike conduct, and be it further

RESOLVED, that all members of the Builders' Exchange of Alameda County be asked to withdraw their accounts from the said First Trust & Savings Bank and the First National Bank; and be it further

RESOLVED, that a copy of these Resolutions be spread on the minutes of this meeting and a copy sent to each of the following members:

First Trust and Savings Bank,
Commercial Club,
Chamber of Commerce and

Merchants' Exchange
all of Oakland, and
Builders' Exchange,
General Contractors' Association,
L. B. Dutton, Architect,
all of San Francisco.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

RESIDENCE—2 story and base, frame. Cost not stated. Fresno, Fresno Co., Cal. Architects, Swartz, Hotchkin & Swartz, Rowell Bldg, Fresno. Owner, George V. Martin. The dwelling will be erected at the corner of Tulare and T streets, and has been designed for a ten-room house with two baths. Interior will be finished in pine and hardwoods. Hardwood floors will be used in the principal rooms. There will be a central heating system and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal bath. Plans are being prepared.

RESIDENCE—2 story and base, frame. Cost not stated. Fresno, Fresno Co., Cal. Architect, Eugene Mathewson, Forsyth Bldg., Fresno. Owner, Edward Baldwin. The dwelling will be erected on property just outside the city limits, and has been designed to contain eight rooms, sleeping porch and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and

brick or tile mantels. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal bath. Plans are nearly complete.

Contracts Awarded.

SCHOOL—1 story and base, brick, \$70,350. Hanford, Kings Co., Cal. Architect's name not given. Owners, Hanford School District. Contractors, Trehwitt & Shields, Fresno. Contract price, \$10,350.

SCHOOL—1 story, frame, \$5,000. Bakersfield, Kern Co., Cal. Architect, none. Owners, City of Bakersfield. Contractor, P. L. Cummings, Bakersfield. Contract price, \$4,800.

SCHOOL—2 story and base, brick, \$57,000. Bakersfield, Kern Co., Cal. Architect, O. L. Clark, Bakersfield. Owners, City of Bakersfield. Contractors, F. J. Amweg Co., 244 Kearny St., S. F. Contract price, \$38,550.

THEATRE—3 story and base, brick and steel, \$90,000. Fresno, Fresno Co., Cal. Architects, Thayer & Parker, Forsyth Bldg., Fresno and 244 Kearny St., S. F. Owner, J. B. Whittemore. Contractors, Brinkmeyer & Glahn, Fresno. Contract price, \$90,000.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

HOTEL AND STORES—4 story and base, reinforced concrete, \$100,000. Susanville, Lassen Co., Cal. Architect, none. Owner, E. A. Carpenter, Susanville. The completion of the new railroad through Susanville has caused a demand for better hotel facilities. The new building will be erected on a corner site and will cover an area of 120x120 feet. There will be a number of stores besides the hotel office, lobby and dining room on the first floor. Upper floors will contain in the neighborhood of 120 guest rooms and baths. Interior finish will be of pine and redwood. Tile will be used in the bath rooms. There will be steam heat and elevator service. Metal window sash and frames will be used. Exterior of the hotel will be faced with cement plaster. Plans will shortly be completed.

CLUB HOUSE—2 story and base, reinforced concrete, \$12,000. Auburn, Placer Co., Cal. Architect, Frank S. Holland, 100 Haight St., S. F. Owners, Tahoe Club. The building will be erected on one of the principal corners of the Town of Auburn, and will cover an area of 31x100 feet. There will be stores on the first floor and club rooms above. Interior of the second floor will be finished in pine and hardwoods. There will be a hot water heating system. Hardwood floors will be used. Exterior of the building will be faced with cement plaster. Stores will have large display windows in patent store fronts. Plans are nearly complete and figures will be taken within a few days.

RESIDENCE—1½ story and base, frame, \$1,500. Stockton, San Joaquin Co., Cal. Architect, Walter King, Kings Bldg., Stockton. Owner, C. C. Eise. The house will be erected on Acadia street near Harrison, and has been designed to contain seven rooms and bath. Interior finish will be of pine and hardwood. Hardwood floors will be used in the living room, dining room and den. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in

the bath room and kitchen. Exterior of the dwelling will be covered with rustle. Plans are now being prepared and figures will be called shortly.

HOTEL—2 story and base, brick, \$10,000. Stockton, San Joaquin Co., Cal. Architect, Walter King, Elks' Bldg., Stockton. Owners, Simon Jacobs & Co. The present brick building at the corner of San Joaquin and Church streets will be entirely remodeled. There will be stores on the first floor and upper floor will be subdivided into hotel rooms. Work will require new plastering, painting, plumbing and electric work. A hot water system will be installed. Exterior of the building will be faced with cement plaster. A new steam heating system will also be installed. Plans are being prepared.

PACKING PLANT—1 and 2 story, reinforced concrete, \$250,000. Sacramento, Cal. Architects, Seidler & Hoen, Sacramento. Owners, Swanton & Son, Sacramento. The owners have just announced their intention of building a large plant on the north bank of the American River north of Sacramento. The present plant, together with the barns and corrals will be removed and the site subdivided for city lots. Details of the construction have not been announced. Mr. Swanton has returned from a trip to Chicago where arrangements for special machinery were completed. Further mention of the work will be made in these columns at an early date.

FIRE HOUSE—1 story, brick and frame, \$7,000. Sacramento, Cal. Architect's name not given. Owners, City of Sacramento. Bids for the construction of the Oak Park fire house opened by the Commissioners show W. C. Keating of Sacramento low at \$6,150. A list of the other bidders follows: Murcell & Haley bid \$6,739, and Robert Pondie asked \$11,000.

LOS ANGELES AND SOUTH CALIFORNIA.

MISSION HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Robert Orr, Van Nuys Bldg., L. A. Owners, Christian Woman's Board of Missions. The building will be erected on Wall street and has been designed for a Japanese Mission. First floor will contain offices, class rooms and chapel. Second floor has been arranged for twenty guest sleeping rooms and the third floor for six three-room apartments with private bath. Basement will contain kitchen and dining room. There will be steam heat. Interior finish will be of pine throughout. Exterior of the building will be faced with pressed brick. Plans are being prepared.

FACTORY—1 and 3 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, H. J. Krumer and A. R. Hutchinson, 159 So. Western Ave., L. A. Owners, Homer Motors Co. The building will be erected on San Fernando Road, and will cover an area of 150x200 feet. A portion of the building will be one story high and the balance three stories. There will be a concrete first floor, elevators and metal window sash and frames. Interior of the front portion will be finished in pine. Exterior will be faced with cement plaster. The industry is being financed by the sale of stock. Only preliminary plans have been prepared.

BREW HOUSE—1 story and base, mill construction. Cost not stated. Los Angeles, Cal. Architect, Griesser, 1011 Schiller Bldg., Chicago. Owners, Maler Brewing Co. The building will be an addition to the company's present plant, and will cover an area of 60x100 feet. Interior will be largely finished in tile and glazed brick. Exterior will be faced with red repressed brick. Special brewing machinery and equipment will be ordered in the east. Plans and specifications for the building will be completed and forwarded to Los Angeles within a week or ten days.

GARAGE—1 and 2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, none. Owner, C. Will Rishon, 210 West Eighth St., L. A. The building will be erected on Olive street and will cover an area of 50x165 feet. There will be sales rooms in the front portion of the building and storage space and a machine shop in the rear. Interior finish will be of pine and hardwood. Metal window sash and frames will be used. Floor will be of cement. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owner who is now taking figures on the work.

HOSPITAL—2 story and base, reinforced concrete, \$15,000. Santa Ana, Orange Co., Cal. Architect, Frederick H. Elks, Harvey-Finley Bldg., Santa Ana. Owners, Orange County. The building will cover an area of 48x92

Veneered Panels that
ARE good—order
today from

White Brothers

5th and Brannan Streets

San Francisco

Veneered Panels for every purpose

No matter what "kind" of a panel you need, the "Wybro" panels will answer your purpose.

There are 168 varieties of "Wybro" panels—each variety of unexcelled quality.

Better use WYBRO panels—they are everlastingly good.

feet. Construction will be fire proof throughout, with reinforced concrete walls, floors and roof slabs. Interior will be arranged for wards and private rooms. Interior finish will be of pine. Tile will be used extensively in the operating room. There will be steam heat and elevator service. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken. Bids will be opened on August 5th. Plans can be secured from the architect or from the County Clerk.

HOTEL—12 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architect, W. J. Saunders, International Bank Bldg., L. A. Owner, W. L. Blenkiron. The building is to be erected on West 6th street, and will contain a total of 115 rooms and 50 baths. There will be steel frame, reinforced concrete walls and floors. Two passenger elevators. Negotiations are now underway with a tenant. If a satisfactory lease can be drawn construction will be started at once.

HOTEL—6 story and base, reinforced concrete, \$500,000. Los Angeles, Cal. Architect, A. S. Heinemann, Fernando Bldg., L. A. Owners, Mutual Home Building Co. A site for this big structure has just been secured at the summit of Hill Street east of Mt. Washington. Detail plans have not been prepared and a general description of the building cannot be given at this time. The owners announce that construction will not be started until the latter part of this year. Further details of the work will be given as the plans progress.

RESIDENCE—2 story and base, frame, \$37,000. Los Angeles, Cal. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, C. H. Warner. The dwelling will be erected at the corner of Santa Anita and Hobbins streets, and will contain eleven rooms, sleeping porch and several baths. Interior finish will be of hardwoods. There will be a central heating system, probably hot water, vacuum cleaning plant and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Work will be carried out by the Milwaukee Building Co.

SCHOOL—1 story and base, brick. Cost not stated. Huntington Park, Los Angeles Co., Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Huntington Park School District. All bids received on June 27th for this work have been rejected. New plans are now being prepared which will provide for five class rooms instead of

six. Exterior of the building will be faced with cement plaster. Plans will be completed at once and bids are to be opened on July 25th.

STORES—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owner, David Hewes. The building will be erected on a corner and will cover an area of 260x140 feet. There will be twelve stores with large plate glass display windows set in patent store fronts. Interior will be finished in pine. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

OFFICES—12 story and base. Class A construction, \$300,000. Los Angeles, Cal. Architect's name not given. Owners, Spring Street Investment Co., Los Angeles Investment Bldg., L. A. This company report that all preliminary arrangements have been completed for the construction of a building 60x128 feet on Spring street between 6th and 7th streets. The ground floor has been leased to the Gibraltar Investment Co. Further mention will be made of the work.

HOTEL ADDITIONS—2, 4 story and base, reinforced concrete. Cost not stated. Riverside, Riverside Co., Cal. Architect, Myron Hunt, Hibernian Bldg., L. A. Owner, Frank Miller, Glenwood Mission Inn. These additions have been mentioned here before. One building will be 48x100 feet and the other 48x70 feet. The first floors will contain dining rooms, ex-hibit rooms and curio rooms. Upper floors will be arranged for 27 guest rooms, all of which will have private baths. Steam heat will be furnished from the general plant. Exteriors will be faced with cement plaster. Clay roofs will be used. Work will be done by Day Labor under the direction of Stanley Wilson, Riverside.

HOTEL—2 story and base, reinforced concrete. Cost not stated. Banning, Riverside Co., Cal. Architects, J. Martyn Haenke and W. J. Dodd, Story Bldg., L. A. Owners, Mountain Mission Inn Co. This company has just been incorporated with a capital of \$1,000,000. Only preliminary sketches of the building have been made. These show a structure containing 130 guest rooms. The incorporators of the company are Dr. Haas, 1163 West 37th St., Henry Waterman, Fred B. Zuck, Valentine Kratz and W. J. Wool, all of Los Angeles. Further mention of the work will be made in these columns as the plans progress.

Contracts Awarded.

PORTLAND AND OREGON.

HOSPITAL—2 story and base, brick and concrete, \$25,000. Astoria, Ore. Architects, Sutton & Whitney, Lewis Bldg., Portland. Owners, Town of Astoria. The plans call for a T shape building, 10x77½ feet, with a wing in the rear 10x40. The ground floor will be used for a laundry, kitchen, dining room and large store room. The first floor will contain three dormitories, two lavatories and superintendent's quarters. The second floor will contain sick wards, operating room, baths, doctors' rooms, and quarters for matrons and nurses. Interior finish will be of pine and hardwood. Steam heat and a hot water system will be installed. Considerable marble and tile are specified. Exterior of the building will be faced with pressed brick and cement plaster. Plans are complete and figures are now being taken. Bids will be opened on August 14th. Plans can be secured from the architects or from the City Clerk of Astoria.

BANK—3 story and base, brick and stone. Cost not stated. Forest Grove, Ore. Architect, W. B. Bell, Worcester Bldg., Portland. Owners, First National Bank of Forest Grove. The building will be erected on a corner and will cover an area of 50x62 feet. There will be one small store besides the banking rooms on the first floor. Upper two floors will be arranged for modern offices. Interior of the banking rooms will be finished in pine, hardwood, marble and ornamental plaster. Plans provide for special bank fixtures, coin and safe deposit vaults. There will be steam heat. Marble and tile will be used in the halls on the upper floors. The exterior

of the building will be faced with a local stone. Plans are being prepared and will be out for figures in a few weeks. Further mention of the work will be made at that time.

CHURCH—1 story and base, concrete and frame, \$15,000. Roseburg, Ore. Architects, Tourtellotte & Hummell, Rothchild Bldg., Portland. Owners, First Methodist Church of Roseburg. The building will contain a large main auditorium, Sunday school rooms, pastor's study, social hall and lanquet room. Interior finish will be of pine and ornamental plaster. Art glass windows will be used. There will be a central heating system. Exterior of the building will be covered with cement plaster on metal lath. Plans will be complete and ready for figures within a week or ten days.

LODGE HALL—3 story and base, brick. Cost not stated. Medford, Ore. Architect, Clark, Medford, care Elks' Hall Association. Owners, Elks' Hall Association. The building will contain stores on the first floor and offices and lodge rooms on the upper floors. Mr. Clark has only just been commissioned to prepare the plans, and details of the work are not yet available. Mr. Clark is not a practicing architect and correspondence with him will have to be carried on in care of the owners.

HOSPITAL—3 story and base, reinforced concrete. Cost not stated. Springfield, Ore. Architect not selected. Owner, Mrs. R. M. Baker, Springfield. Preliminary arrangements are being made for the construction of a modern hospital 38x60 feet. Interior will be arranged for twelve private rooms, four wards, operating room and office. The four wards will have a total of 50 beds. Interior finish will

be of pine. There will be a central heating system. Exterior will probably be faced with cement plaster. Only preliminary sketches have been made.

LIBRARY—1 story and base, brick and concrete, \$12,500. La Grande, Ore. Architect's name not given. Owners, Town of La Grande. The plans submitted to the Carnegie Library Association have been approved and construction will be started at once. Interior of the building will be finished in pine with hardwood floor. There will be a central heating system and metal stacks. Exterior will be faced with cement plaster. Bids will be called for at once.

SCHOOL—2 story and base, brick. Cost not stated. Cottage Grove, Ore. Architects, Tourtellotte & Hummell, Rothchild Bldg., Portland. Owners, Cottage Grove School District. The building will cover an area of 115x60 feet. There will be sixteen classrooms and a large auditorium with a seating capacity of 300 people. Interior finish will be of pine. There will be a central heating system and vacuum cleaning system. Exterior will be faced with pressed brick. Plans are complete and figures will be called for next week.

Contracts Awarded.

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

The Electric Weld

Automatic Storage Gas Water Heaters.

An automatic gas water heater controlled by a movement temperature thermocouple using gas at the rate of 50 feet per hour when in operation, with no limit to the amount of hot water that can be drawn per minute.

A single extremely simple valve controls the entire heater, insuring permanent service with no cost for upkeep.

This heater is absolutely guaranteed, leaving the decision entirely with the consumer.

Electric Weld

The Electric Weld

Combination Gas Water Heaters

Over 8000 in daily use in Los Angeles and vicinity.

The entire sale of parts to maintain the above heaters last year was \$68.20, which is $\frac{3}{4}$ of a cent per heater. This showing should command the attention of every person using a gas water heater.

The boiler is made of double extra heavy steel, guaranteed to work under 150 pounds pressure all joints are electrically welded, which guarantees the same tightness as a glass bottle.

Otis Elevators

Sustain Architects' Endorsement

The Architect who specifies Otis Elevators identifies himself and his client with the most thorough Elevator organization in the world---an organization with fifty-seven years' experience and success in building Elevators.

Our Elevators --- of every type---from the simplest Hand-power Elevators to the most elaborate Electric and Hydraulic Installations---are the world's most finished Elevator products.

We maintain Branches in eighty-one cities in the United States the distribution of which offers to users of Otis Elevators an inspection and Repair Service unapproached by any other Elevator Company.

Your clients and their engineers who use Otis Elevators will receive the benefit of our broad engineering experience and the unequalled facilities of our "Service Department." We are always glad to co-operate with them and with you to the fullest extent.

We Make

Gearless Traction Elevators. Worm Gear Traction Elevators. Drum Type Elevators. All Types of Hydraulic Elevators. Freight Elevators of Every Description. Automatic Residence Elevators. Electric Dumbwaiters. Incline Railway Hoists. Blast Furnace Hoists. Escalators. Inclined Freight Elevators. Gravity Conveyors, Etc.

Let us send you our latest books giving detail description of Otis Elevator products.

Eliminate Form Work in your concrete construction

The cost of form work doubtless has often caused you to make alterations in plans you would have liked to carry out. It is especially so in curved or arched construction—admittedly the strongest and most pleasing type.

Self-Sentering will enable you to plan roofs, floors, ceilings, walls, partitions, etc., without form work of any kind. It is adapted with equal facility to flat, inclined or curved surfaces. Concrete roofs of any character may be constructed with it. Floors can be planned with arched slab construction on spans up to 12' in width. Partitions built with it need be only 2" thick—a great saving of floor space in large lofts.

Self-Sentering is a new reinforcement and centering combined. It is manufactured in sheets 28" wide and up to 12' long, or curved in the factory to any desired radius. It is made up of a series of cold-drawn heavy ribs connected with the most efficient form of expanded metal, all cut and drawn from one sheet of special steel.

Write for our Fireproofing Handbook

We shall be glad to send you a complimentary copy on request. It is a handsome 80-page illustrated book, published for Architects, Engineers and Contractors. It will give you concisely all the facts you want to have on file regarding Self-Sentering.

Editorial Comment.

Building operations throughout the United States for the month of June, 1913, have shown a decline compared with the same month of last year. Official reports from 60 different cities throughout the country made to the American Contractor, show a loss for the month of about 16 per cent in the aggregate. New York and Chicago and the larger building centers have shown a considerable decline. This is the natural result of the tendency of the times, the general depression of business and the somewhat stringent state of the money market. Altogether the western cities have fared better than those of the east. Particulars are to be found in the following table:

City	June, 1913.	June, 1912.

Forest fires such as have just devastated the slopes of Tamalpais leave their marks on the trees that later furnish the lumber for our homes. The peculiarities of the growth of trees are thus described in a recent number of the Scientific American:

"The forester depends very largely on the annual rings of growth not only to determine the age of trees, but also to calculate the growth and yield of individuals and forests. Sometimes they serve a different purpose. A few years ago, in a lawsuit involving a forfeit of \$25,000 as surety against the cutting of timber on alleged Tennessee State land, sections of tree trunks near the ground were admitted as evidence in locating an old stream bed which marked the boundary of the original grant. This was made possible through the fact that the timber on the newer land was younger than that on the original banks of the stream and was also even-aged instead of all ages, thus showing that the change in the bed of the stream had been made rather suddenly and comparatively recently.

The occurrence of a severe fire, an insect infestation, an unseasonable frost, or periods of abundant rain or of drought may be read from the effects produced upon the structure of the wood from year to year. If a fire is severe enough to destroy portions of the cambium or growing layer of a tree the wound will eventually grow over from the edges. Even if entirely effaced from the outside it will appear upon cutting open the tree, and if a number of rings is counted from the very edge of the wound to the back the time of the fire can be determined with accuracy."

The tendency of a tree to cover up an injury attached to it is commonly observed in the growing over of nails and wires. Sometimes the cones of a lodge pole pine persist so long on the tree that they are caught by the growing wood and completely encased. Thus the wood of the tree not only less accurately records the history of its life.

Workmen's Compensation.

Theory and History of Western Canada's Compensation Law.

By W. F. Gullid, LL.B., of Winnipeg
in Western Canada Contractor.

There are few fields of legal inquiry so absorbingly interesting as that which treats of "Employers' Liability," or, as it is generally termed in more recent years, "Workmen's Compensation." In either case the reference is to "the obligation which the law imposes upon the employers of labor to compensate their workmen in respect of personal injury suffered in the course of employment."

Nor is the interest in such an investigation merely academic. It is true that the law on the subject is involved and intricate, so much so that few lawyers even profess to be authorities therein, and these few only because, to a certain extent, they have through long experience and practice become specialists in this particular field. Nevertheless, there are large numbers of our citizens in Western Canada affected by the law of Workmen's Compensation or Employers' Liability. We have many occupations and industries, as for example, mining, railroading, manufacturing, building and construction of various kinds, wherein both the employer and workman live in daily likelihood of having to depend upon the condition of the law for the determination of their rights or liabilities as the case may be. In each of these occupations we find a twofold and antagonistic interest. On the one hand we have the interest of the employer — a monetary interest chiefly, and to a limited extent the interest of "Capital" — while opposed to this on the other hand, we have the interest evinced by the employee, an interest which is personal and vital, and broadly speaking, the interest of the representative of "labor."

It is this very widespread and divergent, yet keen, interest that has induced the writer to essay the task of preparing a brief digest and presenting in the space of a short review, and as clearly as may be, the condition of our law in Western Canada on this important and difficult subject, and it is his hope that, in some measure at least, the perusal of these paragraphs may prove not only interesting, but enlightening and profitable.

No one can be more fully aware of the intricacy of the subject and of the difficulties which stand in way of this task; difficulties which are rather enhanced by reason of the fact that the article is framed for the average reader, and is in no way to be considered a legal treatise. To begin with the field is exceedingly broad and expansive; not only so but in many instances whole volumes of case law turn on the wording of some single phrase of an Act. Further the law itself is not fixed. Our latest Acts on "Workmen's Compensation" are to a certain extent experimental. The law today is the result of years of growth and experiment, so that to properly understand it, an adequate knowledge of its history and development is essential. Moreover there is an added complexity due to the confluence of streams from at least four different fountains of legal liability, each varying widely in nature and origin. Add to this one further

difficulty (by no means inconsiderable) — the degree of variance of the laws of those different provinces we are considering, namely, Manitoba, Saskatchewan, Alberta, and British Columbia. Being apprised of these difficulties the reader will duly appreciate the position of the writer.

The mention of the lack of uniformity in the laws in the various provinces suggests the advisability of dealing with our subject in a general way, that is to say, in a manner applicable generally to all or to a number of our provinces, indicating briefly, where necessary or expedient, special features in the laws of each, and to offer, as occasion suggests, a few remarks by way of criticism.

It will come as a surprise to many to learn that practically all of our laws on Workmen's Compensation and Employers' Liability comes directly from England. Many would call, our latest Acts on Workmen's Compensation drastic. We pride ourselves in living in a democratic and progressive country, and yet we have taken this very Act almost word for word from the Act of England — Conservative England. The Lloyd George budget and state insurance are not the only indications that Great Britain, considered the most conservative country in the world, is yet the most democratic and radical in the way of advanced legislation. This will account for the frequent references made throughout to English law, it being in practically all points applicable here by reason of this similarity in our statutes.

The investigation of our field reveals the fact that liability of the employer may be based entirely, or in part, on any one or more of four chief grounds, each of which operates in an important way, and has an important and direct bearing on the position, both of employer and workman.

That is to say, liability is founded on:

(a) The common law of England, which is incorporated into the law of all of our provinces, or

(b) Lord Campbell's Act, sometimes called "The Fatal Accidents Act" or "Compensation for Death by Accident," re-enacted in our various provinces, or

(c) The Employers' Liability Act of England, 1880, adopted by most of our provinces, either under the name or under the title "Workmen's Compensation for Injuries Act," which is not to be confused, however, with the more recent enactments termed "Workmen's Compensation," or

(d) The Workmen's Compensation Act of England, 1897, 1900 and 1906. All of our western provinces have within recent years adopted Acts embodying the limited principle of compulsory insurance, characteristic of this division.

Let us deal with these in order:

(a) Common Law Liability.

It is on the common law of England that the whole structure of the law of Employers' Liability is founded, and in which it has its roots. Indeed, not infrequently, workmen who have suf-

fered injury bring their action solely on this ground, or combine such action with that under the third head, namely, the Employers' Liability Act, and in such cases if successful on the common law ground, may obtain large sums by way of damages. Frequently juries assess the loss of an arm or leg as high as \$8,000.00 or \$10,000.00. It may be asked, then, why workmen do not oftener nowadays, rely on a suit at common law. The answer is that the case must be a very clear and strong one to insure a verdict, and lawyers are apt to counsel "a bird in the hand is worth two in the bush," and advise their clients to take advantage of the later Acts which render a verdict of damages tolerably certain, even although the amount recovered be considerably less.

To succeed at common law, some breach of the statutory duty by the employer or some "personal negligence" must be established. For instance, the adoption by an employer of a defective system or plan of management, or the use of defective and improper agencies for carrying on work, or again the sanction by an employer with full knowledge, of the use of machinery or tackle which is improper and unsafe, would be sufficient. The onus of proving the negligence is on the workman, so that he must be able to establish a strong case.

Moreover, in the course of time, certain defences to such an action have become recognized, and have added to the difficulties of the workman who seeks recovery at common law. Of these to make mention of but four: (1) If the injury resulted in death (as often happened), the representatives or dependents of the deceased, even though their only source of livelihood was thus suddenly removed, could not maintain such an action, as it was then held that the personal action died with the person. The effect of this maxim (however justified it may have been in origin) was removed by Lord Campbell's Act, shortly to be discussed. (2) In the doctrine of "Common Employment," as established in the celebrated case of *Priestly vs. Fowler*, a very great blow was struck at the chance of a workman succeeding in such an action. The doctrine, in short, was that an employer was absolved from liability where the injury arose through the act of a fellow servant of the injured, the theory being that there was an "implied" contract on the part of the workman to take the risks of the employment, including the risk of injury caused by a fellow-servant. It was chiefly to dispose of such a defense that the "Employers' Liability Act" below referred to was enacted. (3) Under the maxim, "*Volenti non fit injuria*," the workman who knew of and accepted the risk attendant on any work, was prevented from succeeding, and such knowledge and acceptance or consent being a question of fact might be implied or inferred from the circumstances of the case, and the particular

conduct of the injured workman. This defence is also available under the Employers' Liability Act referred to later, though its scope has been narrowed by the trend of subsequent decisions. (1) One of the chief defences to such an action at common law is "contributory negligence," that is to say, if in any way the workman himself contributed to bring about the injury, he is precluded from succeeding, even although there may have been some negligence on the part of the company, but which was not the effective or proximate cause of the injury.

While it is seen, therefore, that there were and still are many weapons placed in the hands of the employer to defend an action by a workman, at common law, and while owing to this, in the majority of cases, such an action cannot be successfully maintained, and while, further, lawyers are inclined to advise their clients, unless they have a strong case, to take advantage of the more effective and certain remedies provided by the Statute, nevertheless, the common law aspect is an exceedingly important one; and especially so in view of the fact that on its basic principles the whole of the legal superstructure of Workmen's Compensation is founded, and to the extent that situations arise for which provision is not made by Statute, these principles flourish with unabated force and vigor.

(b) Lord Campbell's Act.

Turning to Lord Campbell's Act in 1845. This merely took away one of the grounds of defence available at common law, namely, where the injury resulted in death. Under this Act, which has been re-enacted in all our provinces, and indeed, incorporated in some instances into our Employers' Liability Act, provision is made for the bringing of an action by the personal representative of the deceased on behalf of the dependants of the deceased, or to be more exact, on behalf of the wife, husband, parents (which includes grand-parents and step-parents) and children (which includes grand-children and step-children) of the person whose death has been occasioned by negligence. More recent Acts include in this list brothers and sisters; but in all cases the damages are assessed and proportioned to the pecuniary loss resulting from such death to the parties for whom and for whose benefit an action is brought. Such action must be brought within one year from the death and generally, where there is no executor or administrator, may be brought by the dependants or some one or more of them personally.

(c) Employers' Liability Act.

England, 1880; British Columbia, 1897; Northwest Territories, 1909; Manitoba, 1902. The purpose of these Acts was two-fold (a) to relieve the workmen of the necessity of proving "personal negligence" on the part of the employer as required at common law. Owing to the increase in size of private business where the employer took but a small share in the actual management of the work, and owing further to the establishment of companies and corporations, where the employer was an abstract personality, it was impossible to prove personal negligence, and hence common law actions by workmen almost invariably

failed. (b) To overcome the recognized defence to common law action of common employment above referred to, or in other words to nullify the effect of the decision in Priestley vs. Fowler.

This two-fold purpose was achieved by these Acts by the insertion of some provision to the effect "that where personal injury is caused to a workman:

"(a) by defective ways, works, machinery or plant,

"(b) by reason of the negligence of a fellow servant for whose negligence, either in supervision or otherwise, the employer is by such Act made responsible,

"(c) by reason of defective rules, by-laws or particular instructions,

"(d) by reason of the negligence of a person having charge or control of any signal points, locomotive engine or train upon a railway,

"In all such cases a workman is to have the same right of action as if he had not been a workman." Here also, in the event of death, the same provision, as outlined in Lord Campbell's Act, applies both as to the parties for whose benefit the action must be brought and as to the necessity of such parties establishing pecuniary loss.

It will be seen that this Act renders the chance of a workman recovering very much stronger than had been the case at common law, the chief feature being that the employer is held answerable for those who are in delegated authority under him. At the same time there are certain limitations and conditions, both restrictive and precedent. The Act is confined in its application to certain classes of servants, generally speaking, to those performing manual labor, but not including firm servants; the compensation recoverable is limited in amount to the average earnings of a workman in the same class, for the space of three years, or some equivalent sum, and is further sometimes conditioned on proper notice of accident, and trial, while the action itself must be commenced within two years from the time of the injury.

But a claim brought under the Act may be defeated if the employer can establish:

(a) That the servant whose act or neglect caused the accident was not acting in the scope of his authority,

(b) The accident was unavoidable or inevitable or what may be called accident pure and simple,

(c) That the injured was really a trespasser at the time,

(d) That the injured person himself contributed to the accident,

(e) That the servant injured agreed to take the risk.

Such in brief, is the sum and substance of this division of our subject as based on the principles embodied in the Employers' Liability Act.

(d) Workmen's Compensation.

For several years an agitation has been on foot among workmen for the enactment of a law which would enable them to recover for injuries sustained during the course of their employment, entirely regardless of negligence on the part of the employer or any of his other workmen. There has been founded in Germany a system of insurance of workmen against accidents happening in the course of their employment (which, by the way,

has been largely adopted in many other European countries), but it was not, however, until 1897 that the first Workmen's Compensation Act of England was passed to meet the insistent demand of workmen. Later it was extended in 1900 and again in 1906, so as to include domestic servants and farm laborers. It is to be noted that in all its main features it has been adopted in recent years by our provinces in the following order: British Columbia, 1902; Alberta, 1908; Manitoba, 1910; Saskatchewan, 1910.

Briefly, these acts, after defining the nature of the employment to which, and the workmen to whom, the Act applies (and in this respect it is to be noted that our Acts do not include domestic servants or farm laborers), provide that such workmen are to be compensated for "personal injury by accident arising out of and in the course of the employment." Thus workmen are practically insured irrespective of the question of negligence, against all accidents occurring during the course of their employment, though, in passing, we may note these exceptions being instances where no compensation is recoverable, under these Acts: (a) where the period of disablement is less than two weeks (in Saskatchewan one week); (b) where the workman elects to proceed independently of the Act, that is at common law or under the Employers' Liability Act; (c) where the injury is due to the serious or wilful misconduct (and in Manitoba, drunkenness) of the workman, though even here, should the injury result in death, compensation is nevertheless recoverable by the dependants. Under these Acts, compliance with certain rules is necessary, these having to do chiefly with the giving of notice of accident and notice of claim within specific times (varying in the different provinces), such rules prescribing also the manner for giving such notice. The action itself must be commenced not later than six months from the date of the injury. Provision is also made for workman and employer adopting, with the approval of the attorney general, some alternative scheme of compensation. A rather important feature is the liability of the employer for injuries to workmen hired by sub-contractors, though a right of recovery over against such sub-contractors is reserved to the employer.

It is to be observed, moreover, that a commencement of proceedings under these Acts precludes the commencement of an action later, either at common law or under the Employers' Liability Acts, or vice versa. To these Acts are usually attached two schedules the first dealing with the amount of compensation and how it is to be computed; the second providing a quasi judicial procedure aimed to give a prompt and speedy remedy. In case of death results from the accident, the dependants, if any (though in Manitoba they must reside in the province) may recover to the extent of \$1,000 to \$2,000, the amount varying in the different provinces. If the dependants are only dependent in part upon the earnings of the deceased, the compensation is proportioned to the loss or injury to such dependants, though in no case can they recover more than the maximum sum of \$1,500 or \$2,000 as the case may be. If there are no dependants, the employer may

be required to pay \$100 to cover funeral and medical expenses. Where the injury results in total or partial incapacity, but not death, compensation is made payable in weekly installments amounting to one-half of the former earnings of the injured with a maximum of \$10 per week, and with the total limitation of \$1,500 or \$2,000 as a maximum.

Such is a brief outline of our Workmen's Compensation Acts. The outstanding feature is obviously the embodiment of the principle of limited insurance—a principle that is based upon the view, apparently, that all ordinary misadventures met with by workmen in the course of their employment should be regarded as incidental to the expense of the work in which they are engaged, and should therefore be charged to such industry without reference to the question of negligence or default.

With the rightness or wrongness of this principle we are not here concerned, for although it has been suggested that these Acts are more or less experimental in nature, the writer

has no hesitation in saying that they are here to stay. In practice, contractors, builders and employers of labor in general realize (or should realize) this fact and protect themselves against the statutory liability by insuring this risk in some accident insurance company, just as nations today insure against the dangers of war and invasion by the building of navies and the upkeep of armies. Viewed in this light, the alarm with which the Acts were first contemplated by employers has practically vanished.

But we have already exceeded the patience of the reader, though throughout the space has seemed but all too short to adequately deal with such an interesting and extensive field of law. We have outlined the development of the subject from its origin in common law, and it is hoped that the historical review and brief critical analysis of the important steps of this development will afford employer and workmen alike a clearer understanding of the law of workmen's compensation, which is the outcome of long years of growth and experience.

building will be erected on one of the corners of Pine and Stockton streets. The assured early completion of the Stockton street tunnel has caused a marked revival of interest in property on Stockton street from Sutter to Sacramento streets, and the first of the year will see a number of high class hotels and apartment houses under construction. Announcement of another large apartment house on one of the Stockton street corners will be made within a week. The building planned by Mr. MacDonald will have a complete steel frame, reinforced concrete floors, walls and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster, making the construction fireproof throughout. Suites will range from two to four and five rooms. Interior finish will be of pine and hardwoods with considerable marble and tile used. All suites will have connecting bath rooms and will be equipped with wall beds. There will be steam heat, oil burning apparatus, vacuum cleaning system and elevator service. The elevators will connect direct with the tunnel by means of a sub-basement, and this will be made a regular stop for all cars using the tunnel. Exterior of the building will probably be faced with cement plaster and mat glazed terra cotta. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 7 story and base, brick and steel, \$74,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Starr & Larson. The building will be erected at the southeast corner of Sutter and Jones streets, and will cover a considerable ground area. The first floor will be arranged for entrance lobby, office, social rooms and several apartments. Upper floors will be divided into two and three room suites. All apartments will have private bath rooms and wall beds. There will be steam heat, elevator service, a vacuum cleaning system and hot water plant. Interior finish will be of pine and hardwood veneer. Some ornamental plaster will be used. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. A contract for the steel and iron work has been awarded to the Central Iron Works for \$29,250, and plans for the balance of the work are now out for figures.

SAN FRANCISCO—Apartment houses, 2, 3 story and base, frame, \$30,000 each. Architect, none. Owners, Louis Lee and F. Heine, 1255 Polk St., S. F. These two buildings will be erected on the north side of Pine street east of Leavenworth. Each will contain 15 apartments of two and three rooms. Buildings will have street frontages of 37½ feet and will extend back 116 feet. All suites will have connecting bath rooms and will be equipped with wall beds. Interior finish will be of pine and elm panels. Bath rooms will be finished in cement plaster. There will be steam heat, automatic elevators and hot water systems. Exteriors will be covered with pressed brick veneer, rustic and shiplap. Plans are complete and the work will be done by Day Labor.

LOS ANGELES, CAL. — Apartment house, 3 story and base, Class C construction, \$60,000. Architect, Fernand Palminter, Byrne Bldg., L. A. Owner, Mrs. Harvey Ingerson. The building will be erected on Beaudry avenue near 2nd street, and will cover an area

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These announcements are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architect, none. Owner, W. M. Garey, 930 Chestnut St., S. F. The building will be erected on the east side of Larkin street north of Jackson, and has a frontage on Larkin street of 20 feet and a depth of 57 feet 9 inches. There will be six apartments of three rooms and bath each. Interior finish will be of pine and redwood. Some hardwood floors will be used. No heat will be installed. All suites will be equipped with wall beds. Bath rooms will have cement plaster wainscot and sanitary floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

SAN FRANCISCO—Apartment house, 7 story and base, Class C construction, \$90,000. Architect, Charles J. Rousseau, Pheasant Bldg., S. F. Owner, John Mack. This building will be erected on Post street between Jones and Leavenworth, covering an area of 69x37½ feet. Interior has been arranged to contain 56 suites of two, three and four rooms. All apartments will have private bath room and wall beds. Plans provide for steam heat, elevator service, vacuum cleaning plant and hot water system. Interior finish will be of pine, redwood and hardwood veneer. Tile and cement will be used in the bath rooms. There will also be special built-in features in the bath rooms and kitchens. There will be two large social rooms, office and parlors. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, reinforced concrete, \$75,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Portola Realty Co. This is the second

large building project announced as a direct result of the commencement of work on the Stockton street tunnel, and is to be erected at the southwest corner of Stockton and California streets. The building will have a frontage on Stockton street of 68 feet 9 inches and of 124 feet on California street. Besides the social rooms and offices, upper floors will be arranged for a total of 140 rooms which will be divided in two, three and four room suites. Interior finish will be of pine and hardwoods. Bath rooms will have cement floors and tile wainscot. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Provision has been made for direct connection with the Stockton street tunnel through elevator service via the basement. Construction will be practically fireproof throughout. Exterior of the building will be faced with cement plaster. Plans are now being prepared and construction will be undertaken before the first of the year.

BERKELEY, ALAMEDA CO., CAL.—Apartment house, 4 story and base, frame. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will contain in the neighborhood of 100 rooms which will be arranged in suites of from two to four rooms. All apartments will have private baths and will be equipped with wall beds. Interior finish will be of pine and hardwood. Hardwood floors will be used in some of the rooms. Bath rooms will be finished in cement plaster and tile. There will be steam heat and elevator service. Exterior of the building will be covered with rustic shiplap and brick veneer. Plans are nearly complete and figures will be called for shortly.

SAN FRANCISCO—Apartment house, 15 story and base, Class A construction. Cost not stated. Architect, Kenneth MacDonald, Jr., Holbrook Bldg., S. F. Owner's name withheld. This

of 80x154 feet. Interior will be divided into 110 rooms which are to be arranged in two and three room suites. All apartments will have private baths and wall beds. Interior finish will be of pine with some hardwood veneer. There will be steam heat, an automatic elevator and vacuum cleaning system. Bath rooms will have cement floors and tile wainscot. Built-in features will be used in the bath rooms and kitchens. Exterior of the building will be faced with pressed brick. Plans are being prepared and when complete the work will be done by Day Labor.

HERMOSA BEACH, LOS ANGELES CO., CAL.—Apartment house, 3 story and base, brick, \$25,000. Architect not selected. Owner, Dr. W. C. Bondies, 906 Mission St., South Pasadena. The building will be designed for two and three room suites with private baths and wall beds. No plans have been made. Further details will be given when the owner selects an architect. Dr. Bondies will also erect several frame dwellings on his property at Hermosa Beach.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick, \$50,000. Architect, E. B. Hogan, Jr., 1564 West 46th St., L. A. Owner, Ernest C. Hillman, 635 West 46th St., L. A. The building will cover an area of 54x120 feet and has been designed to contain 86 rooms arranged in two and three room suites. All suites will have private bath rooms and will be equipped with wall beds. Plans provide for steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine with some hardwood panels. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

SEATTLE, WASH.—Apartment house, 3 story and base, brick, \$30,000. Architect, W. W. Voorhees, Etel Bldg., Seattle. Owner, W. J. Morrow. The building will be erected on a corner site and will cover a considerable area. Suites will be arranged in two and three room apartments with private baths. Interior will be finished in pine and elm panels. Some hardwood floors will be used. There will be steam heat and an automatic elevator. Bath rooms will have tile floors and wainscot. All suites will have wall beds. Exterior of the building will be faced with pressed brick. Plans will be ready for figures about the first of September.

Contracts Awarded.

PASADENA, LOS ANGELES CO., CAL.—Apartment house, 1 story and base, brick, \$60,000. Architects, Frank G. Kruecker and H. C. Decker, Ferguson Bldg., L. A. Owners, Charles Seale and S. S. Wold. Contractor, George Whyte, Pasadena, general construction, \$12,000. Munger & Munger, Pasadena, plumbing and heating, \$9,000.

LOS ANGELES, CAL.—Apartment house, 3 story and base, frame. Cost not stated. Architect, C. Gould, L. A. Owner, Mrs. A. Burwell. Contractor, R. T. Laughlin, Llesner Bldg., L. A. Contract price not stated.

BANKS.

CONCORD, CONTRA COSTA CO., CAL.—Bank, 2 story and base, brick or reinforced concrete. Cost not stated. Architect, G. A. Applegarth, Call Bldg.,

S. F. Owners, Bank of Concord. This is the second bank structure which has been designed for Concord institutions by Mr. Applegarth. This building will be erected on a corner site and will contain the banking rooms on the first floor and a number of modern offices on the upper floor. Interior of the banking rooms will be finished in hardwood and ornamental plaster. There will be special bank fixtures and coin vaults. Upper floor will be finished in pine. There will be a central heating system. Exterior of the building will be faced with cement plaster. Plans are being prepared.

BRIDGES, DAMS AND HARBOR WORK.

Contracts Awarded.

FIR, WASH.—Bridge, concrete and steel, \$50,000. Engineers, Bowerman & McCloy, Mutual Life Bldg., Seattle. Owners, Skagit County. Contractors, Skagit Construction Co., Mt. Vernon. Contract price, \$50,000.

CHURCHES.

TILLAMOOK, ORE.—Church, 1 story and base, brick and stone, \$20,000. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, First Methodist Church of Tillamook. The building will be designed in the Colonial style with a high basement and main floor. The basement will be arranged for Sunday school rooms, social hall and kitchen. Main floor will contain an auditorium seating 250 people. Interior finish will be of pine. There will be a central heating system. Exterior of the building will be faced with pressed brick and stone. Plans are complete and figures are now being taken.

TULARE, TULARE CO., CAL.—Church addition, concrete and brick construction. Cost not stated. Architect's name not given. Owners, St. Aloysius Church. This work will consist of the addition of two large wings, which will contain class rooms. The main auditorium will also be enlarged. Interior finish will be of pine throughout. The exterior of the building will be faced with cement plaster. Plans are in the hands of Father Edward Schmitt, who will have charge of letting the contracts.

Contracts Awarded.

AZUSA, LOS ANGELES CO., CAL.—Church, 1 story and base, frame, \$12,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, First Presbyterian Church of Azusa. Contractors, Perkins & Holcomb, Watts. Contract price, \$11,656.

COURT HOUSES.

SAN FRANCISCO—City Hall foundations, etc., \$11,882. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owners, City and County of San Francisco. Contractors, Nichols & Handley, Hearst Bldg., S. F. Contract price, \$11,882. This contract calls for the concrete foundation work and building excavating for the new City Hall, and is the third contract to be let for this \$1,500,000 structure.

FACTORIES & WAREHOUSES.

SACRAMENTO, CAL.—Grain elevator, reinforced concrete construction. Cost not stated. Architect, P. J. Herold, Forum Bldg., Sacramento. Owner's name withheld. This work has been mentioned here some time ago when plans were being prepared. Working drawings are now complete and figures are being taken. The building will be fireproof. Special grain handling machinery will be used. Exterior will be faced with cement plaster. Besides the elevator a flour mill will be erected shortly, plans for which have also been prepared in the office of Architect P. J. Herold.

GARAGES.

Contracts Awarded.

LOS ANGELES, CAL.—Garage, 1 and stores, 1 story and base, brick, \$23,000. Architects, Kempel & Erkes, Hene Bldg., L. A. Owners, Schmidt Estate. Contractor, Fred R. Brauer, 2025 Willard Ave., L. A. Contract price, \$23,000.

PORTLAND, ORE.—Garage and hall, 1 story and base, brick and steel. Cost not stated. Architect, Robert F. Tegen, Sweetland Bldg., Portland. Owners, Paul Van Firdaugh and Mrs. Hortense. Contractors, Litherland-Abbey Co., Beck Bldg., Portland. Contract price not stated.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, \$10,500. Architect, Bernard J. Joseph, First National Bank Bldg., S. F. Owner, Henry A. Jacobs. The building will be erected on the west side of Scott street south of Sacramento, and has been designed for a high-class residential flat building. Flats will consist of six and seven rooms. Interior will be finished in pine and hardwoods. Hardwood floors will be used in the principal rooms. There will be a central heating system and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with klinker brick veneer, rustic and cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO—Flats, 2 story and base, frame, \$1,000. Architect, C. Pantoni, 906 Kearny St., S. F. Owner, A. Corbelli. The building will be erected on Pacific street west of Jones, and has been designed to contain two modern flats of five and six rooms. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be open fire places and brick or tile mantels. Tile will be used in the bath rooms and kitchens, east corner of Devisadero and Broadway with rustic and shiplap. Plans are complete and figures are being taken.

SAN FRANCISCO—Flats, 2, 2 story and base, frame, \$1,500 each. Architect, none. Owners, C. W. and W. J. Keenan, Hayes and Masonic avenue, S. F. The buildings will be erected on Hayes street east of Masonic avenue, and each has been designed to contain two modern flats of four and five rooms. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and brick or tile mantels. The will

be used in the bath rooms and kitchens. Exteriors of both buildings will be covered with cement plaster on metal lath and klinker brick veneer. Plans are in the hands of the owners and work will be done by Day Labor. Materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.
Flats, 2 story and base, frame, \$3,000. Architect, N. W. Shaw, 2073 Bateman St., Berkeley. Owner, Arthur Frey. The building will contain two flats of five and six rooms and bath. Interior finish will be of pine with hardwood floors. Bath rooms will have cement plaster wainscot. There will be a large open fire place with brick mantel in each living room. Exterior of the building will be covered with cement plaster and rustic. Plans are complete and figures are now being taken.

GOVERNMENT WORK AND SUPPLIES.

New Columbia Hospital.

Congress at the last session appropriated \$300,000 for the construction in this city of a modern fireproof hospital building for the treatment of diseases peculiarly to women and a lying-in asylum. The building is to be erected on the site belonging to the United States to replace the present building of the Columbia Hospital. The construction of the building and the expenditure of the appropriation is to be under the supervision of the superintendent of the Capitol building. The sum of \$100,000 has been made available to commence the work. The plans and specifications will probably be obtainable about the middle of October. There will be two wings and an administration building in the center. The buildings are to be of brick and of fireproof construction. Nathan C. Wyeth, of this city, is the architect.

Puget Sound Traveling Cranes.

The contract for furnishing electric traveling cranes for the general foundry, Puget Sound navy yard, Washington, has been awarded to Pauling & Harnischfeger, Milwaukee, Wis., at \$16,825.

Pearl Harbor, H. T., Gunners' Quarters.

The contract for the construction of two gunners' quarters at the U. S. naval magazine, Kaula, Pearl Harbor, H. T., has been awarded to the Lord-Young Engineering Co., Honolulu, H. T., at \$13,880.

Pearl Harbor, H. T., Officers' Quarters.

The bid of the Lord-Young Engineering Co., Honolulu, H. T., \$19,440 in amount, has been accepted for the construction of two officers' quarters at the naval station, Pearl Harbor, H. T.

Capra Wire, Reclamation Service.

The following bids were opened at the office of the U. S. Reclamation Service, Los Angeles, Cal., for furnishing copper wire for Minidoka project, Idaho:

1. Bid 1. Standard Underground Cable Co., Los Angeles, Cal.
2. B. F. Klein & Co., Los Angeles, Cal.
3. U. S. Steel Products Export Co., Los Angeles, Cal.
Item 1. 35,000 lbs No. 5 E. & S. 3-

wire bare copper strand—Bid 1, \$5,705; 2, \$5,687.50; 3, \$6,125. Place of delivery, bid 1, Perth Amboy, N. J.; 2, Elizabeth, N. J.; 3, Worcester, Mass. Reel charge, bid 1, \$112; 2, \$140; 3, \$150. Reel weight, bid 1, 3,200 lbs; 2, 3,275 lbs; 3, 4,000 lbs.

Item 2. 400 lbs No. 6 E. & S. solid soft-drawn copper wire—Bid 1, \$63; 2, \$65.40; 3, \$67. Delivery same as item 1.

Item 3. 48,000 lbs No. 1 E. & S. solid weatherproof wire—Bid 1, \$6,615; 2, \$6,657; 3, \$6,762. Deliveries, same as item 1. Reel charge, bid 1, \$72; 2, \$168; 3, \$165. Reel weight, bid 1, 3,100 lbs; 2, 5,250 lbs; 3, 4,400 lbs.

Item 4. Miscellaneous solid and stranded E. C. wire—Bid 1, \$1,156.66; 2, \$1,107.55; 3, \$1,108.25. Deliveries, same as item 1. Reel charge, bid 1, \$18.50; 2, \$10; 3, \$20.

Item 5. 1,500 ft No. 4 E. & S. triple-conductor cable—Bid 1, \$537; 2, \$540; 3, \$557.50. Deliveries, bid 1, Pittsburgh, Pa.; 2, Stamford, Conn.; 3, Worcester, Mass. Reel charge, bid 1, \$7.50; 2, \$25; 3, \$10.

Lump sum, bid A, items 1 to 4, inclusive—Bid 1, \$13,519.66; 2, \$13,495.15; 3, \$14,397.57.

Lump sum, bid B, items 1 to 5, inclusive—Bid 1, \$14,056.66; 2, \$14,295.15; 3, \$15,164.77.

San Diego Range Light.

The following bids were received by the light-house inspector, 14th district, for the construction of the San Diego front range light:

Muir & Symon, San Francisco, Cal., \$114.

Western Iron Works, \$869.
Judson Mfg. Co., San Francisco, Cal., \$696; accepted.

San Diego Light No. 5.

Muir & Symon, San Francisco, Cal., \$684; accepted.

Western Iron Works, \$858.
Judson Mfg. Co., \$833.
Todd & Peters, \$825.

Mortensen Construction Co., \$865.
San Diego Light No. 2—Rear range.
Muir & Symon, San Francisco, Cal., \$910; accepted.

Western Iron Works, \$1,287.
Judson Mfg. Co., \$957.
Todd & Peters, \$1,300.

Mortensen Construction Co., \$1,600.

Phoenix, Ariz., Screens.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for furnishing door and window screens for the U. S. post office at Phoenix, Ariz.:

T. L. Edens, Phoenix, Ariz., \$1,610.
Winslow & Grable, Phoenix, Ariz., \$1,615.

Robbins Mfg. Co., Chicago, Ill., \$1,675.
The Willer Mfg. Co., Milwaukee, Wis., \$1,685.

Honolulu, H. T., Quarantine.

The contract for the construction of latrine buildings, sewage purification tank, and connecting piping at the U. S. quarantine station, Honolulu, H. T., has been awarded to W. N. Concomin, Monadnock Building, San Francisco, Cal., at \$29,375; plus for 200 lin ft of riprap on discharge pipe at \$12 per ft, \$2,400; total, \$31,775. Time 5 months from date of contract.

Five-Ton Pillar Cranes.

The Isthmian Canal Commission will soon be in the market for the purchase of six 5-ton pillar cranes. These cranes

are needed for handling forgings between furnaces and hammers and under the latter. No operating gear is required, except that the trolleys shall be operated from the floor by pendant chains. The effective radius from center line of mast to center line of eye for hoist shall be not less than 15 feet, and the over-all length from center line of mast to end of boom not more than 16 feet 6 inches. The crane shall not exceed 18 feet from floor line to top of mast and shall be 13 feet from floor line to underside of boom. The crane shall consist of a heavy cast iron pillar; a vertical structural mast braced, and a structural steel horizontal boom fitted with tracks for the trolley. The mast shall be assembled above the pillar, and the load carried by a roller thrust bearing at the upper end of the pillar. The thrust bearing shall receive the load from a cast-iron strut, which, riveted between the sides of the mast, forms the bearing for a vertical pivot on the pillar. This bearing shall not be more than 18 inches below the boom. The lower end of the mast shall have a structural steel frame fitted around the pillar. This frame shall carry suitable rolls for resisting the side thrust and reducing friction to a minimum. The cranes shall be assembled at the factory and tested under a load of six tons before shipment.

Fort Peck Indian School.

The following bids were received by the commissioner of Indian Affairs, Washington, D. C., for the construction of a brick hospital at the Fort Peck Indian School, Mont.:

E. L. Olson, Harper, Mont., \$9,744; 120 days.

W. D. Lovell, Minneapolis, Minn., \$12,900; 180 days.

G. A. Grate, Minneapolis, Minn., \$13,150.

The Constructing Quartermaster Office at Fort Mason is now in charge of Capt. F. W. Griffin, pending the arrival of Col. Geo. McK. Williamson, who will resume charge after August. Capt. E. L. Walton has left for his new command in Arizona.

The following appropriations for the fiscal year 1914 have been made to the Constructing Quartermaster's Office at Fort Mason for work at the various posts:

Seven new buildings at Presidio, \$91,000.

Two new buildings at Fort Mason, \$10,000.

Five new buildings at Fort Winfield Scott, \$134,000.

Road construction at Presidio, \$50,000.

Road construction at Fort Winfield Scott, \$20,000.

Sewer construction at Fort Winfield Scott, \$20,000.

Retaining wall at Fort Miley, \$20,000.

This work will be undertaken as soon as orders from Washington are received.

Engineer O. W. Degen, Constructing Quartermaster's Office at Fort Mason, is preparing plans for track-eave system at Fort Mason, connecting with the proposed tunnel under Fort Mason which is to be constructed by the State Board of Harbor Commissioners. The track system will connect at the tunnel with the Belt Line Railroad, Depot Warehouses and Transport Docks.

HALLS & SOCIETY BLDGS. HOSPITALS.

PASADENA, LOS ANGELES CO., CAL.—Lodge hall, 3 story and base, brick, \$35,000. Architect, C. A. Balch, 344 North Lake St., Pasadena. Owners, Pasadena Old Fellows Hall Association. The building will be erected on a corner site. The first floor will contain the parlors, office, lobby and a library. Second floor will be given over to a large auditorium and the third floor will be arranged for living apartments. There will be a central heating system. Interior finish will be of pine and hardwoods. Hardwood floors will also be used. The exterior of the building will be faced with pressed brick. Dr. S. P. Swearingen, 10 East Colorado street, is in charge of the work. Plans are complete and will be out for figures in two weeks.

PORTLAND, ORE.—Lodge hall alterations and additions, brick construction, \$20,000. Architects, Emil Schacht & Sons, Commonwealth Bldg., Portland. Owners, Knights of Pythias. The two-story brick building now under lease to this organization will have a third floor added and undergo extensive alterations. The second floor, now used as an auditorium, will be converted into club rooms and will be elaborately finished. Plans will be completed at once.

Contracts Awarded.

PORTLAND, ORE.—Lodge hall, 1 and 2 story and base, brick and steel, \$50,000. Architects, Clausen & Clausen, Macleay Bldg., Portland. Owners, Turn Verein Society, Contractor, William Vaez, 242½ First St., general construction. Contract price not stated. J. F. Shea Co., heating and plumbing. Contract price not stated.

HOSPITALS.

SAN FRANCISCO.—Screens for hospital group. Cost not stated. Architect, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans for screens for the eight principal buildings of the San Francisco hospital group have been completed and are now out for figures. Bids will be opened by the Board of Public Works on July 23rd. Plans and specifications can be secured from the Department of Architecture, Temporary City Hall.

LOS ANGELES, CAL.—Hospital, 2 or 3 story and base, reinforced concrete, \$50,000. Architects, Garrett & Farrell, Currier Bldg., L. A. Owners, French Hospital Association. A site for this building has been secured at the corner of College and Castelar streets. Only preliminary sketches of the building have been made and details cannot be given at this time. If additional funds are secured a much more pretentious building, or perhaps a group of buildings, will be erected. Further mention of the work will be made in these columns as plans progress.

PORT ORCHARD, WASH.—Veterans' Home, 4, 2 story and base, brick, \$100,000. Architects, Heath & Grove, National Realty Bldg., Tacoma. Owners, Washington Veterans' Home. This work will include the following buildings: Two-story barracks, 2-story assembly hall, 2-story laundry, 2-story superintendent's residence and three

employee's cottages. All construction will be of brick. Plans are still in the preliminary stage and details of the work cannot be given. Further mention will be made here when figures are called.

ALHAMBRA, LOS ANGELES CO., CAL.—Library, 1 story and base, brick and steel, \$26,485. Architect, Frederick L. Roehrig, American Bank Bldg., L. A. Owners, City of Alhambra. Contractor, H. F. Roberts, 263 North Marguerita St., Alhambra. Contract price, \$26,485. Note: This contract does not include interior trim.

Contracts Awarded.

OXNARD, VENTURA CO., CAL.—Hospital, 2 story and base, brick, \$42,000. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Sisters of Mercy. Contractor, Thomas Carroll, Oxnard. Contract price, \$42,000.

HOTELS.

SAN FRANCISCO.—Hotel, 6 story and base, steel and reinforced concrete, \$65,000. Architect, G. Albert Lansburgh, 709 Mission St., S. P. Owner, A. Eisenberg. This building has been mentioned here before when the architect was first commissioned to prepare plans. The structure will be erected on the north side of Sutter street between Jones and Leavenworth streets. Plans provide for a total of 90 guest rooms, 65 per cent of which will have private baths. Interior finish will be of pine and hardwoods with ornamental plaster used in the office and lobby. There will be steam heat, elevator service, hot water plant and a vacuum cleaning system. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

SAN FRANCISCO.—Hotel, 3 story and base, brick and steel, \$25,000. Architect, Charles E. J. Rogers, 24 California St., S. F. Owner's name withheld. The building will be erected on Golden Gate avenue near Hyde. The first floor will be arranged for an automobile sales room and upper floors will contain in the neighborhood of 50 guest rooms and several baths. Interior finish will be of pine. Bath rooms will have cement floors and tile wainscot. First floor will be finished in hardwood, marble and tile. A hot water system will be installed. There will be plate glass windows in patent store fronts. Exterior of the building will be faced with pressed brick. Bids will be called for shortly.

EL CENTRO, IMPERIAL CO., CAL.—Hotel, 4 story and base, brick and steel, \$130,000. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owners, Bell Development Co. The building will be erected at the corner of 7th and Main streets, and will cover an area of 121x151 feet. There will be four stores besides the hotel offices, lobby and dining room on the first floor. Upper floors will contain a total of 117 guest rooms and 60 private baths. Mahogany and tile will be used on the first floor. There will be steam heat, two passenger and one freight elevator, a vacuum cleaning system and hot water supply. Exterior of the building will be faced with cement plaster. Brick work and carpentry will be done by Day Labor. Separate contracts will be let for the other parts of the building.

Contracts Awarded.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architect, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, Edwin W. Pascoe, Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Plans for this work are now being prepared. When complete the job will be constructed on a percentage basis.

PANAMA - PACIFIC EXPOSITION TION WORK.

SAN FRANCISCO.—Warehouses, 1 story, frame and concrete. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans have been completed for two concrete and frame warehouses which are to be erected on the Exposition Grounds. Bids will be opened by the Buildings and Grounds Committee for this work on July 31st. Plans can be secured from the Director of Works, room 207 Service Building. An official proposal appears under the heading of Official Advertising in this issue.

Contracts Awarded.

SAN FRANCISCO.—Drainage system for race track, \$1,575. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Contractors, Pringle, Dunn & Co., S. F. Contract price, \$1,575.

RAILROAD CONST., STATIONS AND EQUIPMENT.

EUGENE, ORE.—Passenger station, 1 story and base, brick, \$25,000. Architect's name not given. Owners, Oregon Electric R. R. Co. Contractors, Moore Bros., Portland. Contract price not stated.

RESIDENCES.

SAN FRANCISCO.—Residence, 2 story and base, frame, \$7,500. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, Mr. Buck. The dwelling will be erected on 19th avenue in the Richmond District, and has been designed to contain seven rooms, bath and sleeping porch. Interior will be finished in pine and hardwoods. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Bath room will have tile floor and cement plaster. Tile will also be used in the kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO.—Residences, 2, 2½ story and base, frame, \$12,000. Architect, Charles C. Frye, 20 Montgomery St., S. F. Owner, E. M. Luckett. These houses will be erected at the southeast corner of Divisadero and Frederick streets. Each dwelling has been designed to contain seven rooms and bath. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed in each house. Bath rooms will be finished in tile and ce-

ment plaster. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, Fred Warden, 535 Laidley Ave., S. F. The house has been designed to contain six rooms and bath, and will be erected on London street near Excelsior. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room and dining room. There will be a large open fire place in the living room with tile mantel. Bath room and kitchen will have cement wainscot. Exterior of the dwelling will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 2½ story and base, frame, \$7,500. Architect, Charles C. Frye, 20 Montgomery St., S. F. Owner, Mrs. R. T. Ogle. The house will be erected on Devisadero between Union and Filbert streets. There will be eight rooms, bath and sleeping porch. Interior finish will be of pine and hardwood with some white enamel. Hardwood floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath room will be finished in tile. An automatic water heater will be installed. Asbestos shingle roof is specified. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures have been taken. A contract will be awarded this week.

OAKLAND, CAL.—Bungalow, 1 story and base, frame. Cost not stated. Architect, F. D. Voorhees, Central Bldg., Oakland. Owner, Fred W. Diehl. The house has been designed to contain six rooms and bath. Interior will be finished in pine with some hardwood. Hardwood floors will be used in the living room, dining room and den. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, V. S. Kidd. This work has been mentioned here before. Plans are now complete and figures are being taken. The dwelling has been designed to contain eight rooms and bath. Interior finish will be of pine and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$1,000. Architect, Harris Allen, 2514 Hildreth, Berkeley. Owner, Dudley Brand. The dwelling will be erected on Prospect street near Dwight Way, and has been designed to contain eight rooms, bath and sleeping porch. Interior will be finished in pine, redwood

and some hardwoods. There will be furnace heat and open fire places. Mantels will be of brick. Hardwood floors will be used in the living room, dining room and reception hall. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$1,000. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, Mr. Knight. This house will be erected in the Northbrae Tract, and has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and out for figures.

OAKLAND, CAL.—Residence, 2 story and base, \$3,500. Architect, none. Owner, Edward Larmer, 831 Poirier Ave., Oakland. The dwelling has been designed for a seven room house with bath and sleeping porch. All interior finish will be of pine or redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Contracts Awarded.

ALTADENA, LOS ANGELES CO., CAL.—Residence, 2 story and base, frame, \$15,250. Architect, C. F. Driscoll, Chamber of Commerce Bldg., L. A. Owner, Emma W. Barton. Contractor, M. R. Mitchell, 1112 Michigan Ave., L. A. Contract price, \$15,250.

—SCHOOLS—

SAN FRANCISCO—Fire escapes for school. Cost not stated. Architect, City Department of Architecture. Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans and specifications for fire escapes on the Yerba Buena School have been completed and are now out for figures. Bids will be opened on July 23rd by the Board of Public Works. Plans can be secured from the Department of Architecture. A proposal appears under the heading of Official Advertising in this issue.

BERKELEY, ALAMEDA CO., CAL.—Convent, 3 story and base, frame, \$35,000. Architect, John J. Foley, 46 Kearny St., S. F. Owners, St. Joseph's Convent. This work was mentioned here sometime ago when the architect was first commissioned to prepare plans. The building will contain a number of art studios and music room besides the chapel and dormitories. Interior finish will be of pine and redwood. Steam heat will be installed. The building covers a large ground area. Exterior will be covered with shiplap and sanded. Plans are complete and figures are now being taken by the architect.

OAKLAND, CAL.—School, 2 story and base, frame. Cost not stated. Architect, City Architect J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Plans for a small frame school building which is to be erected on San Pablo avenue at 62nd street have been completed and are now out for bids. Interior finish will be of pine with some maple floors. Exterior will be covered with rustic and shiplap. Bids will be opened by the Board of Education on July 24th. Plans and specifications can be secured from the architect. Bids are also being taken by the Board of Education for four portable schools, of frame construction, and for a temporary frame addition for the Sweet School at 12th avenue and East 20th street. Plans for this work can be secured from Architect Donovan's office.

BEARDSLEE SCHOOL DISTRICT, KERN CO., CAL.—School, 1 story and base, frame, \$12,000. Architect, J. M. Saffell, New Fish Bldg., Bakersfield. Owners, Beardslee School District. The building will contain four standard size class rooms and an assembly hall. Interior will be finished in pine. There will be a hot water system of heating

with oil burning furnace. Composition blackboards will be used. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken. Plans and specifications can be secured from the architect.

COTTAGE GROVE, ORE.—School, 2 story and base. Cost not stated. Architects, Tourtellotte & Hummel, Rathcliff Bldg., Portland. Owners, Cottage Grove School District. Plans and specifications for this work, which has been mentioned here before, will be completed by July 28th. Bids will be opened on August 9th. The building will cover an area of 60x145 feet, and will contain sixteen standard class rooms, assembly hall seating 300 people and principal's office and teachers' rooms. There will be a central heating system, probably steam, vacuum cleaning and program clocks. Interior finish will be of pine and hardwood. Exterior of the building will be faced with pressed brick.

FLAGSTAFF, ARIZ.—College buildings, 3, 1 and 2 story and base, reinforced concrete, \$55,500. Architects, Cook & Smart, Phoenix. Owners, Northern Arizona Normal School. These buildings will consist of a two-story girls' dormitory, estimated to cost \$11,500, a two-story concrete and stone addition to the boys' dormitory, estimated to cost \$11,000, and a one-story concrete and stone power house, estimated to cost \$1,000. The two dormitory buildings will have steam heat and pine interior finish. Exterior of all three buildings will be faced with cement plaster. Plans are being prepared.

TUSTIN, ORANGE CO., CAL.—School, 2 story and base, brick, \$40,000. Architect, F. J. Eley, Hervey-Pinley Bldg., Santa Ana. Owners, Tustin School District. The building has been designed to contain eight standard size class rooms, an auditorium and offices. Interior finish will be of pine throughout. Some maple floors will be used. There will be a central heating system and vacuum cleaning plant. Program clocks will also be installed. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

HUNTINGTON PARK, LOS ANGELES CO., CAL.—High school, 2 story and base, brick. Cost not stated. Architect, George W. Eldredge, Los Angeles Investment Bldg., L. A. Owners, Huntington Park High School District. The building will cover an area of 119x255 feet. It will contain an auditorium seating 600 people, a study room seating 200 people, ten class rooms, library, rest rooms, commercial and domestic science departments, principal's office, art rooms, fireproof vaults, lecture rooms and three laboratories. There will be a plenum system of heating, metal window sash and frames, pine trim and maple and composition floors. Exterior of the building will be faced with ruffled brick. Plans are complete and out for figures. Bids will be opened on August 2nd. Plans can be secured from the architect.

Contracts Awarded.

BERKELEY, ALAMEDA CO., CAL.—Campanile, Class A construction, \$250,000. Architect, John Galen Howard, 602 Mission St., S. F. Owners, University of California. The Regents of the University of California have awarded the following contracts for

the construction of the Sather Campanile, which is to be erected on the University grounds at Berkeley: Elevator work to Otis Elevator Co., \$3,900; excavating and concrete work to Clinton Fireproofing Co. for \$11,000; granite work to Raymond Granite Co. for \$72,500; marble work to McGilvray Stone Co. for \$8,385; structural steel work to California Construction Co. for \$13,000. The contract for the ornamental metal work has not been awarded, but will be within the next three or four days.

SANTA MONICA, LOS ANGELES CO., CAL.—School gymnasium, 1 story and base, brick, \$30,000. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Santa Monica School District. Contractor, C. S. McCully, 2751 Francis Ave., L. A. general construction, \$26,200. W. J. English, Santa Monica, plumbing, \$3,394.

LANCASTER, LOS ANGELES CO., CAL.—School, 2 story and base, reinforced concrete, \$15,000. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Lancaster School District. Contractors, Anderson & Murdock, Louise street, Glendale. Contract price, \$11,639.

ONTARIO, SAN BERNARDINO CO., CAL.—School, 2 story and base, reinforced concrete, \$25,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Ontario School District. Contractor, F. W. Edwards, Orange, general construction, \$20,069. Heating and ventilating, Machinery and Electric Co., 351 North Main St., L. A., \$3,347.

FELLOWS, KERN CO., CAL.—School, 1 story and base, brick and concrete, \$15,000. Architect, Thomas B. Wiseman, Producers' Bank Bldg., Bakersfield. Owners, Midway School District. Contractor, J. E. Yancy, Bakersfield, general construction, \$13,010. Heating, Machinery and Electric Co., 351 North Main St., L. A., \$2,231.

STORE.

SAN FRANCISCO—Market, 1 story and base, reinforced concrete and steel. Cost not stated. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Henry C. Cowell Lime and Cement Co. The building will be erected on The Embarcadero, extending from Sacramento to Commercial street. The building will be but one story high and has been leased to Mr. Long, who now conducts several of the best known markets in the city. It is Mr. Long's intention to make the new building the most modern market in the west. The location has been selected owing to its proximity to the ferries and convenience which the market will afford the many thousands of commuters who daily cross the bay. The building will have three street frontages, the principal frontage being on The Embarcadero and the others on Market and Sacramento streets. Modern sanitary equipment including mechanical sweeping and scrubbing machines will be installed. Interior finish will be largely of marble and tile. One of the most convenient features of the market is to be known as the "Basket System." By this method the commuters may place their orders in the morning which will be filled and turned over to Wells-Fargo Co., who will deliver the order and return the basket. Working drawings are now being prepared and work will be started as soon as possible. No esti-

mate of the cost of the building has been made.

SAN FRANCISCO—Stores and rooms, concrete, \$29,000. Architect, Charles C. Frye, 20 Montgomery St., S. F. Owners, Hop Wo Tencovely Society. This building will be erected on Stockton street between Clay and Sacramento, and will cover an area of 40x100 feet. There will be two stores on the first floor besides the entrance to the rooms above. Upper floors will be divided into about 50 rooms. Interior finish will be of pine and redwood. Running water will be supplied to all rooms. Stores will have plate glass windows in patent store fronts. Exterior will be faced with cement plaster. Plans are complete and figures have been taken. A contract will probably be awarded at once.

OAKLAND, CAL.—Stores, 1 story and base, brick and steel, \$17,000. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owner, Joseph King. The building will be erected on Webster street and will cover a large area. Plans provide for six stores. Interiors will be finished in pine and hardwood. There will be large display windows and patent store fronts. Exterior of the building will be faced with pressed brick. Considerable marble and tile will be used. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Lofts, 13 story and base, Class A construction. Cost not stated. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Mason Estate. This work has been mentioned in these columns before when plans were first started. The building will be erected on Spring street between 7th and 8th streets, and will cover an area of 60x140. Construction will be fireproof throughout. There will be a complete steel frame, concrete walls and floors and hollow tile interior partitions. Exterior will be faced with terra cotta. Plans are complete and figures on the general contract are now being taken.

LOS ANGELES, CAL.—Stores and lofts, 2 story and base, Class C construction. Cost not stated. Architects, Eulson & Munsell, Stinson Bldg., L. A. Owners, Los Angeles Realty Holding Co. The building will be erected on a corner and will cover an area of 50x100 feet. There will be stores on the first floor and lofts above. Interior finish will be of pine throughout. Metal window sash and frames will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken by the architects.

McKITTERICK, KERN CO., CAL.—Stores, 1 story and base, brick. Cost not stated. Architect, Thomas B. Wiseman, Producers' National Bank Bldg., Ekersfield. Owners, N. J. Brown & Son. The building will contain two stores, one of which will be leased to the Government for a post office. Interior finish will be of pine throughout. There will be plate glass display windows in patent store fronts. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

THEATRES.

LOS ANGELES, CAL.—Theatre and boxes, 1 story and base, brick. Cost not stated. Architect, none. Owners,

Los Angeles Development Co., Black Bldg., L. A. The building will be erected at the corner of 13th and Vermont avenue, and will cover an area of 5x150 feet. There will be two stores and an auditorium seating 750 people. Interior finish will be of pine. There will be patent store fronts. Considerable marble and tile will be used in the entrance. Exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owners who are now taking figures.

Contracts Awarded.

PRESNO, PRESNO CO., CAL.—Theatre and offices, 2 story and base, brick and steel, \$35,000. Architect's name not given. Owner, Emil Kehrlein. Contractor, H. P. Hoyt, San Francisco. Contract price, \$35,000.

SEALED PROPOSALS.

PROPOSALS FOR CANAL SUPPLIES.

PROPOSALS FOR STEEL REINFORCEMENT, CONCRETE, L. M. HEIL, ETC.

STEEL REINFORCEMENT, CONCRETE, LUMBER, ETC.—Department of the Interior, U. S. Reclamation Service, Washington, D. C. Sealed proposals will be received at the office of the United States Reclamation Service, Malta, Mont., until 2 o'clock p. m., August 6, 1913, for masonry work and structures on the second mile of Dodson North Canal, laterals and waste water ditches, involving about 300,000 cubic yards of excavation, 1,200 cubic yards of reinforced concrete, the placing

of about 300,000 pounds of steel reinforcement and the placing in wooden structures of about 10,000 feet, b. m., of timber. The work is situated on the north side of Milk River, adjacent to the main line of the Great Northern Railway in the vicinity of Wagner, Exeter and Malta, Mont. For particulars address the United States Reclamation Service, Washington, D. C., Great Falls, Mont., or Malta, Mont. F. H. NEWELL, director.

PROPOSALS FOR DREDGING.

DREDGING—U. S. Engineer Office, 101 Custom House, San Francisco, Cal. Sealed proposals for dredging in Susan Channel, Cal., will be received at this office until 11 o'clock a. m., July 26, 1913, and then publicly opened. Information on application. THOMAS H. KIES, lieutenant colonel, engineers.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, at carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCE—2 story and base, frame, \$7,500. San Francisco, Architect Edward T. Foulkes, Crocker Bldg., S. F. Owner, Mr. Buck. The dwelling will be erected on 19th avenue in the Richmond District, and has been designed to contain seven rooms, bath and sleeping porch. Interior will be finished in pine and hardwoods. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Bath room will have tile floor and cement plaster. Tile will also be used in the kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCES 2, 2½ story and base, frame, \$12,000. San Francisco, Architect, Charles C. Frye, 20 Montgomery St., S. F. Owner, E. M. Luckett. These houses will be erected at the southeast corner of Divisadero and Broadway streets. Each dwelling has been designed to contain seven rooms and bath. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed in each house. Bath rooms will be finished in tile and cement plaster. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$2,000. San Francisco, Architect, none. Owner, Fred Warden, 335 Labley Ave., S. F. The house has been designed to contain six rooms and bath and will be erected on London street near Excelsior. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room and dining room. There will be a large open fire place in the living room with the mantel. Bath room and kitchen will have cement wainscot. Exterior of the dwelling will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE 2½ story and base, frame, \$7,500. San Francisco, Archi-

tect, Charles C. Frye, 20 Montgomery St., S. F. Owner, Mrs. R. T. Oglet. The house will be erected on Divisadero between Union and Filbert streets. There will be eight rooms, bath and sleeping porch. Interior finish will be of pine and hardwood with some white enamel. Hardwood floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath room will be finished in tile. An automatic water heater will be installed. Asbestos shingle roof is specified. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures have been taken. A contract will be awarded this week.

FLATS—2 story and base, frame, \$10,500. San Francisco, Architect, Leonard J. Joseph, First National Bank Bldg., S. F. Owner, Henry A. Jacobs. The building will be erected on the west side of Scott street south of Sacramento, and has been designed for a high-class residential flat building. Plans will consist of six and seven rooms. Interior will be finished in pine and hardwoods. Hardwood floors will be used in the principal rooms. There will be a central heating system and open fire places. Mantels will be of brick and tile. Automatic water heaters will be installed. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with klunker brick veneer, rustic and cement plaster. Plans are complete and figures are being taken.

FLATS—2 story and base, frame, \$14,000. San Francisco, Architect, C. Pantoni, 906 Kearny St., S. F. Owner, A. Campbell. The building will be erected on Pacific street west of Jones, and has been designed to contain two modern flats of five and six rooms. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be open fire places of brick or tile mantels. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

APARTMENT HOUSE 2 story and base, frame, \$10,000. San Francisco, Architect, none. Owner, W. M. Carey, 920 Chestnut St., S. F. The building will be erected on the east side of Larkin street north of Jackson, and has a frontage on Larkin street of 20

feet and a depth of 57 feet 9 inches. There will be six apartments of three rooms and bath each. Interior finish will be of pine and redwood. Some hardwood floors will be used. No heat will be installed. All suites will be equipped with wall beds. Bath rooms will have cement plaster wainscot and sanitary floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner, who will do the work by Day Labor. He is now in the market for all materials.

APARTMENT HOUSE—7 story and 1 1/2. Class C construction, \$90,000. San Francisco. Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owner, John Black. This building will be erected on Post street between Jones and Leavenworth, covering an area of 60x137 1/2 feet. Interior has been arranged to contain 56 suites of two, three and four rooms. All apartments will have private bath room and wall beds. Plans provide for steam heat, elevator service, vacuum cleaning plant and hot water system. Interior finish will be of pine, redwood and hardwood veneer. Tile and cement will be used in the bath rooms. There will also be special built-in features in the bath rooms and kitchens. There will be two large social rooms, office and parlors. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

APARTMENT HOUSE—7 story and 1 1/2. Class C construction, \$74,000. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Starr & Larson. The building will be erected at the southeast corner of Sutter and Jones streets, and will cover a considerable ground area. The first floor will be arranged for entrance lobby, office, social rooms and several apartments. Upper floors will be divided into two and three room suites. All apartments will have private bath rooms and wall beds. There will be steam heat, elevator service, a vacuum cleaning system and hot water plant. Interior finish will be of pine and hardwood veneer. Some ornamental plaster will be used. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. A contract for the steel and iron work has been awarded to the Central Iron Works for \$20,250, and plans for the balance of the work are now out for figures.

APARTMENT HOUSES—2, 3 story and 1 1/2. Class C construction, \$30,000 each. San Francisco. Architect, none. Owners, Louis Lee and F. Heine, 1255 Polk St., S. F. These two buildings will be erected on the north side of Pine street east of Leavenworth. Each will contain fifteen apartments of two and three rooms. Buildings will have street frontages of 37 1/2 feet and will extend back 116 feet. All suites will have connecting bath rooms and will be equipped with wall beds. Interior finish will be of pine and elm panels. Bath rooms will be finished in cement plaster. There will be steam heat, automatic elevators and hot water systems. Exterior will be covered with pressed brick veneer, rustic and ship-lap. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—15 story and 1 1/2. Class A construction. Cost not stated. San Francisco. Architect, Kenneth MacDonald, Jr., Hollbrook Bldg.,

S. F. Owner's name withheld. This building will be erected on one of the corners of Pine and Stockton streets. The assured early completion of the Stockton street tunnel has caused a marked revival of interest in property on Stockton street from Sutter to Sacramento streets, and the first of the year will see a number of high-class hotels and apartment houses under construction. Announcement of another large apartment house on one of the Stockton street corners will be made within a week. The building planned by Mr. MacDonald will have a complete steel frame, reinforced concrete floors, walls and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster, making the construction fireproof throughout. Suites will range from two to four and five rooms. Interior finish will be of pine and hardwoods with considerable marble and tile used. All suites will have connecting bath rooms and will be equipped with wall beds. There will be steam heat, oil burning apparatus, vacuum cleaning system and elevator service. The elevators will connect direct with the tunnel by means of a sub-basement and this will make a regular stop for all cars using the tunnel. Exterior of the building will probably be faced with cement plaster and mat glazed terra cotta. Plans are now being prepared.

APARTMENT HOUSE—8 story and 1 1/2. Class C construction, \$35,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Portola Realty Co. This is the second large building project announced as a direct result of the commencement of work on the Stockton Street Tunnel, and is to be erected at the southwest corner of Stockton and California streets. The building will have a frontage on Stockton street of 68 feet 9 inches and of 124 feet on California street. Besides the social rooms and offices, upper floors will be arranged for a total of 140 rooms, which will be divided into two and three room suites. Interior finish will be of pine and hardwoods. Bath rooms will have cement floors and tile wainscot. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Provision has been made for direct connection with the Stockton street tunnel through elevator service via the basement. Construction will be practically fireproof throughout. Exterior of the building will be faced with cement plaster. Plans are now being prepared and construction will be undertaken before the first of the year.

FLATS—2, 2 story and base, frame, \$1,500 each. San Francisco. Architect, none. Owners, C. W. and W. J. Keenan, Hayes and Masonic Aves., S. F. The buildings will be erected on Hayes street east of Masonic avenue, and each has been designed to contain two modern flats of four and five rooms. Interior finish will be of pine with some elm panels. Hardwood floor will be used in the principal rooms. There will be open fire places and brick or tile mantels. Tile will be used in the bath rooms and kitchens. Exterior of both buildings will be covered with cement plaster on metal lath and knicker brick veneer. Plans are in the hands of the owners and work will be done by Day Labor. Materials are now being purchased.

HOTEL—6 story and base, steel and reinforced brick, \$65,000. San Francisco. Architect, G. Albert Lansburgh, 709 Mission St., S. F. Owner, A. Eisenberg. This building has been mentioned here before when the architect was first commissioned to prepare plans. The structure will be erected on the north side of Sutter street between Jones and Leavenworth streets. Plans provide for a total of 90 guest rooms, 65 per cent of which will have private baths. Interior finish will be of pine and hardwoods with ornamental plaster used in the office and lobby. There will be steam heat, elevator service, hot water plant and vacuum cleaning system. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

SCREENS FOR HOSPITAL GROUP—Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans for screens for the eight principal buildings of the San Francisco Hospital group have been completed and are now out for figures. Bids will be opened by the Board of Public Works on July 23rd. Plans and specifications can be secured from the Department of Architecture, Temporary City Hall.

HOTEL—3 story and base, brick and steel, \$25,000. San Francisco. Architect, Charles E. J. Rogers, 24 California St., S. F. Owner's name withheld. The building will be erected on Golden Gate avenue near Hyde. The first floor will be arranged for an automobile sales room and upper floors will contain in the neighborhood of 56 guest rooms and several baths. Interior finish will be of pine. Bath rooms will have cement floors and tile wainscot. First floor will be finished in hardwood, marble and tile. A hot water system will be installed. There will be plate glass windows in patent store fronts. Exterior of the building will be faced with pressed brick. Bids will be called for shortly.

FIRE ESCAPES FOR SCHOOL—Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans and specifications for fire escapes on the Yerba Buena School have been completed and are now out for figures. Bids will be opened on July 23rd by the Board of Public Works. Plans can be secured from the Department of Architecture. A proposal appears under the heading of Official Advertising in this issue.

MARKET—1 story and base, reinforced concrete and steel. Cost not stated. San Francisco. Architect, Henry H. Meyers, Kolid Bldg., S. F. Owners, Henry C. Cowell Lime and Cement Co. The building will be erected on The Embarcadero, extending from Sacramento to Commercial street. The building will be but one story high and has been leased to Mr. Long, who now conducts several of the best known markets in the city. It is Mr. Long's intention to make the new building the most modern market in the west. The location has been selected owing to its proximity to the ferries and convenience which the market will afford the many thousands of commuters who daily cross the bay. The building will have three street frontages, the principal frontage being

kept well to the front in elevator construction.

Other papers are in preparation by experts and definitely on the Society's program as follows:—dates of presentation to be fixed later on.

1. "Practical Tests of Structural Material," by Smith, Emery & Co.

2. "Electrical Transmission," by W. W. Hanscom.

3. "Development of California," by Robert Newton Lynch, Vice-President and Manager of the California Development Board.

Other papers will be announced in time.

The meetings of the society are held in the Board Room of the Mechanics' Institute, 57 Post St. G. Alexander Wright is President.

HIGHEST POWER PERMIT ISSUED.

WASHINGTON, July 18.—The largest water power permit ever issued by the Department of Agriculture was signed last Wednesday by Secretary Houston, granting rights to the Pacific Light and Power Company of Los Angeles to operate power plants in the Sierra National Forest. It will carry electric power 240 miles to Los Angeles and vicinity at 150,000 volts, said to be the highest commercial transmission ever attempted.

On account of the amount of power to be disposed of, the permit allows twelve years for construction. Four power houses, two reservoirs and twenty-five miles of cement lined tunnels will be built. Under a temporary permit the company had done some work. That granted Wednesday is final.

Part of the power will be used for pumping water for irrigation in the upper San Joaquin valley. The power will be carried over a double steel tower line of aluminum cables.

The permit, above referred to authorizes the \$12,000,000 project now under construction at Big Creek for the Pacific Light and Power Company by Stone & Webster in the Sierras, fifty-six miles east of Fresno.

Seven thousand feet above the sea, behind the biggest system of electric dams in the world is being imprisoned 125,000 acre feet of water, a lake seven miles long, a mile and a half in width and 150 feet deep. The water is held in check by three dams, 160 feet, 90 feet and 75 feet in height respectively.

From behind the upper dam, which is taller than any building in the southern part of the state, the water is carried through a 12-foot tunnel three and a half miles in length and is dropped 2,180 feet into power house No. one, which is 140 feet tall, or higher than any building in Fresno.

From power house No. one the water will be carried on to five other power houses planned by the corporation, which will ultimately develop 350,000 horse power.

The first unit, 7,500 horse power, will be sent over the line some time in September. This is sufficient power to operate all the electric railroads south of the Tehachapi.

It is the intention of the Pacific Light and Power Company to expend \$50,000 in the Sierras in the course of the next few years.

on The Embarcadero and the others on Market and Sacramento streets. Modern sanitary equipment including mechanical sweeping and scrubbing machines will be installed. Interior finish will be largely of marble and tile. One of the most convenient features of the market is to be known as the "Basket System." By this method commuters may place their orders in the morning which will be filled and turned over to the Wells-Fargo Co., who will deliver the order and return the basket. Working drawings are now being prepared and work will be started as soon as possible. No estimate of the cost of the building has been made.

STORES AND ROOMS—3 story and base, steel and reinforced concrete, \$20,000. San Francisco. Architect, Charles C. Frye, 20 Montgomery St., S. F. Owners, Hop Wo Benevolent Society. This building will be erected on Stockton street between Clay and Sacramento, and will cover an area of 40x100 feet. There will be two stores on the first floor besides the entrance to the rooms above. Upper floors will be divided into about 50 rooms. Interior finish will be of pine and redwood. Running water will be supplied to all rooms. Stores will have plate glass windows in patent store fronts. Exterior will be faced with cement plaster. Plans are complete and figures have been taken. A contract will probably be awarded at once.

WAREHOUSES—1 story, frame and concrete. Cost not stated. San Francisco. Architect, Director of Works Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans have been completed for two concrete and frame warehouses which are to be erected on the Exposition Grounds. Bids will be opened by the Buildings and Grounds Committee for this work on July 31st. Plans can be secured from the Director of Works, room 207 Service Building. An official proposal appears under the heading of Official Advertising in this issue.

COLLEGE BUILDINGS—3, 1 and 2 Contracts Awarded.

CITY HALL FOUNDATIONS, ETC.—\$14,882. San Francisco. Architects, Lickwell & Brown, 251 Kearny St., S. F. Owners, City and County of San Francisco. Contractors, Nichols & Handley, Hearst Bldg., S. F. Contract price, \$14,882. This contract calls for the concrete foundation work and finishing excavating for the new City Hall and is the third contract to be let for this \$1,500,000 structure.

DRAINAGE SYSTEM FOR RACE TRACK—\$4,575. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Contractors, Pringle-Dunn & Co., S. F. Contract price, \$4,575.

TECHNICAL SOCIETY OF THE PACIFIC COAST.

What ought to be a very interesting paper will be presented this evening before the Technical Society of the Pacific Coast, by Mr. B. C. Van Emon, the pioneer elevator builder of San Francisco, on the subject of "Elevators, Their Uses and Abuses."

Mr. Van Emon is thoroughly acquainted with his subject. The first electric elevator built in San Francisco was constructed by him and in the march of progress Mr. Van Emon has

OAKLAND AND ALAMEDA

BUNGALOW—1 story and base frame. Cost not stated. Oakland, Cal. Architect, F. D. Voorhees, Central Bldg., Oakland. Owner, Fred W. Diehl. The house has been designed to contain six rooms and bath. Interior will be finished in pine with some hardwood. Hardwood floors will be used in the living room, dining room and den. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, V. S. Kidd. This work has been mentioned here before. Plans are now complete and figures are being taken. The dwelling has been designed to contain eight rooms and bath. Interior finish will be of pine and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame. \$4,000. Berkeley, Alameda Co., Cal. Architect, Harris Allen, 2514 Hillegass Ave., Berkeley. Owner, Dudley Braid. The dwelling will be erected on Prospect street near Dwight Way, and has been designed to contain eight room, bath and sleeping porch. Interior will be finished in pine, redwood and some hardwoods. There will be furnace heat and open fire places. Mantels will be of brick. Hardwood floors will be used in the living room, dining room, den and reception hall. Bath room will have the floor and wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—2 story and base, frame. \$4,000. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, Mr. Knizitz. This house will be erected in the Northbrae Tract, and has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and out for figures.

RESIDENCE—2 story and base, frame. \$3,500. Oakland, Cal. Architect, none. Owner, Edward Larmer, 621 Polier Ave., Oakland. The dwelling has been designed for a seven-room house with bath and sleeping porch. All interior finish will be of pine or redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places.

Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame. \$3,000. Oakland, Cal. Architect, none. Owner, W. E. Bond, 1151 Randolph Ave., Oakland. The house has been designed for a seven-room dwelling with bath, and will be erected on west 13th avenue. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. The owner is now purchasing all materials.

RESIDENCE—2 story and base, frame. \$4,000. Oakland, Cal. Architect, none. Owner, L. Assum, 755 60th St., Oakland. The house will be erected on Ocean View Drive, and has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be largely of pine with some hardwoods and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

BUNGALOW—1 story and base, frame. \$3,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, Patrick-Nelson Co., 2011 Shattuck Ave., Berkeley. The house will be erected on Amador near Mt Diablo street, and has been designed to contain seven rooms and bath. Interior finish will be of pine with hardwood floors in the principal rooms. There will be a large open fire place in the living room with brick and tile mantel. Tile will be used in the bath room and kitchen. Exterior of the bungalow will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—4 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architects, Rousseau & Rousseau, Monarch 1112, S. F. Owner's name withheld. The building will contain in the neighborhood of 100 rooms, which will be arranged in suites of from two to four rooms. All apartments will have private baths and will be equipped with wall beds. Interior finish will be of pine and hardwood. Hardwood floors will be used in some of the rooms. Bath rooms will be finished in cement plaster and tile. There will be steam heat and elevator service. Exterior of the building will be covered with rustic shiplap and brick veneer. Plans are nearly complete and figures will be called for shortly.

FLATS—2 story and base, frame. \$3,000. Berkeley, Alameda Co., Cal. Architect, N. W. Shaw, 3073 Bateman St., Berkeley. Owner, Arthur Frey.

The building will contain two flats of five and six rooms and bath. Interior finish will be of pine with hardwood floors. Bath rooms will have cement plaster wainscot. There will be a large open fire place with brick mantel in each living room. Exterior of the building will be covered with cement plaster and rustic. Plans are complete and figures are now being taken.

FRAT HOUSE—3 story and base, frame. \$20,000. Berkeley, Alameda Co., Cal. Architect, William C. Hays, Foxcroft Bldg., S. F. Owners, Alpha Tau Omega Fraternity. The building will contain social rooms, dining room, kitchen and library on the first floor. Upper floors will be arranged for a number of sleeping apartments and baths. Interior finish will be of pine and redwood with hardwood floors. There will be a central heating system and open fire places. Bath rooms will be equipped with showers and will have tile wainscot. Automatic water heaters will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

CONVENT—3 story and base, frame. \$35,000. Berkeley, Alameda Co., Cal. Architect, John J. Foley, 16 Kearny St., S. F. Owners, St. Joseph's Convent. This work was mentioned here some time ago when the architect was first commissioned to prepare plans. The building will contain a number of art studios and music room besides the chapel and dormitories. Interior finish will be of pine and redwood. Steam heat will be installed. The building covers a large ground area. Exterior will be covered with shiplap and sanded. Plans are complete and figures are now being taken by the architect.

SCHOOL—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, City Architect J. J. Donovan. Security Bank Bldg., Oakland. Owners, City of Oakland. Plans for a small frame school building, which is to be erected on San Pablo avenue at 62nd street have been completed and are now out for bids. Interior finish will be of pine with some maple floors. Exterior will be covered with rustic and shiplap. Bids will be opened by the Board of Education on July 24th. Plans and specifications can be secured from the architect. Bids are also being taken by the Board of Education for four portable schools of frame construction and for a temporary frame addition to the Sweet School at 12th avenue and East 20th street. Plans for this work can be secured from Architect Donovan's office.

STORES—1 story and base, brick and steel. \$17,000. Oakland, Cal. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owner, Joseph King. The building will be erected on Webster street and will cover a large area. Plans provide for six stores. Interiors will be finished in pine and hardwood. There will be large display windows and patent store fronts. Exterior of the building will be faced with pressed brick. Considerable marble and tile will be used. Plans are complete and figures are being taken.

Contracts Awarded.

CAMPANILE—Class A construction, \$250,000. Berkeley, Alameda Co., Cal. Architect, John Gaben Howard, 602 Mission St., S. F. Owners, University of California. The Regents of the University of California have awarded

SAN JOSE & SANTA CLARA CLARA VALLEY.

RESIDENCE — 2 story and base,
frame, \$10,000. Saratoga, Santa Clara
Co., Cal. Architect, C. W. Dickey, Cen-
tral Bank Bldg., Oakland. Owner,
Penj. Bazata. The house has been de-
signed for a country home and will
contain in the neighborhood of eight
rooms, bath and sleeping porch. In-
terior will be finished in pine with
some hardwood and white enamel.
Hardwood floors will be used in the
principal rooms. There will be furnace
heat and open fire places. Mantels
will be of brick and tile. An auto-
matic water heater will be installed.
Tile will be used in the bath room
and kitchen. Exterior of the house will
be covered with cement plaster on
metal lath. Plans are complete and
the architect is now taking figures on
the work.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—3 story and base. Class C construction. \$50,000. Los Angeles, Cal. Architect, Fernand Parmentier, Byrne Bldg., L. A. Owner, Mrs. Harvey Ingerson. The building will be erected on Beaudry avenue near 3rd street, and will cover an area of 60x154 feet. Interior will be divided into 110 rooms, which are to be arranged in two and three room suites. All apartments will have private baths and wall beds. Interior finish will be of pine with some hardwood veneer. There will be steam heat, an automatic elevator and vacuum cleaning system. Bath rooms will have cement floors and tile wainscot. Built-in features will be used in the bath rooms and kitchens. Exterior of the building will be faced with blue pressed brick. Plans are being prepared and when complete the work will be done by Day Labor.

HOSPITAL—2 or 3 story and base, reinforced concrete, \$50,000. Los Angeles, Cal. Architects, Garrett & Farrell, Currier Bldg., L. A. Owners, French Hospital Association. A site for this building has been secured at the corner of College and Castelar streets. Only preliminary sketches of the building have been made and details cannot be given at this time. If additional funds are secured a much more pretentious building, or perhaps a group of buildings, will be erected. Further mention of the work will be made in these columns as plans progress.

SCHOOL—2 story and base, brick, \$40,000. Tustin, Orange Co., Cal. Architect, F. H. Eley, Hervey-Findley

Bldg., Santa Ana. Owners, Tustin School District. The building has been designed to contain eight standard class rooms, an auditorium and offices. Interior finish will be of pine throughout. Some maple floors will be used. There will be a central heating system and vacuum cleaning plant. Program clocks will also be installed. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

APARTMENT HOUSE—3 story and base, brick, \$25,000. Hermosa Beach, Los Angeles Co., Cal. Architect not selected. Owner, Dr. W. C. Bondies, 906 Mission St., South Pasadena. The building will be designed for two and three room suites with private baths and wall beds. No plans have been made. Further details will be given when the owner selects an architect. Dr. Bondies will also erect several frame dwellings on his property at Hermosa Beach.

APARTMENT HOUSE—4 story and base, brick, \$50,000. Los Angeles, Cal. Architect, E. B. Hogan, Jr., 1564 West 46th St., L. A. Owner, Ernest C Hillman, 635 West 46th St., L. A. The building will cover an area of 54x120 feet, and has been designed to contain 86 rooms arranged in two and three room suites. All suites will have private bath rooms and will be equipped with wall beds. Plans provide for steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine with some hardwood panels. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

LODGE HALL—3 story and base, brick, \$35,000. Architect, C. A. Balch, 344 North Lake St., Pasadena. Owners, Pasadena Odd Fellows Hall Association. The building will be erected on a corner site. The first floor will contain the parlors, office, lobby and a library. Second floor will be given over to a large auditorium and the third floor will be arranged for living apartments. There will be a central heating system. Interior finish will be of pine and hardwoods. Hardwood floors will also be used. The exterior of the building will be faced with pressed brick. Dr. S. P. Swearingen, 10 East Colorado St., is in charge of the work. Plans are complete and will be out for figures in two weeks.

HOTEL—4 story and base, brick and steel, \$130,000. El Centro, Imperial Co., Cal. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owners, Bell Development Co. The building will be erected at the corner of 7th and Main streets and will cover an area of 131x151 feet. There will be four stores besides the hotel offices, lobby and dining room on the first floor. Upper floors will contain a total of 117 guest rooms and 60 private baths. Mahogany and tile will be used on the first floor. There will be steam heat, two passenger and one freight elevators, a vacuum cleaning system and hot water supply. Exterior of the building will be faced with cement plaster. Brick work and carpentry will be done by Day Labor. Separate contracts will be let for the other parts of the building.

HIGH SCHOOL—2 story and base, brick. Cost not stated. Huntington Park, Los Angeles Co., Cal. Architect, George W. Eldredge, Los Angeles In-

vestment Bldg., L. A. Owners, Huntington Park High School District. The building will cover an area of 119x255 feet. It will contain an auditorium seating 600 people, a study room seating 200 people, ten class rooms, library, rest rooms, commercial and domestic science departments, principal's office, art rooms, fireproof vaults, lecture rooms and three laboratories. There will be a plenum system of heating, metal window sash and frames, pine trim and maple and composition floors. Exterior of the building will be faced with ruffled brick. Plans are complete and out for figures. Bids will be opened on August 2nd. Plans can be secured from the architect.

LOFTS—13 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Mason Estate. This work has been mentioned in these columns before when plans were first started. The building will be erected on Spring street between 7th and 8th streets and will cover an area of 60x101. Construction will be fireproof throughout. There will be a complete steel frame, concrete walls and floors and hollow tile interior partitions. Exterior will be faced with terra cotta. Plans are complete and figures on the general contract are now being taken.

STORES AND LOFTS—2 story and base. Class C construction. Cost not stated. Los Angeles, Cal. Architects, Hudson & Munsell, Stimson Bldg., L. A. Owners, Los Angeles Realty Holding Co. The building will be erected on a corner and will cover an area of 50x100 feet. There will be stores on the first floor and lofts above. Interior finish will be of pine throughout. Metal window sash and frames will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken by the architects.

STORY AND BASE, REINFORCED CONCRETE, \$55,500. Flagstaff, Ariz. Architects, Cook & Smart, Phoenix. Owners, Northern Arizona Normal School. These buildings will consist of a two-story Girls' Dormitory, estimated to cost \$11,500; a two-story concrete and stone addition to the Boys' Dormitory, estimated to cost \$11,000, and a one-story concrete and stone power house, estimated to cost \$1,000. The two dormitory buildings will have steam heat and pine interior finish. Exterior of all three buildings will be faced with cement plaster. Plans are being prepared.

THEATRE AND STORES—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, none. Owners, Los Angeles Development Co., Black Bldg., L. A. The building will be erected at the corner of 13th street and Vermont avenue, and will cover an area of 54x150 feet. There will be two stores and an auditorium seating 750 people. Interior finish will be of pine. There will be patent store fronts. Considerable marble and tile will be used in the entrance. Exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owners who are now taking figures.

Contracts Awarded.

APARTMENT HOUSE—4 story and base, brick, \$60,000. Pasadena, Los Angeles Co., Cal. Architects, Frank G. Krucker and H. C. Deckbar, Pergu-

son Bldg., L. A. Owners, Charles Shade and S. S. Wolf, Contractor, George H. Whyte, Pasadena, general construction, \$13,000. Munger & Munger, Pasadena, plumbing and heating, \$3,000.

HOTEL—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, Edwin W. Pascoe, Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Plans for this work are now being prepared. When complete the job will be constructed on a percentage basis.

SCHOOL GYMNASIUM—1 story and base, brick, \$20,000. Santa Monica, Los Angeles Co., Cal. Architects, Allison & Allison, Hilberian Bldg., L. A. Owners, Santa Monica School District. Contractor, C. S. McCully, 2751 Francis Ave., L. A., general construction, \$26,200. W. J. English, Santa Monica, plumbing, \$3,234.

SCHOOL—2 story and base, reinforced concrete, \$15,000. Lancaster, Los Angeles Co., Cal. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Lancaster School District. Contractors Anderson & Murdock, Louise St., Glendale. Contract price, \$14,699.

SCHOOL—2 story and base, reinforced concrete, \$35,000. Ontario, San Bernardino Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Ontario School District. Contractor, P. W. Edwards, Orange, general construction, \$30,069 Heating and ventilating. Machinery and Electric Co., 351 North Main St., L. A., \$3,247.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, C. Gaul, L. A. Owner, Mrs. A. Burgwald. Contractor, R. T. Laughlin, Lissner Bldg., L. A. Contract price not stated.

CHURCH—1 story and base, frame, \$12,000. Azusa, Los Angeles Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, First Presbyterian Church of Azusa. Contractors, Perkins & Holcomb, Watts. Contract price, \$11,636.

GARAGE AND STORES—1 story and base, brick, \$23,000. Los Angeles, Cal. Architects, Kempel & Erkes, Henne Bldg., L. A. Owners, Schmidt Estate. Contractor, Fred R. Brauer, Willard Ave., L. A. Contract price, \$23,000.

HOSPITAL—2 story and base, brick, \$12,000. Oxnard, Ventura Co., Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Sisters of Mercy. Contractor, Thomas Carroll, Oxnard. Contract price, \$12,000.

RESIDENCE—2 story and base, frame, \$15,250. Alhambra, Los Angeles Co., Cal. Architect, C. F. Prisco, Chamber of Commerce Bldg., L. A. Owner, Emma W. Barton. Contractor, M. R. Mire, 41112 Alhambra Ave., L. A. Contract price, \$15,250.

LIBRARY—1 story and base, brick and steel, \$26,185. Alhambra, Los Angeles Co., Cal. Architect, Frederick L. Gray, B. S. Sorenson Bank Bldg., L. A. Owners, City of Alhambra. Contractor, H. F. Ross, 1261 No. La Marquerra St., Alhambra. Contract price, \$26,185. Note: This contract does not include interior trim.

PORTLAND AND OREGON.

SCHOOL—2 story and base, brick. Cost not stated. Cottage Grove, Ore. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, Cottage Grove School District. Plans and specifications for this work, which has been mentioned here before, will be completed by July 25th. Bids will be opened on August 9th. The building will cover an area of 60x115 feet and will contain sixteen class rooms, assembly hall, seating 300 people, and principal's office and teachers' rooms. There will be a central heating system, probably steam, vacuum cleaning and program clock. Interior finish will be of pine and hardwood. Exterior of the building will be faced with pressed brick.

CHURCH—1 story and base, brick and stone, \$20,000. Tillamook, Ore. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, First Methodist Church of Tillamook. The building will be designed in the Colonial style with a high basement and main floor. The basement will be arranged for Sunday school rooms, social hall and kitchen. Main floor will contain an auditorium seating 350 people. Interior finish will be of pine. There will be a central heating system. Exterior of the building will be faced with pressed brick and stone. Plans are complete and figures are now being taken.

LODGE HALL ALTERATIONS AND ADDITIONS—Brick construction, \$20,000. Portland, Ore. Architects, Emil Schacht & Sons, Commonwealth Bldg., Portland. Owners, Knights of Pythias. The two-story brick building now under lease to this organization will have a third floor added and undergo extensive alterations. The second floor, now used as an auditorium, will be converted into club rooms and will be elaborately finished. Plans will be completed at once.

Contracts Awarded.

GARAGE AND HALL—4 story and base, brick and steel. Cost not stated. Portland, Ore. Architect, Robert F. Tegen, Swetland Bldg., Portland. Owners, Paul Van Firdaugh and Mrs. Hortense. Contractors, Litherland-Abbey Co., Beck Bldg., Portland. Contract price not stated.

LODGE HALL—1 and 2 story and base, brick and steel, \$50,000. Portland, Ore. Architects, Clausen & Clausen, Mackay Bldg., Portland. Owners, Turn Verein Society. Contractor, William Vietz, 242 1/2 First street, general construction. Contract price not stated. J. F. Shea Co., heating and plumbing. Contract price not stated.

PASSENGER STATION—1 story and base, brick, \$25,000. Eugene, Ore. Architect's name not given. Owners, Oregon Electric R. R. Co. Contractors, Moore Bros., Portland. Contract price not stated.

LODGE HALL—2 story and base, brick, \$20,000. Tillamook, Ore. Architect, E. E. McIlhenny, Lumber Exchange Bldg., Portland. Owners, Tillamook Masonic Hall Association. Contractors, Trench & Porellus, Builders' Exchange, Portland. Contract price, \$20,000.

LIBRARY—1 1/2 story and base, brick and concrete, \$12,000. St. Johns, Ore. Architects, Johnson & Mayer, Commercial Club Bldg., Portland. Owners, City of St. Johns. Contractors, McCalland

Bros., 669 East Everett St., Portland. Contract price, \$12,000.

SEATTLE AND WASHINGTON.

APARTMENT HOUSE—2 story and base, brick, \$30,000. Seattle, Wash. Architect, V. W. Voorhees, Etzel Bldg., Seattle. Owner, W. J. Morrow. The building will be erected on a corner site and will cover a considerable area. Suites will be arranged in two and three room apartments with private baths. Interior will be finished in pine and elm panels. Some hardwood floors will be used. There will be steam heat and an automatic elevator. Bath rooms will have the floors and wainscot. All suites will have wall beds. Exterior of the building will be faced with pressed brick. Plans will be ready for figures about the first of September.

VETERANS HOME—4, 2 story and base, brick, \$100,000 Port Orchard, Wash. Architects, Heath & Grove, National Realty Bldg., Tacoma. Owners, Washington Veterans' Home. This work will include the following buildings: 2 story barracks, 2 story assembly hall, 2 story laundry, 2 story superintendent's residence and three employees' cottages. All construction will be of brick. Plans are still in the preliminary stage and details of the work cannot be given. Further mention will be made here when figures are called.

GARAGE—3 story and base, reinforced concrete, \$250,000. Seattle, Wash. Architects, Haynes & Cantin, Melhorn Bldg., Seattle. Owners, Madison Square Building Co. The building will cover an area of 240x360 feet. Construction will be fireproof throughout, with reinforced concrete walls and floors and metal lath and plaster partitions. The first floor and basement will be used for storage purposes. Upper floors will contain the offices, machine shops and a body and painting factory. There will be large elevators, sprinkler system and metal window sash and frames. Exterior of the building will be faced with cement plaster. Plans are now being prepared. Further mention will be made of this work as the plans progress.

BRIDGE—Steel construction, \$300,000. Tacoma, Wash. Engineer, Engineering Dept., O. W. Ry. and Navigation Co., Tacoma. Owners, Oregon-Washington Railway and Navigation Co. President Farrell has announced that plans are nearly complete for a large steel constructed bridge over the tide flats and waterway to connect with the company's present depot. The president's announcement also carried with it the news of extensive track and yard improvements and the construction of a reinforced concrete freight depot.

WAREHOUSES—2, 3 story and base, reinforced concrete, \$175,000 each. Seattle, Wash. Engineer, Paul P. Whitlamm, Port of Seattle Commission, Central Bldg., Seattle. Owners, Port of Seattle Commission. One of the warehouses will be erected on Lander street and will be 90x223 feet, and the other will be erected on Stacey street, covering an area of 90x201 feet. A third temporary warehouse of frame construction will be erected on Whittom street, and will be 300 feet long. Plans will be completed for the buildings early in August. Exteriors will be

faced with brick.

ISOLATION HOSPITAL—2 story, frame, \$15,000. Seattle, Wash. Architect Huntington, Seattle. Owners, City of Seattle. The building is to form a part of the institution at Richmond Heights. The building will be composed of two wings, each 32x75 feet and an administration building 37x58 feet. One wing will contain two wards and separate rooms, and the other four wards. Plans will be ready for figures by August 10th.

HOTEL—3 story and base, steel and concrete, \$100,000. Seattle, Wash. Architect, A. Wickersham, Lyon Bldg., Seattle. Owners, Yesler Estate. This building has been mentioned here before. Pile foundation work is now complete and bids are being called for on the general construction. There will be stores on the first floor and a number of modern hotel rooms on the upper floors. Plans provide for steam heat, elevator service and metal window sash and frames. Exterior of the hotel will be faced with cement plaster.

LIBRARY—2 story and base, brick, stone and concrete, \$40,000. Seattle, Wash. Architect, W. Marbury Somerville, White Bldg., Seattle. Owners, City of Seattle. This work has been mentioned here before. The building will be known as the Yesler Memorial Library, and is to be erected at the corner of Yesler Way and 24th avenue. The design is in the classic style. Interior will be finished in pine, hardwoods and ornamental plaster. There will be steam heat and a vacuum cleaning plant. Exterior will be faced with stone and pressed brick. Plans are complete and figures are being taken.

FREIGHT DEPOT—1 and 2 story reinforced concrete. Cost not stated. Tacoma, Wash. Engineer, Engineering Department O. W. Ry. and Nav. Co., Tacoma. Owners, Oregon-Washington Railway and Navigation Co. Work will be started shortly on the construction of a 1 and 2 story freight depot in the present yards of the company at Tacoma. President Farrell of the company is the authority for the statement that plans for the work are now practically complete and that figures will be called for without delay.

FREIGHT DEPOT—2 story, steel, brick and concrete, \$45,000. Seattle, Wash. Architect, Engineering Department Northern Pacific R. Co., Seattle. Owners, Northern Pacific Co. The building has been mentioned here before. It will cover an area of 60x260 feet, and is to be erected on Terry avenue and Thomas street. Construction will be fireproof throughout. Floors and roofs will be of concrete. Upper floors will be used for company freight offices. Exterior will be faced with cement plaster. Plans are complete and figures will be called for at once.

CAR BARN—2 story and base, reinforced concrete, \$50,000. Seattle, Wash. Architect, Daniel Huntington, Seattle. Owners, City of Seattle. Plans are being prepared for a municipal car barn and office building which will be erected at the corner of Union and Third avenues. The building will be 87x260 feet. The first floor will be arranged for car barn and repair shop, and upper floor for offices of the Municipal railroad. Exterior will be faced with cement plaster. Plans will be competed within a month and figures called.

UNIVERSITY BUILDINGS—Reinforced concrete construction, \$1,000,000. Seattle, Wash. Architect's name not given. Owners, University of the Puget Sound. It is stated on good authority that a million dollars will be expended by this institution within the next year on buildings. A part of this work, amounting to \$350,000, will be undertaken this year. Details of the project are not obtainable as yet.

SCHOOL—1 story and base, reinforced concrete, \$15,000. Marcus, Wash. Architects, Sweatt & Levesque, Spokane. Owners, Marcus School District. The building will be constructed in three units, each of which will cost \$15,000. The plans for the first unit have been completed and are now out for figures. There will be four class rooms. Plans provide for a central heating system. Interior finish will be of pine with some maple floors. Exterior will be faced with cement plaster. Plans can be secured from the architects.

Contracts Awarded.

APARTMENT HOUSE ALTERATIONS—3 story and base, brick, \$30,000. Seattle, Wash. Architect, J. Merrill Brown, Northern Bank Bldg., Seattle. Owners, Nebraska Investment Co. Contractor, John Kauffman, 605 8th Ave., Seattle. Contract price, \$30,000.

HOSPITAL—Administration building, 4 story and base, reinforced concrete, \$73,900. Seattle, Wash. Architect, Huntington, Seattle. Owners, City of Seattle. Contractors, Jenkins & Jones, Hinkley Bldg., Seattle. Contract price, \$73,900. This is the administration building of the Richmond Heights Hospital group.

FREIGHT DEPOT—1 and 2 story, reinforced concrete, \$104,000. Spokane, Wash. Architect, Engineering Department Chicago, Milwaukee and Puget Sound R. R. Co. Owners, Chicago, Milwaukee and Puget Sound R. R. Co. Contractors, Hurley-Mason Co., Board of Trade Bldg., Seattle. Contract price, \$104,000.

SCHOOL—2 story and base, brick, \$25,723. Camas, Wash. Architects, Fred A. Legg and George A. Kingsbury, Ainsworth Bldg., Portland. Owners, Camas School District. Contractors, Dannon & McClaran, Salem, Ore. Contract price, \$25,723.

BRIDGE—Concrete and steel, \$50,000. Fir, Wash. Engineers, Bowerman & McCloy, Mutual Life Bldg., Seattle. Owners, Skagit County. Contractors, Skagit Construction Co., Mt. Vernon. Contract price, \$50,000.

LARGE ACREAGE RESTORED TO PUBLIC DOMAIN.

Six Million Acres of Withdrawn Lands Classified by United States Geological Survey and Restored to Entry.

Six million acres of withdrawn public lands were restored to entry during the months of May and June upon approval by the Secretary of the Interior of the recommendations of the United States Geological Survey. This action was the result of examination and classification of the lands by the Survey, those restored either having been found not to be valuable for power sites, reservoirs, coal, phosphate, or potash deposits, or having been definitely valued as coal lands, and rendered available for purchase under the coal-land law.

Of these lands relieved from coal withdrawal nearly 2½ million acres were in the State of Colorado. Five and a half thousand acres were also withdrawn in Colorado as water-power sites.

In Idaho 1,100,000 acres of coal and phosphate withdrawals were classified and restored, and for water power sites approximately 10,000 acres were withdrawn and about the same acreage restored.

In Montana 250,000 acres were restored as being noncoal-bearing and about 1,000 acres as not valuable for water-power sites, while about 150 acres were withdrawn for that purpose.

In North Dakota nearly 1,100,000 acres of coal withdrawal were classified and restored.

In Oregon approximately 75,000 acres were restored as nonoil-bearing lands and about 12,000 acres were withdrawn for water-power or reservoir sites.

In South Dakota over 330,000 acres were relieved from the coal withdrawal.

In Utah about 1,500 acres were withdrawn for water-power sites.

In Wyoming over 47,000 acres of coal withdrawals were reopened to entry and purchase; approximately 87,000 acres were withdrawn for classification as to whether they are oil-bearing lands, and about 304,000 acres were restored as nonphosphate lands.

For all States the total withdrawals during the months of May and June were over 116,000 acres, and the total restorations were over 6,000,000 acres.

The total outstanding withdrawals on July 1 in all the public-land States amounted to 68,692,289 acres, of which more than 58 million acres are in coal-land withdrawals.

These lands are held pending classification by the Geological Survey, and as rapidly as they are found to be mineral bearing they are either valued and placed on sale (as in the case of coal lands), definitely reserved pending appropriate legislation by Congress to provide for their disposition (as in the case of potash or phosphate lands), or held subject to development under departmental regulations (as in the case of water power or reservoir reservations); or if they are found to be non-mineral in character they are restored to public entry. This work of classification and valuation is being prosecuted by the Geological Survey as rapidly as the appropriations provided by Congress will permit.

FIRST COAL DISCOVERY.

Richmond Basin in Virginia Produced Fuel Century and a Half Ago.

The presence of coal in the Richmond Basin of Virginia was known as far back as 1700 and mines were opened and worked at as early a date as 1750. In 1789 shipments were made to some of the Northern States. In 1822, according to R. C. Taylor, in his "Statistics of Coal," the production amounted to 51,000 short tons. For nearly a century the Richmond Basin maintained some prominence as a coal producer, but in 1882, when the Pocahontas district was opened, followed shortly afterward by the development of the New River field in West Virginia, the mines in the Richmond Basin were put at a disadvantage and operations were for many years practically suspended.

During the last four years, how-

ever, new life has been introduced into the Richmond Basin areas by the reopening of the old Gayton mines in Henrico County. For many years after the opening of the southwestern Virginia and the southern West Virginia coals the mines of the Richmond Basin lay idle or were worked only for a restricted local market. The Richmond Basin is the only area producing free-burning coal which lies immediately adjacent to the Atlantic seacoast.

MULTIPLICATION OF UNSKILLED WORKERS.

W. Jett Lauck, in the North American Review, discusses the lessening necessity of skill in workmen owing to the improvement of machinery. He says: "It is undoubtedly in all branches of industry which involve skill and responsibility, but the significant fact is that the constant invention and installation of new machinery have greatly reduced the number of skilled occupations." Because of the improvement of machine processes, workmen of little if any skill may be employed. Lauck says that it is a conservative estimate that three-fourths of the workers in our own industrial establishments are unskilled.

Are these three-fourths of the jobs to be filled permanently with low-grade men, men incapable of the skill of their forefathers who piled skilled crafts? If the eugenists are to be credited, everybody is to be brought up much above that level. Are all to be given a technical education so that they can be promoted to something else? But, in that case, who will take their place with the 75 per cent of unskilled jobs, which may be 80 or 90 per cent by that time if the machinery grows steadily more perfect and more easy to manage? There lies the dilemma of society, constantly striving for a skill which progress as constantly is making needless.

It seems plain that the course of events must assign to unskilled labor a large and increasing proportion of men of a superior sort whose superior abilities do not run in a technical line, just as civil service posts, clerkships, constables, and so on, have given a living to men whose real business was waiting unprofitable looks, so the simple industrial processes, which once and invention have evolved into a complicated trade for many men of a moderate gift, give work real life to men who are otherwise idle. It may even be creative work, poetry or a scientific dream; if not, there is

the chance for study, for the reading of good books, and whatever education has been got will not be wasted. In the great majority, of course, no such intellectual spark has ever been kindled, but where it exists it should be cultivated to the utmost, and not necessarily as a means of what we call rising in the world. Not all who have brains should try to live by them; in our educational plans we must not forget the unskilled trades and the need of providing for those who, by the inexorable laws of arithmetic, must follow them. A dishwasher with a college diploma is provided for, and if his education enables him to look at life in the spirit of the philosophers he is better off than as a bad schoolmaster or a stickit minister. And he will leave, we trust, no soap in the tea-cups.—Springfield Republican.

A MADE TO ORDER CITY.

Among the great cities of the world there is not one whose growth and development has been more remarkable than Berlin's. And there is no other city, not even St. Petersburg, the development of which has been guided by so much forethought and system. In the early part of the last century Berlin was not one among the great cities. In 1829 the city had only 202,000 population. In 1910, including the suburbs in the count, there was a population of 3,400,000. Berlin is a typical of the New Germany. It is a city made largely in accord with blue-print plans.

The London World in recent comment upon the quick rise of Berlin to greatness remarks that Berlin dates from Sedan. It is declared that the modern German capital is the outward expression of a tumult of soul. The aim of those who have made the modern city, the London paper says, was to borrow all that is best from the other cities, in shops and palaces and improve on them and fuse them into something characteristically German. It is claimed that the result is a failure to improve, a failure to fuse and a failure to germanize. Berlin, says the British critic, conveys the sense of attempted ornamentation by people who do not understand the principles of ornamentation. And then this sour grapes commentator adds "that is why Americans like Berlin."

When the venom of the London World's discourse upon the marvelous growth of the German capital is extracted and the plain truth of the matter is told, the occasion of grievance will be recognized as based upon the fact that Berlin is a beautifully

CIVIL ENGINEER STUDENT (MALE).

August 6 1913.

The United States Civil Service Commission announces an open competitive examination for civil engineer student, for men only, on August 6, 1913. From the register of eligibles resulting from this examination certification will be made to fill vacancies as they may occur in this position in the Office of Public Roads, Department of Agriculture, at a salary of \$720 per annum, and vacancies as they may occur in positions requiring similar qualifications, unless it is found to be in the interest of the service to fill any vacancy by reinstatement, transfer, or promotion.

PASSING OF THE AGE OF IRON.

The United States Steel Corporation, which is the largest owner of iron mines in the United States and is one of the largest manufacturers of the metal in the world and is now working up 30,000,000 tons annually, is supposed to have in the lake districts 900,000,000 tons of ore and in Alabama and Tennessee 600,000,000 tons. It has been figured that at the present rate of consumption this great corporation has iron ore to last thirty-five years.

If, of course, there is other iron ore in the United States than that owned by the great corporation mentioned, but as the mines are worked out iron goes up in price, and it is an article as necessary as food. The civilized world ca

not do without it. It is actually a question if we have iron enough to last fifty years, while the European supply is very limited.

There is a corresponding project of scarcity of coal, too, but the growing use of electricity for light and power creates the ability to economize immensely in coal by using water-power to generate the current. The fact that electricity can be carried long distances on wires from the places where it is generated to where it is used creates the possibility of immense saving in the consumption of coal.

But nothing can take the place of iron, which has so largely taken the place of wood, and when the supply shall be greatly limited and approach the point of exhaustion, an irreparable blow will have been dealt to civilization.

The duration of the highest material civilization is limited by the world's supply of iron. Savage tribes have been able to exist with hatchets and arrow-heads of flintstone, and in a later age barbarian people made their metallic weapons and implements of copper, but the present is the era of the world's highest civilization—it is the Iron Age—and it was made so by the use of iron for the innumerable purposes for which no other metal or substance can be substituted.—New Orleans Picayune.

PANAMA CANAL ARCHITECTURE.

It is reassuring to learn from the last issue of the Panama Canal Record that the architectural features of the Panama Canal, both as to landscape and buildings, are in the hands of an architectural firm of note, the character of whose past work is a guarantee that the Panama Canal is not to be belittled by amateur architecture.

Too often in the past American engineering works of magnitude have suffered either from disregard or misapprehension of their architectural and aesthetic requirements. The outlines and masses which result from the strictly utilitarian principles of design which govern the engineer are frequently inharmonious and displeasing to the eye, and to violence to an aesthetic sense whose demands are becoming more insistent with the general spread of knowledge and artistic education. Sometimes, as in the case of the Brooklyn Bridge, a great engineering work is as ornamental as it is useful, and sometimes as in the case in the Williamsburg Bridge—surely the ugliest structure of its kind in existence—the result is artistically deplorable.

In our issue of February 8th of this year, we drew attention to the fact that the Panama Canal was in danger of being "expended by the crude character of some of the structures which were being erected, and to prove our contention, we illustrated a range or light tower, which had been built on the outer wall of the lake approach to the Gatun Locks. This structure, designed in the offices of the engineering force at the Isthmus, is no doubt strong, stable and perfectly adapted to its purpose of showing a light in a certain location at a fixed elevation for all time to come; but considered as an architectural work it is about as ugly and inharmonious a piece of design as mortal eye ever looked upon. We had hoped that by this time the tower had been replaced, either by a more grace-

ful design in reinforced concrete, or by a steel tower of open work construction similar in general outline to the Eiffel Tower. We understand, however, that any change in this direction is strongly opposed by the engineer in charge of that particular class of work.—Scientific American.

PROFITABLE SANDALWOOD MONOPOLY IN MYSORE.

[Consul Henry D. Baker, on special Service in India.]

A most remarkable gain has occurred in the value realized by last year's sale of sandalwood by the Mysore Government, which controls a practical monopoly of the world's supply of the high grades used for medicines and for scents. At this sale the usual quantity of about 2,500 tons offered brought about \$750,000, as against \$331,000, the value of the sandalwood sold during the year 1910-11. The general previous average, with unimportant variations, for the past 10 years, has been about \$400,000 annually. This extraordinary increased value has brought a quite unexpected substantial increase in revenue to the Mysore Government, and has been in the nature of a sudden cutting of a big "melon" for the benefit of this native Province of Southern India.

The reason for this almost doubling of the value of sandalwood within a year, while the price had previously never shown much fluctuation, are not at all understood by the officials of the Mysore Government, and they are greatly surprised by the high prices offered by European dealers, who gave no explanation as to the cause of the unusual demand. It is thought, however, that some new important use has been discovered for sandalwood by some manufacturing interests who are keeping the matter a secret. It is not known whether or not to expect these high values to continue.

The sandalwood trade is controlled chiefly by about half a dozen leading European firms, who act as agents in their purchases in Mysore for medicine manufacturers in Europe and in the United States. There are also a few native merchants in the business, but on account of some of them having yielded to the temptation of adulterating the high-priced oil after distillation, their trade has fallen off considerably, manufacturers in the United States especially desiring to be assured of the purity of the product, deeming it best to purchase the best wood obtainable and then to distill the oil themselves.

Sources of Supply—Varied Uses.

The chief sandalwood area of the world, producing about seven-eighths of the total annual supply, includes a belt in Mysore, about 240 miles long by 16 broad, running from the northwest to the southwest of the province. A second, and much smaller and less important zone lies farther to the east. The total area of both belts is about 5,450 square miles. The grades and materials of sandalwood number about 15; the wood ranges in size from billets not less than 20 pounds in weight, the finest grade, down to the sawdust obtained in sawing up the wood, the lowest grade. Every part has a value. The heart wood alone, which is about one-third of the total weight felled, constitutes the odoriferous wood. In Mysore the collection of sandalwood is

entirely restricted to overmature, dead, and fallen trees, and old stumps and roots. All of the sandalwood in the State is owned by the Government, and very serious penalties are attached to any private encroachment on the Government monopoly.

RECENT ARCHAEOLOGICAL DISCOVERIES.

To the south of the "Street called Straight" in Damascus a series of streets forming concentric semi-circles has been found, which is supposed to have inclosed the site of a theatre of Roman times. The houses within the semi-circles are constructed on the top and sides of a great pile of rubbish. Among other discoveries made upon this site is to be mentioned that of a complete piece of the outer wall of an ancient temple. The wall is well preserved throughout its fifty feet of length and varies from twenty-seven to thirty feet in height. An inscription connected with the temple has been recovered; it mentions two men, Menedoros and Zenonos, as stewards of the temple, and is dated in the year 349 A. D. For some reason the name of Diocletian has been erased from the text of the inscription. Near Marash, in Northern Syria, Garstang has discovered a royal monument of the Hittites. This monument is a slab of dolerite 3.20m. in height, by 66m. in breadth, by 34m. in thickness, and it bears upon its face of it in relief a man clad in the Hittite costume and holding a triangular-shaped bow against his shoulder. The figure is posed upon the back of an animal with a short tail, while above the figure is a winged rosette, a sign of royal rank. The monument dates in the ninth century B. C. The same scholar, Garstang, has finished his search of the site of Sakhtje Genzi. By using sectional cuttings it has been possible to show that the strata penetrated date from the eighteenth to the twenty-sixth dynasties of Egypt. This is especially valuable for the determination of Hittite chronology. In the course of the work on this site the temple and several Hittite houses were found.—International Year Book.

LENICIA SHIPYARD REOPENED.

LENICIA (Solano Co.), July 18.—After being closed for eight years, the Benicia shipyard is again in operation.

This yard, one of the pioneer concerns of the kind in the State, was long owned by the late Matthew Turner. A few months ago it was sold to James Robertson, formerly of the firm of Schulz, Robertson & Schultz of San Francisco.

Robertson has practically rebuilt the yard. Last week he received a cargo of 100,000 feet of shipbuilding lumber from Puget Sound.

BOND ISSUE ALLOWED.

The Railroad Commission gave a decision recently by which the San Joaquin Light & Power Corporation is authorized to issue bonds in the sum of \$1,776,000, and the company is given authority to pledge these for an issue of two-year 6 per cent trust notes, with that notes may be issued of 75 per cent of the proceeds of the used in extending

Frank Neidick

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout the city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

QUICK DELIVERY OUR SPECIALTY.

38 EIGHTH ST.
SAN FRANCISCO, CAL.

Bind your copies of the Building and Industrial News in PERMANENT BOOK FORM

We have succeeded at last in securing a really practical binder. The Building and Industrial News contains a great deal of technical and statistical information that many of our readers find worth saving for future reference. There is no better way of preserving it than using the

"BIG BEN" BINDER

which preserves the magazine in permanent book form. This binder is hand-made and durable, and makes the permanent filing of magazines as easy as filing ordinary papers. It opens flat like a regular book, and comes in fine art cloth with the name of our Journal stamped in gold on the front cover and back. For persons who desire to

Save These Valuable Articles

this binder is just the thing, as it holds several numbers of our Journal and can be used again indefinitely year after year, simply by taking out the old Journals and inserting the new ones as they come to you.

By making special arrangement with the manufacturers of this best binder that has ever been put on the market, we are able to furnish them to you for **ONLY \$1.00 EACH.**

Merely send us your name and address and say: "Send us your binder. I enclose \$1.00," and we will send the binder promptly all charges prepaid.

Send in your orders now and begin saving the statistical and technical information, articles and valuable data, that will be published in The Building and Industrial News this year.

Otis Elevators

Sustain Architects' Endorsement

The Architect who specifies Otis Elevators identifies himself and his client with the most thorough Elevator organization in the world---an organization with fifty-seven years' experience and success in building Elevators.

Our Elevators --- of every type---from the simplest Hand-power Elevators to the most elaborate Electric and Hydraulic Installations---are the world's most finished Elevator products

We maintain Branches in eighty-one cities in the United States the distribution of which offers to users of Otis Elevators an inspection and Repair Service unapproached by any other Elevator Company.

Your clients and their engineers who use Otis Elevators will receive the benefit of our broad engineering experience and the unequalled facilities of our "Service Department." We are always glad to co-operate with them and with you to the fullest extent.

We Make

Gearless Traction Elevators. Worm Gear Traction Elevators. Drum Type Elevators. All Types of Hydraulic Elevators. Freight Elevators of Every Description. Automatic Residence Elevators. Electric Dumbwaiters. Incline Railway Hoists. Blast Furnace Hoists. Escalators. Inclined Freight Elevators. Gravity Conveyors, Etc.

Let us send you our latest books giving detail description of Otis Elevator products.

“WAINWRIGHT”

GALVANIZED

STEEL CORNER BAR

FOR PROTECTING EDGES OF CONCRETE CURBS STEPS, COLUMNS, ETC.

The Only Effective CONCRETE EDGE PROTECTOR

Offered to the Contracting Public

WAINWRIGHT PATENTS—March 9, 1897.

November 22, 1898. May 5, 1913.

March 26, 1907. Aug. 29, 1907.

Aug. 7, 1910.

This bar has been in public use for more than
ten years as the main feature of the

Wainwright Steel-Bound Concrete Curb

THE BEST IN THE WORLD OVER FIVE MILLION FEET

In Use in More Than Four Hundred Cities in the United States

ABSOLUTELY NON-BREAKABLE--CHEAPER THAN GRANITE

Handsome Than Granite and much stronger. Continuous in Construction, hence never cut of line. GALVANIZED STEEL CORNER BAR Prevents Chipping or Breaking on Edges. This Curb is Mechanically Perfect and Unequalled for Curved Corners.

This Curb Will Stand Harder Use And Last Ten
Times As Long As Plain Concrete Curb

CONTRACTORS can make money by laying this curb.

CITY ENGINEERS can save money by specifying it.

ARCHITECTS are invited to read pages 242 and 243 "Sweet's Index."

Editorial Comment.

The decision made by the administration leaders and committees of the houses of Congress yesterday to forbid all importations of arms into Mexico rather than to favor the insurgents by permitting the importation of arms by either faction was one that does credit to their good senses as well as accords with the spirit of humanity that should animate our nation. Whatever may be the morals of the contest in Mexico, for the government of the United States to take a position that we are willing and glad for both sides to buy weapons of us with which to cut each other's throats sounds too much like the act of an assassin for hire.

There is a growing impression in the United States that whatever may be the merits of the controversy between the Mexican factions, Diaz, Madero, Huerta, or whoever may happen to be the figurehead, there is a faction in control of the government at Mexico whose interests are antagonistic to granting any real constitutionalism for the republic and that this faction must be unhorsed before there can be any lasting peace to the south of our border. Madero started out to fight this interest, but soon succumbed to its influence, and in his turn was overthrown when its master spirits found that his weaknesses would prevent his success. The same interest has set up Huerta and is willing in turn to overthrow him, and put up some one else. The refusal of the United States to give its moral support to the existence of the Huerta government has been a bitter disappointment to the people who have put him in power.

It has been unjust for the United States to administer its law in such a way as to favor Huerta as against Carranza or the other insurgent leaders. On the other hand, to seem to endorse the present butchery by permitting the sale of arms to both sides would have been worse still. There should be hereafter an embargo on all shipments of guns and ammunition from this country.—Fresno Republican.

The Japanese owners of farm lands are seeking to escape the limitations of the present alien land law by incorporating and turning over their holdings to the corporations. Reports state that a great number of incorporation papers have been filed with the Secretary of State during the past few days and it is supposed that many more will be filed before August 10th, the date on which the referendum clause of the constitution provides that laws will go into effect after their passage. Just how far this will evade the law has not yet been determined. But the decisions

of the better judges and the trend of legislation of late has been to prevent the escape of responsibility for acts through incorporation. That is that a person incorporates a company and by the creation of this filitious person escapes the responsibility of his acts. The incorporation of companies to take over the land of alien owners and then transfer the ownership of the aliens to stock certificates is a question that will have to be decided by the courts as to status of ownership. And if the present law does not cover the situation there is no reason why one that does should not be enacted in the future.

Everybody should remember that today is the last day to register for the municipal bond election. Get in an register and vote for the bonds. The railroads will pay for themselves. And besides we'll get some sort of car service and be in a measure independent of the domination of the United Railroads. Exercise some independence and throw back the insult that is daily offered to your intelligence by Patrick Calhoun and M. H. De Young.

The Cali has started a crusade against Chief White of the Police Department. It has always been a question in the minds of the people why the present Chief was appointed. Certainly his previous training never fitted him for the job. And it is doubtful if he ever would have been appointed much less retained by the present administration had he not been connected with an important public service corporation.

A great hue and cry is being raised by the United Railroads and their votaries about the proposed bond issue for the municipal railroads and the increasing indebtedness of the city. That the taxpayers will be overburdened if the bond issue passes; and that generally the city is going to the demeriton bow-wows if the bonds are voted.

Here is the proposition. The United Railroads have to pay interest on about 50 millions of watered capital. The people have to pay it. Why in God's name can't the city pay interest on an actual investment under the same circumstances and put some money aside?

The proposed bond issue will take over the Union Street line, a railroad already established and earning a big revenue. It will add nine additional lines to the present Geary Street line making a complete municipal system. There can be no question about the roads paying for themselves. Why then should the people not vote for the system that will tend to free them from the dictation of the trolley trust and will at the same time put money in the treasury? Register now and vote for the bonds on August 26.

Accident Prevention At Saw Mills.

By C. D. Gray in the "Wood-Worker."

"Two Killed, Two Hurt, when Boiler Explodes." "Saw Mill Engine Blown Up." "Carried to Horrible Death when He Trips on Lever." "Saw Mill Man Killed in Boiler Explosion." "Fatally Injured in Saw Mill."

These are typical headlines which confront the reader of the newspapers in lumber manufacturing districts. They indicate, even to the casual observer, that the operation of saw mills is carried on at a considerable cost in the way of injuries and deaths to employees. While many of the accidents reported in the items of which the captions are shown above, happened at portable mills in the country districts, others were recorded at important plants and were fairly typical of what is happening right along.

It would be absurd to say that saw mill men are less mindful of their obligation to their employees and to the community than other manufacturers; yet it may be assumed that a large proportion of the accidents which are constantly reported is due to carelessness or neglect in some form or other. In other words, many of the injuries inflicted, resulting in permanent disability, or death, were easily preventable.

Americans are typical and characteristically prodigal of natural wealth, and, it is believed by many, of human life. The free waste of this country, to take a prominent example, has assumed appalling proportions, simply because the average man is too busy with other things to keep his premises free from excessive hazards. Preventable diseases are reaping annual tolls that ought to rouse every citizen of the country to positive measures of assistance in bringing about better conditions of health and sanitation. Accidents in industrial plants happen that might have been avoided, and the cost to individual and the community mounts high.

It is probably true that the saw mill, as a general proposition, is as free as any wood-working establishment from accidents. In the first place, the character of the work is such that grown men must be employed for the most part, and this fact leads to better conditions, inasmuch as youngsters are proverbially careless, and the use of them in box factories, flooring factories and other wood-working plants where the work is within their strength, is usually accompanied by a fairly large percentage of accidents.

But, just as the saw mill has fewer accidents as far as number is concerned, it also has more serious ones. If a man is hurt in a saw mill the chances are that his injuries are more serious than if he were an accident victim in a planing mill or furniture factory, because of the heavier character of the machinery employed. Hence the necessity of care is all the more emphasized.

As indicated by some of the headlines quoted at the beginning of this article, boiler explosions are all too numerous, especially at small mills,

where not enough attention is given to the proper operation of power plants. The portable boiler and engine are usually given pretty rough treatment; not enough care is taken to keep a sufficient amount of water in the boiler, and the inevitable frequently happens. This is also due to the fact that frequently no one is delegated specially to operate the power equipment, and in the case of the little mill the man operating the saw is supposed to keep a weather eye on the boiler, and tries to keep it supplied with water and fuel. This condition makes for accidents, but the use of greater care even here would be of considerable assistance.

In the larger mills with stationary power plants, inspections should be held regularly, and the boilers gone over carefully to see that they are in good condition. It is a noticeable fact that while mills are frequently closed to enable repairs and alterations to be made, especially after a long run, attention is usually confined to the saws and their appurtenances, and less given to the boilers than is really necessary. When the opportunity is presented for cleaning out the boilers, removing scale and insuring the proper maintenance of the equipment, it should be taken advantage of.

The use of guards on saws in lumber manufacturing seems to be impracticable, as it would be a hard matter to arrange a safety device to advantage. This only emphasizes the need of care in sawing. Not a great many accidents happen at the saw itself, however, though occasionally reports are made of men being tripped and thrown against the saw, or of the saw being started accidentally, causing an employee working in its vicinity to be injured. The United States Steel Corporation has adopted a danger signal, to be used in all its plants, a red ball, the emblem being hung at every point where there is danger of somebody being hurt. Every saw mill should adopt this idea and place the crimson symbol of danger at the saw, as a constant warning to its employees never to relax their vigilance against accident.

While the big saws cannot be protected, there is no reason why the other manufacturing equipment in the mill should not be kept as safe as possible. The edgers and trimmers should have guards mounted upon them, as their installation will not interfere to any extent with the work being done, and may help a great deal, though the hazard here is minimized by the fact that the employee seldom comes very close to the saws used in edging lumber. Resaws can be guarded, and are frequently protected in up-to-date mills. The increasing use of the resaw argues in favor of more attention being given this feature.

Probably the most prolific source of accident in the mill grows out of the carelessness shown in regard to protecting transmission equipment. Inasmuch as steam power is used universally, and it must be carried long dis-

tances in order to supply energy for the saws, conveyors and other equipment, there is necessarily an unusually large amount of transmission machinery in the way of belts, hangers and pulleys. In some mills of considerable pretensions as manufacturing plants it takes almost the agility of an acrobat to make progress through the maze of belts and hangers, especially in the lower portion of the mill. This is leaving exposed a danger point that can easily be protected. Large belts, especially, should be fenced in, a few boards nailed around them being better than no protection at all. Belting is necessary and must be used, but there is nothing to be gained by allowing it to remain a constant menace to the safety of those working in the mill.

In connection with conveying equipment, numerous gears and cogs must be used; and it is a significant commentary upon the care given this feature that in many mills where the owners should, and probably do, know better, these gears are left unprotected, and are likely at any time to cause serious injury by catching the clothing of some passer-by and drawing him into the meshes of the cog wheels. Boxes for these cogs can be put on without much expense of time or money, and the added point of safety is well worth considering. Ordinarily the mill, if it is of any size, has a machine shop which can be employed to turn out protective devices for this and other dangerous features of the mill, and as the amount of material needed is inconsequential, the improvement can usually be made without any trouble.

In the yard the piling and handling of logs is a matter of great importance. The extravagance of handling logs without a derrick is so patent that for this reason alone the old-fashioned plan of yanking logs off the car by a rope and then dragging them up an incline into the mill, should have been eliminated. There are still some mills which use this plan, however. The danger involved in handling logs in this way is more than considerable, and the character of the damage inflicted to the body of an employee caught under a log is particularly severe. In erecting log piles the base of the pile should be broad enough to eliminate the danger of the timber rolling off, and care should, of course, be taken in moving them to the mill.

The derrick itself should be erected and maintained with more than ordinary care. A good many serious accidents have happened because the boom or mast of the derrick collapsed under a heavy load, investigation showing that in many cases it had not been properly put up in the first place. A thorough test at the time of erection would eliminate this trouble. In this connection it might be mentioned that all-steel derricks are now being put out which seem to offer special advantages in the elimination of this danger. Their greater strength is probably the chief

claim being made for them by the manufacturers, however.

Most lumbermen understand the necessity of piling so as to get a solid and substantial stack, and it is not often that a pile collapses and causes any accidents. It is an occasional form of injury reported from lumber plants, however, and may be mentioned incidentally for that reason.

As a general proposition, industrial accidents are due equally to the negligence of the manufacturer and the carelessness of the employee. That is another way of saying that to eliminate preventable accidents, co-operation between them is needed. If the saw mill operator does all in his power to make his plant safe, then insists of the active co-operation of his men along the same line, he will not have much difficulty in noting an improvement in his plant in this respect.

OCCUPATIONAL DISEASES.

During one of the legislative committee hearings recently, Mr. Andrew Furuseth, quoting Browning, said "A country is wealthy in proportion to the number of healthy men and women whom it possesses." The picture of an influential labor-leader quoting Browning before a joint committee of the legislature is interesting and sounds like an account of an afternoon tea party, but Mr. Furuseth was very much in earnest; he was arguing for a bill designed to protect the health of certain workmen. The statement quoted is true and the importance of protecting the health of workmen is great. There exists in Milan, Italy, a special scientific institute for research on industrial diseases, and England, Germany, and other nations have collected much valuable information on occupations in relation to disease. The United States thus far has done little.

Two years ago the legislature of California passed a bill requiring the reporting of all persons ill as a result of working with lead, phosphorus, arsenic, mercury, anthrax or compressed air. The Governor approved the bill, and this year there has been placed before him for consideration a bill providing a farther extension of the list of reportable diseases, and establishing an administrative method for thorough investigations and control of all important conditions favoring occupational diseases.

There occurred June 8-13, 1913, in Rome, the Fourth National Conference on Occupational Diseases. An organization which holds annual meetings in the United States—The National Association for Labor Legislation—has paid particular attention to occupational diseases in this country during the past few years, and has had a marked influence in stimulating interest in the subject. It is to be hoped that in 1915 an exhibit on this subject may be presented in San Francisco. Secretary Andrews of the American association mentioned, stated recently before the National Civic Federation that at least 13,000,000 cases of illness among workers and a money loss of \$750,000,000 annually, had been estimated as due to occupational diseases in the United States.—From the Report of State Board of Health.

Firms dealing news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 8 story and base, concrete and steel, \$85,000. Architect, William H. Crim, Jr., 425 Kearny St., S. F. Owner's name withheld. The building will be erected on one of the few choice sites remaining vacant in the apartment house district. Interior will be arranged for a large number of two and three room suites, all of which will have connecting baths and wall beds. Finish will be of pine and hardwoods with some ornamental plaster. There will be elevator service, hot water plant, steam heat and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Bath rooms will have cement floors and tile wainscot. Plans are now being prepared. Further mention will be made of the work as the plans progress.

SAN FRANCISCO—Apartment house, 4 or 5 story and base. Class C construction. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner's name withheld. The building will be erected in the Fifty Vara District and will contain in the neighborhood of 65 rooms arranged in two and three room suites. Interior finish will be of pine and elm panels. Some hardwood floors will be used. There will be steam heat, an automatic elevator and hot water plant. All suites will have wall beds and connecting bath rooms. Bath rooms will be finished with cement floors and tile wainscot. Exterior of the building will probably be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$6,000. Architect, C. O. Clausen, Phelan Bldg., E. F. Owner, Louis D. Stoff, Maskey Bldg. The building will be erected on the west side of Jones street south of Jackson and will have a frontage of 25 feet and a depth of 67 feet. Interior has been arranged for six suites of two and three rooms each. Trim will be of pine with some elm panels. Hardwood floors will also be used. There will be wall beds and private baths. Bath rooms will be wainscoted with tile. A hot water system will be installed. Exterior of the building will be covered with rustic, shiplap and brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Apartment house, 6 story and base. Class C, \$75,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, James H. Hjul. The building will be erected on the south side of Sutter street west of Jones, and will cover an area of 68 feet 9 inches by 137 1/2 feet. Plans have been arranged for 66 suites of two, three and four rooms. Interior finish will be of pine and hardwoods. All suites will have private bath rooms and will be equipped with wall beds. There will be steam heat, elevator service, vacuum cleaning system and hot water supply. Some ornamental plaster will be used. Marble and tile will be used in the entrance and lobby. Bath rooms

will have tile floors and wainscot. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

OAKLAND, CAL.—Apartment house, 3 story and base, frame. Cost not stated. Architect, none. Owner, D. Miller, 21st St., Oakland. The building will be erected on 21st street between Webster and Harrison streets. Suites will be arranged in two and three room apartments. Interior finish will be of pine throughout. There will be private bath rooms and wall beds. Plans provide for a central heating system and hot water supply. Bath rooms will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$14,000. Architect, Arthur G. Scholz, Phelan Bldg., S. F. Owners, Mr. and Mrs. Mertens. The building will be erected on the south side of Fulton street east of Gough, and has been designed to contain fourteen suites of two and three rooms. Interior finish will be of pine with some elm veneer. Hardwood floors will be used in the principal rooms. There will be a central heating system and hot water supply. All apartments will be equipped with wall beds and will have private baths. Bath rooms will be finished in tile. Some tile will also be used in the kitchens. Exterior of the building will probably be covered with cement plaster on metal lath and brick veneer. Plans are now being prepared.

FRESNO, FRESNO CO., CAL.—Apartment house, 4 story and base, brick and steel, \$80,000. Architect, Eugene Mathewson, Forsyth Bldg., Fresno. Owner, J. D. Stratham. This work has been mentioned here before when plans were first started. Working drawings are now being completed. The building will be erected on the corner of Mariposa and M streets, covering an area of 100 feet square. Interior has been arranged for 38 suites of two, three and four rooms. Interior finish will be of pine and hardwoods. Hardwood floors will be used in the principal rooms. There will be steam heat, two electric elevators and a vacuum cleaning system. Bath rooms will have tile floors and wainscot. Exterior of the building will be faced with pressed brick. Considerable marble and tile will be used in the entrances. Plans are nearly complete.

BANKS.

PASADENA, LOS ANGELES CO., CAL.—Bank additions, 7 story and base, reinforced concrete, \$100,000. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Citizens' Savings Bank. This work has been mentioned here before. At present there is a one-story reinforced concrete building on the site and six stories will be added. First floor will be remodelled for banking rooms and upper

floors will be subdivided into about 16 offices to the floor. Steam heat and elevators will be included in the work. Exterior will be faced with pressed brick and terra cotta. Plans are nearly ready for figures.

Contracts Awarded.

FILLMORE, VENTURA CO., CAL.—Bank, 1 story and base, reinforced concrete. Cost not stated. Architect's name not given. Owners, Farmers' and Merchants' Bank of Fillmore. Contractors, Sweetser & Baldwin Co., 9th and Los Angeles streets, Los Angeles. Contract price not stated. The contract includes bank equipment.

CHURCHES

OAKLAND, CAL.—Church, 1 story, frame, \$5,000. Architect, William H. Ratchif, Jr., First National Bank Bldg., Berkeley. Owners, St. Peter's Parish. The building will be erected in Rock Ridge Park. Interior will be arranged for a main auditorium and Sunday school rooms. All interior finish will be of pine or redwood. Some art glass will be used. Exterior of the church will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

TILLAMOOK, ORE.—Church, 1 story and base, brick. Cost not stated. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, First Methodist Church of Tillamook. The building will be designed with a high basement which will be used for Sunday school rooms. Main floor will contain an auditorium seating 350 people. Interior finish will be of pine throughout. There will be a central heating system, probably warm air. Ornamental plaster and art glass are specified. Exterior of the building will be faced with pressed brick and stone. Plans are complete and are now out for figures. Plans can be secured from the architects.

MARSHFIELD, ORE.—Church, 1 story and base, reinforced concrete, \$20,000. Architect, D. C. Lewis, coach Bldg., Portland. Owners' name withheld. The Sunday school rooms, social hall and kitchen will occupy the basement floor. Main floor will be used for the auditorium and pastor's study. Interior finish will be of pine throughout. A central heating system will be installed. There will be art glass windows, ornamental plaster and some marble work. Exterior of the church will be faced with cement plaster. Plans are now being prepared.

EUGENE, ORE.—Mausoleum, 1 story, reinforced concrete and stone. Cost not stated. Architects, Ellis F. Lawrence associated with William G. Holford, Chamber of Commerce Bldg., Portland. Owners, Portland Mausoleum Co., Spaulding Bldg., Portland. The building has been designed to contain six receptacles. Exterior will be faced with marble and cut stone. Interior finish will be of stone, ornamental bronze and iron. Heavy ornamental bronze and iron gates and window grilles will also be used. The work will include modern plumbing and electric work. Plans are complete and figures are being taken.

COLTON, SAN BERNARDINO CO., CAL.—Church, 1 story and base, brick and frame, \$18,000. Architect, Norman L. Marsh, Broadway Central Bldg., L. A. Owners, Jewel Methodist Congregation. The building has been designed

in the Classic style and will cover an area of 70x10 feet. Interior finish will be of pine throughout. Foundations will be of concrete and superstructure will be of frame faced with pressed brick veneer. Besides the main auditorium there will be Sunday school rooms, social hall and pastor's study. Plans are complete and figures are being taken.

Contracts Awarded.

SAN MATEO CO., CAL.—Mausoleum. Class A construction, \$85,000. Architect, C. C. Cummings, Monadnock Bldg., S. F. Owners, Modern Mausoleum Co. Contractors, Roberts Bros., Sheldon Bldg., S. F. Contract price, \$85,000.

COURT HOUSES.

SAN FRANCISCO—City Hall, 4 story and dome. Class A construction, \$1,500,000. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owners, City and County of San Francisco. Bids will be opened on July 30th for erecting the structural steel for the new City Hall. A complete list of the figures as opened will appear in the next issue of the Building and Industrial News.

FACTORIES & WAREHOUSES.

VAN NUYS, LOS ANGELES CO., CAL.—Factory, 2 and 3 story and base, brick and concrete. Cost not stated. Architect, A. S. Heineman, San Fernando Bldg., L. A. Owners, Murray-Harris Organ Co. The building will cover an area of 200x300 feet. Foundations will be of concrete and walls of brick faced with stock brick or cement plaster. Plans will include pine trim and floors, metal window sash and frames, elevators and a central heating system. Plans are now being prepared.

Contracts Awarded.

KETCHIKAN, WASH.—Cold storage plant, 5 story and base, reinforced concrete, \$110,000. Architect's name not given. Owners, Northern Dock Co. Contractor, A. W. Quist, Hoge Bldg., Seattle. Contract price, \$110,000. Note: This contract does not include the machinery.

FIRE HOUSES.

GLENDALE, LOS ANGELES CO., CAL.—Fire house, 2 story and base, brick. Cost not stated. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, City of Glendale. This work has been mentioned here before when plans were first started. The building will cover an area of 50x70 feet. First floor will be given over to the apparatus room and upper floor will be arranged for sleeping rooms. Interior will be finished in pine throughout. There will be a central heating system and modern plumbing. Exterior of the building will be faced with tapestry brick. Bids are now being taken and will be opened on August 14th. Plans can be secured from the architects or from G. B. Woodberry, City Clerk.

SEATTLE, WASH.—Fire house, 2 story and base, brick and frame, \$12,000. Architect, Daniel Huntington, Seattle. Owners, City of Seattle. The building will be erected on the Hunter Boulevard, and has been designed for three pieces of apparatus on the first floor and sleeping rooms above. Inter-

rior will be finished in pine. There will be special plumbing and electric work. Exterior of the building will be covered with cement plaster on metal lath and brick veneer. Plans are complete and figures are being taken.

FLATS.

SAN FRANCISCO—Flats, 3 story and base, frame, \$10,000. Architect, none. Owner, Henry Scholten, 1522 Santa Clara Ave., Alameda. The building will be erected on the north side of Howard street west of Lafayette avenue, and will cover an area of 50x70 feet. Interior will be arranged to contain nine flats of four and five rooms and bath. All interior trim will be of pine or redwood. Modern plumbing, including 30-gallon boilers, will be installed. Bath room floors will be of tile. Terrazzo steps are specified. Exterior of the building will be covered with ship-lap and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

SAN FRANCISCO—Flats, 3 story and base, frame, \$9,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Rousseau Realty Co. The building will be erected on the north side of Page street near Webster, covering an area of 25x65 feet 9 inches. Interior will be arranged for six modern flats with baths. Interior finish will be of pine and redwood with some hardwood floors. There will be open fire places with brick or tile mantels. Bath room floors will be of tile. Wall beds are to be used. Exterior of the building will be covered with cement plaster on metal lath and rustic. Plans are complete and figures are being taken. Art glass, wall beds, finish hardware and shades are not to be included in the contract.

SAN FRANCISCO—Flats, 3 story and base, frame, \$15,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner's name withheld. The building will be erected in the Western Addition and has been designed to contain six apartments of four rooms each. Interiors will be finished in pine, hardwood and white enamel. Hardwood floors will be used in the living rooms and reception halls. All bed rooms will be equipped with wall beds. A central heating system and open fire places will be installed. Mantels will be of brick. Bath rooms will have composition floors and tile wainscot. Entrance will be finished in marble and tile. Exterior of the building will be covered with brick veneer, rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Flats, 3 story and base, frame, \$7,000. Architect, August Nordin, Mills Bldg., S. F. Owners, J. H. and M. E. Plante. The building will be erected on Sharon street south of 15th. There will be three modern flats of five and six rooms. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be open fire places and brick or tile mantels. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with rustic and ship-lap. Plans have been out for figures and a contract will be awarded within a day or two.

SAN FRANCISCO—Flats, 2, 2 story

and base, frame, \$3,000 each. Architect, none. Owner, C. A. Rushton, 714 9th avenue, S. F. These buildings will be erected on the west side of 8th avenue south of Cabrillo, and each has been designed to contain two modern flats of five and six rooms. Each building will have a street frontage of 25 feet and will extend back a distance of 60 feet. Interiors will be finished in pine with some elm panels. There will be hardwood floors in the living rooms, dining rooms and reception halls. Plans provide for open fire places with brick or tile mantels. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with klunker brick veneer, rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner, who will do the work by Day labor. He is now in the market for all materials.

BERKELEY, ALAMEDA CO., CAL.—Flats, 2 story and base, frame. Cost not stated. Architect, none. Owner, B. E. Kennedy, 2539 Milvia St., Berkeley. The building will be erected at the northeast corner of Parker and Milvia streets and has been designed to contain twelve rooms, which are to be arranged in two flats. Interior finish will be of pine and redwood. Some hardwood floors are specified. There will be open fire places and tile or brick mantels. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with rustic and ship-lap. Plans are complete and in the hands of the owner. Work will be done by Day Labor and he is now purchasing all materials.

GARAGES.

SEATTLE, WASH.—Garage, 1 story and base, brick, \$12,000. Architects, Beezer Bros., Northern Bank Bldg., Seattle. Owner, O. W. Fisher. The building has been designed for a private garage, and will be erected on property in the rear of the owner's new residence on Belmont avenue. There will be storage space for five machines and a completely equipped repair shop. Exterior of the garage will be faced with pressed brick. A cement floor and metal window sash and frames are specified. Plans are complete and figures are being taken.

GOVERNMENT WORK AND SUPPLIES.

Puget Sound, Air Compressor.
The following bids were received by the chief, bureau of yards and docks, Navy Department, Washington, D. C., July 12 for furnishing air compressor with accessories at the navy yard, Puget Sound, Wash.:
Item 1, reciprocating air compressor and compressor foundation, complete; 2, turbine-driven rotary air compressor and foundation; 3, compressors and accessories, fulfilling in every respect the performance requirements of the specification, but with such modification in design as bidders may suggest; 4, deduct from items 1, 2, or 3 for omitting foundation; 5, deduct from items 1, 2, or 3 for omitting the condenser and cooler tube corrosion process, as described in paragraph 26.
Charles C. Moore & Co., engineers, 1st street, San Francisco, Cal., item 1, 14 ft, \$59,617; 16 ft, \$49,500; item 4,

deduct \$3,912 for 11 ft and \$2,795 for 10 ft; item 5, \$3,500.
Laidlaw-Dunn-Gordon Co., 115 Broadway, New York city, item 1, \$47,555; alternate, \$50,175; item 4, deduct \$3,600; alternate, deduct \$3,800; item 5, deduct, \$2,475; alternate, deduct \$2,475.

San Francisco, Cal., Appraisers' Store.
As previously reported, the contract for an electric wiring system, lighting fixtures, etc., in the U. S. appraisers' stores, San Francisco, Cal., was awarded to the General Electric Construction Co., 223 Minna street, San Francisco, Cal. In the prosecution of the work the following fixtures and material will be used: Cabinet and tablet, Drendell Electric Co., "Doemec" conduit, American Conduit Co., "Galvanite" metal molding, National Metal Molding Co.; plug receptacles, Harvey-Hubbell; snap switches, General Electric Co.; rubber-covered wire, General Electric Co.

Yards and Docks.

Specifications for work under the bureau of yards and docks, Navy Department, have been furnished to the following firms in addition to those previously mentioned in these columns: San Francisco, Water Pipe, August 2. R. D. Wood & Co., 460 Chestnut St., Philadelphia, Pa.

Central Foundry Co., 90 West street, New York city.

Lidgerwood Manufacturing Co., 96 Liberty street, New York city.

U. S. Cast Iron Pipe and Foundry Co., 1421 Chestnut street, Philadelphia, Pa.

Treadwell Construction Co., Midland, Pa.

R. S. Bishop, Evans Building, Washington, D. C.

Canal Circular 787-D.

The Isthmian Canal Commission will open bids August 5, 1913, under canal circular 787-B, for furnishing the following material and supplies:

Class 1, 44 chequered steel plates.
Class 2, 77,000 feet cold-twisted reinforcing steel bars.

Class 3, 183,000 feet galvanized-steel wire.

Class 4, 1,700 lineal feet galvanized-steel wire mesh.

Class 5, 2,000,000 pounds oats.

San Francisco, Quarantine Station.

The bid of Tiernon & Doronio, San Francisco, Cal., \$606.51, has been accepted for furnishing miscellaneous lumber for the above building.

Fort Peck Indian School, Hospital.

The contract for the construction of a brick hospital at the Fort Peck Indian School, Mont., has been awarded to E. L. Oleson, Poplar, Mont., at \$9,864.

Orders have been received at the Constructing Q. M. Office, Fort Mason, Cal., authorizing the preparation of plans for altering old Fort Point in the Presidio of San Francisco into a Federal Prison. Plans are to be rushed that they may be ready by the time that the Secretary of War and General Leonard Wood, Chief of Staff, and the Chief of the Quartermaster's Corps arrive in San Francisco, which will be during the latter part of this month.

Engineer O. W. Degen, Constructing Quartermaster's office, Fort Mason, is

now preparing plans for this work and states that it will require a large expenditure, but that an estimate has not been completed. The work will include a large amount of interior partitions, plastering, mill work, roofing, plumbing, painting, electric work and light fixtures, steel cells, a complete steam heating system, modern kitchen equipment and oil burning system.

In connection with this project there will be constructed quarters for the accommodation of 15 officers. Five sets of new officers' quarters will be constructed. Old Fort Point will take the place of Alcatraz Prison, which is to be converted into an immigration station.

San Francisco, Marine Hospital.

As previously reported the contract for the installation of conduit and wiring system in the U. S. marine hospital, San Francisco, was awarded to the Decker Electrical Construction Co., 111 New Montgomery street, San Francisco, Cal. In the prosecution of the work the following fixtures and material will be used: Conduit, American Conduit Mfg. Co.; conduit fittings, boxes, Sprague Electric Co.; conductors, Crouse-Hines Co.; rubber-covered wire, General Electric Co.; snap switches, do; cut-outs, do; metal molding, National Metal Molding Co.

HOTELS.

SAN FRANCISCO—Hotel, 2 story and base, brick and steel, \$18,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner's name withheld. The building will be erected in Chinatown and will cover a small inside lot. The first floor will be arranged for stores and the hotel entrance. Upper floor will contain a number of guest rooms and baths. Running water will be supplied to all rooms. Interior finish will be of pine and redwood. There will be modern plumbing and electric work. Exterior of the building will be faced with cement plaster. Stores will have plate glass windows and patent store fronts. Plans are complete and a general contract will be let this week.

OAKLAND, CAL.—Hotel, 6 story and base, brick and steel, \$65,000. Architect, William Wilde, Albany Bldg., Oakland. Owner, Charles Streit. This building has been mentioned here a number of times before when the plans were first started. Contracts have been let for the excavating, concrete and steel work. The building will be erected at the northeast corner of 11th and Franklin streets, and will be arranged with a number of stores on the first floor and guest rooms above. Many of the rooms will have private baths. Interior finish will be of pine and hardwood with ornamental plaster in the lobby and office. Bath rooms will have tile floors and wainscot. There will be steam heat, elevator service and a vacuum cleaning plant. Exterior of the building will be faced with pressed brick. Bids are now being taken for the general construction.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel, \$50,000. Architects, Neher & Skilling, Garland Bldg., L. A. Owner, W. H. Wagner. The building will be erected on Hope street near 8th and has been designed to cover a lot 60x155 feet. Interior will

be arranged for a lobby and offices on the first floor and in the neighborhood of 96 rooms and 60 baths on the upper floors. Interior finish will be of pine with some ornamental plaster. Bath rooms will have tile floors and wainscot. Plans provide for steam heat, elevator service, and a hot water plant. There will be metal window sash and frames. Interior partitions will be of metal lath and plaster. Exterior of the hotel will be faced with artificial stone. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 3 story and base. Class C construction. Cost not stated. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, J. Domozzi. The building will cover a ground area of 50x110 feet. There will be a total of 50 rooms nearly all of which will have connecting baths. There will be steam heat, elevator service and a vacuum cleaning plant. Running hot and cold water will be supplied to all rooms. There will be metal window sash and frames. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 12 story and base, reinforced concrete. Cost not stated. Architect, Frederick Noonan, Wright and Callender Bldg., L. A. Owner, N. W. Stowell. The building will be erected on Spring street south of 4th, covering an area of 65x125 feet. The first floor will contain one store, barber shop, large lobby, buffet, sample rooms and parlors. Upper floors will be arranged for a total of 275 rooms with 264 baths. Construction will be fireproof throughout with reinforced concrete walls, floors and roof slabs. Interior partitions will be of metal lath and plaster. Interior finish will be of pine and hardwoods. There will be elevator service, steam heat, vacuum cleaning system and hot water plant. Exterior of the building will be faced with glazed brick and terra cotta. Metal window sash and frames will be used. Working drawings are nearly complete.

Contracts Awarded.

LOS ANGELES, CAL.—Hotel, 2 story and base, brick and steel, \$55,000. Architect, Maine Building and Investment Co., Thorpe Bldg., L. A. Owners, H. L. Squires and N. S. Meigs. Contractors, Maine Building and Investment Co., Thorpe Bldg., L. A. Contract price, \$55,000. Note: The building will contain 121 rooms. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel, \$65,000. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, G. I. Jacoby. Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price, \$65,000.

HOSPITALS.

SAN RAFAEL, MARIN CO., CAL.—Hospital, 1 and 2 story and base, reinforced concrete, \$10,000. Architect, Thomas O'Connor, 104 D St., San Rafael. Owners, Marin County. Architect O'Connor has been commissioned by the Marin County Board of Supervisors to prepare plans and specifications for a new and modern County Hospital which is to replace the building recently destroyed by fire. The new hospital will be erected in Lucas

Valley, about four miles from San Rafael, and will be of the reinforced concrete type of construction, absolutely fireproof throughout. The design will be in the Spanish Mission style, closely following the lines of the old Mission San Rafael. Interior will be arranged for about seventy-five rooms, besides the operating rooms, nurses' quarters and administrative offices. Interior will be finished in pine and hardwoods. Tile will be used extensively. There will be a central heating system and other modern improvements. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. An estimated cost of \$10,000 has been placed on the work. Plans will be ready to be submitted to the Board of Supervisors at their next meeting and if final approval is given the plans, bids will be advertised for at once.

SEDRO WOOLEY, WASH.—Hospital group, 4, 2 story and base, reinforced concrete, \$50,000 each. Architects, Saunders & Lawton, Alaska Bldg., Seattle. Owners, State of Washington. The State institution at Sedro Woolley, known as the Northern State Hospital, will be improved with the construction of four new buildings. These buildings have been designed for wards, nurses' quarters and an administrative building. All will be supplied with steam heat from a central plant. Exterior will be faced with cement plaster. Plans are complete and have been approved. Bids will be opened on August 9th by the State Board of Managers at Olympia. Plans and specifications can be secured from the architects.

LOS ANGELES, CAL.—Hospital, 3 story and base, brick and steel, \$50,000. Architects, Garrett & Farrell, Currier Bldg., L. A. Owners, French Hospital Association. This building was mentioned here when preliminary sketches were made. Further details of construction are now available. The building will be 38x120 feet and will contain 25 private rooms, major and minor operating rooms, accident room and ten bath rooms. Interior finish will be of pine throughout. Bath rooms will be finished in tile. There will be a complete steel frame, brick filler walls and glazed brick facing. Plans include elevator service, steam heat and a vacuum cleaning system. Working drawings are being prepared.

Contracts Awarded.

SAN FRANCISCO—Hospital screens, \$9,152. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractor, P. J. Sullivan, Jr., S. F. Contract price, \$9,152. A complete list of the figures opened for this work appears under the heading of San Francisco in this issue.

LIBRARIES.

BAKERSFIELD, KERN CO., CAL.—Library, 1 story and base, reinforced concrete. Cost not stated. Architect's name not given. Owners, City of Bakersfield. The building will be erected on Baker street and has been designed in the classic style. There will be two reading rooms, stack room and librarian's office. Interior finish will be of pine and hardwood. Metal stacks will be used. Exterior of the building will be faced with cement plaster. Plans and specifications are on file with H.

F. Murbok, City Clerk, Producers' Bank Bldg. Bids are now being taken and will be opened on August 9th.

RENTON, WASH.—Library, 1 story and base, brick and concrete, \$10,000. Architect, H. H. Ginnold, Epler Block, Seattle. The building will be designed in the classic style and will cover an area of 45x90 feet. Interior finish will be of pine and hardwood. There will be a central heating system, probably furnace heat. Plans provide for a large public reading room, librarian's office and stack room. Some ornamental iron will be specified. Exterior of the building will be faced with cement plaster. Plans are being prepared.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Paving roadways. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for paving the east roadway and the Fillmore street entrance to the Exposition Grounds have been completed. Bids are now being taken for this work. Plans and specifications can be secured from the Director of Works. Bids will be opened on July 31st. An official proposal appears in another column of this issue.

SAN FRANCISCO—Structural steel for Fine Arts building. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids opened by the Buildings and Grounds Committee for furnishing, fabricating and erecting the structural steel for the Fine Arts Building show close figuring on the three propositions, A, B, and C, calling for all work, fabrication and furnishing and for erecting. Dyer Bros. were low at \$133,000, for all work under proposition A, while the United States Steel Products bid for furnishing and fabricating and J. G. Williams Construction Co. bid for erecting combined was \$394 lower than Dyer Bros.' bid. No contracts have been awarded. A complete list of these figures appears under the heading of San Francisco in this issue.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, J. E. McCarthy, Anglo Bldg., S. F. Owner, J. C. Kirby, 2947 18th St., S. F. The house, which has been designed for a seven-room dwelling, will be erected on 19th avenue, north of Anza. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be a large open fire place in the living room with brick or tile mantel. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now purchasing all materials.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,800. Architect, none. Owner, C. A. Hall, 1218 5th avenue, S. F. The house will contain seven rooms and bath, and will be erected on 5th avenue north of Parmassus. Interior will be finished in pine and hardwood. Hardwood floors

will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Some brick veneer will also be used. Plans are complete and work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, A. H. Gerlts. The dwelling will be erected near the University Campus, and has been designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine, redwood and some hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room will be finished in tile and tile wainscot will also be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,500. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, A. D. Grimwood. The dwelling will be erected on Mesa avenue in Piedmont, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine and hardwood. Hardwood floors will be used in the living room, dining room, den and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Bath room will be finished in tile and tile wainscot will also be used in the kitchen. There will be an automatic water heater. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and now out for figures.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,500. Architects, Hutchinson Bros., 470 12th St., Oakland. Owner, Mrs. D. Numan. This dwelling will be erected in the Broadmoor Tract, and has been designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine and white enamel. Hardwood floor will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with shingles and shiplap. Plans are complete and figures are now being taken by the architects.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$6,500. Architect, William H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner, J. W. Clarke. The house will be erected at Adams Point, and will contain in the neighborhood of ten rooms, baths and sleeping porch. Interior will be finished in pine, redwood and hardwood. Floors in the principal rooms will be of hardwood. Bath rooms will have composition floors and the wainscot. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water

heater will be installed. Tile will be used in the kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken by the architect.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,500. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The house will be erected on Mesa avenue, and will contain in the neighborhood of eight rooms, bath and sleeping porch. All interior finish will be of pine and white enamel. Bath rooms will have composition floors and tile wainscot. There will be furnace heat and open fire places. Mantels will cost \$150 each and will be of brick and tile. Hardwood floors will be used in the living room, dining room, den and reception hall. Tile will be used in the kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now ready for figures.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,500. Architect, Frank S. Forster, 1417 Arch St., Berkeley. Owner, Dr. C. L. Roadhouse. The dwelling will be erected in North Berkeley, and will contain seven rooms, bath and sleeping porch. Interior will be finished in pine, redwood and some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans have been revised and new figures are now being called.

SAN JOSE, SANTA CLARA CO., CAL.—Cottages, 1 story and base, frame. Cost not stated. Architects, none. The following Day Labor jobs are reported as about to be started in San Jose: Frank Bosmanic, South Park street west of Gardner, San Jose, 1 story, frame, five-room cottage, \$1,400, and W. F. Gilman, 530 Hull avenue, San Jose, 1 story frame, four-room cottage, \$1,600. Owners will purchase all materials.

PACIFIC GROVE, MONTEREY CO., CAL.—Bungalows, 5, 1 story and base, frame, \$2,000 each. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owners, Conference Claimants Endowment Fund. Each of these houses will contain five rooms and bath. Interiors will be finished in pine with some hardwood floors. There will be a large open fire place with tile or brick mantel in each living room. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

DIXON, SOLANO CO., CAL.—Residence, 2 story and base, frame, \$10,000. Architects, Salfeld & Kohlberg, Clunie Bldg., S. F. Owner, Henry Peters. The house will contain in the neighborhood of ten rooms, several baths and a sleeping porch. Interior will be finished in pine and redwood with some white enamel. Hardwood floors will be used in the living room, dining room, den and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath rooms and kitchen.

An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RUTHERFORD, NAPA CO., CAL.—Residence, 2 story and base, frame, \$20,000. Architect, L. M. Turton, Napa. Owner, Fred S. Ewer. This work has been mentioned here some months ago when plans were first started. The house will contain in the neighborhood of twelve rooms, baths and sleeping porch. Interior finish will be of pine and hardwoods and white enamel. Hardwood floors will be used in the principal rooms. There will be a central heating system and open fire places. Mantels will be of stone and brick. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

SACRAMENTO, CAL.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, E. A. Pearce, Sacramento. The dwelling will be erected on Carnegie avenue and 21st street. The house has been designed to contain five rooms and bath. All interior finish will be of pine. Some hardwood floors will be used. There will be an open fire place with brick mantel in the living room. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

ALAMEDA, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,800. Architects, Newsom & Dixon, 812 Broadway, Oakland. Owner, John Lundholm. The dwelling is to be erected at the corner of 8th and Santa Clara avenue, and will contain six rooms, bath and sleeping porch. Interior finish will be of pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of brick. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Owner is now purchasing all materials.

OAKLAND, CAL.—Residences, 1, 1 and 1, 2 story and base, frame, \$2,600 and \$2,000. Architects, Newsom & Dixon, 812 Broadway, Oakland. Owner, Mr. McWilliams. These two dwellings will be erected on 21st street between 5th and 7th avenues. Houses will contain six and seven rooms and bath. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be large open fire places in the living rooms. Mantels will be of brick. Tile will be used in the bath rooms. Exteriors will be covered with cement plaster on metal lath. Plans for both houses are complete and work will shortly be started by Day Labor. All materials are now being purchased.

PORTLAND, ORE.—Residence, 2 story and base, brick, \$6,000. Architects, Doyle & Patterson, Worcester Bldg., Portland. Owner, Gordon Voorhes. The dwelling will be erected in Waverly Heights and will cover a ground area of 40x100 feet. The dwell-

ing will contain in the neighborhood of 20 rooms, several baths and sleeping porches. Interior finish will be largely of hardwoods, although considerable selected Oregon pine will be used. Hardwood floors will be used throughout except in the bath rooms which will have composition floors. Plans provide for steam heat, a vacuum cleaning system and open fire places. Bath rooms will be finished in tile. Mantels will be of brick and stone. A hot water plant will be installed. Plans call for a considerable amount of ornamental plaster and ornamental iron and bronze. Exterior of the dwelling will be faced with pressed brick and cement plaster. Plans are now out for figures. Bids will be opened on August 1st.

SCHOOLS.

PORTLAND, ORE.—School, 2 story and base, brick and steel. Cost not stated. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, City of Portland. The building has been designed for a modern high school and will cover a large ground area. Plans provide for sixteen class rooms, large assembly hall seating 350 people, domestic science and manual training departments, teachers' rooms, principal's office and library. Interior finish will be of pine with maple floors. There will be steam heat, a vacuum cleaning system, slate blackboards, program clocks and a bell system. Exterior of the building will be faced with pressed brick. Plans are complete and have received the approval of the Board of Education. Bids are now being taken and will be opened on August 9th. Plans can be secured from the architects.

SAN FRANCISCO—School fire escapes, \$3,440. Architect, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works for furnishing and erecting fire escapes on the Yerba Buena School show Dyer Bros. low at \$3,440. A complete list of these figures will be found under the heading of San Francisco in this issue.

BANNING, RIVERSIDE CO., CAL.—School, 1 story and base, brick and concrete, \$17,000. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Banning School District. The building will cover an area of 60x100 feet and has been designed to contain four class rooms, assembly hall and study rooms. Interior will be finished in pine with some maple floors. There will be a plenum heating system. Exterior of the building will be faced with cement plaster. Plans are now being prepared. Bids will be called for as soon as bonds can be sold.

LONG BEACH, LOS ANGELES CO., CAL.—Schools, 3, 2 story and base, brick and concrete, \$55,000 and \$30,000. Architect, A. Burnside Sturges, Story Bldg., L. A. Owners, Long Beach School District. One of the buildings will be a two-story brick structure, 71x76 feet, containing sixteen class rooms, assembly hall, studies and offices, and domestic science and sloyd rooms. It will cost \$55,000. The other two buildings will be 65x165 feet, containing twelve rooms each, with auditorium and manual training rooms,

and will each cost \$30,000. The buildings will be equipped with plenum heating systems. Bonds for the work have been voted. Bids will be called for as soon as the bonds can be sold.

Contracts Awarded.

PHOENIX, ARIZ.—School, 2 story and base, brick and steel, \$125,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, City of Phoenix. Contractor, O. L. Tuell, Phoenix, general construction, \$111,874; B. F. Hulse, Los Angeles, heating, \$4,744, and E. F. Jones, Phoenix, painting, \$5,192. Note: The building will cover an area of 286x126 feet.

PORTLAND, ORE.—College buildings, 2, 3 story and base, brick and steel, \$117,700. Architects, Bennes & Hendricks, Henry Bldg., Portland. Owners, Oregon Agricultural College. Contractors, Snook & Travis, Salem. Contract price, \$117,700. Note: This contract does not include heating or electric work.

SEWERS, STREET WORK AND WATER SYSTEMS.

SAN FRANCISCO—Steam pipe for pumping plant. Cost not stated. Engineer, City Department of Engineering, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids will be received up to and including the first day of August by the Board of Fire Commissioners for furnishing and installing a 24-inch steam pipe at Pumping Station No. 1. Plans can be secured from the Secretary of the Board of Fire Commissioners in the Temporary City Hall.

STORES AND OFFICES.

SAN FRANCISCO—Stores, 1 story and base, brick and steel, \$12,000. Architect, William H. Crim, Jr., 425 Kearny St., S. F. Owner, Francis Ward. This work has been mentioned here before when the architect first started working drawings. The building will be erected on a corner site and has been arranged for a furniture store and cafe. Interior will be finished in pine with some hardwood. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

LOS ANGELES, CAL.—Stores and offices, 12 story and base. Class A construction. Cost not stated. Architects, Morgan, Wall & Morgan, Van Nuys Bldg., L. A. Owner, W. G. Kerckhoff. The building is to be erected at the northwest corner of 6th and Los Angeles streets and will cover an area of 50x150 feet. Construction will be fireproof throughout with a complete steel frame, brick walls, faced with pressed brick and terra cotta. Floors and roof will be of reinforced concrete. Interior partitions will be of hollow tile and metal lath and plaster. There will be metal trim, metal window sash and frames. Interior finish will be of hardwoods, marble and tile. Plans provide for steam heat, mail chutes, a vacuum cleaning system and elevator service. There will also be patent store fronts, sidewalk doors, lights and lifts. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Office building, 14 story and base. Class A construc-

tion. Cost not stated. Architect, Thornton Fitzhugh, Consolidated Realty Bldg., L. A. Owners, Building Owners Co. The building will be erected on the west side of 6th street between Hill and Olive streets, covering an area of 66x150 feet. There will be a number of stores on the first floor and a total of 325 offices on the upper floors. Construction will be fireproof with a complete steel frame, hollow tile and metal lath and plaster interior partitions. Plans provide for a number of elevators, steam heat, a vacuum cleaning system and mail chutes. Exterior of the building will be faced with pressed brick and terra cotta. Interior will be finished in hardwoods, marble and metal trim. Plans are complete and figures are being taken on the general construction. Contracts have already been awarded for the excavating, foundation work, structural steel and terra cotta.

LOS ANGELES, CAL.—Stores and lofts, 2 story and base, brick and steel, \$25,000. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. S. H. Van Nuys. The building will cover an area of 50x150 feet. There will be stores on the first floor and light lofts above. Interior finish will be of pine throughout. There will be metal window sash and frames. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

SAN FRANCISCO—Restaurant finish and fixtures, \$10,000. Architects, Smith & Stewart, 244 Kearny St., S. F. Owners, Old Dragon Restaurant. These owners have leased the second floor of the premises at 920 Market street and will spend in the neighborhood of \$10,000 in decoration, finish and fixtures. The work will include interior finish, which will be of hardwood, ornamental plaster, stucco, art glass and imported tapestries. The work also calls for plumbing and electric work and kitchen equipment. Plans are complete and a general contract will be let.

Contracts Awarded.

PORTLAND, ORE.—Stores and hall, 4 story and base, brick and steel. Cost not stated. Architect, Robert P. Tegen, Swetland Bldg., Portland. Owners, Paul Van Firdaugh and Mrs. Hortense Taylor. Contractors, Litherland-Abbey Co., Beck Bldg., Portland. Contract price not stated.

LOS ANGELES, CAL.—Stores and lofts, 3 story and base, brick and steel, \$37,000. Architect's name not given. Owner, M. H. Newmark. Contractors Alta Planing Mill Co., 320 McGarry St., L. A. Contract price, \$37,000.

LOS ANGELES, CAL.—Stores, 1 story and base, brick, \$21,000. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owner, David Hewes, Contractors, Willard-Slater Co., 2214 Santa Fe Ave., L. A. Contract price, \$21,000.

THEATRES.

Contracts Awarded.

SEATTLE, WASH.—Theatre, 4 story and base, reinforced concrete and steel, \$200,000. Architect, Warren Milner, Arcade Bldg., Seattle. Owner's name not given. Contractor, S. G. Cobbs, Arcade Bldg., Seattle. Contract price, \$200,000. Note: The building will cover an area of 60x125 feet.

SEALED PROPOSALS.

PROPOSALS FOR CANAL SUPPLIES.
CANAL CIRCULAR 787.—Proposals for Leases and Standards and Supports for Light Houses, State Trinal and Closet Stalls and Fittings, Pillar Cranes, Switch Stands, Angle Bars, Galvanized-Steel Sheets, Steel Plates, Horseshoes, Ratchet Braces, Sprower Heads, Water Coolers, Stable Brooms, Hackshaw Blades, Paint Brushes, Air Brake Wires, Leather Cotton Canvas, Ships' Pelt, Oakum, Vitreous Seal Pipe, Vitreous Tile Conduit, Chloride of Lime, Unslacked Lime, Linseed Oil, and Chrome Yellow.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until **10:30 a. m. August 4, 1913**, at which time they will be opened in public for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 787) may be obtained from this office or the office of the assistant purchasing officer, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. ROGGS, major, corps engineers, U. S. A., general purchasing officer.

PROPOSALS FOR SALE OF MATERIALS.

SALE OF OLD MATERIAL.—There will be sold at the navy yard, Mare Island, Cal., material belonging to the Navy, condemned as unfit for use therein, consisting of whale boats, cutters, launches, row, chain, diving suits, lamps, clothing, furniture, dishes, press-copy material, flags, books, scrap rubber, musical instruments, scales, refrigerator, ordnance, and machine stores, boiler tubes, engines, pumps, machine tools, ingot brass, scrap iron and steel, etc. The sale will be for cash to the highest bidder by sealed proposals to be opened at **1:30 p. m. August 11, 1913**. Schedules containing form of proposals and terms of sale can be obtained upon application to the general storekeeper, navy yard, Mare Island, Cal. **JOSEPHUS DANIELS**, Secretary of the Navy.

WATER PIPE.—Sealed proposals invited "Proposals for Pipe Line" will be received at the bureau of yards and

docks, Navy Department, Washington, D. C., until **11 o'clock a. m. August 2, 1913**, and then and there publicly opened, for water pipe from Yerba Buena Island to Oakland, Cal. Amount available, \$10,000. Plans and specifications can be obtained on application to the bureau or to the commandant of the naval training station, San Francisco, Cal. **H. R. STANFORD**, chief of bureau.

PROPOSALS FOR STEEL REINFORCEMENT, CONCRETE, LUMBER, ETC.

STEEL REINFORCEMENT, CONCRETE, LUMBER, ETC.—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Malta, Mont., until **2 o'clock p. m. August 6, 1913**, for earthwork and structures on the second unit of Dodson North Canal, laterals and waste water ditches, involving about 300,000 cubic yards of excavation, 1,200 cubic yards of reinforced concrete, the placing of about 300,000 pounds of steel reinforcement and the placing in wooden structures of about 140,000 feet, b. m. of lumber. The work is situated on the north side of Milk River, adjacent to the main line of the Great Northern Railway in the vicinity of Wagner, Exeter and Malta, Mont. For particulars address the United States Reclamation Service, Washington, D. C.; Great Falls, Mont. or Malta, Mont. **F. H. NEWELL**, director.

Firms dealing news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, J. E. McCarthy, Anglo Bldg., S. F. Owner, J. C. Kirby, 3947 15th St., S. F. The house, which has been designed for a seven-room dwelling, will be erected on 19th avenue north of Anza. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be a large open fire place in the living room with brick or the mantel. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now purchasing all materials.

RESIDENCE—2 story and base, frame, \$2,800. San Francisco. Architect, none. Owner, C. A. Hall, 1318 5th Ave., S. F. The house will contain seven rooms and bath, and will be erected on 5th avenue north of Parnassus. Interior will be finished in pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Some brick veneer will also be used. Plans are complete and work will be done by Day Labor.

APARTMENT HOUSE—8 story and base, concrete and steel, \$85,000. San Francisco. Architect, William H. Crim, Jr., 425 Kearny St., S. F. Owner's name withheld. The building will be erected on one of the few choice sites remaining vacant in the apartment house district. Interior will be arranged for a large number of two and three room suites all of which will

have connecting baths and wall beds. Finish will be of pine and hardwoods with some ornamental plaster. There will be elevator service, hot water plant, steam heat and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Bath rooms will have cement floors and tile wainscot. Plans are now being prepared. Further mention will be made of the work as the plans progress.

APARTMENT HOUSE—4 or 5 story and base, Class C construction. San Francisco. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner's name withheld. The building will be erected in the Fifty Vara District, and will contain in the neighborhood of 65 rooms, arranged in two and three room suites. Interior finish will be of pine and elm panels. Some hardwood floors will be used. There will be steam heat, an automatic elevator and hot water plant. All suites will have wall beds and connecting bath rooms. Bath rooms will be finished with cement floors and tile wainscot. Exterior of the building will probably be faced with pressed brick. Plans are being prepared.

APARTMENT HOUSE—3 story and base, frame, \$6,000. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner Louis D. Stoff, Maskey Bldg. The building will be erected on the west side of Jones street south of Jackson, and will have a frontage of 25 feet and a depth of 67 feet. Interior has been arranged for six suites of two and three rooms each. Trim will be of pine with some elm panels. Hardwood floors will also be used. There will be wall beds and private baths. Bath rooms will be wainscoted with tile. A hot water system will be installed. Exterior of the building will be covered with rustic, ship-lap and brick veneer. Plans are complete and in the hands of the owner, who

will do the work by Day Labor. Materials are now being purchased.

APARTMENT HOUSE—6 story and base, Class C, \$75,000. San Francisco. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, James H. Hjul. The building will be erected on the south side of Sutter street west of Jones, and will cover an area of 68 feet 9 inches by 137½ feet. Plans have been arranged for 66 suites of two, three and four rooms. Interior finish will be of pine and hardwoods. All suites will have private bath rooms and will be equipped with wall beds. There will be steam heat, elevator service, vacuum cleaning system and hot water supply. Some ornamental plaster will be used. Marble and tile will be used in the entrance and lobby. Bath rooms will have tile floors and wainscot. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

APARTMENT HOUSE—3 story and base, frame, \$11,000. San Francisco. Architect, Arthur G. Scholz, Phelan Bldg., S. F. Owners, Mr. and Mrs. Mertens. The building will be erected on the south side of Fulton street east of Gough, and has been designed to contain 14 suites of two and three rooms. Interior finish will be of pine with some elm veneer. Hardwood floors will be used in the principal rooms. There will be a central heating system and hot water supply. All apartments will be equipped with wall beds and will have private baths. Bath rooms will be finished in tile. Some tile will also be used in the kitchens. Exterior of the building will probably be covered with cement plaster on etal lath and brick veneer. Plans are now being prepared.

CITY HALL—4 story and dome, Class A construction, \$4,500,000. San Francisco. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owners, City and County of San Francisco. Bids will be opened on July 30th for erecting the structural steel for the new City Hall. A complete list of the figures as opened will appear in the next issue of the Building and Industrial News.

FLATS—3 story and base, frame, \$10,000. San Francisco. Architect, none. Owner, Henry Scholten, 1522 Santa Clara Ave., Alameda. The building will be erected on the north side of Howard street west of Lafayette avenue, and will cover an area of 50x70 feet. Interior will be arranged to contain nine flats of four and five rooms and bath. All interior trim will be of pine or redwood. Modern plumbing, including 30-gallon boilers, will be installed. Bath room floors will be of tile. Terrazzo steps are specified. Exterior of the building will be covered with shiplap and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

FLATS—3 story and base, frame, \$9,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Rousseau Realty Co. The building will be erected on the north side of Page street near Webster, covering an area of 35x68 feet 3 inches. Interior will be arranged for six modern flats with baths. Interior finish will be of pine and redwood with some hardwood floors. There will be open fire places with brick or

tile mantels. Bath room floors will be of tile. Wall beds are to be used. Exterior of the building will be covered with cement plaster on metal lath and rustic. Plans are complete and figures are being taken. Art glass, wall beds, finish hardware and shades are not to be included in the contract.

FLATS—3 story and base, frame, \$15,000. San Francisco. Architects, Falch & Knoll, east Bldg., S. F. Owner's name withheld. The building will be erected in the Western Addition, and has been designed to contain six apartments of four rooms each. Interiors will be finished in pine, hardwood and white enamel. Hardwood floors will be used in the living rooms and reception halls. All bed rooms will be equipped with wall beds. A central heating system and open fire places will be installed. Mantels will be of brick. Bath rooms will have composition floors and tile wainscot. Entrance will be finished in marble and tile. Exterior of the building will be covered with brick veneer, rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

FLATS—3 story and base, frame, \$7,000. San Francisco. Architect, August Nordin, Mills Bldg., S. F. Owners, J. H. and M. E. Plante. The building will be erected on Sharon street south of 15th. There will be three modern flats of five and six rooms. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be open fire places and brick or tile mantels. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with rustic and shiplap. Plans have been out for figures and a contract will be awarded within a day or two.

FLATS—2, 2 story and base, frame, \$5,000 each. San Francisco. Architect, none. Owner, C. A. Rushton, 714 9th avenue, S. F. These buildings will be erected on the west side of 9th avenue south of Cabrillo, and each has been designed to contain two modern flats of five and six rooms. Each building will have a street frontage of 25 feet and will extend back a distance of 60 feet. Interiors will be finished in pine with some elm panels. There will be hardwood floors in the living rooms, dining rooms and reception halls. Plans provide for open fire places with brick or tile mantels. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with klunker brick veneer, rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner, who will do the work by Day Labor. He is now in the market for all materials.

HOTEL—2 story and base, brick and steel, \$18,000. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner's name withheld. The building will be erected in Chinatown and will cover a small inside lot. The first floor will be arranged for stores and the hotel entrance. Upper floor will contain a number of guest rooms and baths. Running water will be supplied to all rooms. Interior finish will be of pine and redwood. There will be modern plumbing and electric work. Exterior of the building will be faced with cement plaster. Stores will have plate glass windows and patent store

fronts. Plans are complete and a general contract will be let this week.

SCHOOL FIRE ESCAPES—\$3,410. San Francisco. Architect, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works for furnishing and erecting fire escapes on the Yerba Buena School show Dyer Bros. low at \$3,410. A complete list of these figures will be found under the heading of San Francisco in this issue.

STEAM PIPE FOR PUMPING PLANT—Cost not stated. San Francisco. Engineer, City Department of Engineering, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids will be received up to and including the 1st day of August by the Board of Fire Commissioners for furnishing and installing a 2½-inch steam pipe at Pumping Station No. 1. Plans can be secured from the Secretary of the Board of Fire Commissioners in the Temporary City Hall.

STORES—1 story and base, brick and steel, \$12,000. San Francisco. Architect, William H. Crim, Jr., 425 Kearny St., S. F. Owner, Francis Ward. This work has been mentioned here before when the architect first started working drawings. The building will be erected on a corner site and has been arranged for a furniture store and cafe. Interior will be finished in pine with some hardwood. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

RESTAURANT FINISH AND FIXTURES—\$10,000. San Francisco. Architects, Smith & Stewart, 244 Kearny St., S. F. Owners, Old Dragon Restaurant. These owners have leased the second floor of the premises at 920 Market street and will spend in the neighborhood of \$10,000 in decoration, finish and fixtures. The work will include interior finish which will be of hardwood, ornamental plaster, stucco, art glass and imported tapestries. The work also calls for plumbing and electric work and kitchen equipment. Plans are complete and a general contract will be let.

PAVING ROADWAYS—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for paving the east roadway and the Fillmore street entrance to the Exposition Grounds have been completed. Bids are now being taken for this work. Plans and specifications can be secured from the Director of Works. Bids will be opened on July 31st. An official proposal appears in another column of this issue.

STRUCTURAL STEEL FOR FINE ARTS BUILDING—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids opened by the Buildings and Grounds Committee for furnishing, fabricating and erecting the structural steel for the Fine Arts Building show close figuring on the three propositions, A, B, and C, calling for all work, fabrication and furnishing and for erecting. Dyer Bros. were low at \$123,000 for all work under proposition A, while the United States Steel Prod-

ucts' bid for furnishing and fabricating and J. G. Williams' Construction Co.'s bid for erecting, combined was \$391 lower than Dyer Bros' bid. No contracts have been awarded. A complete list of these figures appears under the heading of San Francisco in this issue.

Contracts Awarded.

HOSPITAL SCREENS—\$9,152. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractor, P. J. Sullivan, Jr., S. F. Contract price, \$9,152. A complete list of the figures opened for this work appears under the heading of San Francisco in this issue.

SCHOOL—2 story and base, brick and steel, \$125,000. Phoenix, Ariz. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, City of Phoenix. Contractor, O. L. Tuell, Phoenix, general construction, \$111,871. B. F. Hulse, Los Angeles, heating, \$4,714, and E. F. Jones, Phoenix, painting, \$5,192. Note: The building will cover an area of 280x120 feet.

Old Fort Point A Federal Prison.

Famous Old Fort to be Remodeled for Federal Prison. Plans are Being Made at Fort Mason.

Orders have been received from Washington authorizing the preparation of plans for altering old Fort Point into a Federal Prison. Plans are to be rushed that they may be ready by the time that the Secretary of War and General Leonard Wood, Chief of Staff and the Chief of the Constructing Quartermaster's Department, arrive in San Francisco, which will be during the latter part of this month.

Engineer O. W. Degen, Constructing Quartermaster's office, Fort Mason, is now preparing plans for this work and states that it will require a large expenditure, but that an estimate has not been completed. The work will include a large amount of interior partitions, plastering, mill work, roofing, plumbing, painting, electric work and light fixtures, steel cells, a complete steam heating system, modern kitchen equipment and oil burning system.

In connection with this project there will be constructed quarters for the accommodation of 15 officers. Five sets of new officers' quarters will be constructed. Old Fort Point will take the place of Alcatraz Prison, which is to be converted into an immigration station.

City Bids Opened.

Board of Public Works Open Bids for Wire Screens and Fireescapes at Wednesday's Meeting

Bids were opened by the Board of Public Works at the Wednesday afternoon session for furnishing fire escapes for the Yerba Buena School and also for furnishing and installing wire screens at the San Francisco Hospital group. P. J. Sullivan Jr. submitted the low bid for work at the San Francisco

Hospital at \$9,152 and Dyer Bros. were low on the fire escapes for the Yerba Buena School at \$3,440. Following is a complete list of the bids as opened:

Fire Escapes, Yerba Buena School.	
Western Iron Works.....	\$4,156
Ralston Iron Works.....	3,878

McSheehy Bros.....	11,412

BRING SUIT FOR TIMBER LAND.

PORTLAND, Ore., July 28.—Twenty six timber claims in Baker country, Or. valued at \$3000 each, held in the name of the Hewitt Land Company, a Washington corporation, constitute the bone of contention in a suit brought recently against that company by the United States Government, in which the Government will attempt to show that patents were obtained by fraud.

The Hewitt Land Company sought the claims after patents were issued to entrymen and its is alleged the entrymen acted on money provided by the Stoddard Lumber Company, an Eastern Oregon concern. The Government has contended the Hewitt and Stoddard companies are closely affiliated.

Structural Steel, Fine Arts Building.

Figures Run Close Under Different Propositions. Only Three Hundred Ninety-four Dollars.

Bids were opened by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Co. on Thursday last for the structural steel work for the Fine Arts Building. Bids were submitted on three propositions: Proposition A, a lump sum bid for furnishing, fabricating, erecting, riveting and bolting all structural steel and iron, and including a unit price for additions or deductions. Bidding under Proposition A Dyer Bros. submitted the only figures, their lump sum bid being \$133,000. Their unit price per ton was \$85. Proposition B included furnishing, fabricating and delivering F. O. B. Ferry Slip, Exposition Grounds; B-2 furnishing and fabricating F. O. B. eastern terminal, and B-3 and 4, unit prices F. O. B. Ferry Slip, Exposition Grounds, and F. O. B. eastern terminal respectively. This proposition attracted the greater number of bidders.

Proposition B.

United States Steel Products Co.—Furnishing, fabricating and delivering F. O. B., San Francisco, \$113,306; F. O. B. eastern terminal, \$87,635; unit price for additions or deductions F. O. B., San Francisco, \$73.95 per ton; unit price for additions or deductions F. O. B. eastern terminal, \$57.20 per ton.

Milliken Bros.—Furnishing, fabricating and delivery F. O. B., San Francisco, \$127,884. No bid on the other propositions.

Phoenix Bridge Co.—F. O. B. eastern terminal, \$101,800. No other bid submitted.

McClintic-Marshall Co. — Furnishing, fabricating and delivery F. O. B., San Francisco, \$119,987; F. O. B. eastern terminal, \$94,417. No bids on the other propositions.

Proposition C called for receiving the steel F. O. B. building site, unloading, hauling, storing and erecting all structural steel and iron together with a unit price for additions or deductions, and a unit price for riveting per 100 rivets.

Proposition C.

J. G. Williams Construction Co.—Receiving F. O. B. grounds and erecting, \$19,300; unit price per ton additions or deductions, \$13 per ton; price per 100 for riveting, no bid.

J. Monk—Receiving F. O. B. grounds and erecting, \$21,450; unit price per ton additions or deductions, \$15 per ton; price per 100 for riveting, \$12.50.

California Construction Co.—Receiving F. O. B. grounds and erecting, \$29,900. No bid on the other propositions.

Taking the lowest bid offered under Proposition B, which calls for the furnishing, fabricating and delivery F. O. B. Ferry Slip, Exposition Grounds, which was submitted by the United States Steel Products Co., at \$113,306, and adding the lowest figure submitted for receiving, unloading and erecting as submitted under Proposition C, that submitted by J. G. Williams for \$19,300, a total of \$132,606 is secured. Under Proposition A, which includes both Propositions B and C, Dyer Bros. submitted a bid of \$133,000, or \$394 dollars above the lowest bid received under propositions B and C.

These figures have been taken under advisement and conditions will be considered in awarding the contract.

Bids were also opened at the same time for furnishing rock for roads in the Exposition Grounds. For this work the following bids were received:

Furnishing Rock for Roads.

	Per cu. yd.
D. J. O'Day.....	.98
E. O. Mallery.....	.95
Pater-McBryde & Quayle.....	\$1.02 1/4

Geo. B. McDougall State Architect.

Junior Member of Well Known Firm Replaces Architect John W. Woollett at Sacramento.

News of the appointment of George B. McDougall, junior member of the architectural firm of McDougall Bros., of this city, to the position of State Architect to succeed Architect John W. Woollett, resigned, was received in this city yesterday.

George B. McDougall is one of the best known architects in local practice. Has contributed much to the architecture of this city and has taken a prominent part in the activities of the American Institute of Architects. The best known of the San Francisco buildings designed by Mr. McDougall is the

Young Men's Christian Association. This together with the firm's work for the University of California and the vast amount of commercial work has given the new State Architect a wide experience which well fits him for the position of responsibility to which he has been appointed.

In presenting his resignation Mr. Woollett speaks in the highest terms of State Engineer McClure and regrets that conditions at this time are such as to render his further continuance in office impossible.

Chief Building Inspector Submits Yearly Report.

Private Building Operations for the Fiscal Year Ending June 30th.

Chief Building Inspector, John P. Horgan, head of the Bureau of Building Inspection, submitted his yearly report at the meeting of the Board of Public Works yesterday morning. His report contained the total number and cost of private building operations for the fiscal year ending June 30th, 1913.

His report is as follows:

Character of	Permits	Number	Amount
Class "A" Bldgs	26	\$2,937,907.00	
Class "B" Bldgs	28	2,024,850.00	
Class "C" Bldgs	272	7,734,823.00	
Frame Bldgs.	2322	7,863,815.00	
Alterations, additions, repairs, general	3497	1,865,131.00	
	6049	\$22,426,526.00	

The Fees Collected upon the above amounted to \$32,324.80.

In addition to the above more important matters, this Bureau received applications, as follows:

To raze structures.	395
To move buildings.	83
Applications withdrawn and rejected	168
General complaints received and attended to.	525
Total number of applications filed	6592

During the year I found it necessary to disapprove approximately 50% of the applications filed for various implied infractions of the Building Law, which, in most cases, were subsequently corrected and permits taken out for, and the balance withdrawn or abandoned.

For your particularly information, I wish to emphasize the fact that the above figures do not include the expenditures for public buildings and grounds, nor the Panama-Pacific International Exposition improvements, and all of which are of such vast importance and amounts that when summed up will total a very respectable figure as a further evidence of the local progressive spirit and confidence.

There are now standing a balance of 166 temporary frame buildings within the Fire Limits and preparations are being made to have those removed within a short time. This shows the progress made in having them removed under the law, when it is considered that at there were 1800 of like character erected after the fire in 1906 up to the time the law was passed preventing their further erection.

The committee appointed by the Board of Supervisors to revise the present Building Law (of which I was

named the chairman) has devoted its utmost endeavors to recommend the various changes proposed, with a view to harmonizing the differences arising among the varied building interests, and at the same time acquire a modern building code consistent with the requirements for the greatest safety to human life, and also in keeping with the constantly changing and improved methods of building construction and maintenance, and their usages. This committee expects to have a complete report ready to submit to the Board of Supervisors in the near future.

FOR THE FISCAL YEAR ENDING

JUNE 30, 1913.

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 2 story and base,
 frame. Cost not stated. Berkeley, Alameda
 Co., Cal. Architect, John Hud-
 son Thomas, First National Bank Bldg.,
 Berkeley. Owner, A. H. Gerdtis. The
 dwelling will be erected near the Uni-
 versity Campus, and has been designed
 for an eight-room house with bath and
 sleeping porch. Interior finish will be
 of pine, redwood and some hardwood
 veneer. Hardwood floors will be used
 in the principal rooms. There will be
 furnace heat and open fire places. Man-
 tels will be of tile and brick. An auto-
 matic water heater will be installed.
 Bath rooms will be finished in tile and
 tile wainscot will also be used in the
 kitchen. Exterior of the house will be
 covered with cement plaster on metal
 lath. Plans are complete and figures
 are being taken.

RESIDENCE — 2 story and base,
 frame, \$4,500. Oakland, Cal. Archi-
 tect, Charles W. McCall, Central Bank
 Bldg., Oakland. Owner, A. D. Grim-
 wood. The dwelling will be erected on
 Mesa avenue in Piedmont, and has
 been designed to contain seven rooms,
 bath and sleeping porch. Interior fin-
 ish will be of pine and hardwood.
 Hardwood floors will be used in the
 living room, dining room, den and re-
 ception hall. Plans provide for fur-
 nace heat and open fire places. Man-
 tels will be of brick and tile. Bath
 room will be finished in tile and tile
 wainscot will also be used in the
 kitchen. There will be an automatic
 water heater. Exterior of the house
 will be covered with cement plaster
 on metal lath. Plans are complete and
 now out for figures.

RESIDENCE — 2 story and base,
 frame, \$4,500. Oakland, Cal. Archi-
 tects, Hutchinson Bros., 470 13th St.,
 Oakland. Owner, Mrs. D. Nunan. This
 dwelling will be erected on the Broad-
 moor Tract, and has been designed for
 an eight-room house with bath and
 sleeping porch. Interior finish will be
 of pine and white enamel. Hardwood
 floors will be used in the living room,
 dining room and reception hall. There
 will be furnace heat and open fire
 places. Mantels will be of brick. An

automatic water heater will be in-
 stalled. Tile will be used in the bath
 room and kitchen. Exterior of the
 house will be covered with shingles
 and shiplap. Plans are complete and
 figures are now being taken by the
 architects.

RESIDENCE — 2 story and base,
 frame, \$6,500. Oakland, Cal. Archi-
 tect, William H. Ratcliff, Jr., First Na-
 tional Bank Bldg., Berkeley. Owner,
 J. W. Clarke. The house will be erec-
 ted at Adams Point, and will contain
 in the neighborhood of ten rooms,
 baths and sleeping porch. Interior will
 be finished in pine, redwood and hard-
 wood. Floors in the principal rooms
 will be of hardwood. Bath rooms
 will have composition floors and tile wain-
 scot. There will be furnace heat and
 open fire places. Mantels will be of
 tile and brick. An automatic water
 heater will be installed. Tile will be
 used in the kitchen. Exterior of the
 dwelling will be covered with cement
 and figures are now being taken by the
 architect.

RESIDENCE — 2 story and base,
 frame, \$4,500. Piedmont, Alameda Co.,
 Cal. Architect, Charles W. McCall,
 Central Bank Bldg., Oakland. Owner's
 name withheld. The house will be
 erected on Mesa avenue and will
 contain in the neighborhood of eight
 rooms, bath and sleeping porch. All
 interior finish will be of pine and white
 enamel. Bath rooms will have com-
 position floors and tile wainscot. There
 will be furnace heat and open fire
 places. Mantels will cost \$150 each
 and will be of brick and tile. Hard-
 wood floors will be used in the living
 room, dining room, den and recep-
 tion hall. Tile will be used in the
 kitchen. An automatic water heater
 will be installed. Exterior of the
 house will be covered with cement
 plaster on metal lath. Plans are now
 ready for figures.

RESIDENCE — 2 story and base,
 frame, \$4,500. Berkeley, Alameda Co.,
 Cal. Architect, Frank S. Forster, 1417
 Arch St., Berkeley. Owner, Dr. C. L.
 Roadhouse. The dwelling will be
 erected in North Berkeley and will
 contain seven rooms, bath and sleep-
 ing porch. Interior will be finished in
 pine, redwood and some hardwood ve-
 neer. Hardwood floors will be used
 in the living room, dining room and
 reception hall. There will be furnace
 heat and open fire place. Mantel will
 be of brick. Tile will be used in the
 bath room and kitchen. An automatic
 water heater will be installed. Exter-
 ior of the dwelling will be covered
 with cement plaster on metal lath.
 Plans have been revised and new fig-
 ures are now being called.

APARTMENT HOUSE—3 story and
 base, frame. Cost not stated. Oakland,
 Cal. Architect, none. Owner, D. Mil-
 ler, 21st St., Oakland. The building
 will be erected on 21st street between
 Webster and Harrison streets. Suites
 will be arranged in two and three
 room apartments. Interior finish will
 be of pine throughout. There will be
 private bath rooms and wall beds.
 Plans provide for a central heating
 system and hot water supply. Bath
 rooms will have tile wainscot. Exter-
 ior of the building will be covered
 with cement plaster on metal lath.
 Plans are complete and in the hands
 of the owner who will do the work by
 Day Labor. He is now in the market
 for all materials.

CHURCH—1 story, frame, \$5,000, Oakland, Cal. Architect, William H. Hatchell, Jr., First National Bank Bldg., Berkeley. Owners, St. Peter's Parish. The building will be erected in Rock Ridge Park. Interior will be arranged for a main auditorium and Sunday school rooms. All interior finish will be of pine or redwood. Some art glass will be used. Exterior of the church will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

FLATS—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, none. Owner, P. E. Kennedy, 2539 Milvia St., Berkeley. The building will be erected at the northeast corner of Parker and Milvia streets, and has been designed to contain twelve rooms, which are to be arranged in two flats. Interior finish will be of pine and redwood. Some hardwood floors are specified. There will be open fire places and tile or brick mantels. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner. Work will be done by Day Labor and he is now purchasing all materials.

HOTEL—6 story and base, brick and steel, \$65,000, Oakland, Cal. Architect, William Wilde, Albany Bldg., Oakland. Owner, Charles Streit. This building has been mentioned here a number of times before when the plans were first started. Contracts have been let for the excavating, concrete and steel work. The building will be erected at the northeast corner of 11th and Franklin streets and will be arranged with a number of stores on the first floor and guest rooms above. Many of the rooms will have private baths. Interior finish will be of pine and hardwood with ornamental plaster in the lobby and office. Bath rooms will have tile floors and wainscot. There will be steam heat, elevator service and a vacuum cleaning plant. Exterior of the building will be faced with pressed brick. Bids are now being taken for the general construction.

RESIDENCE—2 story and base, frame, \$2,800, Alameda, Alameda Co., Cal. Architects, Newsom & Dixon, 812 Broadway, Oakland. Owner, John Lundholm. The dwelling is to be erected at the corner of 8th and Santa Clara avenue, and will contain six rooms, bath and sleeping porch. Interior finish will be of pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of brick. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Owner is now purchasing all materials.

RESIDENCES—1, 1 story and 1, 2 story and base, frame, \$2,500 and \$3,000, Oakland, Cal. Architects, Newsom & Dixon, 812 Broadway, Oakland. Owner, Mr. McWilliams. These two dwellings will be erected on 21st street between 5th and 7th avenues. Houses will contain six and seven rooms and bath. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be large open fire places in the living rooms. Mantels will be of brick. Tile will be used in the bath rooms. Exteriors will be cov-

ered with cement plaster on metal lath. Plans for both houses are complete and work will shortly be started by Day Labor. All materials are now being purchased.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

RESIDENCE — 2 story and base, frame, \$10,000. Dixon, Solano Co., Cal. Architects, Salfeld & Kohlberg, Clunie Bldg., S. F. Owner, Henry Peters. The house will contain in the neighborhood of ten rooms, several baths and a sleeping porch. Interior will be finished in pine and redwood with some white enamel. Hardwood floors will be used in the living room, dining room, den and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath

rooms and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

RESIDENCE — 2 story and base, frame, \$20,000. Rutherford, Napa Co., Cal. Architect, L. M. Turton, Napa. Owner, Fred S. Ewer. This work has been mentioned here some months ago when plans were first started. The house will contain in the neighborhood of twelve rooms, baths and sleeping porch. Interior finish will be of pine and hardwoods and white enamel. Hardwood floors will be used in the principal rooms. There will be a central heating system and open fire places. Mantels will be of stone and brick. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

HOSPITAL — 1 and 2 story and base, reinforced concrete, \$10,000 San Rafael, Marin Co., Cal. Architect, Thomas O'Connor, 104 D St., San Rafael. Owners, Marin County. Architect O'Connor has been commissioned by the Marin County Board of Supervisors to prepare plans and specifications for a new and modern County Hospital which is to replace the building recently destroyed by fire. The new hospital will be erected in Lucas Valley, about four miles from San Rafael, and will be of the reinforced concrete type of construction, absolutely fire-proof throughout. The design will be in the Spanish Mission style, closely following the lines of the Old Mission San Rafael. Interior will be arranged for about seventy-five rooms, besides the operating rooms, nurses' quarters and administrative offices. Interior will be finished in pine and hardwoods. Tile will be used extensively. There will be a central heating system and other modern improvements. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. An estimated cost of \$10,000 has been placed on the work. Plans will be ready to be submitted to the Board of Supervisors at their next meeting and if final approval is given the plans, bids will be advertised for at once.

APARTMENT HOUSE—4 story and base, brick and steel, \$50,000, Fresno.

Fresno Co., Cal. Architect, Eugene Mithewson, Forsythe Bldg., Fresno. Owner, J. D. Statham. This work has been mentioned here before when plans were first started. Working drawings are now being completed. The building will be erected at the corner of Mari-posa and M streets, covering an area of 100 feet square. Interior has been arranged for 38 suites of two, three and four rooms. Interior finish will be of pine and hardwoods. Hardwood floors will be used in the principal rooms. There will be steam heat, two electric elevators and a vacuum cleaning system. Bath rooms will have tile floors and wainscot. Exterior of the building will be faced with pressed brick. Considerable marble and tile will be used in the entrances. Plans are nearly complete.

LIBRARY—1 story and base, reinforced concrete. Cost not stated. Bakersfield, Kern Co., Cal. Architect's name not given. Owners, City of Bakersfield. The building will be erected on Baker street and has been designed in the classic style. There will be two reading rooms, stack room and librarian's office. Interior finish will be of pine and hardwood. Metal stacks will be used. Exterior of the building will be faced with cement plaster. Plans and specifications are on file with H. F. Murdoch, City Clerk, Producers' National Bank Bldg. Bids are now being taken and will be opened on August 5th.

Architect...None.
Day's work.....COST, \$2500

WOODLAND RAILROAD REPORT.
According to a financial report of the Sacramento and Woodland Railway, controlled by the Northern Electric, for the first 11½ months of its incorporation, a splendid record has been made, the gross earnings being \$138,547.36.

The railroad company carries both freight and passengers. It is capitalized for \$1,000,000 and has outstanding \$750,000 in 5 per cent thirty year bonds.

Following is the annual statement which reflects the condition of the road:

Gross earnings	\$138,547.36
Operating expenses, inclusive of insurance and taxes....	\$2,287.73
Net earnings	\$5,659.63
Interest on total bond issue.	\$5,637.50
Surplus	\$19,722.13

CANCELLATION OF BUILDING CONTRACT.

July 22, 1913—LOT 16 BLK "K" Berry Bangs Tract, Bkly. Owner, Wm J Bell with John Weitzel, contractor. Contract recorded June 25, 1913

RECIPE FOR GROWING OLD.

He'd kick the cat; he'd call the cop
To pinch the little boys,
"The pests! the brats! I'll put a stop
To all that devilish noise!"
He always panned his wife's new hat
He always knocked the grub
He'd kick at this, he'd scowl at that,
A crabid, grouchy dub,
The gods observed his yelps and sneers
And tacked a decade to his years.
Just be a grouch, a whiner, fretter,
For growing old there's nothing
better! —Morris Miller.

LOS ANGELES AND SOUTH CALIFORNIA.

HOTEL—4 story and base, brick and steel, \$50,000. Los Angeles, Cal. Architects, Neher & Skilling, Garland Bldg., L. A. Owner, W. H. Wagner. The building will be erected on Hope street near 8th and has been designed to cover a lot 60x155 feet. Interior will be arranged for a lobby and offices on the first floor and in the neighborhood of 96 rooms and 60 baths on the upper floors. Interior finish will be of pine with some ornamental plaster. Bath rooms will have the floors and wainscot. Plans provide for steam heat, elevator service, and a hot water plant. There will be metal window sash and frames. Interior partitions will be of metal lath and plaster. Exterior of the hotel will be faced with artificial stone. Plans are complete and figures are being taken.

HOTEL—3 story and base. Class C construction. Cost not stated. Los Angeles, Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, J. Domozz. The building will cover a ground area of 50x110 feet. There will be a total of 50 rooms, nearly all of which will have connecting baths. There will be steam heat, elevator service and a vacuum cleaning plant. Running hot and cold water will be supplied to all rooms. There will be metal window sash and frames. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

STORES AND OFFICES—12 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, W. G. Kerckhoff. The building is to be erected at the northwest corner of 6th and Los Angeles streets and will cover an area of 50x150 feet. Construction will be fireproof throughout with a complete steel frame, brick walls, faced with pressed brick and terra cotta. Floors and roof will be of reinforced concrete. Interior partitions will be of hollow tile and metal lath and plaster. There will be metal trim, metal window sash and frames. Interior finish will be of hardwoods, marble and tile. Plans provide for steam heat, mail chutes, a

vacuum cleaning system and elevator service. There will also be patent store fronts, sidewalk doors, lights and lifts. Plans are complete and figures are being taken.

OFFICE BUILDING—14 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architect, Thornton Fitzhugh, Consolidated Realty Bldg., L. A. Owners, Building Owners Co. The building will be erected on the west side of 6th street between Hill and Olive streets, covering an area of 66x150 feet. There will be a number of stores on the first floor and a total of 325 offices on the upper floors. Construction will be fireproof with a complete steel frame, brick and concrete walls, concrete floors and roof slabs, hollow tile and metal lath and plaster interior partitions. Plans provide for a number of elevators, steam heat, a vacuum cleaning system and mail chutes. Exterior of the building will be faced with pressed brick and terra cotta. Interior will be finished in hardwoods, marble and metal trim. Plans are complete and figures are being taken on the general construction. Contracts have already been awarded for the excavating, foundation work, structural steel and terra cotta.

BANK ADDITIONS—7 story and base, reinforced concrete, \$100,000. Pasadena, Los Angeles Co., Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Citizens' Saving Bank. This work has been mentioned here before. At present there is a one-story reinforced concrete building on the site and six stories will be added. First floor will be remodeled for banking rooms and upper floors will be subdivided into about 16 offices to the floor. Steam heat and elevators will be included in the work. Exterior will be faced with pressed brick and terra cotta. Plans are nearly ready for figures.

SCHOOL—1 story and base, brick and concrete, \$17,000. Banning, Riverside Co., Cal. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Banning School District. The building will cover an area of 60x100 feet and has been designed to contain four class rooms, assembly hall and study rooms. Interior will be finished in pine with some maple floors. There will be a plenum heating system. Exterior of the building will be faced with cement plaster. Plans are now being prepared. Bids will be called for as soon as bonds can be sold, not stated. The contract includes bank equipment.

CHURCH—11 story and base, brick and frame, \$18,000. Colton, San Bernardino Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Jewel Methodist Congregation. The building has been designed in the Classic style and will cover an area of 70x40 feet. Interior finish will be of concrete and superstructure will be of frame faced with pressed brick veneer. Besides the main auditorium there will be Sunday school rooms, social hall and pastor's study. Plans are complete and figures are being taken.

FIREHOUSE—2 story and base, brick. Cost not stated. Glendale, Los Angeles Co., Cal. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, City of Glendale. This work has been mentioned here before when plans

were first started. The building will cover an area of 50x70 feet. First floor will be given over to apparatus room and upper floor will be arranged for sleeping rooms. Interior will be finished in pine throughout. There will be a central heating system and modern plumbing. Exterior of the building will be faced with tapestry brick. Bids are now being taken and will be opened on August 1th. Plans can be secured from the architects or from G. B. Woodberry, City Clerk.

FACTORY—2 and 3 story and base, brick and concrete. Cost not stated. Van Nuys, Los Angeles Co., Cal. Architect, A. S. Heineman, San Fernando Bldg., L. A. Owners, Murray-Harris Organ Co. The building will cover an area of 200x300 feet. Foundations will be of concrete and walls of brick faced with stock brick or cement plaster. Plans will include pine trim and floors, metal window sash and frames, elevators and a central heating system. Plans are now being prepared.

HOSPITAL—3 story and part base, brick and steel, \$50,000. Los Angeles, Cal. Architects, Garrett & Farrell, Currier Bldg., L. A. Owners, French Hospital Association. This building was mentioned here when preliminary sketches were made. Further details of construction are now available. The building will be 38x120 feet and will contain 28 private rooms, major and minor operating rooms, accident room and ten bath rooms. Interior finish will be of pine throughout. Bath rooms will be finished in tile. Here will be a complete steel frame, brick filler walls and glazed brick facing. Plans include elevator service, steam heat and a vacuum cleaning system. Working drawings are being prepared.

HOTEL—12 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, Frederick Noonan, Wright and Callender Bldg., L. A. Owner, N. W. Stowell. The building will be erected on Spring street south of 4th, covering an area of 60x155 feet. The first floor will contain one store, barber shop, large lobby, buffet, sample rooms and parlors. Upper floors will be arranged for a total of 275 rooms and 261 baths. Construction will be fireproof throughout with reinforced concrete walls, floors and roof slabs. Interior partitions will be of metal lath and plaster. Interior finish will be of pine and hardwoods. There will be elevator service, steam heat, vacuum cleaning system and hot water plant. Exterior of the building will be faced with glazed brick and terra cotta. Metal window sash and frames will be used. Working drawings are nearly complete.

SCHOOL—3, 2 story and base, brick and concrete, \$75,000 and \$30,000. Long Beach, Los Angeles Co., Cal. Architect, A. Burnside Sturges, Store Bldg., L. A. Owners, Long Beach School District. One of the buildings will be a two-story brick structure, 71x76 feet, containing sixteen class rooms, assembly hall, studies and offices, and domestic science and food rooms. It will cost \$75,000. The other two buildings will be 65x165 feet, containing twelve rooms each, with auditing and manual training rooms, and will each cost \$30,000. The buildings will be equipped with plenum heating systems. Bonds for the work have been voted. Bids

will be called for as soon as the bonds can be sold.

STORES AND LOFTS—2 story and base, brick and steel, \$25,000. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. S. H. Van Nuys. The building will cover an area of 50x150 feet. There will be stores on the first floor and light lofts above. Interior finish will be of pine throughout. There will be metal window sash and frames. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

Contracts Awarded.

HOTEL—2 story and base, brick and steel, \$55,000. Los Angeles, Cal. Architect, Maine Building and Investment Co., Thorpe Bldg., L. A. Owners, H. L. Squires and N. S. Meigs. Contractors, Maine Building and Investment Co., Thorpe Bldg., L. A. Contract price, \$55,000. Note: The building will contain 121 rooms. Plans are being prepared.

HOTEL—4 story and base, brick and steel, \$65,000. Los Angeles, Cal. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, G. I. Jacoby. Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price, \$65,000.

STORES AND LOFTS—3 story and base, brick and steel, \$37,000. Los Angeles, Cal. Architect's name not given. Owner, M. H. Newmark. Contractors, Alta Planing Mill Co., 830 McGarry St., L. A. Contract price, \$37,000.

STORES—1 story and base, brick, \$31,000. Los Angeles, Cal. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owner, David Hewes. Contractors, Willard-Slater Co., 2314 Santa Fe Ave., L. A. Contract price, \$31,000.

BANK—1 story and base, reinforced concrete. Cost not stated. Fillmore, Ventura Co., Cal. Architect's name not given. Owners, Farmers' and Merchants' Bank of Fillmore. Contractors, Sweetser & Baldwin Co., 9 th and Los Angeles streets, L. A. Contract price

PORTLAND AND OREGON.

CHURCH—1 story and base, brick. Cost not stated. Tillamook, Ore. Architects, Tourtelotte & Hummel, Rothchild Bldg., Portland. Owners, First Methodist Church of Tillamook. The building will be designed with a high basement, which will be used for Sunday school rooms. Main floor will contain an auditorium seating 350 people. Interior finish will be of pine throughout. There will be a central heating system, probably warm air. Ornamental plaster and art glass are also specified. Exterior of the building will be faced with pressed brick and stone. Plans are complete and are now out for figures. Plans can be secured from the architects.

CHURCH—1 story and base, reinforced concrete, \$20,000. Marshfield, Ore. Architect, D. C. Lewis, Couch Bldg., Portland. Owners' name withheld. The Sunday school rooms, social hall and kitchen will occupy the basement floor. Main floor will be used for the auditorium and pastor's study. Interior finish will be of pine throughout. A central heating system will be installed. There will be art glass windows, ornamental plaster and some

marble work. Exterior of the church will be faced with cement plaster. Plans are now being prepared.

MAUSOLEUM—1 story, reinforced concrete and stone. Cost not stated. Eugene, Ore. Architects, Ellis F. Lawrence associated with William G. Holford, Chamber of Commerce Bldg., Portland. Owners, Portland Mausoleum Co., Spaulding Bldg., Portland. The building has been designed to contain six receptacles. Exterior will be faced with marble and cut stone. Interior finish will be of stone and ornamental bronze and iron. Heavy ornamental bronze and iron gates and window grilles will also be used. The work will include modern plumbing and electric work. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, brick, \$60,000. Portland, Ore. Architects, Doyle & Patterson, Worcester Bldg., Portland. Owner, Gordon Voorhees. The dwelling will be erected in Waverly Heights and will cover a ground area of 10x100 feet. The dwelling will contain in the neighborhood of 20 rooms, several baths and sleeping porches. Interior finish will be largely of hardwoods although considerable selected Oregon pine will be used. Hardwood floors will be used throughout except in the bath rooms, which will have composition floors. Plans provide for steam heat, a vacuum cleaning system and open fire places. Bath rooms will be finished in tile. Mantels will be of brick and stone. A hot water plant will be installed. Plans call for a considerable amount of ornamental plaster and ornamental iron and bronze. Exterior of the dwelling will be faced with pressed brick and cement plaster. Plans are now out for figures. Bids will be opened on August 1st.

SCHOOL—2 story and base, brick and steel. Cost not stated. Portland, Ore. Architects, Tourtelotte & Hummel, Rothchild Bldg., Portland. Owners, City of Portland. The building has been designed for a modern High School and will cover a large ground area. Plans provide for sixteen class rooms, large assembly hall seating 350 people, domestic science and manual training departments, teachers' rooms, principal's office and library. Interior finish will be of pine with maple floors. There will be steam heat, a vacuum cleaning system, slate blackboards, program clocks and a bell system. Exterior of the building will be faced with pressed brick. Plans are complete and have received the approval of the Board of Education. Bids are now being taken and will be opened on August 9th. Plans can be secured from the architects.

Contracts Awarded.

COLLEGE BUILDINGS—2, 3 story and base, brick and steel, \$117,700. Portland, Ore. Architects, Bennes & Hendricks, Henry Bldg., Portland. Owners, Oregon Agriculture College. Contractors, Snook & Travis, Salem. Contract price, \$117,700. Note: This contract does not include heating or electric work.

STORES AND HALL—1 story and base, brick and steel. Cost not stated. Portland, Ore. Architect, Robert F. Tegen, Swedland Bldg., Portland. Owners, Paul Van Firdaugh and Mrs. Hortense Taylor. Contractors, Litherland-Abbey Co., Beck Bldg., Portland. Contract price not stated.

SEATTLE AND WASHINGTON.

HOSPITAL GROUP—4, 2 story and base, reinforced concrete, \$50,000. Sedro Woolley, Wash. Architects, Saunders & Lawton, Alaska Bldg., Seattle. Owners, State of Washington. The State Institution at Sedro Woolley, known as the Northern State Hospital will be improved with the construction of four new buildings. These buildings have been designed for wards, nurses' quarters and an administrative building. All will be supplied with steam heat from a central plant. Exteriors will be faced with cement plaster. Plans are complete and have been approved. Bids will be opened on August 9th by the State Board of Managers at Olympia. Plans and specifications can be secured from the architects.

FIRE HOUSE—2 story and base, brick and frame, \$12,000. Seattle, Wash. Architect, Daniel Huntington. Seattle. Owners, City of Seattle. The building will be erected on the Hunter Boulevard, and has been designed for three pieces of apparatus on the first floor and sleeping rooms above. Interior will be finished in pine. There will be special plumbing and electric work. Exterior of the building will be covered with cement plaster on metal lath and brick veneer. Plans are complete and figures are being taken.

GARAGE—1 story and base, \$12,000. Seattle, Wash. Architects, Beezer Bros., Northern Bank Bldg., Seattle. Owner, O. W. Fisher. The building has been designed for a private garage and will be erected on property in the rear of the owner's new residence on Belmont avenue. There will be storage space for five machines and a completely equipped repair shop. Exterior of the garage will be faced with pressed brick. A cement floor and metal window sash and frames are specified. Plans are complete and figures are being taken.

LIBRARY—1 story and base, brick and concrete, \$10,000. Renton, Wash. Architect, H. H. Ginnold, Epler Block, Seattle. The building will be designed in the Classic style, and will cover an area of 45x90 feet. Interior finish will be of pine and hardwood. There will be a central heating system, probably furnace heat. Plans provide for a large reading room, librarian's office and stock room. Some ornamental iron will be specified. Exterior of the building will be faced with cement plaster. Plans are being prepared.

Contracts Awarded.

COLD STORAGE PLANT—5 story and base, reinforced concrete, \$110,000. Ketchikan, Wash. Architect's name not given. Owners, Northern Dock Co. Contractor, A. W. Quist, Hoge Bldg., Seattle. Contract price, \$110,000. Note: This contract does not include the machinery.

THEATRE—4 story and base, reinforced concrete and steel, \$200,000. Seattle, Wash. Architect, Warren Miller, Arcade Bldg., Seattle. Owner's name not given. Contractor, S. G. Cobbs, Arcade Bldg., Seattle. Contract price, \$200,000. Note: The building will cover an area of 60x125 feet.

EXPOSITION PROGRESS.

In his report to President Moore, Director of Works, Harris D. H. Connick, of the Panama-Pacific International

Exposition, states that twenty-two important contracts have been completed and that work on the remainder of the contracts is well under way.

Mr. Connick states that more than 270 head of stock are engaged in the work of grading the Exposition site and the contract for the construction of the freight slip and its approach is nearly completed.

"Progress on the construction of the Machinery Building," said Director Connick, "has been most satisfactory during the past thirty days. For the month of June, 2,150,000 feet of lumber was erected in place, and this was on an average of 70,000 feet per day.

"Frame work on the construction of the Palace of Education started on the tenth day of May and about 900,000 feet of lumber has been placed to date, making a daily average of 30,000. A large portion of the floor of the Education Palace has been laid and about 300,000 feet of lumber has been used in the floor work of the Palace of Agriculture. The three fire stations will soon be built, the work actually having been completed on one of them.

"The work of enlarging the sculpture models to full size is progressing successfully under the direction of A. Stirling Calder, Acting Chief of the Department of Sculpture. He is now employing a force of twenty sculptors, painters and helpers.

"Warehouse No. 2 is rapidly nearing completion. The plan covering the electrical installation in the various buildings is well under way, as are also the architectural plans for the various courts and buildings."

MUCH COKE MADE FROM WEST VIRGINIA COALS.

State Exports Millions of Tons of Coal for Coking In Other Regions.—Coal Resources of State Suggests Great Manufacturing Possibilities.

The quality of coke made in West Virginia in 1912 was 2,465,986 short tons, valued at \$1,692,292, compared with 2,291,049 tons, valued at \$4,236,845, in 1911, according to E. W. Parker, of the United States Geological Survey. The increase in 1912 was 7.64 per cent in quantity and 10.75 per cent in value. In spite of this increase the production of coke in West Virginia in 1912 was smaller than that of any year from 1905 to 1910. The smaller production in the last two years is attributable simply to the larger production of coke from West Virginia coal at plants in other States. In 1912 the quantity of coal made into coke in West Virginia was 4,061,702 short tons. It is probable that the quantity of West Virginia coal made into coke in ovens outside of the State exceeded 5,000,000 short tons. In the cokemaking as in the coal mining industry West Virginia suffers from having relatively little home consumption for her products. Eighty per cent of the coal mined in the State and nearly all of the coke made is sent to consumers in other States.

Next to Pennsylvania, West Virginia possesses more wealth in supplies of coking and other high-grade coals than any other State in the Union, but as long as both the coal and the coke continue to be shipped out of the State West Virginia will not attain the position she should occupy as a manufac-

turing State, nor will the miners of coal and makers of coke receive a just return for these products. At the present time, ranking second as a producer of coal and third in the production of coke, West Virginia stands thirty-fourth in the value of her manufactured products. The principal beneficiaries of the coal-mining and coke making industries in the State are the transportation companies.

ELECTRIC POWER DEVELOPMENT IN THE SOUTH.

No portion of our country is making swifter or greater strides in developing powers of rivers and transforming that into the power of electricity than some states of the South. Tennessee, the Carolinas, Alabama, Georgia and others are rapidly justifying the most hopeful predictions of former years. The abundant waters emerging from unfailing springs of mountains and foothills are being harnessed, while yet swift in their dashing brightness, to furnish horse-power by the millions. While in the cities and other communities of the lower lands of several states the belching stacks tell of the consumption of the coals of the Virginias and other states in the production of steam for the turning of the wheels, there are already great plants, and others are being erected to produce from the rushing waters of numerous rivers the cleaner power of electricity to be used in great factories, at the dams and those at a distance, fed through the wires.

We read of the rapid advance of India in the multiplication of spindles to compete with Lancashire in production of cotton fabrics, and then to our own South, where numerous great factories already in operation at a dozen points tell of activities in the same line, and others are rapidly rising to join their voices in the harmonies of great industries.

One of the greatest enterprises in our country for developing electric power from water power, if, indeed, it is not to be the very greatest of all thus far, next to Niagara, has been commenced on the Yadkin river at Whitney, N. C. This historic river narrows at this point from 100 feet to sixty feet, where its deep torrent rushes through a gorge. Here it is to be harnessed for production of at least 150,000 horse-power. The cement alone for the dams and other features of this plant will cost over a million dollars, being one of the largest orders following those for the New York tunnels. The power-house will be about 600x100 feet. The greater portion of the power will run a vast aluminum plant, which will occupy eighteen acres in the immediate vicinity, to be financed and operated by a French company with a capital of \$10,000,000. There will be a surplus of power to drive shops at a distance.—Cincinnati Enquirer.

PENNSYLVANIA SMASHES COKE RECORD.

Output in 1912 Was Over 27,000,000 Tons; More Than of All Other States Combined.

Pennsylvania stands preeminent among the States in the production of coal and in the manufacturing of coke.

Veneered Panels that
ARE good---order

The Best Panels

The test of a panel lies in its **lasting qualities and smooth finish.**

WYBRO Panels have stood the test of time---they have always been found to be the best in point of quality and durability.

Insist on WYBRO panels---they are everlastingly good.

The quantity of coke produced in the State in 1912 was 27,372,018 short tons valued at \$56,054,478, against 21,923,935 tons, valued at \$43,053,367, in 1911, according to Edward W. Parker, of the United States Geological Survey. The increase in 1912, compared with 1911, was 5,448,083 short tons or 24.85 per cent, in quantity, and \$13,001,111, or 30.2 per cent, in value. The quantity of coke made in 1912 was the largest on record, exceeding the previous maximum of 26,513,214 tons in 1907 by 858,804 short tons, but falling behind the earlier year in value by \$11,583,546.

As a producer of coke Pennsylvania is relatively of greater importance than as a producer of coal, for whereas including the production of anthracite Pennsylvania contributes less than half of the entire output of coal in the United States, nearly two-thirds the total production of coke is made within that State. Pennsylvania has, however, not progressed as fast as some other States in the matter of conserving the by-products of coke making. All but a very small quantity of the State's coke is made in beehive ovens or in rectangular ovens in which the process is one of partial combustion, as in the beehive ovens, and without recovery of byproducts or utilization of the heat generated in the coking process.

CENTRAL STATES INCREASE METAL OUTPUT.

Figures for 1912 by United States Geological Survey Show Gain of \$15,000,000 Over 1911.

The value of the output of silver, copper, lead, and zinc, in the States of Arkansas, Kansas, Michigan, Missouri, Oklahoma, Wisconsin, and northern Illinois in 1912 was \$79,675,714, an increase of \$15,536,370 over the value for 1911 and \$23,349,111 over that for 1908. The total value of the production of these metals for the years 1908 to 1912, inclusive, was \$327,385,994, of which \$151,836,908 was for copper, \$98,188,656 for zinc, \$76,217,618 for lead, and \$1,150,512 for silver.

A full account of the production of these metals and their ores in the States named is discussed by districts in an Advance Chapter on "Precious and Semiprecious Metals in the Central States in 1912" by B. S. Butler and J. P. Dunlop, of the United States Geological Survey.

A copy of the complete report may be obtained free on application to the Director of the Geological Survey, Washington, D. C.

SULPHUR PRODUCTION PASSES \$5,000,000 MARK.

Last's Years Output Shows Healthy Increase Over 1911--Rapid Development of Industry in the United States.

The production of sulphur in the United States in 1912 was 303,472 long tons, valued at \$5,252,422, compared with 265,664 long tons, valued at \$4,787,049, in 1911, according to W. C. Phalen, of the United States Geological Survey. The sulphur came from Louisiana, Nevada, and Wyoming, the production of Louisiana being the dominant factor in the domestic sulphur industry.

During the last 12 years the growth of the sulphur industry in the United States has been phenomenal, and the last 7 years has seen the dethronement of Sicily from the dominating position she so long held in the world's sulphur market. Within this period the United States has advanced from the position of an unimportant producer to that of one of the two leading sulphur producers of the world, owing entirely to the development of the sulphur deposits in Louisiana. In 1900 the sulphur production of the United States amounted to 3,147 tons; the imports during that year were 167,696 tons, of which 166,825 tons were classified as crude sulphur chiefly from Sicily. Thus the domestic production in 1900 amounted to not quite 2 per cent of the sulphur consumed. During 1912 the domestic production constituted more than 91 per cent of the consumption and the imports amounted to less than 9 per cent. Moreover, the imports of sulphur from Italy were only 8.7 per cent of the total importation, and Japan was the leading exporter of sulphur into the United States, 91 per cent of the foreign sulphur admitted having come from that country. It seems safe to predict that with the completion of the Panama Canal United States sulphur may practically displace foreign sulphur on the Pacific Coast.

An advance chapter on Sulphur for 1912, just issued by the Geological Survey, includes detailed descriptions of the sulphur industry in Louisiana as carried on by the Union Sulphur Co. and an outline of the extensions of the company in Europe. An account of the beginning of the operations of the Freeport Sulphur Co. at Freeport, near Bryan Heights, Brazoria County, Tex., is also included. This company began operations in November, 1912, when an initial run was made. The sulphur is to be obtained by a process similar to that employed in Louisiana-

615 Phelan Building, San Francisco

that is, it will be melted underground and pumped to the surface by means of an air lift. In Nevada the sulphur comes from the town of Sulphur, in Humboldt County. The Wyoming product comes from the Thermopiles district. A new deposit in Wyoming is located in Park County, 12 miles south of the deposits in Sunlight Basin.

Besides tables of domestic production the report gives figures showing the imports of foreign sulphur and the exports of domestic sulphur.

A copy of the report may be obtained free on application to the Director of the Geological Survey, Washington, D. C.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC.

of BUILDING AND INDUSTRIAL NEWS, published every Wednesday at San Francisco, required by the Act of August 24, 1912.

Name of Editor, Chalmers Munday, 560 Mission Street.

L. A. LARSEN, Owner.
Sworn to and subscribed before me this 21st day of March, 1913.

[SEAL] MARTIN ARONSOHN,
Notary Public in and for the City and County of San Francisco, California.
My commission expires Sept. 20th, 1915.

NEW RAILROAD FOR MODOC COUNTY.

J. E. Sexton, who built the Quincy & Western Railroad, which connects Quincy, Plumas County, with the main line of the Western Pacific at Marston, is preparing to build another feeder for the Western Pacific, according to word that has been received here, from Reynard, Nevada, to Cedarville, Modoc County, California.

Sexton built the Quincy & Western Railroad and then accepted the position of General Manager of the Eureka & Palisade Railroad of Eastern Nevada.

The proposed line from Reynard to Cedarville will tap an undeveloped territory from an agricultural standpoint, save that it is rich in livestock. Lumbering is one of the principal industries. Sexton expects to build a narrow gauge line, but may change to a broad gauge.

PACIFIC GAS STOPS WORK.

AUBURN (Placer Co.), July 23.—The Pacific Gas and Electric Company

NEW MODEL LIFE BOATS.

That three of the latest style lifeboats recently authorized by the Treasury Department may be constructed here was the information forthcoming from the Chamber of Commerce yesterday in a telegram from Washington, which stated that Pacific Coast manufacturers are at liberty to submit bids for boats to be used on the Coast. Ten lifeboats in all are to be delivered, seven at New York, while the remaining three were originally designated for Astoria, Ore.

CIVIL SERVICE EXAMINATIONS.

The United States Civil Service Commission announces that the examinations listed below will be held in San Francisco at an early date:

Assistant preparator in paleontology, National Museum, Washington, D. C.; salary \$60 per month.

Mechanical engineer, office of public roads, Washington, D. C.; salary \$3000 per annum.

Chief, office of information, Department of Agriculture, Washington, D. C.; salary \$2500 per annum.

Laboratory aid in horticulture, Bureau of Plant Industry, Washington, D. C.; salary \$720 per annum.

Laboratory aid in physics, Bureau of Plant Industry, Washington, D. C.; salary \$600 to \$720 per annum.

S. P. TO BUILD TO BOISE.

President A. L. Mohler of the Union Pacific has been in conference with President Spruille of the Southern Pacific, the main objects of discussion being plans for the building of a line to Boise from a point on the Central Pacific line and service changes occasioned by the divorce of the Southern and Union Pacific.

In its plans for building to Boise, the Union Pacific and Southern Pacific expect to beat the Western Pacific. The latter road has contemplated extending to Boise for some time, a definite plan for so doing having been evolved in the Winnemucca

FOREIGN TRADE OPPORTUNITIES.

[Inquiries in which addresses are omitted are on file at Bureau of Foreign and Domestic Commerce, Washington, D. C. In applying for addresses refer to file number.]

Consuls are requested to contribute to this department, and in doing so should in each instance state in what language correspondence should be conducted.

No. 11292. Wireless telegraphy apparatus.—A report from an American consul in England states that a firm in his district desires particulars, including illustrations, prices, etc., from American manufacturers of wireless telegraphy apparatus. The firm is in touch with several ship and trawler owners who own at least 550 vessels.

No. 11293. Cement.—An American consul in Spain has forwarded the names of possible agents for American cement in his district. The consul reports that one firm manufacturing artificial Portland cement secured orders during the past year for over 220,000 barrels.

No. 11294. Electric works.—Sealed proposals will be received by the Chairman of Tenders Committee, Town Hall, Hackney, London, England, up to July 24 for the following: (1) Extra high-tension ring main conduits, comprising key fibre conduit laid in concrete, drawn pits, and covers; (2) substation plant, comprising transforming and converting plant, together with the necessary starting and controlling apparatus and connections; (3) substation switch gear, etc., comprising extra high-tension and low-tension direct-current switchboards to operate in connection with the substation plant. Specifications and drawings may be obtained from the Borough Electrical Engineer, 306 Mare Street, Hackney, London, on deposit of \$25.25, which sum will be refunded to bona-fide tenderers.

No. 11298. Turbine.—Proposals will be received for supplying, delivering, and placing one 2,000-kilowatt high-pressure steam turbine, coupled direct to one extra high-tension alternating-current generator, together with barometric condenser, pumps, etc., for the Oldham (England) corporation Electricity Committee. Copies of specifications, etc., can be obtained from Mr. S. Wilbitt (Newington, Greenhill Electricity Offices, Oldham, England, on payment of \$10.22, which will be returned on receipt of a bona-fide tender.

No. 11299. Lumber expert.—An American consul on special service in India reports that a official of one of the native States in that country requests it made known through the Daily Consular and Trade Reports that the State Government would like to obtain the services of a commercial expert in the lumber industry. The State owns magnificent forests which, if put under good management and with modern sawmilling machinery introduced, would be a valuable asset to the State.

No. 11306. Construction or railways, factories, hospitals, etc.—The consul general at Rio de Janeiro has transmitted a copy of the measure to be adopted to protect the rubber industry of Brazil. These include in part the erection of an experimental station, a factory for refining or purifying raw rubber, a factory for the manufacture of rubber, an immigrant's hotel, hospital, a coal and oil depot, and the construction of railways. The detailed report may be consulted at the Bureau of Foreign and Domestic Commerce.

No. 11303. Breakwater and seawall.—The American consul general at Rio de Janeiro reports that the time for submitting tenders for the construction of a breakwater and seawall (see Trade Opportunity No. 10983, May 21) has been extended to July 25.

No. 11304. Carriage parts.—A responsible importer in a Mediterranean city requested an American consul to place him in touch with American exporters of carriage axles, steel hubs, springs, and carriage furniture. Prices should be quoted c. t. f. a Mediterranean port. Correspondence in English. The consul reports a growing demand for parts used in the construction of two-wheeled vehicles.

No. 11305. Railway construction.—The Public Works Department, Madrid, Spain, invites tenders for the construction of a railway between Bocalones and Malaga at an estimated cost of \$16,000. Tenders will be received through local agents only.

has laid off practically all its employees on the ditch and reservoir construction work between here and Lake Spaulding.

It is estimated that 1000 men are affected by the order from the main office in San Francisco.

A small force, it is said, will be employed at the big dam at Lake Spaulding for the present. Caretakers will be employed at all the camps along the construction line during the tie-up. It is not known how long the shutdown will last. It will at least be for sixty days or longer.

The cause for the shutdown appears to be difficulty in disposing of bonds to raise money to carry on the work. It is, however, only a matter of time when the company will be able to finance the project and resume work.

ALABAMA INCREASED COKE OUTPUT.

Amount manufactured in 1912 Valued at Eight Million Dollars.

Alabama's output of coke in 1912 amounted to 2,975,489 short tons, valued at \$8,098,412, against 2,761,521 short tons, valued at \$7,593,594, in 1911, according to E. W. Parker, of the United States Geological Survey. The increase in 1912 was 213,966 tons, and \$504,818 in value. Alabama retained in 1912 second place in the rank of coke producing States, having superseded West Virginia in 1911. The average price per ton for Alabama coke has declined from \$2.82 in 1910 to \$2.75 in 1911 and \$2.72 in 1912. This does not necessarily indicate an actual decline in the price of coke. A large proportion, possibly over 90 per cent, of Alabama's coke is consumed in furnaces which are owned by the same interests owning and operating the coal mines and coke ovens, and the placing of a value on the coke is largely a matter of accounting. The value per ton of the coke produced in 1912 was lower in spite of the fact that the value of the coal used advanced from \$1.28 in 1911 to \$1.35 in 1912.

That Alabama has developed her coking industry along the lines of modern practice is evident by the fact that in each of the last three years the only new ovens under construction on December 31 were retort ovens, none of the wasteful beehive type having been installed. Moreover, during 1912 there were 191 beehive ovens abandoned. The number of retort ovens, on the other hand, increased from 340 in 1911 to 620 in 1912, and there were 100 additional retort ovens under construction at the end of the year.

RENT FOR CANAL.

WASHINGTON, July 26.—The first payment of \$250,000 to Panama for the annual rental of the canal zone was made yesterday. The payments are in addition to \$10,000,000 paid in cash to Panama nine years ago.

Yesterday's installment was actually due last February; though it was deferred until yesterday for determination whether it should go to Panama or the parent state, Colombia.

At the request of the Panamanian Minister, Senor Morales, the money was paid over to a representative of William Nelson Cromwell of New York, financial agent for the Panama Government.

Frank Neidick

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Bind your copies of the Building and Industrial News in PERMANENT BOOK FORM

We have succeeded at last in securing a really practical binder. The Building and Industrial News contains a great deal of technical and statistical information that many of our readers find worth saving for future reference. There is no better way of preserving it than using the "BIG BEN" BINDER

which preserves the magazine in permanent book form. This binder is handsome and durable, and makes the permanent filing of magazines as easy as filing ordinary papers. It opens flat like a regular book, and comes in fine art cloth with the name of our Journal stamped in gold on the front cover and back. For persons who desire to

Save These Valuable Articles

this binder is just the thing, as it holds several numbers of our Journal and can be used again indefinitely year after year, simply by taking out the old Journals and inserting the new ones as they come to you.

By making special arrangement with the manufacturers of this best binder that has ever been put on the market, we are able to furnish them to you for **ONLY \$1.00 EACH.**

Merely send us your name and address and say: "Send us your binder. I enclose \$1.00," and we will send the binder promptly all charges prepaid.

Send in your orders now and begin saving the statistical and technical information, articles and valuable data, that will be published in The Building and Industrial News this year.

Otis Elevators

Sustain Architects' Endorsement

The Architect who specifies Otis Elevators identifies himself and his client with the most thorough Elevator organization in the world---an organization with fifty-seven years' experience and success in building Elevators.

Our Elevators --- of every type---from the simplest Hand-power Elevators to the most elaborate Electric and Hydraulic Installations---are the world's most finished Elevator products

We maintain Branches in eighty-one cities in the United States the distribution of which offers to users of Otis Elevators an inspection and Repair Service unapproached by any other Elevator Company.

Your clients and their engineers who use Otis Elevators will receive the benefit of our broad engineering experience and the unequalled facilities of our "Service Department." We are always glad to co-operate with them and with you to the fullest extent.

We Make

Geerless Traction Elevators. Worm Gear Traction Elevators. Drum Type Elevators. All Types of Hydraulic Elevators. Freight Elevators of Every Description. Automatic Residence Elevators. Electric Dumbwaiters. Incline Railway Hoists. Blast Furnace Hoists. Escalators. Inclined Freight Elevators. Gravity Conveyors, Etc.

Let us send you our latest books giving detail description of Otis Elevator products.

Editorial Comment.

Building construction for the month of July showed a commendable activity in San Francisco. Permits were issued and contracts filed to the extent of \$2,055,210 for private construction and contracts were let on the Panama-Pacific enterprise to the extent of \$1,689,815 making in all \$3,745,025 exclusive of city and government work. This as against \$2,134,237 for the month of June and \$2,677,088 for the month of May including the same items. Of the \$2,055,210 for private construction \$1,255,713 was for brick and concrete construction; \$661,026 for frame buildings, and \$137,053 came under the head of alterations and additions. These figures show that in spite of the depression of business generally there is a considerable activity in the building line such as to indicate that there is faith in the future of the city.

Compared with other years the record for July is as follows:

July, 1904	1,762,939
July, 1905	2,087,965
July, 1906	1,959,290
July, 1907	4,687,516
July, 1908	2,921,152
July, 1909	3,144,482
July, 1910	1,596,613
July, 1911	2,126,729
July, 1912	2,217,215
July, 1913	3,745,025

While \$1,689,815 of last month's figures were for the work of the Panama Pacific Exposition still the total of private construction run upwards of two millions. This is a good figure considering that it was vacation period generally and business is dull. From present appearances things ought to look up the last half of the year and assume a more buoyant tone.

The Chronicle prints a full page headline to the effect that the Chamber of Commerce declares against the folly of municipal road bonds. Among other things it states that the Directors of the Exposition say that the municipal roads will be useless for the exposition.

If this statement is made with authority it is none the less wholly and absolutely untrue. For if the Union Street line is owned by the municipality and a line is built on Van Ness avenue, how can it help but benefit the Exposition? Surely the Chronicle must think that all the voters of San Francisco belong to the mattonhead club. For if a municipal railroad can furnish transportation to crowds of people it certainly will be a benefit to the exposition whether it runs directly to the exposition grounds or not.

This use of the Chamber of Commerce and of the names of the Exposi-

tion Directors by the organs of special privilege is doing any thing but increasing popular estimation of the members. If the Exposition is to be made a political grab bag wherein the largest contributor seeks to use the names of the Directors for his own purposes, the people are liable to lose faith in the Exposition.

When the United Railroads were asked to furnish adequate transportation to the Exposition grounds they would take no action unless the Board of Supervisors virtually gave up the streets to them. Now that the City is about to take some independent action there is a great cry that it will do no good.

The Examiner for once has come out editorially and hits straight from the shoulder in the matter of the municipal bond issue. The consummate gall and invincible arrogance of the Chamber of Commerce in resolving that the city does not need car lines and that they will be of no benefit to the exposition, if built, is the theme of an editorial in Saturday's issue which treats the subject without gloves. The Chamber of Commerce has it that a bus line is to be established on Van Ness Avenue without cost to the city and on that theory the people are asked to vote against burdening the city with any more bond issues. And presumably the members of the Chamber of Commerce would profit by the bus line.

It has always been a matter of comment that the business men of San Francisco did not stick together or boost for the city. It has frequently been a matter of contrast that the business men of Los Angeles and of Seattle work for their home town, while here if each one does not see that he is going to get the best of it he refuses to work. So in the present case. Instead of boosting for the city the Chamber of Commerce allies itself on the side of special privilege so that what little influence they might have on public opinion is entirely nullified.

Changes in the parcels post regulations are to go into effect August 15th next, whereby the limit of weight will be raised to twenty pounds for the first and second zones. This ought to add materially to the business. Further there is to be a reduction in rates also in the first and second zone.

The special parcels post stamps should be abolished. In time no doubt the zone system will be abolished and a flat rate adopted. As it is small parcels can be sent much more cheaply than ever before. And with the increase of its scope there will be a gradual freedom from the domination of the express companies.

Cracks In Concrete - Causes And Corrections.

The following letter was issued to all members of the Concrete Institute at the end of June, 1909:

Dear Sir:—The Concrete Institute are impressed with the fact that much has yet to be learned on the subject of expansion and contraction of concrete, and that definite information on this subject will be of great value to their members and to all who use this material. The Reinforced Concrete Practice Standing Committee are investigating this matter, and you are asked to be so good as to assist them by giving answers to the following questions, and any further information which you may be kind enough to offer will be of great help:

1. Have you had experience with cracks in concrete?
2. What was the nature of the structure?
3. How old was it when the cracks occurred or when you first observed them?
4. How far apart were the cracks and what size?
5. To what do you ascribe the cracks?

- (a) Shrinkage from setting in air;
 - (b) Variation in temperature;
 - (c) Difference of temperature on different parts of the structure; or
 - (d) Any other cause, and if so, what?
6. What precautions do you advise to prevent such cracks?

An answer as soon as possible would be greatly appreciated.

I am yours very truly,

(Signed) ARTHUR E. COLLINS,

Honorable Secretary.

Fifty-four replies have been received and have been considered. As they are of experience, which must be kept confidential and cannot well be summarized in general terms, particular features needing description in order to enable useful conclusions to be drawn, the committee has not followed the usual course of printing the evidence, but presents the following review of the subject and recommendations for the prevention or diminution of the cracking of concrete.

The cracking of concrete is unsightly, but is not necessarily dangerous. Cracks in concrete may be divided into two classes:

1. Surface cracking.
2. Bed cracking.

In the first category, the cracks

are often referred to as "map" cracks by reason of their shape, and resemble to a certain extent the map in plain and reinforced concrete. They are also known as "crazing" and are of very frequent occurrence. They appear to arise from the "crazing" of cement mortar, which is more cement than the mass of the concrete, thus exposing a comparatively cement skin, which expands at a higher rate on exposure to the air than the body concrete. It is upon the uppermost face of concrete, where the lighter and weaker particles of cement work up to the surface and form a skin known as "laitance." If work

be kept under water, and sometimes if shielded from the sun, this crazing may not occur. To overcome its unsightliness the surface skin should be removed either (1) by brushing the concrete when green with wire brushes; (2) by rubbing by means of a stone or piece of concrete and sand and water; (3) by dressing with hand or pneumatic operated chisels and hammers; (4) by brushing the surface with hydrochloric acid and subsequently washing with clean water. The last two named methods are best with completely hardened concrete.

The cracks extending through the body of concrete may be ascribed to the following:

1. Faulty design in construction so far as statical resistance is concerned.
2. Expansion of cement or concrete.
3. Corrosion of embedded steel.
4. Shrinkage from setting and hardening in air.
5. Difference of temperature in different parts.

Under the first head the following causes have been noted:

- (a) Settlement of the foundations.
- (b) Too high a stress in the reinforcement, resulting in excessive deformation.

(c) Too early removal of forms. The age of the concrete when the forms are removed must be sufficient to give the usual factor of safety due to the stresses caused by dead load and such accidental load as may at that time be anticipated. Generally the following recommendations are made, subject to the approval of the engineer or architect responsible for the works.

For mass concrete walls not subject to thrust, and where the height does not exceed 2 feet, the forms should not be removed under 21 hours. Where the wall is subject to pressure, form should remain in place at least a week, although a fortnight is preferable. For mass concrete arches of more than 20 feet span, one month is recommended.

For reinforced concrete the following is recommended:

Slabs, a minimum of seven days, but otherwise, for slabs carrying only their own weight, an allowance of two days per inch of thickness, or one day per foot of span, whichever is the greater. For sides of beams, walls, and columns not under side thrust a minimum of four days; bottoms of beams, a minimum of two weeks, though a month to six weeks may be necessary under special circumstances for arches the time of removal of the centering is better left to the judgment of the engineer, keeping in view the ratio of rise to span and special circumstances.

If it is intended that the structure should be used for carrying heavy weights, emergency props should be left in for such time as the engineer or architect may direct.

The foregoing periods may be increased by at least the time during which frost or rain has intervened.

(e) Defective design of forms with inadequate allowance for contraction and expansion due to variation of moisture. Dry timber may expand and crack the concrete unless wetted beforehand.

(f) Careless removal of forms, which may result in cracking the concrete by shock of falling timber, or by levering and prising on the green concrete.

(g) Vibration, resulting in deficient adhesion and excessive deflection. Forms should be very rigid.

(h) Insufficient allowance for continuity, fixity, and general monolithic nature of concrete work done "in situ." Over supports the maximum degree of continuity and fixity should be provided for. Frequently cracks will be found over supports of continuous reinforced concrete beams and floor slabs, owing to the omission or insufficiency of steel there. Concrete floors are often built in chases in walls and carried over walls, others standing above, and sufficient fixity is given to cause cracks, if provision has not been made in the reinforcing. Columns and piers when built monolithic with beams will give more or less fixity to end of beams resting thereon, both at end and intermediate supports.

(i) Too close spacing of steel, so that there is no room for the concrete to get round and adhere or bond with the bars.

Expansion of Cement or Concrete.
Under this heading the following causes of cracking are noted:

(a) Overlaid and coarsely ground cements which frequently met with years ago caused expansion, to overcome which it was necessary to leave room for expansion: i.e., expansion joints. Especially was this precaution adopted around the edges of floor slabs adjoining walls.

(b) Coarse materials containing sulphur compounds, unburnt fuel, oxidisable or hydratable iron compounds, unslacked lime, and other deleterious substances. Breeze, clinker and slag frequently contain sulphur and metallic iron or oxide of iron, while boiler ashes may contain both sulphur and unslacked lime (the latter derived from limestone in the coal). Some bricks contain sulphides and sulphates and lime, and should not be used broken for concrete. Old bricks also sometimes have old plaster adhering to them; the sulphate of lime may cause no trouble in plain concrete while it is kept dry, but in the presence of water reacts chemically with the aluminates of the Portland cement, forming sulpho-aluminates of lime which is attended by increase of volume, and may cause blowing if in large quantity, and even a small quantity may result in cracking. Free lime in the same way will swell or contract with water. Black magnetic oxide of iron will become converted into hydroxide of iron in the presence of moisture. Indeed, any iron compounds are dangerous in reinforced concrete as likely to react electrolytically with

the steel in the presence of moist air or dampness, and sulphur causes speedy corrosion.

Corrosion of Embedded Steel.

Should the steel in reinforced concrete corrode by reason of porosity of the concrete or the presence of deleterious substances in the coarse materials of which it is made, or by electrolytic action, the concrete cover to the bars will crack and burst off.

Shrinkage from setting and hardening in air is probably the most frequent cause of cracking.

Concrete will expand slightly in water and contract on drying out, so that cracking is frequently not evidenced from this cause until the concrete is allowed to dry, varying usually up to two months, and in thick mass walls moisture and heat are retained for a long period and may delay cracking up to six months and even longer. It is usual to keep concrete wet for several days after manufacture in order to ensure it gaining maximum hardness, and it is specially important to prevent rapid drying by sun and wind, so that the surface of concrete should be shielded against such exposure. A dry mixture of concrete shrinks less than a wet mixture, and concretes richer in cement contract more than lean mixture. For reinforced concrete work medium wet mixtures are desirable, and therefore concrete richer in cement than 1 to 5 is not advisable for curtain walls. The coefficient of contraction of concrete on exposure to air appears to be about 0.0002 to 0.0005 at one month, and increases to about 0.0004 to 0.0006 at 1½ years. The variation recorded is between poor and rich concretes. Such contraction is usually prevented from taking place uniformly throughout, in retaining walls and pavings it is prevented by friction of the soil, in other cases by the holding of other parts. Plain concrete will usually hold together for some distance, so that contraction joints need only be inserted at intervals; the following are advised as suitable distances apart of such joints in plain concrete:

Paving, 4 to 5 feet.

Curtain walls, 10 feet.

Exposed retaining walls, 15 to 20 feet.

Basement retaining walls (not exposed) and dock walls and dams, 50 feet.

If curtain walls adjoin heavy columns and beams, the rigidity of the latter would probably result in cracking if constructed monolithically, even if reinforced. It is best, therefore, in such cases to provide joints adjoining beams and columns.

If concrete be laid over the joints of a thicker lower surface of concrete, the joints of the latter will most probably be evidenced in the upper surface.

Large surfaces have been successfully constructed without apparent cracks by properly reinforcing the concrete and laying all at one operation. The object of the reinforcement is to break down the tensile resistance of the concrete and cause it to crack uniformly at such close distances as to render the cracks invisible to the eye. If one portion of the concrete be left overnight, great care should be taken to roughen the hardened surface by tooling away, then clean by

brushing with water, and apply half an inch of mortar of the same proportion as the mortar in the concrete and ram the fresh concrete well against it. Such joints will often show, even though well reinforced. In calculating the amount of reinforcement for such purpose, the ultimate tensile strength of the concrete at one month should be equated to the resistance of the steel at the yield point. Usually for a 1:2:4 concrete ½ per cent of steel is required each way, the bars or meshwork being laid at right angles. The reinforcement should be in small sections and well disseminated through the thickness of concrete, and a layer of bars should be near each face. So-called "distribution bars" near the bottom of floor slabs are not sufficient if cracking is to be resisted; rods should also be placed near the upper surface. Cracks frequently occur parallel to rods where "distribution bars" are not used, and also occur at right angles to main bars where continuity bars reinforcement should be in addition to the section of steel required to resist static forces.

The sudden drying out when heating apparatus is installed frequently causes excessive cracking.

Difference of Temperature.

Considerable difference of temperature will cause cracking and should be avoided as much as possible. Heavy reinforcement is not always an effectual preventative. Most reinforced concrete chimneys in which the internal temperature is over 500 deg. F. seem to be cracked vertically, externally, and often horizontally as well, though possibly the latter could be avoided. This cracking is probably due to the difference in temperature between the outside and the inside, which may be considerable with a cold wind blowing. A continuous lining with cavity between it and the outer shell would probably prevent serious cracking.

The Present Railroad Commission.

Why the Public Corporations Are Fighting It. History of The Case.

Public service corporations are making a concerted attack on the Railroad Commission, and the State's authority to enforce the kind of regulation that regulates is now an issue before the courts. The public utilities act has proved strong enough to resist all assaults in the past, and the Commissioners are confident that it will withstand the present onslaught.

One of the most interesting moves in the attack is the contention that the corporations should be permitted to avail themselves of appeals, by means of injunction, to the Superior Court, although the utilities act specifically provides that appeals may be made only to the Supreme Court direct on a writ of review. Resort to the Superior Court would mean an open way for carrying appeals first to the Appellate and then to the Supreme court. Inasmuch as it requires an average of six years for a case to get through these three courts, it is evident that the advantages of dragging litigation are

being sought by the companies.

There is too much expedition to suit the corporations in the proceedings of the Railroad Commission. It disposes of cases in as many weeks as it takes years for the courts.

Joined in the present attack on the Commission are the telephone, gas and electric, water, railroad and steamship companies. Behind the active leaders are massed as secret allies a score or more of big utilities.

Three appeals from rulings of the commission are now pending before the Supreme Court of the State. Their titles are Pacific Telephone and Telegraph Company vs. Railroad Commission, Palmer vs. Railroad Commission and Del Mar Water, Light and Power Company vs. Railroad Commission. Most important of these, in the opinion of the commission, are the actions brought by the telephone company and the Del Mar Company.

The Pacific Telephone and Telegraph Company's appeal was taken from the commission's order compelling the company to make physical connections with the lines of the independent telephone companies of Glenn and Tehama counties, for the transmission of long-distance messages.

This order was a solar plexus blow to the larger company, as it established a precedent for independent companies all over the country to follow in demanding the right to use the wires of the 'phone trust for their long-distance business. It took away from the 'phone trust its most effective weapon for crushing the independent competitors.

No time was lost in making the appeal. The telephone company pleaded that the commissioner's order was equivalent to taking its property without due process of law, that it was an eminent domain proceeding in which the company was entitled to a jury trial. After the case had been argued before the Supreme Court and briefs submitted by both sides, the Pacific Gas and Electric Company unexpectedly interjected itself into the case in the role of "amicus curiae," "friend of the court."

The gas company demonstrated the nature of its friendliness by attacking the constitutionality of the entire procedure under the Public Utilities Act, which provides that all appeals from decisions of the Railroad Commission must be taken direct to the Supreme Court on a writ of review, instead of permitting them to be dragged through the lower courts.

The "Court's friend," however, contended that instead of going to the Supreme Court on a writ of review the proper remedy for protestants against Railroad Commission decisions would be injunction proceedings in the Superior Court, with a trial de novo and subsequent appeals to the District Court of Appeals and finally to the Supreme Court.

The only apparent object of this intervention by the Pacific Gas and Electric Company was a desire to delay the ultimate determination of disputed rulings—the very thing that the Public Utilities Act takes great pains to prevent. Inasmuch as the writ of review principle has been upheld by the courts of other states, the commission has little anxiety about the outcome of this attack.

The appeal of Palmer was taken upon the commission's refusal to compel the Southern California Mountain Water Company to deliver water for irrigation purposes to himself and other farmers in the Otay valley. The commission's refusal was based upon its finding that all the water available in the company's system was needed for the domestic uses of the city of San Diego.

Palmer and his associates claim vested rights to the water because the original notices of appropriation, in specifying the territory in which it was to be used, included their property. This case was submitted to the Supreme Court July 7 and is now ready for decision.

In the Del Mar Water, Light and Power Company's case the commission ordered the company to supply water to a tract next Del Mar, in San Diego county, and to extend its water mains for this service. This was a principle against which water companies all over the country had been fighting successfully for years. The water company contended that all of its available supply was needed to serve the tracts of land which the owners had put on the market, and objected to supplying the rival tract. The commission held, however, that the company had more water than it needed for its own land and ordered the supply extended.

First in importance among the appeals which are expected in the near future will be that of the Glendale Consolidated Water Company. In passing upon a complaint brought by the company, the commission laid down the general principle that it is the duty of water companies to install service connections to the property line and to install meters free, but the expense of these installations shall not be taken into consideration in fixing water rates.

Consumers and rate-payers are more vitally interested in the outcome of this case than of any other, because it directly affects their pocket-books. For years one of the pet sources of income of the water companies has been the charges they exact for making service connections. The city of Los Angeles applies this principle of revenue today in the operation of its municipal system. As the Glendale Consolidated Water Company has applied for and has been denied a rehearing by the commission, notice of appeal is expected at any time.

The other appeal which is believed to be imminent is from the Wilmington Transportation Company. This was the company involved in the celebrated "ocean rates" decision, in which the commission assumed jurisdiction over rates charged between San Pedro and Catalina Island, both in the State of California, although the vessels plying over twenty-one miles of high seas in between.

The transportation company, it is understood, will test the jurisdiction of the commission on the ground that, although its vessels ply between California ports, its business constitutes "commerce with foreign nations," because it passes over the ocean seas, and that it is therefore subject to the control of the Federal Government. It will also cite a decision rendered by Justice Field in the San Francisco District Court in 1882, enjoining the Rail-

road Commission of that period from exercising jurisdiction over the rates of the Pacific Coast Steamship Company. That decision was based upon the dictum of the United States Supreme Court in the case of Lord vs. Steamship Company, which was later looked upon askance by Chief Justice Fuller.

In reply the commission will contend that this company's business is not commerce with foreign nations, and that even if it were the Federal Government has failed to exercise any control, and the State has authority to act until it does. The Wilmington Transportation Company, like the Glendale Water Company, has been denied a rehearing by the commission.

The latest endeavor to block the commission's authority has been made in the Federal Courts by the Southern Pacific, which is seeking to restrain it

from assuming jurisdiction over a proposed issue of trust certificates. The Southern Pacific announced that this was a friendly suit, but since its experience with the Pacific Gas and Electric Company in the role of "friend of the court," the commission is suspicious of all protestations of friendliness, and is preparing to put up a decidedly hostile opposition.

The only two court actions against the present commission which have already been decided failed dismally. One was the appeal of the Southern Pacific from the San Pedro rate schedule, in which United States Judge Van Fleet upheld the commission on every point, and the other the suit of the Palo Alto Gas Company to enjoin the commission from fixing gas rates, which was likewise decided in favor of the commission in the Superior Court of Santa Clara county.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 6 story and base, brick and steel, \$200,000. Architect, Frederick H. Meyer. Bankers' Investment Bldg., S. F. Owners, Schmidt Estate. The building, which is the second large apartment house structure to be erected by the Schmidt Estate in this city recently, will occupy the southeast corner of Post and Leavenworth streets, covering an area of 137½x123½ feet. Interior will be divided into sixty apartments arranged in large suites. Pine, hardwood, marble, tile and ornamental plaster will be used in interior finish. Plans provide for steam heat, passenger and freight elevators, vacuum cleaning system and hot water supply. All suites will have private bath rooms and will be equipped with wall beds. Bath rooms will be finished in tile and cement plaster. Considerable ornamental iron will be used. Exterior of the building will be faced with pressed brick and terra cotta. Working drawings are practically finished and construction will shortly be started. Building Superintendent Rolph, of Mr. Meyer's office, will be in charge of the work. It is probable that all parts of the work will be segregated.

SAN FRANCISCO—Apartment house, 4 story and base, reinforced concrete, \$100,000. Architect, Edward E. Fonlkes. Crocker Bldg., S. F. Owner, Mrs. A. Ruckard. This building will be erected on the south side of Bush street east of Stockton, and will cover an area of 31½x126 feet. There will be in the neighborhood of 27 suites arranged in apartments of two and three rooms. Interior finish will be of pine with some hardwood veneer and hardwood floors. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have cement floors and tile wainscot. Besides the suites the building will contain a large social hall and lobby. All suites will have wall beds and private bath rooms. Exterior will be faced with pressed brick. Plans are complete and figures are now being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architect, none. Owner, Thomas F. Barry, 2641 20th St., S. F. The building will be erected on Green street west of Larkin, and will cover an area of 25x77 feet. Interior has been arranged for six suites of four rooms and bath each. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the living rooms and reception halls. There will be steam heat and wall beds. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

FRESNO, FRESNO CO., CAL.—Apartment house, 2 story and base, brick, \$18,000. Architects, Swartz, Hotchkiss & Swartz, Fresno. Owner, C. W. Musick. The building has been mentioned in these columns before when the architects first started working drawings. The building will be erected on J street, and has been designed with stores on the first floor and a number of apartments on the second floor. Interior finish will be of pine. All suites will have connecting baths and will be equipped with wall beds. Hot water will be supplied to all rooms. Stores will have large display windows in patent store fronts. Exterior of the building will be faced with glazed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick. Cost not stated. Architect, E. J. Borgmeyer, Hilberian Bldg., L. A. Owner, M. S. Kornblum. The building will be erected on Benton Boulevard near 7th street, and has been designed to contain 27 suites which will be arranged in apartments of two and three rooms and bath. Interior finish will be of pine with some elm panels and hardwood floors. Plans provide for steam heat, elevator service and a vacuum cleaning system. Tile will be used in the bath rooms. Exterior of the building will be faced with glazed pressed

brick. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 3 story and base, frame, \$13,000. Architects, E. H. MacGibbon Co., Los Angeles Investment Bldg., L. A. Owner, Charles H. Louis. Contractors, E. H. MacGibbon Co., Los Angeles Investment Bldg., L. A. Contract price, \$13,000.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick, \$13,000. Architects, Maine Building and Investment Co., Thorpe Bldg., L. A. Owner, W. R. Neelands. Contractors, Maine Building and Investment Co., Thorpe Bldg., L. A. Contract price, \$13,000.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick, \$13,500. Architect, Elmore P. Jeffery, Citizens' National Bank Bldg., L. A. Owner, Mrs. Ella Barker. Contractors, May & Grimwood, Union Oil Bldg., L. A., general construction. Contract price, \$13,500. Note: This contract does not include elevator work or light fixtures.

BANKS.

FOREST GROVE, ORE.—Bank, 3 story and base, brick and stone. Cost not stated. Architect, W. B. Bell, Worcester Bldg., Portland. Owners, First National Bank of Forest Grove. The structure will cover a ground area of 50x62 feet. Entire ground floor will be occupied by the bank and upper floors will be subdivided into modern offices. Banking rooms will be finished in hardwood, marble, tile and ornamental plaster. There will be coin and safe deposit vaults. Interior finish of the offices will be of pine. There will be steam heat and elevator service. Exterior of the building will be faced with cut stone from a local quarry. Plans are complete and figures are being taken.

CHURCHES.

Contracts Awarded.

SALEM, ORE.—Mausoleum, 1 story, reinforced concrete and stone, \$35,000. Architects, Ellis G. Lawrence and William G. Holford, Chamber of Commerce Bldg., Portland. Owners, Portland Mausoleum Co., Contractors, Hurley-Mason Co., Board of Trade Bldg., Portland. Contract price, \$35,000.

COURT HOUSES.

SAN FRANCISCO—City Hall, 4 story and dome. Class A construction, \$1,500,000. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owners, City and County of San Francisco. Bids are now being called for by the Board of Public Works for erecting the structural steel and iron for the new City Hall. Bids will be opened on Wednesday, August 6th. A complete list of these bids will appear in the next issue of the Building and Industrial News.

SAN FRANCISCO—City Hall, 4 story, base and dome. Class A construction, \$1,500,000. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owners, City and County of San Francisco. Plans and specifications for the granite work on the new City Hall have been completed and approved. Bids are now being called for by the Board of

Public Works and will be opened on August 27th. A bond in the sum of \$300,000 is required, which indicates that the work is estimated to cost in the neighborhood of \$1,200,000. Plans and full instructions for bidders can be secured from the Board of Public Works. An official proposal appears in another column of this issue.

SAN FRANCISCO — Subtreasury vaults, etc. Cost not stated. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids are now being called for on the construction, including mechanical equipment, interior lighting fixtures and electric protection for two money vaults which are to be installed in the San Francisco Subtreasury. These vaults will cover 3,500 square feet of floor area. Plans and specifications can be secured from the superintendent of construction in this city or from the Supervising Architect at Washington, D. C. Bids will be opened in Washington on September 2nd. An official proposal appears in this issue.

SAN FRANCISCO — Subtreasury vault entrance, etc. Cost not stated. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids will be opened in Washington, D. C., on September 2nd for construction, complete, of two vault entrances for the money vaults which are to be installed in the United States Subtreasury at San Francisco. Plans are specifications can be secured from the Supervising Architect at Washington or from the Superintendent of Construction in this city. An official proposal appears in another column of this issue.

HANFORD, KINGS CO., CAL.—Court house, 2 story and base, brick and concrete, \$30,000. Architects, J. Carl Thayer associated with Henry Doriot, Forsythe Bldg., Fresno. Owners, Kings County. Plans for the building have been completed and approved by the County Supervisors. No details of the construction have been received in this city and other than the fact that the building will cover an area of 50x125 feet nothing can be said. Plans are now out for figures. Plans and specifications can be secured from the architects or from the Clerk of the Board of Supervisors.

WALLA WALLA, WASH. — Court house. Class A construction, \$200,000. Architect, Henry Osterman, Walla Walla. Owners, Walla Walla County. The County Commissioners have voted to construct a new building costing \$200,000. Architect Osterman was informally commissioned to prepare plans, but this action was not unanimous. A competition may be called. Further mention will be made of the work as it develops.

FACTORIES & WAREHOUSES.

SAN FRANCISCO — Warehouse, 2 story and base, brick, \$15,000. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, Crane & Co. The building will be erected on the property on Stanford street south of Brannan, and will cover an area of 100x80 feet. Construction will be of the heavy warehouse type. No interior finish will be installed. There will be a freight elevator and automatic sprinkler system. Metal window sash and frames are

specified. Exterior of the building will be faced with pressed brick. Plans are complete and segregated figures are being taken on all parts of the work.

SAN FRANCISCO—Machine shop, 1 story, frame construction, \$2,500. Architect, none. Owner, E. W. Tucker, 256 Spear St., S. F. The building will be erected on Fremont 275 north of Harrison, and will cover an area of 21x137½ feet. No interior finish will be installed except in the front portion which will be fitted up for offices. The building has been designed for a machine shop and will be occupied by the owner. Exterior will be covered with galvanized iron. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN JOSE, SANTA CLARA CO., CAL.—Cannery and warehouse, 1 story, frame, \$2,000. Architect, none. Owners, Creco Canning Co., San Jose. This building will cover an area of 50x115 feet. A portion of the structure will be used for canning purposes and the balance of the building will be used as a warehouse. No interior finish will be used. Exterior will be covered with galvanized iron. Plans are complete and work will be done by Day Labor.

PORTLAND, ORE.—Warehouse, 2 story and base, brick and concrete. Cost not stated. Architect, Aaron Gould, Worcester Bldg., Portland. Owner's name withheld. The building will be erected on East Washington street and will cover a ground area of 100x100 feet. Rear portion of the structure will be of reinforced concrete construction and the part facing the street of brick. There will be large freight elevators, automatic sprinklers and fireproof doors. Metal window sash and frames will also be specified. Exterior will be faced with pressed brick and cement plaster, stage. Further mention will be made of the work as the plans progress.

SEATTLE, WASH.—Factory buildings, 1 and 2 story, brick and steel. Cost not stated. Architects, Stephen & Stephen, New York Bldg., Seattle. Owners, Broderick & Bascom Co. The one-story factory building will cover an area of 84x210 feet. There will also be a two-story fireproof oil house and a frame carpenter shop. Plans and specifications include metal window sash and frames and structural steel. About 4,000 cubic yards of fill is to be made. Plans for the work are now being prepared. Exterior of the buildings will be faced with stock brick.

FIRE HOUSES AND JAILS.

FRESNO, FRESNO CO., CAL.—Detention home, 2 story and base, brick and concrete, \$35,000. Architects, Swartz, Hotchkin & Swartz, Fresno. Owners, Fresno County. The building will be fireproof and will contain two large dormitories, one for females and one for males. There will also be work rooms, kitchens, dining halls and class rooms. Interior finish will be of pine throughout. Plans provide for a central heating system, modern plumbing and electric work. Metal window sash and frames will be used. Exterior of the building will be faced with pressed brick. Working drawings are being completed and bids will be called for sometime during this month.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$1,500. Architect, none. Owners, C. J. and W. J. Keenan, Hayes and Masonic, S. F. The building will be erected on the north side of Hayes street west of Central avenue, and will cover an area of 25x60 feet. Interior has been arranged for two modern flats of five and six rooms with bath. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be large open fire places with brick mantels in the living rooms. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with rustic and ship-lap with some brick veneer. Plans are complete and in the hands of the owners who will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Flats, 2 story and base, frame, \$3,500. Architect, E. P. Helms, 1334 Church St., S. F. Owner, O. R. Anderson. The building will be erected on the east side of 15th avenue north of California street, and has been designed to contain two modern flats of five and six rooms. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the living rooms and reception halls. There will be large open fire places in the living rooms with brick or tile mantels. Bath rooms will be finished in tile and the wainscoting will be used in the kitchens. Exterior of the building will be covered with cement plaster on metal lath and rustic. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

GOVERNMENT WORK AND SUPPLIES.

Mare Island Dredging.

The lowest figure submitted to the Navy Department for the dredging of the Mare Island Channel is that of the Standard American Dredging Company of Oakland, which offers to do the work for the lump sum of \$233,000 if awarded the entire contract, and its figures on the three separate details of the work amount to \$286,500, divided as follows:

Removal of \$2,600,000 cubic yards of mud, \$195,000; 6,000 yards of rock at thirty-foot depth, \$18,000; 42,000 cubic yards rock at twenty-foot depth, \$73,500.

The bids of the San Francisco Bridge Company were as follows:

Removal of mud, \$189,020; rock at thirty-foot depth, \$26,400; rock at twenty-foot depth, \$115,500. Total, \$330,920.

Bids were also submitted by the Hawaiian Channel Company and the American Dredging Company. It is expected that the award of the contract will be made at an early date and that the work will be started immediately thereafter. The city of Valjejo is awaiting action on this matter before calling for a bond election, as it proposes to build a bulkhead along the waterfront, behind which the debris from the channel can be dumped, thus reclaiming the tide lands, the control of which was recently given to the city.

Appraisers' Stores, San Francisco.

Under bids opened for reconstructing the wiring and lighting system of the U. S. Appraisers' Building at San Francisco, Cal., the contract was awarded to the General Electrical Construction Co., of 223 Minna street, San Francisco, Cal., at \$8,395. In the prosecution of the work material of the following manufacture will be used: General Electric Co. pendant switches and keyless sockets; Cutler-Hammer Mfg. Co. canopy switches; Holophone Glass Co. reflectors and glassware.

Balanced Valves.

The following bids were opened by the Reclamation Service, Los Angeles, Cal., under specification 213, for balanced regulating valves for Belle Fourche project:

Advance Machine Co., Los Angeles, Cal., \$85; Los Angeles, 21 days.

Maine Machine Works, Los Angeles, Cal., \$90; Los Angeles, 14 days.

Fulton Engine Works, \$151; Los Angeles, 14 days.

Isthmian Canal Commission, Redwood Lumber.

The following bids were opened by the general purchasing officer, Isthmian Canal Commission, Washington, D. C., for furnishing a miscellaneous quantity of redwood lumber:

Acme Lumber Co., San Francisco, Cal., \$1,234.49.

G. Elias & Bro., Buffalo, N. Y., \$1,355.39.

W. R. Grace & Co., San Francisco, Cal., \$1,140.27.

Canal Circular 778.

The following bids were opened by the general purchasing officer Isthmian Canal Commission, Washington, D. C., under circular 778, for furnishing two lock entrance flating caissons and their equipment:

Seattle Construction and Dry Dock Co., Seattle, Wash., \$952,000, with partially inclosed motors, Westinghouse pumps, Lardlow valves, and General Electric motors, etc.

Union Iron Works, San Francisco, Cal., \$748,600, with partially inclosed motors, Worthington pump, Union Iron Works valves, General Electric motors, etc.

Canal Circular 787-G.

The Isthmian Canal Commission will open bids August 14, 1913, at 2:30 p. m., under canal circular 787-G, for furnishing the following material and supplies:

Class 1, 25 push cars.
Class 2, 300 cape chisels and 1,200 cold chisels.

Class 3, 246 twist drills.

Class 4, 2,184 files.

Class 5, 114 Stillson wrenches.

Class 6, 600 scythe blades.

Class 7, 132 machettes.

Class 8, 114 garden hose.

Class 9, 1,000 lbs copper tacks.

Class 10, 48 pairs ash ores, 8-ft.

Class 11, 3,000 ft rubber air hose.

Class 12, 300 lbs spiral hot and cold water packing.

Class 13, 600 lbs rubber sheet packing.

Class 14, 1,000 lbs square flax packing.

Class 15, 300 lbs spiral square packing.

Class 16, 3,000 lbs sheet packing, brass wire insertion.

Class 17, 200 asbestos manhole gaskets.

Class 18, 5,000 ft rawhide belt lacing.

Class 19, 300 lbs carpenter's chalk-line.

Class 20, 15 reams emery cloth.

Class 21, 3,000 lbs stearic acid candles.

Class 22, 4,000 lbs metal polish.

Class 23, 1,000 reams white bond paper.

Class 24, 260 reams white ledger paper.

Class 25, 100 reams onion skin paper.

Class 26, 500,000 manilla shipping tags, No. 6.

Class 27, 100 reams onion skin paper.

Class 28, 500,000 manilla shipping tags, No. 6.

Class 29, 100 reams onion skin paper.

Class 30, 500,000 manilla shipping tags, No. 6.

Class 31, 100 reams onion skin paper.

Class 32, 500,000 manilla shipping tags, No. 6.

Class 33, 100 reams onion skin paper.

Class 34, 500,000 manilla shipping tags, No. 6.

Class 35, 100 reams onion skin paper.

Class 36, 500,000 manilla shipping tags, No. 6.

Class 37, 100 reams onion skin paper.

Class 38, 500,000 manilla shipping tags, No. 6.

Class 39, 100 reams onion skin paper.

Class 40, 500,000 manilla shipping tags, No. 6.

Class 41, 100 reams onion skin paper.

Class 42, 500,000 manilla shipping tags, No. 6.

Class 43, 100 reams onion skin paper.

Class 44, 500,000 manilla shipping tags, No. 6.

Class 45, 100 reams onion skin paper.

Class 46, 500,000 manilla shipping tags, No. 6.

Class 47, 100 reams onion skin paper.

Class 48, 500,000 manilla shipping tags, No. 6.

Class 49, 100 reams onion skin paper.

Class 50, 500,000 manilla shipping tags, No. 6.

Class 51, 100 reams onion skin paper.

Class 52, 500,000 manilla shipping tags, No. 6.

Class 53, 100 reams onion skin paper.

Class 54, 500,000 manilla shipping tags, No. 6.

Class 55, 100 reams onion skin paper.

Class 56, 500,000 manilla shipping tags, No. 6.

Class 57, 100 reams onion skin paper.

Class 58, 500,000 manilla shipping tags, No. 6.

Class 59, 100 reams onion skin paper.

Class 60, 500,000 manilla shipping tags, No. 6.

Class 61, 100 reams onion skin paper.

Class 62, 500,000 manilla shipping tags, No. 6.

Class 63, 100 reams onion skin paper.

Class 64, 500,000 manilla shipping tags, No. 6.

Class 65, 100 reams onion skin paper.

Class 66, 500,000 manilla shipping tags, No. 6.

Class 67, 100 reams onion skin paper.

Class 68, 500,000 manilla shipping tags, No. 6.

Class 69, 100 reams onion skin paper.

Class 70, 500,000 manilla shipping tags, No. 6.

Class 71, 100 reams onion skin paper.

Class 72, 500,000 manilla shipping tags, No. 6.

SAN FRANCISCO—Street paving and repairs and reforesting. Cost not stated. Engineer, Constructing Quartermaster's Department, Fort Mason, Owners, United States Government. The Constructing Quartermaster's office at Fort Mason has been authorized by the War Department to prepare plans for several miles of new asphalt roads with concrete base and for extensive repairs to roads now made. In connection with the building of new roads will follow the beautification of the Presidio. Fort Winfield Scott will be reforested with about 100,000 trees of many varieties. John McLaren, well known landscape architect, is co-operating with Engineer O. W. Degen in this work.

GARAGES.

Contracts Awarded.

LOS ANGELES, CAL.—Garage, 1 story and base, brick and concrete, \$15,000. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owner, Hugh L. Evans. Contractors, F. O. Engstrom Co, 5th and Seaton Sts., L. A. Contract price, \$15,000.

LOS ANGELES, CAL.—Garage, 1 story and base, brick, \$10,000. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owners, Belgard and Jackson. Contractor, A. E. Harshman, Story Bldg., L. A. Contract price, \$10,000.

HALLS AND SOCIETY BUILDINGS.

SAN PEDRO, LOS ANGELES CO., CAL.—Lodge hall, 3 story and base, brick and steel, \$10,000. Architect, Thornton Fitzhugh, Pacific Electric Bldg., L. A. Owners, San Pedro Masonic Temple Association. The building will be erected on a corner site and will cover an area of 50x100 feet. The entire building will be given over to the use of the association. There will be several lodge rooms, library, reading rooms and social halls. A completely equipped banquet room and kitchen will also be provided. Interior finish will be of pine and hardwood. There will be steam heat. Metal window sash and frames and metal lath and plaster interior partitions are specified. Exterior of the building will be faced with pressed brick and artificial stone. Plans are nearly complete and figures will be called for shortly.

SAN FRANCISCO—Lodge hall, 3 story and base, brick, \$35,000. Architect, Charles Paff, Merchants' Exchange Bldg., S. F. Owners, Carpenters' Hall Association. This work was mentioned here when Architect Paff was first commissioned to prepare plans. Drawings for the excavation have been completed and are in the hands of the Building Committee for figures. Plans can be secured from the Secretary at 801 Mission street. Contracts for the balance of the work will follow as soon as bids can be secured. The new building will be erected on McCoppin and Valencia streets and will be arranged for stores on the first floor and lodge halls and offices above. Exterior will be faced with pressed brick. A. Calderwood is the general secretary.

RICHMOND, CONTRA COSTA CO., CAL.—Lodge hall, 3 story and base, B. Osborn, Richmond. Owners, Rich-

brick. Cost not stated. Architect, J. mond Moose Hall Association. This building will be erected on 6th street and will cover an area of 72x112 feet. There will be two stores on the first floor, lodge rooms on the second floor and the third floor will be arranged for a number of offices. Preliminary plans are now under consideration and a detailed description of the work can not be given at this time. Further mention will be made as plans progress.

McMINNVILLE, ORE.—Lodge hall, 3 story and base, brick. Cost not stated. Architect, C. C. Robins, Ainsworth Bldg., Portland. Owners, Masonic Hall Association of McMinnville. This work has been mentioned here before when the architect was first commissioned to prepare plans. The structure will cover an area of 80x95 feet. First floor and basement will be used for commercial purposes, the second floor for offices and the third floor will be fitted up for lodge rooms and banquet hall. Interior finish will be of pine with some hardwoods. There will be steam heat and elevator service. Stores will have plate glass display windows in patent store fronts. Metal window sash and frames are specified. Exterior of the building will be faced with klinker or pressed brick. Plans are complete and figures are being taken. Bids will be opened on August 12th.

HOTELS.

SAN FRANCISCO—Hotel, 8 story and base. Class B construction, \$95,000. Architect, N. W. Sexton, Chronicle Bldg., S. F. Owner, Milton D. Grosh et al. This building was mentioned here when the architect was first commissioned to prepare plans. Working drawings have been completed and a contract for the excavating and grading let. The building will be erected on the north side of Sutter street 100 feet west of Powell, and will have a street frontage of 37½ feet and a depth of 137½ feet. A complete steel frame with exterior walls of reinforced concrete are specified. Exterior will be faced with cement plaster. Main floor will be given over to a large lobby, offices and parlors. Upper floors will be arranged for guest rooms, all of which will have private baths. Interior finish will be of pine and hardwoods. Ornamental plaster will be used in the lobby and offices. Bath rooms will have cement floors and tile wainscot. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Metal window sash and frames and metal lath and plaster partitions will be specified. Plans are complete and figures are being taken on the general contract.

SAN FRANCISCO—Hotel, 3 story and base, frame, \$15,000. Architect, O. E. Evans, 2267 Mission St., S. F. Owner, Mr. Mohr, 579 7th street, S. F. This building will be erected on Railroad avenue near 21st avenue, and has been designed for a saloon on the first floor and a number of single rooms above. Interior finish will be of pine and redwood. Hot and cold running water will be supplied to all rooms. Besides the guest rooms there will be two public rooms on each of the upper floors. Exterior of the building will be faced with ship-lap and rustle. Plans are now being prepared and figures will be

called for within a few days.

SAN FRANCISCO—Hotel addition, 3 story, brick and steel, \$38,000. Architect, William Mosser, Nevada Bank Bldg., S. F. Owner, Miss Jennie M. Blair. The present four-story hotel structure at the northwest corner of Ellis and Mason streets is to have a four-story addition, making the completed building seven stories in height and greatly increasing its capacity. The present lines of architecture will be followed out as will the interior finish, which is of pine and hardwoods. All guest rooms will have connecting baths. The heating plant will be increased and elevator service will be extended to the new portion of the building. Plans are complete and figures will be called for at once.

SAN FRANCISCO—Hotel, 5 story and base, reinforced concrete. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, John J. Clayton. This building will be erected on the north side of Howard street between 3rd and 4th streets. There will be two stores on the first floor, lobby, office, reading room and dining room on the second floor and 52 rooms on the upper three floors. In addition to the guest rooms each floor will contain a number of baths which will have cement floors and tile wainscot. There will be elevator service and steam heat. Hot and cold running water will be supplied to all rooms. Stores will have patent store fronts. Metal window sash and frames are specified. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

OAKLAND, CAL.—Hotel, 8 story and base, brick and steel, \$120,000. Architect, Clay M. Burrell, Albany Bldg., Oakland. Owners, Morris & Muller. This work was mentioned here when the architect was first commissioned. The structure will be erected at the north east corner of 14th and Jefferson streets, covering a large area. Ground floor will contain three stores besides the hotel entrance and lobby. Upper floors will be arranged for about 200 guest rooms, a large percentage of which will have connecting baths. Interior finish will be of pine and hardwoods. There will be steam heat and elevator service. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Bids have been taken for the steel work and plans for the balance of the contract are now out for figures.

LOS ANGELES, CAL.—Hotel, 12 story and base, reinforced concrete. Cost not stated. Architect, Frederick Noonin, Wright and Callender Bldg., L. A. Owner, N. W. Stowell. This building will be erected on Spring street south of 4th, and has been mentioned here before. Plans provide for a total of 275 rooms and 261 baths, besides the general office, lobby and parlors. There will be steam heat, elevator service, a hot water system and vacuum cleaning system. Interior will be finished in pine, hardwoods, marble and tile. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with glazed pressed brick and terra cotta. Plans are complete and figures are being taken.

Contracts Awarded.

Owners, E. Gottschalk Co. Contractors, Trewitt & Shields, Fresno, general construction. Contract price, \$119,773.

THEATRES.

SAN FRANCISCO—Theatre, 2 story and base, Class A construction, \$10,600. Architects, Rousseau & Rousseau, Monadnock Bldg., S. P. Owner's name withheld. This building, which has been designed for a high class motion picture theatre, will be erected on Broadway east of Stockton. The building will have a frontage of 68 feet and a depth of 137½ feet. Interior will be handsomely finished in pine and ornamental plaster. There will be a modern system of ventilation. Construction will be fireproof throughout with a complete steel frame, exterior walls of brick and concrete, faced with pressed brick. Considerable art glass, marble and tile will be used. Plans are being prepared.

SACRAMENTO, CAL.—Theatre, 3 story and base, reinforced concrete, \$75,000. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. P. Owners, Turner & Dahnen Circuit. The building will be erected on K street and will contain, besides the theatre proper, several stores. The theatre will be arranged with a main auditorium and gallery. Interior finish will be of pine and hardwoods and ornamental plaster. There will be steam heat and a modern system of ventilation. Construction will be fireproof, with concrete walls, floors and roof slabs. Interior partitions will be of metal lath and plaster. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

VANCOUVER, B. C.—Theatre, 3 story and base, Class A construction, \$150,000. Architect, J. J. Bonnell, 319 Pender street, Vancouver. Owner's name withheld. The building will be erected on Keefer street near Main and will cover an area of 75x120 feet. There will be a main auditorium and two galleries. Construction will be fireproof throughout with a complete steel frame, reinforced concrete walls, floors and roof. Interior partitions will be of metal lath and plaster. Interior finish will be of pine, hardwoods and ornamental plaster. A modern system of heating and ventilating will be installed. Exterior of the building will be faced with cement plaster. Plans are now being prepared and will be out for figures within a month.

SEALED PROPOSALS.

PROPOSALS FOR GRANITE WORK.
OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 27th day of August, 1913, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The granite work for the City Hall to be located on city property bounded by McAllister, Polk and Grove streets and Van Ness avenue.

Progressive payment will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within

five (5) calendar days from the date of the contract to be made and entered into therefor and completed within the time limits as provided for in the specifications.

The amount of bond for faithful performance of contract has been fixed at \$200,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Proposals will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms. The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works, F. J. CHURCHILL, Secretary.

PROPOSALS.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 6th day of August, 1913, for doing the following work to wit:

The erection of the structural steel and cast iron for the City Hall, to be located on City property bounded by McAllister, Polk and Grove streets and Van Ness avenue.

Progressive payments will be made.

Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed within one hundred and ninety (190) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$200,000.00.

All proposals offered must be accompanied by a check, certified by a responsible bank, payable to the order of the Clerk of the Board of Supervisors, for an amount not less than ten per cent of the aggregate of the proposal, based on a total of seventy-five hundred (7500) tons.

Proposals forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms. The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works, F. J. CHURCHILL, Secretary.

PROPOSALS FOR BUILDING—SPANISH HARDWARE, ETC.

THE BOARD OF EDUCATION of the City of Oakland, State of California, requests and will receive bids for the furnishing of all Materials, Labor and Workmanship required in connection with the construction, erection and finish of a basement and one (1) story addition to, and of certain changes, alterations and additions to the present building of the Fruitvale School No. 2, located on the northerly side of Penniman avenue, between Thirty-fifth (35th) and Thirty-sixth (36th) avenues, in the said city of Oakland.

Also for the furnishing of all the lock sets, panic and exit door bolts and padlocks required for exit doors and gates of thirteen (13) certain school buildings and for the furnishing of all the other finished hardware required for the Manual Training School, now in course of erection in the said City of Oakland.

All said materials, labor and workmanship is to be furnished and provided for in accordance with the plans, drawings and specifications prepared therefor and on file in the office of John J. Donovan, the Supervising Architect of the City of Oakland, to which said plans and Specifications reference is hereby made.

All proposals shall be made upon and conform to the requirements of the form of proposals, prepared and furnished by the city, through the Supervising Architect, and shall be enclosed in sealed envelopes, marked "Bids for Fruitvale School" or "Bids for Spanish Hardware," as the case may be, addressed to the Board of Education, and deposited by the bidder, or his agent, with the Board, while in session, between 4:30 and 5:30 o'clock p. m., Pacific Time, on the 18th day of August, 1913, in the rooms of the Board in the City Hall Annex, No. 1228 Broadway, Oakland, California, and at the expiration of the time named the bids will be opened, examined and publicly declared in open session of the Board.

No bid which combines the school building with the finished hardware proposition will be considered. All bids must be accompanied by a check, certified by a responsible bank, payable to the order of Frank M. Smith, City Clerk, in an amount not less than 100% of the aggregate amount of the bid. Said check shall be forfeited to and be retained by the City if the successful bidder fails or refuses to execute the contract in the required form and furnish within the forms to be provided by the City and as required by the Charter of the City of Oakland, within twenty (20) days after receiving notice award.

All information relative to the requirements for bidding, and all directions necessary to explain and make definite any of the provisions of the specifications or drawings will be given by the Supervising Architect upon application at his office.

The right is reserved to the Board in accordance with the provisions of the Charter of the City of Oakland, to reject any or all bids submitted.

By order of the Board of Education of the City of Oakland, California, Dated July 4, 1913. A. L. HANNAFORD, Secretary of the Board of Education of the City of Oakland.

tion, and deposited by the bidder, or his agent, with the Board, while in session, between 4:30 and 5:30 o'clock p. m., Pacific Time, on the 18th day of August, 1913, in the rooms of the Board in the City Hall Annex, No. 1228 Broadway, Oakland, California, and at the expiration of the time named the bids will be opened, examined and publicly declared in open session of the Board.

August 10, 1913, and then there publicly opened, for a gunners' quarters and a filling house at the naval magazine, Puget Sound, Wash. Amount available, \$7,500—\$6,000 for gunners' quarters and \$1,500 for filling house. Plans and specifications can be obtained on application to the bureau or to the commandant of the navy yard, Bremerton, Wash. H. R. STANFORD, chief of bureau.

Firms dealing news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

BUNGALOW—1½ story and base, frame, \$2,100. San Francisco. Architect, none. Owner, A. T. Morris, 616 9th Ave., S. F. The house will be erected on the east side of 12th avenue near Anza street, and has been designed to contain six rooms and bath. Interior finish will be of pine with some redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room with brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—3 story and base, frame, \$35,000. San Francisco. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owner, Albert G. Ehrman. This dwelling will be erected on the north side of Broadway, east of Baker street, and has been designed as a modern city home. There will be in the neighborhood of fourteen rooms, several baths and sleeping porches. Interior finish will be of pine and hardwoods. Tile will be used in the bath rooms. There will be a central heating system, probably steam. Hardwood floors will be used throughout. Considerable marble and the work is specified. There will be an automatic water heater. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and contract for excavating, concrete work and foundations has been awarded to Frank M. Garden

Co. Figures are being taken for the balance of the construction.

RESIDENCES—2, 2 story and base, frame, \$5,000 each. San Francisco. Architect, Edward E. Young, 251 Kearny St., S. F. Owner, Thomas Scobie. These houses will be erected on the west side of Lake street east of 16th avenue. Each house has been designed to contain seven rooms and bath. Interiors will be finished in pine with some hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will have composition floors and tile wainscot. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

APARTMENT HOUSE—6 story and base, brick and steel, \$200,000. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Schmiedell Estate, which is the second large apartment house structure to be erected by the Schmiedell Estate in this city recently, will occupy the southeast corner of Post and Leavenworth streets, covering an area of 137½x123½ feet. Interior will be divided into sixty apartments arranged in large suites. Pine, hardwood, marble, tile and ornamental plaster will be used in interior finish. Plans provide for steam heat, passenger and freight elevators, vacuum cleaning system and hot water supply. All suites will have private bath rooms and will be equipped with wall beds.

Bath rooms will be finished in tile and cement plaster. Considerable ornamental iron will be used. Exterior of the building will be faced with pressed brick and terra cotta. Working drawings are practically finished and construction will shortly be started. Building Superintendent Rolph of Mr Meyer's office will be in charge of the work. It is probable that all parts of the work will be segregated.
APARTMENT HOUSE—4 story and base, reinforced concrete, \$10,000. San Francisco. Architect, Edward E. Foulkes, Crocker Bldg., S. F. Owner, Mrs. A. Hodge. This building will be erected on the south side of Bush street east of Stockton, and will cover an area of 31½x126 feet. There will be in the neighborhood of 27 suites arranged in apartments of two and three rooms. Interior finish will be of pine with some hardwood veneer and hardwood floors. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have cement floors and tile wainscot. Besides the suites the building will contain a large social hall and lobby. All suites will have wall beds and private bath rooms. Exterior will be faced with pressed brick. Plans are complete and figures are now being taken.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco. Architect, none. Owner, Thomas F. Barry, 3641, 20th St., S. F. The building will be erected on Green street west of Larkin, and will cover an area of 25x77 feet. Interior has been arranged for six suites of four rooms and bath each. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the living rooms and reception halls. There will be steam heat and wall beds. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be covered with rustic and ship-lap. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

CITY HALL—4 story and dome. Class A construction, \$4,500,000. San Francisco. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owners, City and County of San Francisco. Bids are now being called for by the Board of Public Works for erecting the structural steel and iron for the new City Hall. Bids will be opened on Wednesday, August 6th. A complete list of these bids will appear in the next issue of the Building and Industrial News.

CITY HALL—4 story, base, and dome. Class A construction, \$1,500,000. San Francisco. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owners, City and County of San Francisco. Plans and specifications for the granite work on the new City Hall have been completed and approved. Bids are now being called for by the Board of Public Works and will be opened on August 27th. A bond in the sum of \$200,000 is required, which indicates that the work has been estimated to cost in the neighborhood of \$1,200,000. Plans and full instructions for bidders can be secured from the Board of Public Works. An official proposal appears in another column of this issue.

TREASURY VAULTS, ETC.—Cost not stated, San Francisco. Ar-

ehitect, Supervising Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids are now being called for on the construction, including mechanical equipment, interior lighting fixtures and electric protection, for two money vaults, which are to be installed in the San Francisco Subtreasury. These vaults will cover 3,500 square feet of floor area. Plans and specifications can be secured from the superintendent of construction in this city or from the Supervising Architect at Washington, D. C. Bids will be opened in Washington on September 2nd. An official proposal appears in this issue.

SUBTREASURY VAULT ENTRANCE ETC.—Cost not stated. San Francisco. Architect, Supervising Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids will be opened in Washington, D. C., on September 2nd for construction, complete, of two vault entrances for the money vaults which are to be installed in the United States Subtreasury in San Francisco. Plans and specifications can be secured from the Supervising Architect at Washington or from the superintendent of construction in this city. An official proposal appears in another column of this issue.

WAREHOUSE—2 story and base, brick, \$15,000. San Francisco. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, Crane & Co. The building will be erected on the property on Stanford street south of Brannan, and will cover an area of 100x80 feet. Construction will be of the heavy warehouse type. No interior finish will be installed. There will be a freight elevator and an automatic sprinkler system. Metal window sash and frames are specified. Exterior of the building will be faced with pressed brick. Plans are complete and segregated figures are being taken on all parts of the work.

MACHINE SHOP—1 story, frame construction, \$2,500. San Francisco. Architect, none. Owner, E. W. Tucker, 256 Spear St., S. F. The building will be erected on Fremont 275 feet north of Harrison, and will cover an area of 24x137½ feet. No interior finish will be installed except in the front portion which will be fitted up for offices. The building has been designed for a machine shop and will be occupied by the owner. Exterior will be covered with galvanized iron. Plans are complete and in the hands of the owner who will do the work by Day Labor.

PLATS—2 story and base, frame, \$4,500. San Francisco. Architect, none. Owners, T. J. and W. J. Keenan, Hayes and Masonry, S. F. The building will be erected on the north side of Hayes street west of Central avenue and will cover an area of 25x80 feet. Interior has been arranged for two modern flats of five and six rooms with bath. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be large open fire places with brick mantels in the living rooms. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with rustic and shiplap with some brick veneer. Plans are complete and in the hands of the owners who will do the work by Day Labor. All materials are now being purchased.

PLATS—2 story and base, frame, \$5,500. San Francisco. Architect, E. P. Helms, 1334 Church St., S. F. Owner, O. K. Anderson. The building will be erected on the east side of 15th avenue north of California street, and has been designed to contain two modern flats of five and six rooms. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the living rooms and reception halls. There will be large open fire places in the living rooms with brick or tile mantels. Bath rooms will be finished in tile and tile wainscoting will be used in the kitchens. Exterior of the building will be covered with cement plaster on metal lath and rustic. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

STREET PAVING AND REPAIRS AND REFORESTING—Cost not stated. San Francisco. Engineer, Constructing Quartermaster Department, Fort Mason. Owners, United States Government. The Constructing Quartermaster's office at Fort Mason has been authorized by the War Department to prepare plans for several miles of new asphalt roads with concrete base, and for extensive repairs to roads now made. In connection with the building of new roads will follow the beautification of the Presidio. Fort Winfield Scott will be reforested with about 100,000 trees of many varieties. John McLaren, well known landscape architect is co-operating with Engineer O. W. Degen in this work.

LOBBY HALL—3 story and base, brick, \$35,000. San Francisco. Architect, Charles Paff, Merchants' Exchange Bldg., S. F. Owners, Carpenters' Hall Association. This work was mentioned here when Architect Paff was first commissioned to prepare plans. Drawings for the excavation have been completed and are in the hands of the Building Committee for figures. Plans can be secured from the Secretary at 804 Mission street. Contracts for the balance of the work will follow as soon as bids can be secured. The new building will be erected on McOppen and Valencia streets, and will be arranged for stores on the first floor and lodge halls and offices above. Exterior will be faced with pressed brick. A. Calderwood is the general secretary.

HOTEL—8 story and base. Class B construction, \$95,000. San Francisco. Architect, N. W. Sexton, Chronicle Bldg., S. F. Owners, Milton D. Gresh et al. This building was mentioned here when the site was first commissioned to prepare plans. Working drawings have been completed and a contract for the excavating and grading lot. The building will be erected on the north side of Sutter street, 100 feet west of Leavenworth and will have a street frontage of 25½ feet and a depth of 157½ feet. A complete steel frame with exterior walls of reinforced concrete are specified. Exterior will be faced with cement plaster. Main floor will be given over to a large lobby, office and floors. Upper floors will be arranged for guest rooms, all of which will have private baths. Interior finish will be of pine and hardwoods. Commercial plaster will be used in the lobby and offices. Bath rooms will have cement floors and tile wainscot. Plans provide for steam heat, elevator service, a vacuum clean-

ing system and hot water supply. Metal window frames and sash and metal lath and plaster partitions will be specified. Plans are complete and figures are being taken on the general contract.

HOTEL—3 story and base, frame, \$15,000. San Francisco. Architect, O. E. Evans, 2367 Mission St., S. F. Owner, Mr. Mohr, 579 7th St., S. F. This building will be erected on Railroad avenue near 21st avenue, and has been designed for a saloon on the first floor and a number of single rooms above. Interior finish will be of pine and redwood. Hot and cold running water will be supplied to all rooms. Besides the guest rooms there will be two public baths on each of the upper floors. Exterior of the building will be faced with shiplap and rustic. Plans are now being prepared and figures will be called for within a few days.

HOTEL ADDITION—3 story, brick and steel, \$38,000. San Francisco. Architect, William Mosser, Nevada Bank Bldg., S. F. Owner, Miss Jennie M. Blair. The present four-story hotel structure at the northwest corner of Ellis and Mason streets is to have a three-story addition, making the completed building seven stories in height and greatly increasing its capacity. The present lines of architecture will be followed out as will the interior finish, which is of pine and hardwoods. All guest rooms will have connecting baths. The heating plant will be increased and elevator service will be extended to the new portion of the building. Plans are complete and figures will be called for at once.

HOTEL—5 story and base, reinforced concrete. Cost not stated. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, John J. Clayton. This building will be erected on the north side of Howard street between 3rd and 4th streets. There will be two stores on the first floor, lobby, office, reading room and dining room on the second floor and 52 rooms on the upper three floors. In addition to the guest rooms each floor will contain a number of baths which will have cement floors and tile wainscot. There will be elevator service and steam heat. Hot and cold running water will be supplied to all rooms. Stores will have patent store fronts. Metal window sash and frames are specified. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$5,000. San Francisco. Architect, D. C. Coleman, Merchants' National Bank Bldg., S. F. Owner, M. Fisher. This dwelling will be erected in Forest Hill and has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be of pine with some hardwoods. There will be furnace heat and open fire places. Mantels will be of brick and tile. Hardwood floors will be used in the living room, dining room, den and reception hall. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on wire lath. Plans are complete and in the hands of the owner. Work will be done by Day Labor. Materials are now being purchased.

OFFICE BUILDING ADDITION—12 story and base. Class A construction,

\$500,000. San Francisco. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owner, Ogden Mills. This work has been mentioned here before when it was first announced that the addition was to be constructed. The new portion of the building will have a frontage on Bush street of 60 feet by 120 feet. New portion will follow the lines of architecture in the present building. Interior finish will be of pine, hardwood and marble. Exterior will be faced with pressed brick and terra cotta. Plans are out for figures and contracts will be awarded within a short time.

THEATRE—2 story and base. Class A construction, \$10,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. This building, which has been designed for a high class motion picture theatre, will be erected on Broadway east of Stockton. The building will have a frontage of 68 feet and a depth of 137½ feet. Interior will be handsomely finished in pine and ornamental plaster. There will be a modern system of ventilation. Construction will be fireproof throughout with a complete steel frame, exterior walls of brick and concrete, faced with pressed brick. Considerable art glass, marble and tile will be used. Plans are being prepared.

STRUCTURAL STEEL FOR ENTRANCE TOWER—Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids opened by the Buildings and Grounds Committee for furnishing and fabricating structural steel for the Main Entrance Tower and for erecting the same. The United States Steel Products Co. were low on furnishing and fabricating at \$207,142, and will probably be awarded the contract. Smith-Rice & Co. were low for erecting at \$33,000. A complete list of these figures appears under the heading of San Francisco in this issue.

PAVING ROADWAYS—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids opened by the Buildings and Grounds Committee for paving the East Roadway to Fillmore street entrance show Flynn & Treacy low at \$18-100 cents. All bids appear under the heading of San Francisco in this issue.

WAREHOUSES NOS. 3 AND 4—Frame construction. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. J. Monk presented the low bid at \$7,940 for construction of the two warehouses for the Exposition Co. Bids were opened on Thursday last by the Buildings and Grounds Committee. Eleven sets of bids were received. A complete list of these figures appears under the heading of San Francisco in this issue.

Contracts Awarded.

STORE AND ROOMS—2 story and base, brick and steel, \$10,000. San Francisco. Architect, C. S. McNally, Mechanics' Institute Bldg., S. F. Owner, Mrs. R. J. Snyder. Contractor, J. R. Hannah, Williams Bldg., S. F. Contract price, \$9,255.

S. F. A. C. Elect Officers.

New Treasurer and Two New Directors are Elected for the Year Ending July 1914.

At the regular monthly meeting of the San Francisco Architectural Club, the new Treasurer, Wm. D. Sherman, and Directors, Jas. Magee and George E. Greenwood, were elected to their respective offices for the year ending July, 1914.

New Draying Company Now In The Field.

**Federal Transfer and Draying Company
Equipped with Motor Trucks Open
Offices at 521 Sutter Street.**

The new draying firm, the Federal Transfer and Draying Company, has taken the Sutter street store of the new Press Club Building at Sutter and Powell streets. The firm consists of M. D. Perry and E. E. Howell. Mr. Perry has for years acted as traveling auditor for the Southern Pacific Company and is an all around transportation man. Mr. Ernest E. Howell has also engaged in the railroad business in the capacity of freight agent.

The Federal Transfer and Draying Co. has purchased a number of automobile trucks for both heavy and light hauling. They are at present figuring on 140,000 yards of crushed rock for a large firm in this city and have several other large contracts in prospect.

The new firm prophesies great activity for the city and particularly the transfer and draying business. Both members of the firm are closely connected with a number of large builders and will sign several large contracts within a short time.

Figures Opened By Exposition.

**Bids Received For Steel Work on Main
Entrance Tower, Paving and

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 2 story and base, frame, \$3,000. Alameda, Alameda Co., Cal. Architect, none. Owner, Werner E. Thorp, 455 Haight Ave., Alameda. The house will contain in the neighborhood of seven rooms, bath and sleeping porch. All interior finish will be of pine. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel in the living room will be of brick. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner who will do the work by Day Labor.

RESIDENCE — 2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, S. G. Downing. The dwelling will be erected in Claremont Park and has been designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine and hardwood. Hardwood floors will be used throughout. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will have composition floors and tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the owner is now taking figures on the various parts of the work.

RESIDENCE — 2 story and base, frame, \$5,000. Oakland, Cal. Architect, none. Owner, H. M. Swalley, 745 Wesley Ave., Oakland. The house has been designed to contain eight rooms, bath and sleeping porch, and will be erected at the northwest corner of Wickson and Warfield avenues. Interior finish will be of pine and hardwood. There will be furnace heat and open fire place. Mantel will be of brick. Hardwood floors will be used in the living room, dining room and reception hall. Bath room will have composition floor and tile wainscot. Tile will also be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE — 2 story and base frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, George P. Baxter. The house will be erected in Claremont Park, and has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be of pine with some hardwood and white enamel. There will be furnace heat and open fire places. Mantels will be of brick and tile. Hardwood floors will be used in the principal rooms. Tile will be used in the kitchen and bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

HOTEL — 8 story and base, brick and steel, \$120,000. Oakland, Cal. Architect, Clay M. Burrell, Albany Bldg., Oakland. Owner, Morris & Muller. This work was mentioned here when the architect was first commissioned. The structure will be erected at the northeast corner of 11th and Jefferson streets, covering a large area. Ground floor will contain stores besides the hotel entrance and lobby. Upper floors will be arranged for about 200 guest rooms, a large percentage of which will have connecting baths. Interior finish will be of pine and hardwoods. There will be steam heat and elevator service. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Bids have been taken for the steel work and plans for the balance of the contract are now out for figures.

Contracts Awarded.

HOTEL—7 story and base, brick and steel, \$75,000. Oakland, Cal. Architects, Oliver & Thomas, Pantages Theatre Bldg., Oakland. Owner, Roger Colt, Contractors, Sommarstrom Bros., 1011 Franklin St., Oakland. Contract price not stated. Note: Contractors are now taking subfigures on the various parts of this work.

HOTEL—7 story and base. Class A construction. Cost not stated. Oakland, Cal. Architects, Bliss & Enville, Balboa Bldg., S. F. Owners, Oakland Hotel Company, Contractors, P. J. Walker Co., Monadnock Bldg., S. F. This contract is for finishing and altering the upper two stories of the Oakland Hotel. Contract price is stated at \$150,000.

RESIDENCE — 2 story and base, frame, \$20,000. Oakland, Cal. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owner, Edward Beck, Contractors, Powell Bros., Alameda, excavating and foundation work; Schnebly-Hostrawser & Pedgrift, First National Bank Bldg., Oakland, carpentry and plastering; Charles Sturin, Oakland, plumbing. Balance of the work is out for figures.

SCHOOLS — Temporary buildings, frame construction. Cost not stated. Oakland, Cal. Architect, City Architect, J. J. Donovan, Security Bldg., Oakland. Owners, City of Oakland. Bids opened at the last meeting of the Board of Education show the following men low: Intermediate School and Temporary Science Building, McGinty & Son, \$4,955; Portable Schools, John R. Paulkes, Schools 4, 5, and 6, \$2,640, \$3,300 and \$3,960 respectively, and for the Bay School O. B. Ackerman & Son, \$3,200. A complete list of these figures appears under the heading of Oakland and Alameda County in this issue.

Oakland School Bids Opened.

Bids Opened by Oakland School Board for a Number of Minor Jobs. Contracts Not Awarded.

Bids were opened for the construction of Intermediate School No. 1 and for a temporary science building by the Oakland Board of Education. Bids were also opened at the same time for three portable schools and for a frame building known as the Bay School. A complete list of the bids opened follows:

LOS ANGELES AND SOUTH-CALIFORNIA.

POST OFFICE—2 story and base. Class A construction. Cost not stated. Pasadena, Los Angeles Co., Cal. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans and specifications are now out for figures for the new Federal Building which is to be erected in Pasadena. The building will cover a ground area of approximately 12,000 square feet. The main portion is to be two stories high with a one story wing in the rear. Construction will be fireproof. Interior partitions will be of hollow tile and metal lath and plaster. Exterior will be faced with stucco. Roof will be of clay tile. Interior finish will be of pine and hardwoods. A general contract, including heating, electric work and light fixtures will be let. Plans can be secured from the Supervising Architect or from the custodian of the site. Bids will be opened in Washington, D. C., on September 11 at 3 p. m.

APARTMENT HOUSE—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, E. J. Borgmeyer, Hiernian Bldg., L. A. Owner, M. S. Kornblum. The building will be erected on Benton Boulevard near 7th street, and has been designed to

contain 27 suite which will be arranged in apartments of two and three rooms and bath. Interior finish will be of pine with some elm panels and hardwood floors. Plans provide for steam heat, elevator service and a vacuum cleaning system. Tile will be used in the bath rooms. Exterior of the building will be faced with glazed pressed brick. Plans are complete and figures are being taken.

LODGE HALL—3 story and base, brick and steel, \$40,000. San Pedro, Los Angeles Co., Cal. Architect, Thornton Fitzhugh, Pacific Electric Bldg., L. A. Owners, San Pedro Masonic Temple Association. The building will be erected on a corner site and will cover an area of 50x100 feet. The entire building will be given over to the use of the association. There will be several lodge rooms, library, reading rooms and social halls. A completely equipped banquet room and kitchen will also be provided. Interior finish will be of pine and hardwood. There will be steam heat. Metal window sash and frames and metal lath and plaster interior partitions are specified. Exterior of the building will be faced with pressed brick and artificial stone. Plans are nearly complete and figures will be called for shortly.

HOTEL—12 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, Frederick Noonan, Wright and Callender Bldg., L. A. Owner, N. W. Stowell. This building will be erected on Spring street south of 4th, and has been mentioned here before. Plans provide for a total of 275 rooms and 264 baths, besides the general offices, lobby and parlors. There will be steam heat, elevator service, a hot water system and vacuum cleaning system. Interior will be finished in pine, hardwoods, marble and tile. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with glazed brick and terra cotta. Plans are complete and figures are being taken.

STORES AND OFFICES—4 story and base, brick and steel. Cost not stated. San Pedro, Los Angeles Co., Cal. Architect, E. H. Dorr, 1811 South Main St., L. A. Owner, N. O. Anderson. The building will cover an area of 25x75 feet and will contain one store on the first floor and 27 modern offices on the upper three floors. Interior will be finished in birch. Plans provide for elevator service, hot and cold running water and gas fuel. There will be metal window sash and frames and patent store fronts. Exterior of the building will be faced with glazed brick. Considerable marble and tile will be used. Plans are complete and figures are being taken.

SCHOOL—2 story and base, brick, \$40,000. Owensmouth, Los Angeles Co., Cal. Architect's name not given. Owners, Owensmouth School District. The building has been designed to contain eight standard size class rooms, an auditorium and principal's office. Interior will be finished in pine with maple floors. There will be a central heating system and modern ventilation. Exterior of the building will be faced with glazed brick. Plans and specifications have received the approval of the Board of Education and are now out for figures. Bids will be

opened on August 11th. Plans and specifications can be secured from the Los Angeles Suburban Homes Co., Trust and Savings Bldg., L. A.

The structure will cover a ground area of 50x62 feet. Entire ground floor will be subdivided into modern offices. Banking rooms will be finished in hardwood, marble, tile and ornamental plaster. There will be no coin and safe deposit vaults. Interior finish of the offices will be of pine. There will be steam heat and elevator service. Exterior of the building will be faced

with cut stone from a local quarry. Plans are complete and figures are being taken.

WAREHOUSE—2 story and base, brick and concrete. Cost not stated. Portland, Ore. Architect, Aaron Gould, Worcester Bldg., Portland. Owner's name withheld. The building will be erected on East Washington street and will cover a ground area of 100x100 feet. Rear portion of the structure will be of reinforced concrete construction and the part facing the street of brick. There will be large freight elevators, automatic sprinklers and fireproof doors. Metal window sash and frames will also be specified. Exterior will be faced with pressed brick and cement plaster. Plans are still in the preliminary stage. Further mention will be made of the work as the plans progress.

SCHOOL GYMNASIUM—1½ story and base, brick. Cost not stated. Portland, Ore. Architects, Doyle & Patterson, Worcester Bldg., Portland. Owners, Reed College. The building will cover an area of 70x160 feet, the main feature of the building being a hanging gallery around the four sides. The building will be arranged with one portion for men and one for women. There will be special exercising rooms, two hand ball courts and swimming tanks. Baths will be equipped with showers. Both wings of the building will be equipped with metal lockers. Plans provide for steam heat. Exterior of the building will be faced with cement plaster and pressed brick. Plans are complete and are being figured.

Contracts Awarded.

MAUSOLEUM—1 story, reinforced concrete and stone, \$35,000. Salem, Ore. Architects, Ellis G. Lawrence and William G. Holford, Chamber of Commerce Bldg., Portland. Owners, Portland Mausoleum Co. Contractors, Hurley-Mason Co., Board of Trade Bldg., Portland. Contract price, \$35,000.

STORE AND OFFICE ALTERATIONS—1 story and base, brick and steel, \$50,000. Portland, Ore. Architects, Whidden & Lewis, Wilcox Bldg., Portland. Owners, Weinhard Estate. Contractor, Edward Kilfeather, 427 3rd St., Portland. Contract price, \$50,000.

SEATTLE AND WASHINGTON.

FACTORY BUILDING—1 and 2 story, brick and steel. Cost not stated. Seattle, Wash. Architects, Stephen & Stephen, New York Bldg., Seattle. Owners, Broderick & Bascom Co. The one-story factory building will cover an area of 8x210 feet. There will also be a two-story fireproof oil house and a frame carpenter shop. Plans and specifications include metal window sash and frames and structural steel. About 1,000 cubic yards of fill is to be made. Plans for the work are now being prepared. Exterior of the buildings will be faced with stock brick.

THEATRE—3 story and base. Class A construction, \$150,000. Vancouver, B. C. Architect, J. J. Donnellan, 319 Pender street, Vancouver. Owner's name withheld. The building will be erected on Keefer street near Main and will cover an area of 75x120 feet. There will be a main auditorium and

two galleries. Construction will be fireproof throughout with a complete steel frame, reinforced concrete walls, floors and roof. Interior partitions will be of metal lath and plaster. Interior finish will be of pine, hardwoods and ornamental plaster. A modern system of heating and ventilating will be installed. Exterior of the building will be faced with cement plaster. Plans are now being prepared and will be out for figures within a month.

COURT HOUSE—Class A construction \$200,000. Walla Walla, Wash. Architect, Henry Osterman, Walla Walla. Owners, Walla Walla County. The County Commissioners have voted to construct a new building costing \$200,000. Architect Osterman was informally commissioned to prepare plans, but this action was not unanimous. A competition may be called. Further mention will be made of the work as it develops.

DOMESTIC ARCHITECTURE OF TODAY.

With Special Reference to the Country Home of Moderate Cost.

"Every man has at some time of his life, personal interest in Architecture."—Huskin

By Mr. Wm. Knobl, Architect, Cleveland, in the Ohio Architect, Engineer and Builder.

It is held that architecture is essentially and inevitably the unconscious expression of a national spirit; that architecture reflects the history, character, and temperament of a people; and that an indigenous style of architecture is produced by important factors—wealth, peace, leisure, civilization, and culture. The object of this paper is to illustrate these facts as manifested in the branch of architecture called domestic, with special reference to the country and suburban home of moderate cost in America.

In every art and science, we find good interperced with bad. The cockle is sure to appear, and appears in proportion to the power of the enemy under the guise of ignorance, commercial gain, and ostentation. America up to within a few years, was one vast cockle field of bad architecture. Rarely was an ideal home to be found, except those that remained from Colonial times. The majority of small houses during that period were built by men who had no knowledge or skill in planning, and whose notions and thoughts were entirely commercial. True, there are still many such men committing blunders for personal gain, but luckily, the people at large are realizing the defect and are demanding homes to suit the conditions of today. What influence this demand has done to domestic architecture is apparent throughout the land.

To cover the entire field properly we cannot confine our observations to one region. We must go to Massachusetts, New York, and Eastern Pennsylvania, to study Colonial and Italian adaptations; Western Pennsylvania, Ohio, and Michigan, abounds with English types; Chicago has produced a style of her own, called the Progressive, and California claims the Bungalow. This variation of styles is

due no doubt to the predominant sentiment that prevails in each section in favor of some particular style. Art of building always yields to the demand.

Yet all these styles are being made thoroughly native, Indigenous American, no matter whence the influence. Indeed, we still go back to precedent, but we use it no more as a model but as an inspiration. The Colonial and the English especially serve as building impulses, and on their simple and sound foundations we are building notable work redolent with race and informed with fine feeling. Examining the work of the various styles, we find no copying. Good architects today assimilate the fine spirit of past masterpieces, grasp the essentials, and make it more or less their own.

Perhaps the Colonial, on account of its note of sincerity, is the most favorite precedent on which we depend. It is the most national. True, it abounds chiefly in the East, yet it is found in every section or region. Its simplicity of mass, directness of expression, and its refinement of detail are appealing. English homes have much that attract our admiration. We cannot but admire the quaint beauty of the old English country houses. They are well adapted to the English landscape, but to copy them outright would be disastrous in America. We can, however, emulate the spirit in which the early English home-builders worked. They knew the principles that underlie a good home. Some of the most salient characteristics are the groups of chimney stacks that suggest warmth and hospitality and long lines of ridge and wall contribute to an air of restful seclusion and retirement. The general plan, however, is unsuited to our conditions of living, excepting for details. The Colonial and English predominate here, but there is still another type that is eliciting much admiration—the Bungalow. To California we principally owe this charming, free, rugged, and cozy type. Influenced by mostly oriental—Japanese, Sikh, Bhutan, Thibet—sources, is yet so nicely assimilated by an architect of knowledge and taste, and so thoroughly adapted to every condition—environment, cost, service, beauty—that it has spread like witchery throughout the land, and verily threatens the supremacy especially in the more inexpensive types.

All these types, though widely varied on the exterior, are yet much alike in plan. The American inherent desire for fresh air and sunshine prompts him not to omit sun rooms, sleeping porches, and to have if possible, every room face the south, not only for the sun but also for the cool breeze. On the first floor all main rooms are connected with large openings forming long vistas, and realize the importance of working from within outward, instead of as in former years from without inward. Whatever beauty the house possesses is based on sound and logical planning and construction. The plan is the outcome of actual requirements based on the habits of living of its occupants.

Unlike the city house built on a narrow lot with only a few feet between, the ideal home always has a beautiful setting with sufficient space between houses. Therefore the garden is likewise eliciting as much care and attention as the house itself. We are

getting back to mother earth—to nature, and under nature's influence we cannot go far wrong. A home surrounded by a beautiful garden has and will always be admired. Consequently in speaking of the home the garden is necessarily included to make one harmonious whole.

Perhaps, in no other class of building has been more thoroughly developed, within the last few years, the principle of beauty known as harmony or adaptation which includes economy, order, unity in variety and proportion, and has more thoroughly inculcated the characteristic of durability, comfort and homelike charm than in the home of moderate cost. This principle and these characteristics are also found in the more expensive home, but these cannot so well reflect the spirit of the people at large, as do the smaller and more humble types.

This enthusiasm displayed in the development of the American home is attributed to various causes. Good architecture has always been held to be the outcome of gradual accretions to a simple demand—hence the study of past work. Architect (he is now considered a necessary evil) and owner alike seem to vie with each other in the gathering of ideas and material through various media; by travel abroad and at home, books and periodicals on architecture find their way into every home. These means especially coupled with good taste are keeping us in touch with all past and present achievements. Also, at no time in the past has country life been more desired and appreciated than at the present time. This condition is somewhat due to the improved modern transit facilities, to high cost of living, and the over crowded conditions of our cities. The people have learned to prefer the beautiful flowers, pure air and fresh, wholesome food, to the foul smell of the gutters and dirty streets of the city.

Again, it is fully realized that the home to be ideal must be both beautiful and practical—must perform its functions well and be pleasant about it. Where can it perform these functions better than in the country? Within we have not only shelter from the elements but also the benefits of the sun and breezes; without it is made indigenous by the proper selection of style, materials, and colors that harmonize and blend happily with the immediate surroundings. This is true in Eastern Pennsylvania where stone is easily and cheaply had, and the Colonial style prevailing, the ideal home that is accepted as native is the home built of stone in the Colonial style. In California the landscape is dotted with beautiful homes that appear as a natural growth. Field stone and rough timbers constitute the principal material, and in the hands of the architect who knows the caprices of the style, inject into it the fine, free, rugged and hospitable spirit of the Bungalow. Thus it was in old England where we find in the various regions styles that harmonize and blend nicely on account of this law of nature. In those early days they were compelled to build of materials most easily obtained, thus fulfilling the law unconsciously. We, on the contrary, by our present means of transportation can build of materials gath-

ered from every part of the globe as economically as the materials gathered near at hand.

Travel and reading, besides working wonders throughout the land, have also wrought their mischief. There are always some who do not comprehend the value of a native style and erroneously model their homes after types individually beautiful and perfect under its local conditions, but brought forth and planted bodily in a foreign land and climate loses its charm and wits like a tropical plant in the arctic zone. It behooves us to go back to precedent, but we must not remain there. The spirit and principles alone are of value to us.

If we are fortunate to have the inheritance of past and foreign examples to lead us aright, how much greater will be the inheritance of future generations! They will not be required to look beyond the confines of their own country for inspiration as we do today, but culture and taste will guide them to avoid what is ugly, uncomfortable, impractical, and follow in the footpath of the present generation until the final principles and ultimate ideals will be fully realized by all classes throughout our country.

This fine spirit of home life so broadly manifested in the building and adornment of the house is surely the most important as well as the most human expression of the art of man, and cannot but affect and uplift the national character. Shallowness, ostentation and pretention will soon be entirely avoided, and stillness, quiet earnestness that seems to lull and soothe the spirit with promises of peace, are the things that will predominate. Such a home is truly a great achievement, a daily influence and delight.

SCAFFOLDING REQUIREMENTS.

Text of the Law Enacted at the Last Session of the Legislature.

Builders generally are interested in the law enacted at the recent session of the California Legislature requiring certain width of scaffold to be erected for the protection of workmen and the safety provisions required. This law is in effect on August 10th next and we herewith print it in full:

CHAPTER 48.

An act to regulate certain scaffolding or staging for the protection of workmen; requiring that in addition to the duties imposed by any law upon employers using or directing or permitting the use of scaffolding or staging swung or suspended from an overhead support such employers shall be subject to the provisions of this act; fixing penalties for a violation hereof to be the same as provided in section 402c of the Penal Code; and providing for the enforcement of this act by the commissioner of the bureau of labor statistics.

[Approved April 23, 1913.]

The people of the State of California do enact as follows:

SECTION 1. All scaffolding or staging, swung or suspended from an overhead support which is more than twenty feet from the ground or floor, shall have a safety rail of wood or other equally rigid material of sufficient strength to bear any sudden strain there against equal to four times

Veneered Panels of

San Francisco

the weight of an ordinary man, such rail to be properly secured and braced in a manner to withstand a sudden strain as hereinbefore prescribed; such rail to rise at least thirty-four inches above the floor or floors or main portions of such scaffolding or staging, and extending along the entire length of the outside and the ends thereof, and properly attached thereto to withstand any strain as hereinbefore provided; and such scaffolding or staging shall be fastened so as to prevent the same from swaying from the building or structure, or place of work where such scaffolding or staging is being used. Any and all parts of such scaffolding or staging shall be of sufficient strength to support, bear, or withstand, with safety, any weight of persons, tools, appliances, or materials that may be supported thereupon or that are to be supported thereby which such scaffolding or staging is being used for any of the purposes thereof.

Sec. 2. In addition to the duties imposed upon an employer by any law regulating or relating to scaffolding or staging, it shall be the duty of such employer who uses or permits the use of scaffolding or staging, as defined in section one of this act, in connection with construction, alteration, repairing, painting, cleaning or the doing of any other kind of work upon any building structure, or other thing or place of work, to furnish safety lines to tie all looks and hangers back on the roof of such building, structure or other thing or place of work, and to provide safety lines hanging from the roof, securely tied thereto, and one such line to be provided between each pair of hangers or falls and near the ends of all such scaffolding or staging. When planks are used for the platforms or floors of such scaffolding or staging, they shall be not less than fourteen inches in width, and not less than one and one-half inches in thickness, and shall be of wood free from knots or fractures impairing the strength of such planks. Not more than two men shall be allowed or placed to work between two hangers or falls upon such scaffolding or staging.

Sec. 3. Any violation of the provisions of this act shall be punishable as provided in section four hundred and two c of the Penal Code, and shall be in addition to the penalties provided therein for the violation of any of the provisions of the said section.

Sec. 4. It shall be the duty of the commissioner of the bureau of labor statistics to enforce the provisions of this act.

INTERIOR TO SEA.

There are four or five railroad lines crossing the Sierra Nevada mountains. There is one railroad line through the Tehachapi mountains and another one in course of construction. At least two railroad lines pierce the corresponding mountains at the northern end of California. All these mountains are higher and more difficult than the Coast Range mountains through which there is yet no single railway north of Tehachapi.

The project has been discussed of extending the Alameda line of the Southern Pacific beyond Coalinga to connect with a railroad on the other side to San Luis Obispo. The railroad on the other side is a mere coal track little used, but it has at least a graded right of way on which heavy rails could be laid. The road on this side as far as Alameda is a first class modern railroad and the gap between is extremely short in miles. It happens, however, that these miles measure the exact crest of the Coast Range mountains and that most of the distance would have to be traversed by expensive tunneling. With all the rest of the line on both sides, however, already complete, it would seem that the development of California is now sufficient to justify connecting up the intervening ten miles or so, even if this particular strip is very expensive.

Further north there are passes already surveyed, through which it is entirely practicable to build railroads from Fresno to Monterey Bay. The existing lines of the Southern Pacific on the two sides of the mountains are close enough at one point so that connection between them would be by no means prohibitive in cost. A direct route independently owned would be better, of course, but the physical connection could be accomplished by either method.

In extreme northern California, there is no connection with the immensely rich and beautiful Humboldt Bay country except by sea or overland by road. This evil, however, is being remedied and the railroad which will connect San Francisco and the interior or with Eureka is now under construction and well towards completion. Otherwise the only connection between the interior and the coast has been by way of San Francisco Bay, where nature itself pierced the mountains.

The railway system of California will never be complete and the social and business unification of the state will not be accomplished until it is

possible to traverse the state in an east and west as well as a north and south direction. Let it be hoped that some of the rumors on this subject may turn out to be true, and that some of the projects may be realized in actuality. Then the present artificial isolation of the sections will be at an end.—Fresno Republican

OIL PROSPECT IN GLENN COUNTY.

WILLOWS (Glenn Co.), July 30.—Glenn County is nearer actual oil development than ever before. Dr. H. Hordon has closed a deal with a number of oil operators of Los Angeles and Bakersfield, to put down a wild cat well in the foothill section of the Coast mountains. The deal is final with the exceptions of signing up a part of the acreage. The operators require a very large field on long options. Among the ranches which will be leased is the Butte ranch owned by Hon. Frank Freeman and associates. It contains upwards of 8,000 acres. The Nye ranch is another one of the properties which will be included in the lease, it is said.

All told a field of 40,000 acres will be optioned. Dr. Hordon is convinced that within a few months actual drilling will have been started.

Many years ago an oil test well was begun on the Nye ranch, which lies near Pruto. The hole was forced down 2,000 feet and the company ran out of funds. The driller who had been on the job kept on pushing downward as long as he could get a cent. He even burned all the fences near by and pawned his personal effects to get fuel to keep up steam. But at last he gave up when the tools stuck. There were good indications of oil.

ELECTRIC SMELTING IN NEW CALEDONIA.

An important hydroelectric plant being erected by a French company in the South of New Caledonia for the production of ferromanganese and ferrochrome involves the construction of two generating stations at different levels on the Yate River. For the lower station, which is being built first, the water will be diverted from the river by a dam 13 feet high to a tunnel 2,500 feet long, which will deliver 31,000 cubic feet per minute, with a head of 350 feet, to the turbines. Electric smelting works will be erected in close proximity to the generating station. A similar quantity of water, with a head of 157 feet, is available for

the higher plant, which will generate 7,600 horsepower to be converted to high-tension current for transmission to various points. A reservoir is also being constructed by means of a dam 52 feet high. It is expected that the lower plant will be completed in about two years, and that then the other installation will be started and will occupy three years to complete. The entire scheme is estimated to cost \$1,000,000 to \$1,170,000.

RAILWAY BUSINESS FOR MAY.

During May the railways of the United States received for their services to the public an average of \$8,230,000 a day; it cost to run their trains and for other expenses of operation \$5,920,000 a day; their taxes were \$311,500 a day; their operating income \$1,972,322 a day for the 226,597 miles of line reporting, or at the rate of \$8.93 for each mile of line for each day. Thus for every six dollars of their earnings which remained available for rentals, interest on bonds, appropriations for betterments, improvements and new construction, and for dividends, the railways had to pay more than one dollar in taxes.

All of these amounts are substantially greater than the similar returns for May, 1912. They are from the summary of the earnings and expenses compiled by the Bureau of Railway Economics from the monthly reports of the steam railways of the United States to the Interstate Commerce Commission. They include over 95 per cent of the mileage and earnings of all the railways of the country.—Bureau of Railway Economics.

COMPLETION OF A GREAT HYDRO-ELECTRIC PLANT.

With the completion by the Mexican Light and Power Company of its light and power plants in Mexico, another great hydro-electric work is about to be put in service. The main power plants have an aggregate capacity of 127,500 horse-power and auxiliary plants at four separate points bring up the total horse-power to about 150,000. The work includes large storage reservoirs in the mountains, tunnels through the intervening ridges of rock and transmission lines. The aggregate storage capacity is sufficient to keep the plants in operation for six months without any rainfall. The current will furnish light and power for the city of Mexico and its capacity is sufficient also to run the trolley systems in the city and the whole Federal district.—Scientific American.

The San Francisco Bulletin is publishing a lot of letters purporting to be from women of the Underworld. It proposes to be publishing all this to give the citizens of California insight into some of the horrors of the social evil so that steps may be taken to remedy existing conditions.

If this is truly its object it is going about it in the worst way that the subject could be approached. Most of the letters read as if they originated in the mind of some newspaper reporter. Much of it is nasty. Most of it neither prints a moral nor adorns a tale but is simply the story of a morbid life.

The Call printed an editorial last week in which it called attention to the

utterances of the press throughout the state in regard to this latest hobby of Fremont Older. The Bulletin promptly accused it of getting out the hammer. If some one don't knock on such a proposition where is the matter going to stop?

The Bulletin is evidently aiding the cause it professes to suppress. For the girls of the class it seeks to protect read the articles and are there informed of things they perhaps would not have thought of. It is a case of suggestion and printing a lot of stuff that is fiction in a great measure and which can do no one any good.

The United States Department of Agriculture has called a meeting in Pittsburgh for today, August 1st, to which many different societies have been invited to send delegates and which is to devote its attention to petroleum and its by products.

Inasmuch as petroleum and its products is occupying such a commanding position in the industrial life of today the meeting should be one of importance. The internal combustion engine, including the automobile, the aeroplane and the various forms of gas engines depend entirely upon the oil industry. So the increasing use in the navies of the world, not only in the battle ships, but in the merchant marine, oil has become an almost indispensable requisite, for no ship that burns coal can compete with oil burning vessels.

This movement in relation to the oil industry is being promoted by Mr. Irving C. Allen, expert in Petroleum in the United States Bureau of Mines, who has given the following statement on the object of his bureau:

"A study of petroleum and its products has never been thoroughly or comprehensively made within the United States.

"Since each year crude petroleum and gases are produced in the United States, having a value in excess of \$200,000,000, it is most important that a thorough study of these materials be undertaken.

"This study should include the origin, geology, statistics, drilling methods, transportation and uses of crude petroleum, and a critical and scientific description of petroleum of all kinds, including bitumen and gases."

The proposed technical body will work in co-operation with the International Petroleum Commission, organized in Paris as far back as the year 1900. This action on the part of the Bureau of Mines should receive the whole-hearted co-operation of everyone who is interested in the petroleum question, and particularly of the powerful manufacturing corporations which directly or indirectly are dependent upon the petroleum industry.

A registration of more than 142,000 is reported at the close of the books in the Registrar's office last Saturday night. This indicates that the people are taking an interest in the forthcoming bond election and if the bond election of last December is to be taken as a guide it is evident that the people will exercise some discrimination in their votes, however intelligent it may be.

No doubt some people will be misled by the loud noise about the in-

crease in taxation and increased property valuation on account of the increase in bonded indebtedness. It should not be forgotten that the street railway properties will pay for itself, that the Geary Street road is an accomplished fact and that the Union Street line is a paying investment. Not only will the municipal lines pay for themselves but they will furnish the people better service and compel the United Railroads to give better service. Such newspapers as the Chronicle are anxious about the taxpayers simply because the revenue of the private interests they represent are in danger. The big tax payers they purport to represent have in many cases acquired their holdings by plundering the people. And the real reason for their opposition is that they know that as soon as the municipality gets control of its own property and demonstrates that public utilities can be operated by the public at a profit that there will be an end to their private graft.

Some have expressed doubts as to the bonds being sold on the present market. They will meet as ready sale as any other bond of the municipality. And even if the city should have to sell them at a discount it would be a paying investment for we need the roads and need them badly. Every citizen will help to pay for them. So it's up to us to get out from under the domination of the United Railroads as much as possible.

HONORS AHEAD.

Mr. E. J. S. Cahill, of San Francisco, was recently elected a fellow of the Royal Geographical Society of London.

Mr. Cahill has devoted much time to the city planning problem, being one of the first in the United States to project city improvements on a broad scale. He has even been called the originator of the "civic center."

The "civic center" idea was first conceived by him in 1901, when he presented the idea to the late Daniel H. Burnham.

Among Mr. Cahill's contributions to geographic science is his newly invented project for laying out all the land of the world in one comprehensive map without exaggeration or distortion.

The only other member of the American Institute of Architects who enjoys the distinction conferred upon Mr. Cahill, is Ralph Adams Cram, of Boston.—Architectural Record.

PLANS FIRE DISTRICTS.

SACRAMENTO, July 31.—The experience of Marin county during the time when a fire on Mount Tamalpais threatened Mill Valley and several other towns in the vicinity has led State Forester Homans to begin a systematic investigation of forest areas in California frequented by summer vacationists, with the idea of suggesting that they be organized into fire districts.

The field work in connection with the investigation is being carried on by J. B. Schroeder, one of Homans' assistants, who is now in the Santa Cruz mountains.

The investigation will cover the Lake Tahoe region and also the Russian River section.

Frank Neidick

Carpenter and Builder
Phone Mission 5126

2669A Howard St., Bet. 22nd and 23rd
San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Bind your copies of the Building and Industrial News in PERMANENT BOOK FORM

We have succeeded at last in securing a really practical binder. The Building and Industrial News contains a great deal of technical and statistical information that many of our readers find worth saving for future reference. There is no better way of preserving it than using the "BIG BEN" BINDER

which preserves the magazine in permanent book form. This binder is handsome and durable, and makes the permanent filing of magazines as easy as filing ordinary papers. It opens flat like a regular book, and comes in fine art cloth with the name of our Journal stamped in gold on the front cover and back. For persons who desire to

Save These Valuable Articles

this binder is just the thing, as it holds several numbers of our Journal and can be used again indefinitely year after year, simply by taking out the old Journals and inserting the new ones as they come to you.

By making special arrangement with the manufacturers of this best binder that has ever been put on the market, we are able to furnish them to you for **ONLY \$1.00 EACH.**

Merely send us your name and address and say: "Send us your binder. I enclose \$1.00," and we will send the binder promptly all charges prepaid.

Send in your orders now and begin saving the statistical and technical information, articles and valuable data, that will be published in The Building and Industrial News this year.

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

Price 50 Cents

For Sale By All Druggists, or will be sent by mail postpaid by the manufacturers,

Otis Elevators

Sustain Architects' Endorsement

The Architect who specifies Otis Elevators identifies himself and his client with the most thorough Elevator organization in the world---an organization with fifty-seven years' experience and success in building Elevators.

Our Elevators --- of every type --- from the simplest Hand-power Elevators to the most elaborate Electric and Hydraulic Installations---are the world's most finished Elevator products

We maintain Branches in eighty-one cities in the United States the distribution of which offers to users of Otis Elevators an inspection and Repair Service unapproached by any other Elevator Company.

Your clients and their engineers who use Otis Elevators will receive the benefit of our broad engineering experience and the unequalled facilities of our "Service Department." We are always glad to co-operate with them and with you to the fullest extent.

We Make

Geerless Traction Elevators. Worm Gear Traction Elevators. Drum Type Elevators. All Types of Hydraulic Elevators. Freight Elevators of Every Description. Automatic Residence Elevators. Electric Dumbwaiters. Incline Railway Hoists. Blast Furnace Hoists. Escalators. Inclined Freight Elevators. Gravity Conveyors, Etc.

Let us send you our latest books giving detail description of Otis Elevator products.

Editorial Comment.

The record shows that \$5,362,000 was expended for automobiles in California during the month of July. This certainly indicates that business is good in the automobile line if nothing else. Perhaps a great majority who spend money for this luxury can ill afford to do so. Any way 2600 persons expended more than 5 million dollars for machines and it shows that there is no lack of interest in motoring. Ordinarily such an expenditure indicates a luxury. If that is so there is not much alarm over hard times at present in California.

The statement of the Railroad Commission concerning the earnings of the Wells Fargo Express Company in California is as follows:

Gross earnings per year \$4,568,436.18.
Paid to railroads, \$1,937,019.73.
Balance, \$2,571,416.45.
Operating expenses, \$1,729,318.91.
Profit for the year, \$842,097.54.
Value of the company's property used in California business, \$613,233.65.
Rate of return per annum, 136 per cent.

The proposal is to reduce these charges by \$750,000 per annum so that the company will receive a net income of 10 per cent on their investment. This is a fair rate for a public service corporation and one concerning which there should be no objection. It is said that the Express Company threatens to leave the state. If it does there would be plenty of capital to take its place. There has been a lot of talk and a lot of bunk handed out to the people about the peculiar abilities of Railroad magnates and bankers. That they possessed peculiar wisdom and all that sort of thing. The fact that when the nigger in the woodpile is discovered it is shown that about nine-tenths of their game is bluff.

The public agitation in the ranks of the progressive elements of both parties has reached a point where publicity is demanded of the business methods of all monopolies. There are no divine right Biers in modern industry. The man of ordinary intelligence has passed that stage of credulity.

Four laws have been held up by the Referendum petitions that have been filed. The Blue Sky law, the Red Light Abatement measure, the Law establishing a Water Commission and Act providing for the non-sale of game. The Water Commission Act and the Blue Sky Law are opposed by people interested in getting water rights and in promoting speculative enterprises. The

Red Light Measure and the Non-Sale of game enactment have partisans on both sides that vehemently believe in their position. They think that the present laws are sufficient so that matters will be voted on next fall.

So far no Initiative petition has been filed. The expense of getting signatures to a petition is so great that unless there is some interest to be served that an Initiative petition is out of the question unless there is a great popular demand for some measure. There was an agitation on foot to abolish the poll tax by Initiative petition but so far it has not materialized.

The popular government ideas of Initiative and Referendum are a safety valve on legislation. Under these restrictions the people can not be saddled with onerous laws without their consent. The general result will be for the good of the people.

Attention has been called to the habit of automobiles passing street cars that have stopped to allow passengers to alight by the fact that a Miss Barker was killed in Berkeley last Tuesday under just such circumstances. It seems to be a custom of many drivers to come up just as the car stops and attempt to pass at that particular time and many times without stopping or even blowing their horns. So, too, when passengers wish to take the car at crossings there will be about a dozen teams and automobiles come along and prevent one from taking the car. There should be some ordinance passed giving people the right of way of streets under such circumstances. And vehicles should be required to pass on the closed side of the car that is receiving or discharging passengers.

The Mexican situation seems to be assuming serious conditions in that there seems to be no party in the revolutionary republic of sufficient power to be said to be the real government. Huerta has assumed power under circumstances that are most revolting to any idea of justice and modern civilization. He came to power by intrigue and treachery and then assassinated his chief and several members of his family. He now demands that the United States government recognize his rule. President Wilson has wisely reserved his action and has sent a man of high character as a special ambassador to that country. It looks like Huerta was afraid of an impartial investigation, that the charges that foreign capital is his backers are true. The shooting of Dixon at El Paso and the action of Huerta seems to be some intrigue to force the hand of the United States.

The Value Of Trade Papers.

An Essay Read Before the National Association of Master Plumbers at Philadelphia,
By William J. Woolley, President, Indiana State Association.

Enthusiasm is the true leader of men: It is the spirit that knows no defeat. Emerson has branded it the motive power of success; the heart-to-heart quality that "gets" the bond of awakened sympathy.

The proper Energy and Enthusiasm makes a lever which with a prop of common sense will move the world. It called our forefathers from the field and bench, to repudiate the acts of their mother land, even at the cost of their own lives.

The true value of enthusiasm cannot be denied: The more of it we possess, the more success we attain. It has brought us together here today, and it alone will be responsible for the success of this meeting, and of the success of the projects started here this week.

So with this thought in mind, I believe that I could not offer a more fitting subject than the one I have chosen, for in my mind the trade paper is the generator, or in more fitting terms the mill that grinds out enthusiasm.

Language written and transmitted through the press, is the highest medium for enlightening, guiding and assisting men to the path of progress and success.

The writings of great men would not be purchased if the readers were capable of the same thought. There are few thinkers. Most people work mechanically, following in the paths of others, and if the leader falls, so do they.

The business world knows only those who are active, who do things; and such men invariably become leaders. The street urchin absorbs the ideas of others, and becomes a financial king—a power among men. The rich man's son allows these same ideas to go for naught, and often becomes a menace to society, a loafer and a disgrace to his family.

Man must progress, he cannot stand still. He must absorb the ideas of others; those ideas are published in the trade papers and for his benefit. It is a means of developing him for a higher plane, and a higher duty.

The Trade Paper produces and agitates the thought that moves us to action; it develops enthusiasm that pushes us to success.

For more than twenty-five years, the Trade Papers have been constantly grinding out enthusiasm, drafted by the many brilliant minds of our craft, and which to my mind is responsible for our wonderful progress, and I say wonderful, because it is in the true sense of the word. Thirty years ago, we represented merely a trade that installed luxuries, while today we are fast becoming merchants, whose ware is not a convenience of the highest type, but a necessity. One of the reasons we are here today combatting against some of the evils that now exist in connection with our business, is because we allowed our enthusiasm to ebb, which permitted the evils to creep in and develop in size, before we awoke to their harmfulness.

It is needless for me to go into details pertaining to the development of our craft by the influence created by the many practical, as well as theoretical articles published in each edition of the various Trade Papers, or comment upon the editorials offered, for I believe you gentlemen will concede to that end, and which is not the theme of this article.

We are here today representing our constituents. They have entrusted to us to act upon the many complex problems that confront our profession in the manner we deem best. Then as progressive men, as practical sanitarians, as master plumbers, let's establish a precedent, let's put forth a demand for publicity of all Association subjects, in detail, by the Trade Papers, for we cannot deny their usefulness, and which if taken advantage of, will permit us to gather the view of our entire membership on all questions, and at the same time give them a comprehensive conception of the work fostered by the Association, in a manner not otherwise attainable.

An organization, like an engine, will not run itself, but like the momentum of a fly-wheel, will run a long while after the power has been shut off, providing it has no load to carry. This, however, is wasted energy, for the turning of the mill stone without the supply of grain will not make flour.

We, as a trade, are blessed with a greater number of real live up-to-date Trade Papers, than any other trade organization to my knowledge.

They are equipped to grind out enthusiasm in unknown quantity. All they need is the grain, and it's up to this National organization to provide ways and means to secure the material needed.

What we need and should have is a National publicity committee, whose duty should be to see that each and every edition of all the Trade Papers carries at least a page of good, live facts pertaining to the National Association. The kind of material that makes enthusiasm boil out of every muscle in a man's body, and sets him to work, is the kind that should be published.

The time is ripe for some action of this character. Too little publicity has been given the many prominent features of our organization by the Association direct. There is no better way to reach the craft by the officials than through these mediums.

The Trade Papers have not been given enough consideration. We take them as a matter of fact; we seem to think it our pronounced duty to publish Association news from every part of the country, furnish complete reports of the open sessions of the State and National conventions, accompanied by expensive illustrations, and we are ready to jump upon them promiscuously for not publishing our photographs, even though we failed to send in our subscription regularly.

I have found men in our organization who were selfish enough to ensure a Trade Paper because an article

had appeared that was not in accord with his views. He failed to take into consideration that the article was written by one connected with the trade who wished his views considered and debated upon, and with a view of benefiting the craft.

If such men wanted to be fair they would use the columns of this same paper in placing their objections to the article, and not by going among their friends misleading them into unjust criticism of the paper itself.

Many of us have traveled thousands of miles to be present here this week, to listen to the thoughts of the bright minds of the men in this room, and it is a priceless experience. We would appreciate a like conference every week in the year, but this would be a prohibitive cost. But as a matter of fact we can have such a conference, for every week or every other week your Trade Paper publishes thoughts of these very men, and it is your privilege to omit what you do not want, and profit by what suits your case.

Handicapped as they are, the Trade Papers have been responsible for the master plumbers of various cities becoming converted to the need of organization, by editorials and articles published, and the possibilities of further development along this line is inconceivable, if the proper attention was diverted in this channel.

The columns of the Trade Press are open to the news of the Local, State and National Associations at absolutely no cost, and there is no other way in which the news can be circulated without cost to the members.

The Association officer who does not avail himself of this opportunity is not fulfilling his obligation and the trust placed in him by his fellow craftsmen. To sacrifice his constituents because of a personal grudge against some particular paper is not in accord with the dignity of the most minute officer of the Association, and an officer who takes such a stand should be openly censured. I am happy to say that I do not know of any instance where officers of our organization have taken this attitude.

Time changes all things; even the constitution of this grand old country is beginning to show ragged edges, and there is a growing demand for a change.

So it is in our National organization. Our method of installation, the class of fixtures, and our method of conducting business; have all made radical changes since the days when they "built better than they knew."

We are all aware of the necessity of publicity or advertising from a business standpoint, and the Association can take no exception. The United States Government uses printer's ink in soliciting recruits for army, navy and Federal positions, and so must our National Association.

One of the reasons we have so many unorganized centers in the United States today can be attributed to the lack of publicity. Personally I am convinced of this fact. Two years ago

the State of Indiana was practically unorganized, so far as a working organization was concerned. There were only two local associations in the State holding regular meetings. Indianapolis, the largest city in the State, had only seven members in good standing; non-members were of the opinion that the State and National Associations were, to use their term, "about all in." Others were of the opinion that the meetings of the State and National Associations were not held for business purposes, but just a big pleasure party, and they didn't feel disposed to contribute for the pleasure of others. They had drawn these conclusions because they rarely heard of any of the work of these organizations over the signatures of the Association officers.

The Trade Paper's reports of the conventions are usually lengthy, with a great deal of space taken up by characterizing each of the many events, which is essential, but in this way the important transactions of the convention are scattered, and are apt to be overlooked by the non-member, or by the aggressive member.

A message, or even a thought from the minds of the Association officers, reproduced each issue in the trade magazines, will create interest and keep life in the Association. The American people want encouragement from those who are leaders.

During the first six months of 1912, as the President of the Indiana State Association, I mailed something over 1,500 letters to the non-members in that State, and the result was overwhelming, but this was expensive to the Association and to myself. Then we tried a State Paper, which was equally as beneficial in bringing in new members and kindling enthusiasm, but this too is an expense, and a burden upon the members, especially upon the one whose duty it is to see that the pages of each issue are filled with readable matter.

I have exercised every available opportunity in using the columns of the various Trade Papers to further the Association work in my own State, and I feel duly grateful for the services rendered me by them.

With this personal experience of rebuilding a State membership that had been allowed to lapse, owing to the lack of enthusiasm, I feel that I am in a position to testify to the advantages and prestige the National Association could acquire, if a limited amount of time was sacrificed by the men higher up in Association affairs in writing brief or suggestive articles pertaining to the Association, and published at intervals in the various Trade Papers. These articles should be brief and to the point in order to attract attention, and a constant reminder of this character would bring recruits.

I have heard exceptions taken to this argument, upon the grounds that many men do not read Trade Papers, but my convictions are that the man who hasn't time to read the trade papers is generally the type of man who hasn't time to collect his bills or file his correspondence or attend his local meetings; and he will not find time to attend his own funeral, for he is already dead.

The value of the Trade Paper cannot

be estimated, if its pages are used scientifically by this organization. We can readily remedy many of the evils we are now combating, if we direct more attention to the use of these publications.

Gentlemen, I have tried to make my views plain, and I hope this convention will interpret my views as I see them, for I am a profound believer in publicity, and I am not ashamed to admit that I read my trade papers from cover to cover, scanning through every advertisement in order to keep up-to-date upon new tools or devices of merit that are placed upon the market from time to time, and I make every effort to see that my men do likewise, for it also benefits me.

TAR MACADAM ROADS.

With the advent of the automobile two problems were created on the trunk roads in all countries which the various road authorities have since been endeavoring to solve as efficiently and as economically as possible—the abatement of the dust nuisance and preservation of the surface of the roadway.

The South Vancouver council has recently decided upon two steps which, though at first glance they may not seem to have any connection with each other, are yet very closely allied. The council has decided to engage the services of a consulting engineer to advise as to the practicability of establishing a municipally owned gas plant on the North Arm of the Fraser River, and they have given a contract to the M. P. Cotton Company to oil five miles of roadways in the municipality at a cost of \$175 per mile. The council has also decided to permanently pave Main and Fraser streets with creosoted wood blocks. The oiling and the paving propositions have two main objects, the abating of the dust nuisance and the preservation of a good road surface; and, though these two objects would at first appear to have no connection with the proposal to establish a municipally owned gas-making plant, there is, as a matter of fact, a very close connection.

Probably in no country in the world are there better trunk roads than those running throughout the length and breadth of the British Isles. In recent years nearly all of these roads have been treated either with raw coal tar, which is a product derived from coal during the process of manufacturing gas. The method of treatment varies, but whether raw tar is used or the more expensive preparations, the result of treating a road surface with coal tar is practically the same; a good, solid surface, practically dustless, yet impervious to water during wet weather. While the road construction engineers are settling the question of the best method of treatment to their own satisfaction, it may be interesting to record the result of an experiment carried out by the municipal engineer to one of the urban authorities on the North Wales coast over a period of five or six years. The highway between Holyhead and Chester runs through his district, and in addition he has many miles of roadways under his control. The municipal council owns the gas works, and for the past five or six years the engineer has been experimenting with various

preparations of tar and with the raw tar as it comes direct from the gas works, for the purpose of treating the roadways under his control; and, as a result of his experiments he has come to the conclusion that the tar direct from the gas works gives the best results.

The method which the engineer in question employs is a very simple and inexpensive one, working out in his case at less than a cent per square yard for the actual spraying and cost of tar after the roadway had been prepared for the treatment.

The first essential for the success of tar spraying is good, even-surfaced macadamized roadway with a fairly level top; that is to say, with less fall to the sides than would be necessary if the surface was not to be sprayed. After the roadway had been thoroughly rolled the engineer had the road brushed, thus removing all dust and loose stones and soil. An old water cart or sprinkler was then taken to the gas works and filled with warm raw tar, and on arrival at the piece of roadway to be treated the tar was sprinkled over the surface in exactly the same way as would be done in sprinkling water to lay the dust, the only difference being that two men followed the sprinkler armed with wide rubber squeegees with which they distributed the tar evenly over the surface of the roadway, one-half of which only was treated at once, leaving the other half open to traffic and paths across the tarred half for foot passengers.

Dry weather is the second essential for success in tar-spraying, because two days are necessary to allow the tar to percolate into the roadway. Given those three essentials—a good macadamized surface, dry weather during operations and evenly distributed sprinkling of tar—a road surface is produced which is impervious to water and is practically dustless.

A second sprinkling a few months later will still further improve the roadway, and with a third sprinkling a surface is produced equal to the most expensive asphalted pavement to be found anywhere.—Canadian Engineer.

The State Highway Of California.

A Permanent and Enduring Roadway Being Constructed, Notwithstanding Newspaper Reports.

In all the attacks by the press in the Johnson administration, nothing has equalled in absolute mis-statement and misrepresentation the attempts that are being made to discredit the road construction of the State highway system.

It is represented that because of politics the highway commissioners are not planning durable construction but are stretching the funds as far as possible and providing a "gingerbread roadway," calculated to last only "until Governor Johnson shall have gone out of office."

To serve a maximum of communities with a fake highway system is, in effect, alleged to be the purpose of the State administration.

The fact is that the policy of Gov-

ernor Johnson and the Highway Commission has been emphatically just the contrary of what is charged. From the very first, the Highway Commission has laid down the principle that the best use of the people's money was to build for durability. The substantial road would be the object lesson, the Commission reasoned, that would encourage the public to vote the funds in future needed for the completion of the system, for which the \$18,000,000 that has been provided is wholly inadequate.

The idea of permanence, for which the Commission has stood so strong, necessarily led to curtailment of the amount of roadway that could be built and how steadfastly the policy has been adhered to is evidenced by the resistance that has been shown against the petitionings and clamorings of many communities of the State that the highways shall be extended so that they might enjoy the use of them.

Instead of "leaving the state a gigantic system of broken-down highways," it is the pronounced purpose of the State administration to build well as far as funds will allow, and to leave it to the future to carry to completion the splendid scheme of highways.

The road construction between San Francisco and San Jose is particularly the object of attack. How unfair to the Commission these outbursts are may be judged from the fact that more money is being expended per mile in this piece of roadway than anywhere else in the State.

The indictment of the entire road construction is based on a section of less than two miles, between Beresford and San Mateo, where a crushed rock base of from five to seven inches is being laid, to be covered with an inch and a half of sheet asphalt. Elsewhere in the state a four inch base of concrete is being used. This fact is ignored by the press, which tries to make it appear that all the construction in the state is to be of this "flimsy" character.

In the first place, the real road authorities say the Beresford-San Mateo construction is not "flimsy," it is emphatically not a "cheat," as is charged, but makes a very durable roadway, as has been proved in many places in the country, notably San Joaquin County.

The reason for this construction between Beresford and San Mateo was that there had been a previous crushed rock construction and the Commission decided to utilize the base it found there.

Instead of a general use of this crushed rock base over the State system, the Commission has let contracts for only eleven and a half miles, in the aggregate, for this character of road of the 2700 miles of the State system, approximately 900, in mountain regions, will be of graded dirt. The remaining 1800 will be of high grade pavement. The most of this pavement will be of four inch concrete, with an asphalt blanket half an inch thick. This sort of construction will cost about eighty-five hundred dollars a mile. The concrete will represent approximately four per cent of this cost.

Such a four inch base will afford a durability that will stand up, for all practical purposes, under road traffic in any part of California. The question

has been studied with utmost care and with the help of the best expert opinion.

It would be possible to construct roadways of higher durability, but the cost would increase in a rapidly rising proportion. Eighty-five hundred dollars per mile is a cost that means excellent roadways requiring only a reasonable amount of money for upkeep, considerably less than what interest would be on the additional expenditure a material increase in durability would entail.

The libelous attacks on the Highway Commission demonstrate the helplessness of the hostile press in trying to "get something on" the Johnson administration. For many months these papers have watched lynx-eyed, but their vigil has been in vain. The Progressive administration has not served, in the remotest degree, a single special interest. Special privilege has been absolutely unable to break its way into favor at Sacramento. This fundamental weakness in American government is banished from California.

nia under Governor Johnson, and the special interests newspapers are moved to the utmost in their bitterness of assault.

The Railroad Commission, under Progressive management, slashes express rates, ending monopoly exactions which have been imposed on a long-suffering public. A few days later comes a campaign of denunciation of the State administration, not as regards the express rate decision, but in connection with so entirely remote a matter as roadway construction.

It is an unvarying course. Whenever the Railroad Commission has hit the special interests hard, and corrected a flagrant abuse, there has always followed a violent outbreak somewhere against Governor Johnson's administration. It seems reasonable to assume, therefore, that there is some relation between the smashing of extortionate express rates on the one hand and the appearance, on the other, of the vicious attacks on the Highway Commission.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architect, D. J. Patterson, Mechanics' Institute Bldg., S. F. Owner, Mrs. Amy J. Patterson. The building will be erected on the east side of Divisadero street near Duboce avenue, and has been designed to contain six modern suites of three and four rooms. Interior will be finished in pine with some elm panels and hardwood floors. Bath rooms will have tile wainscot and floors. Plans provide for a central heating system, but this work will not be included in the general contract. Open fire places will also be installed. Mantels will be of brick or tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$15,000. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, J. Snickolov. The building will be erected on the west side of Folsom street south of 17th street, and will cover an area of 25x72 feet. Suites will contain two and three rooms with bath. Interior will be finished in pine with some hardwood veneer. There will be a central heating system, but this work will not be included in the general contract. Bath rooms will have tile wainscot. All suites will be equipped with wall beds. Exterior of the building will be covered with cement plaster on metal lath, brick veneer base and rustic. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$18,000. Architect, Fred H. Wood, 2211 Steiner St., S. F. Owner, F. M. Greenwood. This building will be erected on Larkin street south of Greenwich and will have a street frontage of 37½ feet by a depth of 80 feet. Interior will contain fifteen suites of two, three and

four rooms. There will be steam heat and a hot water system. Interior will be finished in pine, hardwood and elm panels. Some hardwood floors will be used. Bath rooms will have composition floors and tile wainscot. All suites will be equipped with wall beds. Marble and tile will be used in the entrance lobby. Exterior of the building will be covered with cement plaster on metal lath, brick veneer base and rustic. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$24,000. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, Ludwig Bless. The building will be erected at the northeast corner of California and Elick Lane, a small street between Powell and Mason, covering an area of 60x70 feet. There will be a total of fourteen suites containing two, three and four rooms. All suites will have private bath rooms and wall beds. Interior finish will be of pine with some hardwood veneer. There will be steam heat, an automatic elevator and hot water supply. Bath rooms will have composition floors and tile wainscot. Marble and tile will be used in the entrance. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, Mrs. M. Maher. The building has been designed to contain six suites of two and three rooms and will be erected at the southeast corner of Cole and Fulton streets, covering an area of 25x62 feet. Interior finish will be of pine with elm panels and some hardwood floors. Rector system of heating will be installed. All suites will have wall beds and private bath rooms. Bath rooms will be finished in tile and will have composition floors. Tile and marble will be used in the entrance. Exterior of the

building will be covered with cement plaster on metal lath. Plans are complete and a contract will be awarded this week.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$12,000. Architect, Albert Schroeffer, Foxcroft Bldg., S. F. Owner, Ella Blackman. The building will be erected on the north side of Sacramento street east of Polk street and will cover an area of 30x77½ feet. Plans provide for six well arranged apartments of two, three and four rooms. All suites will have wall beds and private bath rooms. Interior finish will be of pine, elm and hardwoods. There will be a central heating system and hot water supply. Bath rooms will have composition floors and tile wainscot. Tile and marble will be used in the vestibule. Exterior of the building will be covered with rustic and brick veneer. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, David Harris. The building is to be erected at the southeast corner of Ellis and Farren avenue, covering an area of 30x67½ feet. Plans show nine suites of two and three rooms, all with private bath. Interior finish will be of pine, elm panels and some hardwood floors and veneer. A central heating system will be installed. Bath rooms will have composition floors and tile wainscot. Entrance vestibule will have marble wainscot. All suites will have wall beds and hot and cold water will be supplied to all rooms. Exterior of the building will be covered with rustic, cement plaster on metal lath and brick veneer. Plans are complete and figures are being taken.

SACRAMENTO, CAL.—Apartment house, 5 story and base, Class A construction. Cost not stated. Architects, Smith & Stewart, 24 Kearny St., S. F. Owner, Dr. Paris. This work has been mentioned here a number of times before when plans were being prepared and first out for figures. Bids received were all in excess of the amount available and revised plans, eliminating one wing have been prepared. Construction will be fireproof throughout with reinforced concrete walls, floors and metal lath and plaster interior partitions. Interior finish will be of cedar, pine and hardwoods. Exterior of the building will be faced with pressed brick. Revised plans are now being figured.

SAN FRANCISCO—Apartment house, 6 story and base, brick and steel, \$80,000. Architect, none. Owner, L. E. Curtaz. This building will be erected at the northwest corner of Bush and Leavenworth streets, having a frontage on Bush street of 87½ feet and on Leavenworth of 57 feet. The building will have a steel frame and exterior walls of concrete and brick, faced with pressed brick. Plans provide for a number of two and three room suites all with private bath rooms. Interior finish will be of pine with some mahogany used in the entrance and lobby. Bath rooms will have cement floors and tile wainscot. Tile will also be used in the kitchens and toilets. All suites will be equipped with wall beds. There will be steam heat, two elevators, a vacuum cleaning system and hot water

system. Marble and tile will be used in the entrance vestibule. Plans are in the hands of the owner who will sublet all parts of the work.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architects, Train & Williams, Exchange Bldg., L. A. Owner, Mrs. George J. Ley. The building will be erected on a corner site and will cover an area of 60x115 feet. Plans show 106 rooms arranged in suites of two and three rooms with private baths. Interior finish will be of pine with some hardwood floors and veneer. All suites will be equipped with wall beds. There will be steam heat, an automatic elevator, vacuum cleaning system and hot water system. Marble and tile will be used in the entrance vestibule. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

Contracts Awarded.

SAN FRANCISCO—Apartment houses, 2, 3 story and base. Class C construction, \$15,000 each. Architect, N. W. Cannannon Co., Monadnock Bldg., S. F. Owner, Theodore Bielenberg. Hotel Herald. Contractors, N. W. Cannannon Co., Monadnock Bldg., S. F. Plans are now being prepared for two buildings which will be erected on adjoining property on the south side of Turk street east of Polk. Each of the buildings will be arranged for two and three room suites. Interior finish will be of pine throughout. There will be a central heating system and hot water supply. Interior finish will be of pine and hardwood. All suites will have connecting baths and wall beds. Exterior will be faced with either pressed brick or cement plaster. Construction will be started as soon as plans can be completed.

LOS ANGELES, CAL.—Apartment house, 2 story and base, brick, \$16,700. Architect, Charles F. Helmle, Lissner Bldg., L. A. Owner, J. A. Kerchgraber. Contractors, Monarch Investment Co., Security Bldg., L. A. Contract price, \$16,700.

BANKS.

FRESNO, FRESNO CO., CAL.—Bank vault, reinforced concrete. Cost not stated. Architect, Eugene Mathewson, Fortyeth Bldg., Fresno. Owners, First National Bank of Fresno. Plans are now being prepared for a reinforced concrete bank vault, two stories in height and covering an area of 22 feet square. The vaults will weigh 123 tons. Special doors and entrances will be provided. Full particulars can be secured from the architect. Plans will be complete within a week or ten days.

BRIDGES, DAMS AND HARBOR WORK.

BLACK POINT, MARIN CO., CAL.—Bridge, steel and concrete. Cost not stated. Engineers, County Engineers of Marin and Sonoma Counties, Owners, Marin and Sonoma Counties. The Marin County Board of Supervisors agreed to join with Sonoma County in the construction of a bridge across Petaluma River at Black Point, and have sent a committee to confer with the Sonoma Supervisors on the money

to be set aside. This is the result of the visit made to San Rafael by the Sonoma Valley boosters. Further particulars will be given as the plans progress.

Contracts Awarded.

SACRAMENTO, CAL.—Bridge, steel and concrete, \$83,962. Engineer, County Engineer, Sacramento. Owners, Sacramento County. Contractors, Ross Construction Co., Sacramento. Contract price, \$83,962.

PORTLAND, ORE.—Municipal dock No. 1, timber and concrete construction, \$200,000. Engineers, Portland Harbor Commission. Owners, City of Portland. Contractors, Lewis A. Hicks Co., Rialto Bldg., S. F. Contract price, \$210,000.

CHURCHES.

GLENDORA, LOS ANGELES CO., CAL.—Church, 2 story and base, reinforced concrete, \$25,000. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owner, Methodist Episcopal Church of Glendora. The building has been designed in the Gothic style and will cover an area of 76x100 feet. Plans provide for a main auditorium seating 500 people with an adjoining lecture hall seating 200 people. These two rooms may be thrown together by means of sliding doors. Besides these features there will be 23 class rooms, two department lecture halls, social hall and pastor's study. Interior finish will be of pine throughout. A plenum system of heating and ventilation will be installed. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

SNOHOMISH, WASH.—Mausoleum, 1 story, reinforced concrete, \$25,000. Architect, W. Marbury Somerville, White Bldg., Seattle. Owners, Northwest Mausoleum Co. The building will be similar in construction to a number of other mausoleums built by the same company. There will be 24 receptacles. Exterior of the building will be faced with cement plaster and cut stone. Plans will be completed shortly and figures will be called.

Contracts Awarded.

OAKLAND, CAL.—Synagogue, 1 story and base, brick and steel, \$65,000. Architect, G. Albert Lansburgh, 709 Mission St., S. F. Owners, First Hebrew Congregation of Oakland. Contractors, Schenely-Hostrawser & Pedgrift, First National Bank Bldg., Oakland, general construction. Contract price, \$65,000.

COLTON, SAN BERNARDINO CO., CAL.—Church, 1 story and base, brick and frame, \$19,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Jewel Methodist Church of Colton. Contractors, Campbell & Ward, Colton. Contract price, \$18,000.

COURT HOUSES.

MERCED, MERCED CO., CAL.—Hall of Records, 1 story, base and mezzanine floor, reinforced concrete, \$50,000. Architect, H. C. Russell, Humboldt Bank Bldg., S. F. Owners, Merced County. Architect Russell has just been commissioned to prepare plans for this building which will be fireproof. The County Supervisors, acting in conjunction with the City Trustees, are developing a Civic Center which now includes the County Court House, Library and will shortly contain the

new Hall of Records. Besides a large public space the new building contains the County Recorder's office, work space and special vaults. Interior finish will be of pine and hardwoods. A tile floor will be used. Exterior of the building will be faced with cement plaster. Bids will be called for as soon as plans can be completed, which will probably be sometime during this month.

SAN FRANCISCO—City Hall steel erecting. Cost not stated. Architects, Bakewell & Brown, 251 Kearny St., S. P. Owners, City and County of San Francisco. Bids were opened at the Wednesday meeting of the Board of Public Works for hauling, erecting, riveting and painting the steel work for the new City Hall. Bids were taken on a tonnage basis, three sets of figures being received. Blume Construction Co., were apparently low on the work. A complete list of the bids will be found under the heading of San Francisco in this issue.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Warehouse, 3 story and base, brick and steel, \$50,000. Architects, Bakewell & Brown, 251 Kearny St., S. P. Owner, Orville C. Pratt, Jr. This building, which is to be erected at the northwest corner of Spear and Howard streets, has been mentioned in these columns before. The entire structure has been leased to a well known wholesale grocery firm. The structure will cover an area of 68 feet 9 inches by 137½ feet. A portion of the building will be finished for offices and the balance will be used for shipping departments and stock space. Plans provide for two freight elevators, special vaults and metal window sash and frames. Exterior will be faced with stock brick. Plans are complete and figures are being taken.

PORTLAND, ORE.—Warehouse, 2 story and base, brick and steel, \$30,000. Architect, Aaron Gould, Worcester Bldg., Portland. Owners, National Ice Co. The building has been designed for a cold storage plant. No interior finish has been specified. There will be special machinery and equipment. A large freight elevator will be installed. Specifications provide for metal window sash and frames. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

ALBINA, ORE.—Stables and shop, 2 story and base, reinforced concrete, \$60,000. Architects, Emil Sebaht & Sons, Portland. Owners, Star Sand Co. The building will cover a ground area of 190x150 feet, and will be absolutely fireproof. Basement will be used for wagon storage, first floor for stables and a blacksmith shop, and the second floor for a wagon shop and storage space. Metal window sash are specified. There will be concrete floors fireproof roof. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

FLATS.

SAN FRANCISCO—Flats, 3 story and base, frame, \$7,000. Architect, E. H. Hildebrand, Cracker Bldg., owner, E. H. Hildebrand. The building will be

erected on the west side of Larkin street north of Union and will cover an area of 25x72½ feet. There will be six apartment flats, three and four rooms with baths. Interior finish will be of pine with elm panels and some hardwood floors and veneer. Bath rooms will be finished in tile and will have composition floors. There will be open fire places in the living rooms with brick or tile mantels. Exterior of the building will be covered with cement plaster on metal lath and brick veneer base. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Flats and stores, 3 story and base, frame, \$12,000. Architect, Earl B. Scott, Humboldt Bank Bldg., S. P. Owner's name withheld. The building is to be erected on California street in the Richmond District, and has been designed to contain two stores on the first floor and four flats on the upper two floors. Each flat will consist of five rooms and bath. Interior finish will be of pine with some elm panels and hardwood floors. There will be open fire places and tile or brick mantels. Bath rooms will have composition floors and tile wainscot. Each living room will have an open fire place with brick or tile mantel. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

GOVERNMENT WORK AND SUPPLIES.

Supervising Architect, Pending Projects.

The following projects are pending in the office of the supervising architect, bids for which have been opened on dates as indicated:

Casper, Wyo., construction, April 7. Chicago, Ill., fire protection system, June 20.

Fresno, Cal., hoistway and freight lift, July 17.

Grand Junction, Colo., construction, June 24.

Grass Valley, Cal., construction, June 30.

Douglas, Wyo., construction, April 12. Pocatello, Idaho, construction, May 28.

Port Townsend, Wash., heating boilers, July 21.

Air Compressor, Etc., Puget Sound.

All bids received for air compressor, etc., for the navy yard, Puget Sound, Wash., have been rejected and a new call for bids issued, the official advertisement appearing elsewhere in this issue.

Pending Projects, Yards and Docks.

No action has yet been taken on bids opened at the bureau of yards and docks on dates indicated below:

Mare Island, Cal., dredging channel and basin; also San Diego, Cal., one wooden coaling tower and appurtenances.

Gate-Operating Mechanism.

Under bids opened at the U. S. Reclamation Service, Los Angeles, Cal., for radial gate-operating mechanism for the Minidoka project, the contract has been awarded to the Union Machine Co., of San Francisco, Cal. A complete abstract of the bids appears elsewhere in this issue.

Sacramento, Cal., Screens.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for furnishing door and window screens for the U. S. post office at Sacramento, Cal.:

Willer Mfg. Co., Milwaukee, Wis., \$1,800.

The E. T. Burrows Co., Portland, Me., \$1,822.

The Robbins Mfg. Co., Chicago, Ill., \$1,812.

W. B. Rohl, Sacramento, Cal., \$3,480.

Campbell & Turner, Sacramento, Cal., \$2,516.

California Planing Mill, Sacramento, Cal., \$2,580.

C. J. Mathews, Sacramento, Cal., \$4,150.

Coal-Handling Plant, San Diego.

The following bids were opened July 26 at the bureau of yards and docks, Navy Department, for one wooden coaling tower and appurtenances at the naval coal depot, San Diego, Cal.:

The Snare & Triest Co., 233 Broadway, New York city, \$29,750.

C. W. Hunt Co., Inc., West New Brighton, N. Y., \$23,672.

Reinforcement Bars.

The contract for furnishing reinforcement bars for the U. S. Reclamation Service, Montrose, Colo., has been awarded under bids opened July 14 to the Colorado Fuel and Iron Co.; delivery f. o. b. Pueblo, Colo., for the sum of \$1,177.81.

Dredging, Mare Island.

The following bids were opened July 26 at the bureau of yards and docks, Navy Department, Washington, D. C. for dredging channel and basin in Mare Island Strait and removing rocks at Vallejo, Cal.:

Item 1, per cubic yard for dredging and disposing of mud in channel and basin; 2, per cubic yard for dredging and disposing of that part of commission rock to be excavated to a depth of 20 feet; 3, do, to a depth of 20 feet.

S. G. Hinder, 14 Montgomery street, San Francisco, Cal., item 1, 7.27c; 2, \$4.10; 3, \$2.75.

N. R. Harms, 23 California street, San Francisco, Cal., item 1, 8.5c; 2, \$2.10; 3, \$1.90.

Hawaiian Dredging Co., Honolulu, H. I., item 1, \$8.87c; 2, \$5.95; 3, \$3.87.

Standard American Dredging Co., Oakland, Cal., item 1, \$7.5c; 2, \$3; 3, \$1.75.

Insulators, Minidoka Project, Idaho.

The following bid was opened by the U. S. Reclamation Service, Los Angeles, Cal., for furnishing insulators as follows:

Item 1, 1,500 porcelain insulators; 2, 200 strain insulator chain.

Western Electric Co., Los Angeles, Cal., item 1, \$33.25; 2, \$32; time 60 days; delivery East Liverpool, Ohio.

Reinforcement Bars.

The following bids were received by the U. S. Reclamation Service at Montrose, Colo., for furnishing about 7,000 pieces steel reinforcement bars for concrete:

The Calumet Steel Co., f. o. b. Chicago, Ill., \$808.50; discount, \$8.03; freight, \$217.90; net cost, \$1,148.31.

Colorado Fuel and Iron Co., f. o. b. Pueblo, Colo., \$1,020.70; discount, \$5.15;

freight, \$152.26; net cost, \$1,177.81.

The Concrete Steel Co., f. o. b. Pittsburgh, Pa., \$796.34; discount, \$3.98; freight, \$396.07; net, \$1,188.43.

Cambria Steel Co., f. o. b. Johnstown, Pa., \$819.77; discount, \$4.10; freight, \$378.90; net, \$1,194.17.

The Concrete Steel Co., f. o. b. Chicago, Ill., \$880.66; discount, \$440; freight, \$320.59; net, \$1,208.85.

Corrugated Bar Co., f. o. b. Buffalo, N. Y., \$816.34; discount, \$4.08; freight, \$304.95; net, \$1,121.21.

Jones & Laughlin Steel Co., f. o. b. Pittsburgh, Pa., \$831.48; discount, \$416; freight, \$396.07; net, \$1,223.39.

Illinois Steel Co., f. o. b. Gary, Ind., \$916; discount, \$4.58; freight, \$313.92; net, \$1,223.34.

Wm. B. Hough Co., f. o. b. Gary, Ind., \$935.13; discount, \$4.68; freight, \$342.37; net, \$1,272.82.

The Calumet Steel Co., f. o. b. Montrose, Cal., \$1,237.70; discount, \$13.38; net, \$1,224.32.

Substation Equipment.

The following bids were opened at the office of the U. S. Reclamation Service, Los Angeles, Cal., for furnishing substation equipment for the Minidoka project, Idaho:

Item 1, 6 350-K. V. A. transformers; 2, 5 panel switchboards; 3, 2 33,000-volt oil switches; 4, 1 3-phase, 30,000-volt lightning arrester; 5, 2 33,000-volt air brake switches; 6, 1 maximum demand recording device.

General Electric Co., Los Angeles, Cal., deliveries at Pittsfield, Mass., Schenectady, N. Y., and Lynn, Mass., item 1, \$6,699, 105 days; 2, \$1,262, 105 days; 3, \$1,498, 105 days; 4, \$711, 105 days; 5, \$190, 105 days; 6, \$685, 105 days.

Westinghouse Electric and Mfg. Co., Los Angeles, Cal., deliveries East Pittsburgh, Pa., item 1, \$7,640, 50 days; 2, \$2,018, 90 days; 3, \$1,032, 75 days; 4, \$453, 90 days; 5, \$231, 50 days; 6, \$588, 90 days.

B. F. Kierulff & Co., Los Angeles, Cal., delivery Port Wayne, Ind., item 1, \$5,310; 65 days.

Pittsburgh Transformer Co., Pittsburgh, Pa., item 1, \$5,628, 90 days.

Allis Chalmers Co., Los Angeles, Cal., delivery East Norwood, Ohio, item 1, \$6,780, 100 days.

Wagner Electric Co., Los Angeles, Cal., delivery St. Louis, Mo., \$6,900, 120 days.

General Electric Co., Schenectady, N. Y., lump-sum bids as follows: For items 1, 2, 3, 4, 5, and 6, \$11,339; for items 2, 3, 4, 5, and 6, \$4,640.

Westinghouse Electric and Mfg. Co., lump-sum bid for items 2, 3, and 4, \$3,370; for items 1, 2, 3, and 4, \$10,910.

Gate-Operating Mechanism.

The following bids were opened at the office of the U. S. Reclamation Service, Los Angeles, Cal., for furnishing radial gate-operating mechanism for Minidoka project:

Item 1, four radial gate-operating mechanisms, with cast steel gears; 2, do, with cast iron gears and steel pinions.

Union Machine Co., San Francisco, Cal., item 1, \$1,815; 2, \$1,712; ship from San Francisco 60 days, G. E. two H. P. motor.

United Iron Works, Los Angeles, Cal., item 1, \$2,085; 2, \$1,995; time 90 days, shipment from Oakland, Cal.; Westinghouse or G. E. two H. P. motor.

Minneapolis Steel and Machine Co., Minneapolis, Minn., item 1, \$2,150; 2, \$2,037; time, item 1, 55 days; 2, 45 days; shipment from Minneapolis; Ideal two-H. P. motor.

Hinman Hydraulic Mfg. Co., Denver Colo., item 1, \$2,400; 2, \$2,400; time, item 1, 90 days; 2, 60 days; shipment from Denver; General Electric three-H. P. motor.

Fulton Engine Works Los Angeles, Cal., item 1, \$3,051; 2, \$2,520; time 75 days; shipment from Los Angeles; Westinghouse two-H. P. motor.

Llewellyn Iron Works, Los Angeles, Cal., item 1, \$4,508; 2, \$4,068; time, item 1, 50 days; 2, 80 days; shipment from Los Angeles; Westinghouse two-H. P. motor.

GARAGES.

SAN FRANCISCO—Garage, 1 story and base, concrete and steel, \$30,000. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, Louis Samuels. The building will be erected on the south line of Post street west of Jones, and will have a street frontage of 77½ feet by a depth of 137½ feet. The building has been designed for a commercial garage and has already been leased. Construction will be fireproof with concrete walls and floor and steel roof trusses. Interior of the front portion of the building will be finished in pine and balance left unfinished. There will be metal window sash and frames. Exterior will be faced with cement plaster. Mr. Meussdorffer will furnish only the architectural plans and engineering drawings and superintendence will be furnished by Engineer L. M. Hausman, Nevada Bank Bldg. Plans are now being prepared.

SAN FRANCISCO—Garage and sales rooms, 2 story and base, brick and steel. Cost not stated. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. This building, preliminary plans for which are now underway, will be erected south of Market street. The structure will cover a considerable area and has been designed for an automobile sales room and garage. Interior of the front portion of the main floor will be handsomely finished. Tile floor and hardwood veneer will be used. Upper floor will be used for storage space, repair shop and shipping department. Construction will include elevator and metal window sash and frames. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

Contracts Awarded.

TULARE, TULARE CO., CAL.—Garage, 1 story and base, reinforced concrete, \$40,000. Architect, L. F. Platt, Tulare. Owners, Bender and Moore. Contractors, A. W. Pace and G. L. Ferguson, Tulare. Contract price, \$40,000.

HALLS & SOCIETY BLDGS.

PORTERVILLE, TULARE CO., CAL.—Lodge hall, 2 story and base, brick, \$20,000. Architect's name not given. Owners, Porterville Odd Fellows Hall Association. All bids received recently for the construction of this building have been rejected as above the amount available. Plans will be revised and new figures called. The building will be devoted exclusively to the use of the owners and will con-

tain lodge rooms, social hall, smoking rooms and library on the first floor. Second floor will be designed for living apartments. Interior finish will be of pine and hardwood. There will be steam heat, vacuum cleaning system and hot water system. Exterior of the building will be faced with pressed brick. The lowest bid received was from A. R. Laidlaw for \$28,787.

HOTELS.

SAN FRANCISCO—Hotel, 5 story and base, reinforced concrete, \$30,000. Architects, Rhodes & Marsh, 3372 16th St., S. F. Owner, C. F. Hornung. The building will be erected on the west side of Valencia street, 122 feet south of 16th, and will have a frontage of 34 feet by a depth of 89½ feet. There will be a restaurant and one store besides the hotel entrance on the first floor. Upper four floors will be divided into 64 guest rooms and a number of public baths. Interior finish will be of pine and redwood. Bath rooms will have cement floors and tile wainscot. Plans provide for steam heat, elevator service and a hot water supply. Patent store fronts will be specified. Exterior of the building will be faced with cement plaster. Plans will be completed in the course of the next three weeks and bids will be called.

SAN FRANCISCO—Hotel, 5 story and base, reinforced concrete. Cost not stated. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, Carmel Fallon. The building will be erected on the south side of Market street west of Brady street, and will cover an area of 34x124 feet. Plans show two stores on the first floor besides the entrance to the hotel proper. Upper floors will contain a total of 70 rooms and a number of baths. Interior finish will be of pine with some elm panels. There will be steam heat, hot and cold running water and elevator service. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Metal window sash and frames are specified. Plans are nearly complete and figures on the general construction will be called for shortly. A contract for the excavating, grading and bulkheading has been awarded to P. Montague for \$1,290.

SAN FRANCISCO—Hotel and stores, 2 story and base, brick, \$12,000. Architect, Bernard J. Joseph, First National Bank Bldg., S. F. Owners, Marks Bros. The building will be erected on McAllister street west of Gough, and has been designed with stores on the first floor and rooms above. Interior finish will be of pine throughout. Hot and cold running water will be supplied to all rooms. Bath rooms will have composition floors and tile wainscot. Marble base and patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. A contract will be awarded by the last of the week.

SAN FRANCISCO—Hotel, 5 story and base, brick and steel, \$50,000. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owners, Columbia Realty Co. The building is to be erected on the west side of Taylor street north of Sutter, covering an area of 38 feet 9 inches by 132½ feet. The building has been designed for a commercial hotel

and will contain a large number of single rooms, many of which will have private bathrooms. Plans provide for steam heat, elevator service, vacuum cleaning system and hot and cold running water. A large lobby and entrance will occupy the first floor. Interior finish will be of pine, hardwoods and some ornamental plaster. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for within two weeks.

LOS ANGELES, CAL.—Hotel, 12 story and base. Class A construction, \$350,000. Architect, R. T. Laughlin, Lissner Bldg., L. A. Owner, E. F. Hammell. This building is to be erected on Westlake avenue, covering an area of 84x120 feet. Construction will be fireproof throughout, the building having a complete steel frame, terra cotta exterior walls, faced with pressed brick, terra cotta and cut stone. Plans provide for hollow tile interior partitions and floors. There will be a total of 220 guest rooms. Each floor will have ten baths. Interior finish will be of metal, marble, tile, pine and hardwoods. There will be two elevators, steam heat, complete oil burning equipment, vacuum cleaning and hot water systems. Top floor will be arranged for a ball room. Offices, lobby and parlors will occupy the first floor. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel, \$60,000. Architect, Maine Building and Investment Co., Thorpe Bldg., L. A. Owner, H. N. Carpenter. Plans show a building designed in the shape of a letter L with extreme dimensions of 100x125 feet. There will be a total of 125 guest rooms and 36 public and private bath rooms. First floor will contain the offices, lobby and stores. Interior finish will be of pine, birch and white enamel. Plans provide for steam heat, elevator service and hot and cold running water. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick and artificial stone trimming. Work will be carried on by the Maine Building and Investment Co. Plans are now being prepared.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architects, Elsen & Son, Wilcox Bldg., L. A. Owner, Roy Blumen-thal. The building will be erected at the corner of 3rd and Figueroa streets, covering an area of 50x70 feet. There will be two stores besides the hotel entrance and lobby on the first floor. Upper floors will be arranged for a total of 45 guest rooms and several baths. Interior finish will be of pine and redwood. There will be steam heat, elevator service and hot and cold water system. Stores will have patent fronts. Metal window sash and frames will be specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 3 story and base, brick and steel. Cost not stated. Architect, Leonard L. Jones, 1. W. Hellman Bldg., L. A. Owner, Robert A. Fowler. The building will be erected at the southeast corner of Pico and Hill streets and will cover an area of 59x150 feet. There will be six stores on the first floor and entrance to the hotel above. Upper floors will be arranged for a hotel lobby, of-

fice and 55 guest rooms and 20 baths. Interior will be finished in pine and birch. There will be steam heat, hot and cold running water and elevator. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

LOS ANGELES, CAL.—Hotel, 3 story and base. Class C construction. Cost not stated. Architects, Mayberry & Parker, Consolidated Realty Bldg., L. A. Owners, Consolidated Realty Co. The building will be erected at the southwest corner of 14th and Hill streets and has been arranged for stores on the first floor and hotel rooms above. The structure will cover an area of 60x104 feet. Plans provide for three stores, hotel dining room, office and lobby on the first floor and 50 guest rooms and a number of baths on the upper floors. Interior will be finished in pine throughout. Bath rooms will have cement floors and tile wainscot. There will be steam heat and hot and cold running water. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 4 story and base. Class C construction. Cost not stated. Architects, Dennis and H. H. Hewitt, Ray Bldg., L. A. Owner's name withheld. The building will be erected at the northwest corner of 3rd and Hope streets. There will be five stores and a moving picture theatre on the first floor and a total of 93 rooms and 42 bath rooms on the upper floors. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot and cold running water. Interior finish will be largely of pine. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with cement plaster. Metal window sash and frames are specified. Plans are complete and figures will be called for shortly.

HOSPITALS.

Contracts Awarded.

SANTA ANA, ORANGE CO., CAL.—Hospital, 2 story and base, reinforced concrete, \$45,000. Architect, Fred H. Eley, Hervey-Finley Bldg., Santa Ana. Owners, Orange County. Contractor, general construction, A. E. Bird, 1055 West 4th St., Santa Ana, \$37,718; heating and ventilating, Machinery and Electric Co., L. A., \$4,137.

LIBRARIES.

BREMERTON, WASH.—Library, 2 story and base, reinforced concrete, \$20,000. Architect, H. H. Ginnold, Eppler Bldg., Seattle. Owners, City of Bremerton. The architect has just been commissioned to prepare these plans and details of construction can not be given at this time. The building committee have decided to erect a fireproof building. The structure is a gift of the Carnegie Library Association. Complete details will be given in these columns shortly.

rector of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Working drawings for the structural steel for the Horticultural Building have been completed and are now out for figures. The proposal calls for furnishing and fabricating only. Plans can be secured from the Director of Works, room 207 Service Bldg. An official proposal appears in another column of this issue. Bids will be opened on September 4th.

SAN FRANCISCO—General construction Auditorium. Class A construction, \$1,000,000. Architect, Director of Works, Service Bldg., S. F., associated with Architects John Galen Howard, John Reid, Jr., and Frederick H. Meyer. Owners, Panama-Pacific International Exposition Co. Bids for the general construction of the big Auditorium building will be received on September 11th by the Building and Grounds Committee. Separate bids will be submitted for the stone work and elevators. Plans and specifications can be secured from the office of the Director of Works. An official proposal appears in another column of this issue.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SPOKANE, WASH.—Passenger station, 4 story and base. Class A construction, \$500,000. Architects, Architectural Department O. W. R. and N. Co., Spokane. Owners, Oregon-Washington Railroad and Navigation Co. This work was mentioned in these columns when plans were first prepared. The building will be of fireproof construction, and will cover an area of 152x300 feet. Only the central portion will be four stories high. Exterior of the building will be faced with pressed brick, cut stone and terra cotta. Plans and specifications can be secured from J. R. Holman, care of the owners at Spokane. Bids are now being taken and will be opened on August 20th.

LOS ANGELES, CAL.—Freight shed, 1 story, reinforced concrete. Cost not stated. Engineer, Engineering Department San Pedro, Los Angeles and Salt Lake R. R. Co., L. A. Owners, San Pedro, Los Angeles and Salt Lake R. R. Co. Engineer C. F. Miller is preparing plans for a freight shed covering an area of 60x150 feet, which will be erected at the corner of First and Myers streets. The building will be fireproof. Plans will be ready for figures within two weeks. Exterior will be faced with cement plaster.

RESIDENCES.

OAKLAND, CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Frances Poye. The dwelling, which has been designed for an eight-room house with bath and sleeping porch, will be erected in Rock Ridge Park. Interior will be finished in pine and hardwoods with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed. Tile will also be used in the kitchen. Exterior of the house will be covered with cement

plaster on metal lath. Plans have been out for figures and a contract will be signed this week.

PIEDMONT, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$2,500. Architect, none. Owners, United Home builders, 1762 Broadway, Oakland. The bungalow will be erected on Rose avenue and will contain six rooms, bath and sleeping porch. Interior finish will be of pine, redwood and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room with brick mantel. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, Arthur D. Nicholson, Whittell Bldg., S. F. Owner, W. D. Tillghast. The house will be erected on Mountain View avenue near Pacific and has been designed to contain eight rooms, baths and sleeping porch. Interior finish will be of pine, mahogany and white enamel. Hardwood floors will be used in the principal rooms. Bath rooms will have composition floors and tile wainscot. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1½ story and base, frame, \$3,000. Architect, none. Owner, E. Wilcox, 2237 Roosevelt avenue, Berkeley. The house will contain seven rooms and is to be erected on Sutter street between Yolo and Hopkins streets. Interior finish will be largely of pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor. All materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$2,500. Architect, Leonard H. Ford, 2136 Center St., Berkeley. Owner, Miss A. Delaney. The house, which has been designed to contain six rooms and bath, will be erected on King street. Interior finish will be of pine with some hardwood veneer and hardwood floors in the principal rooms. There will be a large open fire place with brick mantel in the living room. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic. Plans are complete and figures are now being taken by the architect.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, J. Henry Walbold. The house will be erected in Claremont Tract and has been designed to contain eight rooms and bath. Interior finish will

be of pine with some hardwood. Hardwood floors will be used in the principal rooms. There will be a large sleeping porch in connection with one of the bed rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick or tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken by the architect.

ORISO, TULARE CO., CAL.—Residence, 2 story and base, frame, \$3,000. Architect, Leonard H. Ford, 2136 Center street, Berkeley. Owner, Mrs. L. A. Leadbetter. The house will contain six rooms and bath. Interior finish will be of pine with some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be an open fire place in the living room with brick mantel. Tile will be used in the bath room and kitchen. Sleeping porch is provided in connection with one bed chamber. Exterior of the house will be covered with rustic. Plans are being prepared.

SACRAMENTO, CAL.—Bungalow, 1 story and base, frame, \$3,500. Architect, Leonard H. Ford, 2136 Center St., Berkeley. Owner, Mrs. G. W. Cahalan. The house has been designed to contain six rooms and bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room with brick or tile mantel. Bath room will have tile wainscot and tile will also be used in the kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared for the work.

SACRAMENTO, CAL.—Residences, 1 and 2 story frame. Cost not given. Architect, none. The following Day Labor jobs are reported as about to be started in Sacramento: B. H. Bill, 3215 4th avenue, 1 story frame dwelling, \$1,500; J. R. Davis, 2829 21st street, 2 story frame dwelling, \$3,500; J. E. Layton, 1011 Piedmont avenue, 1 story frame dwelling, \$1,200; S. W. Davis, 3210 6th avenue, 1 story frame dwelling, \$1,800.

Contracts Awarded.
SAN FRANCISCO—Residences, 3 2 story and base, frame. Cost not stated. Architect, Charles C. Frye, 20 Montgomery St., S. F. Owners, Mr. Luckett and Mrs. Ogle. The following contracts have been awarded on these dwellings in addition to the general construction, which has been awarded to J. P. Fletcher. On the Luckett houses, plumbing to the Hill Co. and painting to B. F. Myer; on the Ogle house, plumbing to William Wade.

LOS ANGELES, CAL.—Residence, 2 story and base, concrete and frame, \$25,000. Architect, Frank L. Molino, 6631 Hollywood Blvd., L. A. Owner, John Schell. Contractor, Frank L. Molino, 6631 Hollywood Blvd., L. A. Contract price, \$25,000.

—SCHOOLS—

SUISUN, SOLANO CO., CAL.—School, 1 and 2 story and base, reinforced concrete, \$70,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Suisun City School District. Architect Smith has just been awarded this work in competition with a

number of local architects. The building will be designed for a high school containing, besides the usual class rooms, domestic science and manual training departments. Construction will be fireproof throughout. Plans will provide for a central heating system, vacuum cleaning and program clocks. Further details of the construction will be given as the plans progress. Exterior of the building will be faced with cement plaster. Construction will depend upon the successful sale of the bonds.

OAKLAND, CAL.—School addition, frame construction, \$4,500. Architect J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. The temporary building known as the Fruitvale School will be altered and an addition constructed. Plans are complete and out for figures. Bids will be opened by the Board of Education on August 15th. Plans and specifications can be secured from the architect.

LOS ANGELES, CAL.—Fine Arts building, Los Angeles State Normal group, 2 story and base, brick and frame. Cost not stated. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, State of California. Plans are being completed for a building 81x121 feet, which will complete the group of buildings now under construction for the Los Angeles State Normal School at the corner of Vermont and Willowbrook avenues, Los Angeles. The building will be of frame construction, faced with tapestry brick veneer and will have a tile roof. Bids will be called for shortly by the State Department of Engineering.

Contracts Awarded.

PORTERVILLE, TULARE CO., CAL.—School, 1 story and base, brick, \$13,000. Architect, F. W. Griffin, Porterville. Owners, Strathmore School District. Contractors, George A. Noble & Sons, Visalia. Contract price, \$13,000.

STORES AND OFFICES.

SAN FRANCISCO—Store and loft, 2 story and base, brick and steel. Cost not stated. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. The building has been designed for a commission house, and will be erected on Washington street in the heart of the commission district. The front portion of the first floor will be arranged for offices. Rear will contain storage space and shipping department. Upper floor will be given over to storage space. There will be a pile foundation, brick exterior walls and tar and gravel roof. Metal window sash and frames will probably be used. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO—Stores, 1 story and base, brick and steel. Cost not stated. Architect, William H. Crim, Jr., 125 Kearny St., S. F. Owners, J. McAllister Co. This building will occupy the only lot remaining vacant on Kearny street between Market and Sacramento. The building will cover an area of 60x50 feet, and will be designed with foundation and walls heavy enough to support additional stories. There will be large plate glass display windows and patent store fronts. Exterior will be faced with

pressed brick. Plans are nearly complete and figures will be called for at once.

SAN FRANCISCO—Stores and lofts, 2 story and base, brick and steel. Cost not stated. Engineer, L. S. Rosener, Merchants' Exchange Bldg., S. F. Owner, L. A. Myers. The building will be erected on the north side of Bush street west of Polk, and has been designed with stores on the first floor and lofts on the upper floor. Stores will be suitable for the automobile trade. Interior finish will be of pine and hardwood with tile or terrazzo entrances. There will be large display windows and patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and a contract will be awarded within a few days.

SAN FRANCISCO—Stores and lofts, 2 story and base, reinforced concrete. Cost not stated. Architects, J. E. Kraft & Sons, Pelican Bldg., S. F. Owners, A. J. and David Donzel. The building will be erected at the southwest corner of the Embarcadero and Pacific street, and will cover an area of 39x 52 1/2 feet. There will be stores on the first floor and lofts above. Patent store fronts and metal sash and window frames will be specified. Exterior of the building will be faced with cement plaster. Interior finish will be of pine throughout. Plans are complete and figures are being taken.

OAKLAND, CAL.—Store alterations, 2 buildings, brick construction, \$20,000 and \$8,000. Architect, Walter J. Mathews, 927 Broadway, Oakland. Owners, Durst Bros. and M. J. and W. J. Layman. The Durst Bros.' job, which is at the northeast corner of 12th and Washington streets will cost in the neighborhood of \$20,000. The Layman job, at the northwest corner of the same street will cost \$8,000. Both buildings will have new store fronts, interior finish, plumbing, plastering and electric wiring. Plans are complete and the work will be done by Day Labor. Mr. Mathews will superintend.

SANTA ANA, ORANGE CO., CAL.—Stores and offices, 4 story and base, brick and steel, \$75,000. Architects, Metcalf & Davies, 43 American avenue, Long Beach. Owner, W. H. Spurgeon. The building will be erected on a corner site, covering an area of 100x 135 feet. There will be five stores besides the entrance on the first floor. Upper floors will be subdivided into a total of 100 offices. Interior will be finished in pine and hardwood with marble and tile wainscot and tile floors in the halls and lobby. There will be steam heat, elevator service and a vacuum cleaning system. Metal window sash and frames are specified. The exterior of the building will be faced with pressed brick and terra cotta. Patent store fronts will be installed. Plans are complete and now out for figures.

Contracts Awarded.

RIVERSIDE, RIVERSIDE CO., CAL.—Store and offices, 2 story and base, reinforced concrete, \$36,000. Architects, Kysor & Higgar, Wright and Callender Bldg., L. A. Owners, Riverside Abstract Co. Contractors, Cresner Manufacturing Co., 196 West 5th St., Riverside. Contract price, \$36,000.

LOS ANGELES, CAL.—Stores, 1 story and base, brick and steel, \$26,000. Ar-

chitects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. S. H. Van Nuys. Contractors, Alta Planning Mill Co., \$30 Garry St., L. A. Contract price, \$26,000.

SEALED PROPOSALS.

PROPOSALS FOR STREET WORK.—OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco, Aug. 7, 1913.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 20th day of August, 1913, for doing the following street work, including the furnishing of the necessary labor and materials therefor to wit:

(a) That a 21-inch vitrified, salt-glazed, iron-stone pipe sewer with brick manhole with cast-iron frame and cover and galvanized wrought-iron steps be constructed along the center line of Balboa street, between the easterly and westerly lines of Twenty-eighth avenue.

(b) That an 8-inch vitrified, salt-glazed, iron-stone pipe sewer with 10 Y branches and 3 brick manholes with cast-iron frames and galvanized wrought-iron steps be constructed along the center line of Seventeenth avenue from a point 20 feet southerly from Rivera street to Santiago street, and that an 8-inch vitrified, salt-glazed, iron-stone pipe sewer be constructed along the center line of Seventeenth avenue from the north-easterly line of Santiago street to a point 20 feet southerly from the southerly line of Santiago street.

(c) That an 8-inch, vitrified, salt-glazed, iron-stone pipe sewer with 6 Y branches be constructed along the center line of Eighteenth avenue from a point 103 feet 6 inches northerly from the northerly line of Rivera street, and that an 8-inch, vitrified, salt-glazed, iron-stone pipe sewer be constructed along the center line of Eighteenth avenue, between the northerly and center lines of Rivera street, and that an 18-inch, vitrified, salt-glazed, iron-stone pipe sewer with 18 Y branches be constructed along the center line of Balboa street between Twenty-eighth and Twenty-ninth avenues.

(e) That a 21-inch, vitrified, salt-glazed, iron-stone pipe sewer with 11 Y branches be constructed along the center line of Balboa street between Twenty-fourth and Twenty-fifth avenues.

(f) That the following vitrified, salt-glazed, iron-stone pipe sewers and appurtenances be constructed:

(1) That a 21-inch with 1 brick manhole with cast-iron frame and cover and galvanized wrought-iron steps along the center line of Balboa street between the easterly and center lines of Twenty-eighth avenue; an 18-inch along the center line of Balboa street, between the center and westerly lines of Twenty-eighth avenue; and an 8-inch along the center line of Twenty-eighth avenue between the center and northerly lines of Balboa street.

(2) That an 8-inch, vitrified, salt-glazed, iron-stone pipe sewer with eighteen (18) Y branches and two (2) brick manholes with cast-iron frames and covers and galvanized wrought-iron steps be constructed along the center line of Seventeenth avenue from a point one hundred and eighty-four (184) feet southerly from Quinlan street to a point one hundred and eighty (180) feet northerly from Rivera street; that a twelve (12) inch vitrified, salt-glazed, iron-stone pipe sewer with two (2) Y branches be constructed along the center line of Seventeenth avenue from the last described point to the northerly line of Rivera street; and that a twelve (12) inch vitrified, salt-glazed, iron-stone pipe sewer be constructed along the center line of Seventeenth avenue between the northerly and center lines of Rivera street.

Said work must be done in accordance with the plans and specifications therefor on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within fifteen (15) days and completed within sixty (60) days from the date of the contract to be made and entered into therefor.

The amount of bond for faithful performance has been fixed at \$200.00.

All proposals offered shall be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County, for an amount not less than ten per centum of the aggregate of the proposal, and no proposal will be considered unless accompanied by such check.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids. By order of the Board of Public Works, F. J. CHURCHILL, Secretary.

Note: The above described work will be let under seven separate contracts. Official proposal for each contract must accompany your bid. Proposals can be secured upon application to the Board of Public Works.

PROPOSALS FOR STREET WORK.—OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 20th day of August, 1913, for doing the following street work, including the furnishing of the necessary labor and materials therefor, to wit:

That London street, between Excelsior and Brazil avenues, be improved by constructing granite curbs where not already constructed, and by paving the roadway with asphalt, with an asphalt pavement consisting of a 6-inch concrete foundation and a 2-inch asphaltic wearing surface, where not already constructed.

Said work must be done in accordance with the plans and specifications therefor on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within fifteen (15) days and completed within sixty (60) days from the date of the contract to be made and entered into therefor.

The amount of bond for faithful performance has been fixed at \$200.00.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works, F. J. CHURCHILL, Secretary.

PROPOSALS FOR PLUMBERS' SUPPLIES.

PLUMBERS' SUPPLIES—Office of the Quartermaster, Fort Bayard, N. M.

PROPOSALS FOR DREDGING.
DREDGING—U. S. Engineer Office, 401, San Francisco, Cal. Sealed proposals for dredging in Oakland Harbor, Cal., will be received at this office until 10 o'clock a. m. August 20, 1913, and then publicly opened. Information on application. THOMAS H. REES, Lt. Col., Engineers.

PROPOSALS FOR CANAL SUPPLIES.
CANAL, CIRCULAR 787-D—Supplies for Structural Steel Reinforcing Bars and Coupler Knuckle Pins.—Sealed proposals will be received at the office of the general purchasing agent, Canal Commission, Washington, D. C., until 2:30 p. m. August 19, 1913, at which time they will be opened in public, for furnishing the materials mentioned. Plans, Blanks and general information relating to this circular (No. 787-D) may be obtained from this office or the office of the assistant purchasing agent, 1058 North Point street, San Francisco, Cal. F. C. BOGGS, major, corps of engineers, U. S. army general purchasing officer.

PROPOSALS FOR GRANITE WORK.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 27th day of August, 1913, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The granite work for the City Hall, to be located on city property located at the corner of Polk and Grove streets and Van Ness avenue.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within 60 calendar days from the date of the contract to be made and entered into therefor and completed within the time limits as provided for in the specifications.

The amount of bond for faithful performance of contract has been fixed at \$300,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms. The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

NOTICE TO CONTRACTORS

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 415 in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 11:30 A. M. Thursday, September 4, 1913, for furnishing and fabricating structural steel and iron work of the Horticultural Building in accordance with the plans and specifications on file in the office of the Director of Works.

A bond in the sum of fifty (\$50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-

Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$10.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER, Chairman. (*)

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 415, in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 11:30 A. M. Thursday, September 4, 1913, for constructing the Exposition Auditorium, in accordance with the plans and specifications on file in the office of the Director of Works.

Separate proposals will be allowed on Stonework and Elevators.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$50.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco. Architect, D. J. Patterson, Mechanics' Institute Bldg., S. F. Owner, Mrs. Amy J. Patterson. The building will be erected on the east side of Divisadero street near Duboce avenue, and has been designed to contain six modern suites of three and four rooms. Interior will be finished in pine with some elm panels and hardwood floors. Bath rooms will have the wainscot and floors. Plans provide for a central heating system, but this work will not be included in the general contract. Open fire places will also be installed. Mantels will be of brick or tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$15,000. San Francisco. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, J. Sockolov. The building will be erected on the west side of Polson street south of 17th street, and will cover an area of 25x72 feet. Suites will contain two and three rooms with bath. Interior will be finished in pine with some hardwood veneer. There will be a central heating system, but this work will not be included in the general contract. Bath rooms will have tile wainscot. All suites will be equipped with wall beds. Exterior of the building will be covered with cement plaster on metal lath, brick veneer and rustic. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$18,000. San Francisco. Architect, Fred P. Wood, 2211 Steiner street, S. F. Owner, E. M. Greenwood. This building will be erected on Larkin street south of Greenwich, and will have a street frontage of 37½ feet by

a depth of 86 feet. Interior will contain fifteen suites of two, three and four rooms. There will be steam heat and a hot water system. Interior will be finished in pine, hardwood and elm panels. Some hardwood floors will be used. Bath rooms will have composition floors and tile wainscot. All suites will be equipped with wall beds. Marble and tile will be used in the entrance lobby. Exterior of the building will be covered with cement plaster on metal lath, brick veneer base and rustic. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$24,000. San Francisco. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, Ludwig Bless. The building will be erected at the northeast corner of California and Ellick Lane, a small street between Powell and Mason, covering an area of 60x70 feet. There will be a total of fourteen suites containing two, three and four rooms. All suites will have private bath rooms and wall beds. Interior finish will be of pine with some hardwood veneer. There will be steam heat, an automatic elevator and hot water supply. Bath rooms will have composition floors and tile wainscot. Marble and tile will be used in the entrance. Exterior of the building will be covered with rustle and cement plaster on metal lath. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, Mrs. M. Maher. The building has been designed to contain six suites of two and three rooms and will be erected at the southeast corner of Cole and Fulton streets, covering an area of 25x62 feet. Interior finish will be of pine with elm panels and some hardwood floors. Rector system of heating will be installed. All suites will have wall beds and private

bath rooms. Bath rooms will be finished in tile and will have composition floors. Tile and marble will be used in the entrance. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and a contract will be awarded this week.

APARTMENT HOUSE—3 story and base, frame, \$12,000. San Francisco. Architect, Albert Schroeffer, Foxcroft Bldg., S. F. Owner, Ella Blackman. The building will be erected on the north side of Sacramento street east of Polk street, and will cover an area of 30x77½ feet. Plans provide for six well arranged apartments of two, three and four rooms. All suites will have wall beds and private bath rooms. Interior finish will be of pine, elm and hardwoods. There will be a central heating system and hot water supply. Bath rooms will have composition floors and tile wainscot. Tile and marble will be used in the vestibule. Exterior of the building will be covered with rustic and brick veneer. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, David Harris. The building is to be erected at the southeast corner of Ellis and Faren avenue, covering an area of 30x67½ feet. Plans show nine suites of two and three rooms, all with private baths. Interior finish will be of pine, elm panels and some hardwood floors and veneer. A central heating system will be installed. Bath rooms will have composition floors and tile wainscot. Entrance vestibule will have marble wainscot. All suites will have wall beds and hot and cold water will be supplied to all rooms. Exterior of the building will be covered with rustic, cement plaster on metal lath and brick veneer. Plans are complete and figures are being taken.

CITY HALL STEEL ERECTING—Cost not stated. San Francisco. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owners, City and County of San Francisco. Bids were opened at the Wednesday meeting of the Board of Public Works for hauling, erecting, riveting and painting the steel work for the new City Hall. Bids were taken on a tonnage basis, three sets of figures being received. Blume Construction Co. were apparently low on the work. A complete list of the bids will be found under the heading of San Francisco in this issue.

FLATS—3 story and base, frame, \$7,000. San Francisco. Architect, E. H. Hildebrand, Crocker Bldg., S. F. Owner, E. H. Hildebrand. The building will be erected on the west side of Larkin street north of Union, and will cover an area of 35x72½ feet. There will be six apartment flats, three and four rooms with baths. Interior finish will be of pine with elm panels and some hardwood floors and veneer. Bath rooms will be finished in tile and will have composition floors. There will be open fire places in the living rooms with brick or tile mantels. Exterior of the building will be covered with cement plaster on metal lath and brick veneer base. Plans are complete and the work will be done by Day Labor.

FLATS AND STORES—3 story and base, frame, \$12,000. San Francisco.

Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. The building is to be erected on California street in the Richmond District, and has been designed to contain two stories on the first floor and four flats on the upper two floors. Each flat will consist of five rooms and bath. Interior finish will be of pine with some elm panels and hardwood floors. There will be open fire places and tile or brick mantels. Bath rooms will have composition floors and tile wainscot. Each living room will have an open fire place with brick or tile mantel. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

GARAGE—1 story and base, concrete and steel, \$30,000. San Francisco. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, Louis Samuels. The building will be erected on the south line of Post street west of Jones, and will have a street frontage of 77½ feet by a depth of 137½ feet. The building has been designed for a commercial garage and has already been leased. Construction will be fireproof with concrete walls and floor and steel roof trusses. Interior of the front portion of the building will be finished in pine and balance left unfinished. There will be metal window sash and frames. Exterior will be faced with cement plaster. Mr. Meussdorffer will furnish only the architectural plans, and engineering drawings and superintendence will be furnished by Engineer L. M. Hausman, Nevada Bank Bldg. Plans are now being prepared.

GARAGE AND SALES ROOMS—2 story and base, brick and steel. Cost not stated. San Francisco. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. This building, preliminary plans for which are now underway, will be erected south of Market street. The structure will cover a considerable area and has been designed for an automobile sales room and garage. Interior of the front portion of the main floor will be handsomely finished. Tile floor and hardwood veneer will be used. Upper floor will be used for storage space, repair shop and shipping department. Construction will include elevator and metal window sash and frames. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

HOTEL—5 story and base, reinforced concrete, \$30,000. San Francisco. Architects, Rhodes & Marsh, 2372 16th street, S. F. Owner, C. F. Hornung. The building will be erected on the west side of Valencia street 122 feet south of 16th, and will have a frontage of 24 feet by a depth of 89½ feet. There will be a restaurant and one store besides the hotel entrance on the first floor. Upper four floors will be divided into 61 guest rooms and a number of public baths. Interior finish will be of pine and redwood. Bath rooms will have cement floors and tile wainscot. Plans provide for steam heat, elevator service and a hot water supply. Patent store fronts will be specified. Exterior of the building will be faced with cement plaster. Plans will be completed in the course of the next three weeks and bids will be called.

HOTEL—5 story and base, rein-

forced concrete. Cost not stated. San Francisco. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, Carmel Fallon. The building will be erected on the south side of Market street west of Brady street and will cover an area of 34x124 feet. Plans show two stories on the first floor besides the entrance to the hotel proper. Upper floors will contain a total of 70 rooms and a number of baths. Interior finish will be of pine with some elm panels. There will be steam heat, hot and cold running water and elevator service. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Metal window sash and frames are specified. Plans are nearly complete and figures on the general construction will be called for shortly. A contract for the excavating, grading and bulkheading has been awarded to P. Montague for \$1,290.

HOTEL AND STORES—2 story and base, brick, \$12,000. San Francisco. Architect, Bernard J. Joseph, First National Bank Bldg., S. F. Owners, Marks Bros. The building will be erected on McAllister street west of Gough, and has been designed with stores on the first floor and rooms above. Interior finish will be of pine throughout. Hot and cold running water will be supplied to all rooms. Bath rooms will have composition floors and tile wainscot. Marble base and patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. A contract will be awarded by the last of the week.

APARTMENT HOUSE—6 story and base, brick and steel, \$80,000. San Francisco. Architect, none. Owner, L. E. Curtaz. This building will be erected at the northwest corner of Buñ and Leavenworth streets, having a frontage on Bush street of 87½ feet and on Leavenworth street of 57 feet. The building will have a steel frame and exterior walls of concrete and brick, faced with pressed brick. Plans provide for a number of two and three room suites all with private bath rooms. Interior finish will be of pine with some mahogany used in the entrance and lobby. Bath rooms will have cement floors and tile wainscot. Tile will also be used in the kitchens and toilets. All suites will be equipped with wall beds. There will be steam heat, two elevators, a vacuum cleaning system and hot water system. Marble and tile will be used in the entrance vestibule. Plans are in the hands of the owner who will submit all parts of the work.

WAREHOUSE—3 story and base, brick and steel, \$50,000. San Francisco. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owner, Orville C. Pratt, Jr. This building, which is to be erected at the northwest corner of Spear and Howard streets, has been mentioned in these columns before. The entire structure has been leased to a well known wholesale grocery firm. The structure will cover an area of 68 feet 9 inches by 137½ feet. A portion of the building will be finished off for offices and the balance will be used for shipping departments and stock space. Plans provide for two freight elevators, special vaults and

metal window sash and frames. Exterior will be faced with stock brick. Plans are complete and figures are being taken.

HOTEL—5 story and base, brick and steel, \$50,000. San Francisco, Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owners, Columbia Realty Co. The building is to be erected on the west side of Taylor street north of Sutter, covering an area of 3½ feet 9 inches by 132½ feet. The building has been designed for a family hotel and will contain a large number of single rooms, many of which will have private bath rooms. Plans provide for steam heat, elevator service, vacuum cleaning system and hot and cold running water. A large lobby and entrance will occupy the first floor. Interior finish will be of pine, hardwoods and some ornamental plaster. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for within two weeks.

STORE AND LOFT—2 story and base, brick and steel. Cost not stated. San Francisco, Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. The building has been designed for a commission house and will be erected on Washington street in the heart of the commission district. The front portion of the first floor will be arranged for offices. Rear will contain storage space and shipping department. Upper floor will be given over to storage space. There will be a pile foundation, brick exterior wall and tar and gravel roof. Metal window sash and frames will probably be used. Exterior of the building will be faced with pressed brick. Plans are being prepared.

STORES—1 story and base, brick and steel. Cost not stated. San Francisco, Architect, William H. Crim, Jr., 425 Kearny St., S. F. Owners, J. McAllister Co. This building will occupy the only lot remaining vacant on Kearny street between Market and Sacramento. The building will cover an area of 60x50 feet and will be designed with foundation and walls heavy enough to support additional stories. There will be two stores in the building. There will be large plate glass display windows and patent store fronts. Exterior will be faced with pressed brick. Plans are nearly complete and figures will be called for at once.

STORES AND LOFTS—2 story and base, brick and steel. Cost not stated. San Francisco, Engineer, L. S. Rosemer, Merchants' Exchange Bldg., S. F. Owner, L. A. Myers. The building will be erected on the north side of Bush street west of Polk, and has been designed with stores on the first floor and lofts on the upper floor. Stores will be suitable for the automobile trade. Interior finish will be of pine and hardwood with tile or terrazzo entrances. There will be large display windows and patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and a contract will be awarded within a few days.

STORES AND LOFTS—2 story and base, reinforced concrete. Cost not stated. San Francisco, Architects, J. E. Krafft & Sons, Phelan Bldg., S. F. Owners, A. J. and David Donzel. The

building will be erected at the southwest corner of the Embarcadero and Pacific street, and will cover an area of 39x52½ feet. There will be stores on the first floor and lofts above. Patent store fronts and metal sash and window frames will be specified. Exterior of the building will be faced with cement plaster. Interior finish will be of pine throughout. Plans are complete and figures are being taken.

STRUCTURAL STEEL WORK—Cost not stated. San Francisco, Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Working drawings for the structural steel for the Horticulture Building have been completed and are now out for figures. The proposal calls for furnishing and fabricating only. Plans can be secured from the Director of Works, room 297 Service Bldg. An official proposal appears in another column of this issue. Bids will be opened on September 4th.

GENERAL CONSTRUCTION AUDITORIUM—Class A construction, \$1,000,000. San Francisco, Architect, Director of Works, Service Bldg., S. F., associated with Architects John Galen Howard, John Reid, Jr., and Frederick H. Meyer. Owners, Panama-Pacific International Exposition Co. Bids for the general construction of the big Auditorium Building will be received on September 11th by the Buildings and Grounds Committee. Separate bids may be submitted for the stone work and elevators. Plans and specifications can be secured from the office of the Director of Works. An official proposal appears in another column of this issue.

Contracts Awarded.

APARTMENT HOUSES—2, 3 story and base. Class C construction, \$15,000 each. San Francisco, Architect, N. W. Concannon Co., Monadnock Bldg., S. F. Owner, Theodore Bielenberg, Hotel Herald, Contractors, N. W. Concannon Co., Monadnock Bldg., S. F. Plans are now being prepared for two buildings which will be erected on adjoining property on the south side of Turk street east of Polk. Each of the buildings will be arranged for two and three room suites. Interior finish will be of pine throughout. There will be a central heating system and hot water supply. Interior finish will be of pine and hardwood. All suites will have connecting baths and wall beds. Extérieurs will be faced with either pressed brick or cement plaster. Construction will be started as soon as plans can be completed.

RESIDENCES—3, 2 story and base, frame. Cost not stated. San Francisco, Architect, Charles C. Frye, 20 Montgomery St., S. F. Owners, Mr. Luckett and Mrs. Ogle. The following contracts have been awarded on these dwellings in addition to the general construction, which has been awarded to J. P. Fletcher. On the Luckett houses: Plumbing to the Hill Co., and painting to E. F. Myer; on the Ogle house, plumbing to William Wade.

City Bids Opened.

Board of Public Works Opens Bids For Erecting City Hall Steel and For Street Roller.

Bids were opened Wednesday afternoon by the Board of Public Works for hauling, erecting, riveting and painting structural steel for the City Hall. Two propositions were submitted, both on a tonnage basis. Proposition 1 asked for bids for hauling, erecting, riveting and painting per ton of 2000 pounds. Proposition 2 asked for a deduction per ton of 2000 pounds for all material delivered f. o. b. cars at the plaza.

Bids were also opened at the same meeting for furnishing a five ton steam roller for the Street Department. The complete bids submitted on both propositions follow:

Erecting City Hall Steel.

Blume Contracting Co., Prop. 1, \$19,600; Prop. 2, \$1,055.
J. G. Williams Constr. Co., Prop. 1, \$19,850; Prop. 2, \$50.
Sound Constr. & Eng. Co., Prop. 1, \$11,235; Prop. 2, \$20.
California Constr. Co., voted on both propositions.

Furnishing Five Ton Steam Roller.
Edward R. Bacon Co., \$1737.50
Jas. Spear Road Mach. Co., 2150.00
A. L. Young Machine Co., 1897.50
Barber Asphalt Paving Co., 1775.00

OAKLAND AND ALAMEDA

RESIDENCE — 2 story and base, frame. Cost not stated. Oakland, Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Frances Foye. The dwelling, which has been designed for an eight-room house with bath and sleeping porch, will be erected in Rock Ridge Park. Interior will be finished in pine and hardwoods with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed. Tile will also be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans have been out for figures and a contract will be signed this week.

BUNGALOW — 1 story and base, frame, \$2,500. Piedmont, Alameda Co., Cal. Architect, none. Owners, United Home Builders, 1762 Broadway, Oakland. The bungalow will be erected on Rose avenue and will contain six rooms, bath and sleeping porch. Interior finish will be of pine, redwood and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room with brick mantel. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and out for figures. Bids will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$5,000. Piedmont, Alameda Co., Cal. Architect, Arthur J. D. Nicholson, Whittell Bldg., S. F. owner, W. D. Thillingshast. The house will be erected on Mountain View avenue near Pacific and has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be of pine, mahogany and white enamel. Hardwood floors will be used in the principal rooms. Bath rooms will have composition floors and the wainscot. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster

on metal lath. Plans are complete and figures are being taken by the architect.

BUNGALOW—1½ story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, E. Wilcox, 2237 Roosevelt avenue, Berkeley. The house will contain seven rooms and is to be erected on Satter street, between Yolo and Hopkins streets. Interior finish will be largely of pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor. All materials are now being purchased.

BUNGALOW — 1 story and base, frame, \$2,500. Berkeley, Alameda Co., Cal. Architect, Leonard H. Ford, 2136 Center St., Berkeley. Owner, Miss A. Delaney. The house, which has been designed to contain six rooms and bath, will be erected on King street. Interior finish will be of pine with some hardwood veneer and hardwood floors in the principal rooms. There will be a large open fire place with brick mantel in the living room. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic. Plans are complete and figures are now being taken by the architect.

RESIDENCE — 2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, J. Henry Walhold. The house will be erected in Claremont Tract and has been designed to contain eight rooms and bath. Interior finish will be of pine with some hardwood. Hardwood floors will be used in the principal rooms. There will be a large sleeping porch in connection with one of the bedrooms. Plans provide for furnace heat and open fire places. Mantels will be of brick or tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

SCHOOL ADDITION — Frame construction, \$1,500. Oakland, Cal. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. The temporary building known as the Fruitvale School will be altered and an addition constructed. Plans are complete and out for figures. Bids will be opened by the Board of Education on August 18th. Plans and specifications can be secured from the architect.

STORE ALTERATIONS—2 buildings, brick construction, \$20,000 and \$8,000. Oakland, Cal. Architect, Walter J. Mathews, 927 Broadway, Oakland. Owners, Durst Bros. and M. J. and W. J. Layman. The Durst Bros.' job, which is at the northeast corner of 12th and Washington streets, will cost in the neighborhood of \$20,000. The Layman job, at the northwest corner of the same streets, will cost \$8,000. Both buildings will have new store fronts, interior finish, plumbing, plastering and electric wiring. Plans are

complete and the work will be done by Day Labor. Mr. Mathews will superintend.

Contracts Awarded.

SYNAGOGUE—1 story and base, brick and steel, \$65,000. Oakland, Cal. Architect, G. Albert Lansburgh, 709 Mission St., S. F. Owners, First Hebrew Congregation of Oakland. Contractors, Schnebly-Holstrower & Pedgrift, First National Bank Bldg., Oakland, general construction. Contract price, \$65,000.

MARIN, CONTRA COSTA AND SONOMA COUNTIES

BRIDGE—Steel and concrete. Cost not stated. Black Point, Marin Co., Cal. Engineers, County Engineers of Marin and Sonoma Counties Owners, Marin and Sonoma Counties. The Marin County Board of Supervisors agreed to join with Sonoma County in the construction of a bridge across Petaluma River at Black Point, and have sent a committee to confer with the Sonoma Supervisor on the money to be set aside. This is the result of the visit made to San Rafael by the Sonoma Valley boosters. Further particulars will be given as the plans progress.

SCHOOL—1 and 2 story and base, reinforced concrete, \$70,000. Suisun, Solano Co., Cal. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Suisun City School District. Architect Smith has just been awarded the work in competition with a number of other local architects. The building will be designed for a High School containing, besides the usual class rooms, domestic science and manual training departments. Construction will be fireproof throughout. Plans will provide for a central heating system, vacuum cleaning and program clocks. Further details of the construction will be given as the plans

progress. Exterior of the building will be faced with cement plaster. Construction will depend upon the successful sale of the bonds.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

BANK VAULT—Reinforced concrete. Cost not stated. Fresno, Fresno Co., Cal. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owners, First National Bank of Fresno. Plans are now being prepared for a reinforced concrete bank vault, two stories in height and covering an area of 22 feet square. The vaults will weigh 123 tons. Special doors and entrances will be provided. Full particulars can be secured from the architect. Plans will be complete within a week or ten days.

HALL OF RECORDS—1 story, base and mezzanine floor, reinforced concrete, \$50,000. Merced, Merced Co., Cal. Architect, H. C. Russell, Humboldt Bank Bldg., S. F. Owners, Merced County. Architect Russell has just been commissioned to prepare plans for this building which will be fireproof. The County Supervisors, acting in conjunction with the City Trustees, are developing a Civic Center, which now includes the County Court House, Library and will shortly contain the new Hall of Records. Besides a large public space the new building contains the County Recorder's office, work space and special vaults. Interior finish will be of pine and hardwoods. A tile floor will be used. Exterior of the building will be faced with cement plaster. Bids will be called for as soon as plans can be completed, which will probably be sometime during this month.

RESIDENCE — 2 story and base, frame, \$3,000. Orviso, Tulare Co., Cal. Architect, Leonard H. Ford, 2136 Center St., Berkeley. Owner, Mrs. L. A. Leadbetter. The house will contain six rooms and bath. Interior finish will be of pine with some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be an open fire place in the living room with brick mantel. Tile will be used in the bath room and kitchen. Sleeping porch is provided, connecting with one bed chamber. Exterior of the house will be covered with rustic. Plans are being prepared.

Contracts Awarded.

GARAGE—1 story and base, reinforced concrete, \$10,000. Tulare, Tulare Co., Cal. Architect, L. F. Platt, Tulare. Owners, Bender and Moore. Contractors, A. W. Pace and G. L. Ferguson, Tulare. Contract price, \$40,000.

LODGE HALL—2 story and base, brick, \$29,000. Porterville, Tulare Co., Cal. Architect's name not given. Owners, Porterville Odd Fellows Hall Association. All bids received recently for the construction of this building have been rejected as above the amount available. Plans will be revised and new figures called. The building will be devoted exclusively to the use of the owners and will contain lodge rooms, social hall, smoking rooms and library on the first floor. Second floor will be designed for living apartments. Interior finish will be of pine and hardwood. There will be steam heat, vacuum cleaning sys-

tem and hot water system. Exterior of the building will be faced with pressed brick. The lowest bid received was from A. R. Laidlaw for \$28,787.

SCHOOL—1 story and base, brick, \$13,000. Porterville, Tulare Co., Cal. Architect, F. W. Griffin, Porterville. Owners, Strathmore School District. Contractors, George A. Noble & Sons, Visalia. Contract price, \$13,000.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

APARTMENT HOUSE—5 story and base. Class A construction. Cost not stated. Sacramento, Cal. Architects, Smith & Stewart, 214 Kearny St., S. F. Owner, Dr. Faris. This work has been mentioned here a number of times before when plans were being prepared and first out for figures. Bids received were all in excess of the amount available and revised plans, eliminating one wing have been prepared. Construction will be fireproof throughout with reinforced concrete walls, floors and metal lath and plaster interior partitions. Interior finish will be of cedar, pine and hardwoods. Exterior of the building will be faced with pressed brick. Revised plans are now being figured.

BUNGALOW — 1 story and base, frame, \$3,500. Sacramento, Cal. Architect, Leonard H. Ford, 2136 Center St., Berkeley. Owner, Mrs. G. W. Cahalan. The house has been designed to contain six rooms and bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room with brick or tile mantel. Bath room will have tile wainscot and tile will also be used in the kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared for the work.

RESIDENCES—1 and 2 story, frame. Cost not given. Sacramento, Cal. Architect, none. The following Day Labor jobs are reported as about to be started in Sacramento: B. H. Hill, 3245 4th avenue, 1 story frame dwelling, \$1,500; J. H. Davis, 2829 21st St., 2 story frame dwelling, \$3,500; J. E. Layton, 4011 Piedmont avenue, 1 story frame dwelling, \$1,200; S. W. Davis, 3210 6th avenue, 1 story frame dwelling, \$1,800.

LOS ANGELES AND SOUTHERN CALIFORNIA.

HOTEL—12 story and base. Class A construction, \$350,000. Los Angeles, Cal. Architect, R. T. Laughlin, Lissner Bldg., L. A. Owner, E. F. Hammel. This building is to be erected on Westlake avenue, covering an area of 84x120 feet. Construction will be fireproof throughout, the building having a complete steel frame, terra cotta exterior walls, faced with pressed brick, terra cotta and cut stone. Plans provide for hollow tile interior partitions and floors. There will be a total of 220 guest rooms. Each floor will have ten baths. Interior finish will be of metal, marble, tile, pine and hardwoods. There will be two elevators, steam heat, complete oil burning equipment, vacuum cleaning and hot water systems. Top floor will be arranged for a hall room. Offices, lobby and parlors will occupy the first floor. Plans are being prepared.

HOTEL—1 story and base, brick and steel, \$60,000. Los Angeles, Cal. Architect, Maine Building and Investment Co., Thorpe Bldg., L. A. Owner, H. N. Carpenter. Plans show a building designed in the shape of a letter L, with extreme dimensions of 100x125 feet. There will be a total of 125 guest rooms and 36 public and private bath rooms. First floor will contain the offices, lobby and stores. Interior finish will be of pine, birch and white enamel. Plans provide for steam heat, elevator service and hot and cold running water. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick and artificial stone trimming. Work will be carried on by the Maine Building and Investment Co. Plans are now being prepared.

HOTEL—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Eisen & Son, Wilcox Bldg., L. A. Owner, Roy Blumenthal. The building will be erected at the corner of 3rd and Figueroa streets, covering an area of 50x70 feet. There will be two stores besides the hotel entrance and lobby on the first floor. Upper floors will be arranged for a total of 45 guest rooms and several baths. Interior finish will be of pine and redwood. There will be steam heat, elevator service and hot and cold

water system. Stores will have patent front. Metal window sash and frames will be specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

HOTEL—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Leonard L. Jones, L. W. Hellman Bldg., L. A. Owner, Robert A. Fowler. The building will be erected at the southeast corner of Pico and Hill streets and will cover an area of 50x150 feet. There will be six stores on the first floor and entrance to the hotel above. Upper floors will be arranged for a hotel lobby, office and 55 guest room with 20 baths. Interior will be finished in pine and birch. There will be steam heat, hot and cold running water and elevator service. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

HOTEL—3 story and base. Class C construction. Cost not stated. Los Angeles, Cal. Architects, Mayberry & Parker, Consolidated Realty Bldg., L. A. Owners, Consolidated Realty Co. The building will be erected at the southwest corner of 14th and Hill streets, and has been arranged for stores on the first floor and hotel rooms above. The structure will cover an area of 60x104 feet. Plans provide for three stores, hotel dining room, office and lobby on the first floor and 50 guest rooms and a number of baths on the upper floors. Interior will be finished in pine throughout. Bath rooms will have cement floors and tile wainscot. There will be steam heat and hot and cold running water. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

HOTEL—1 story and base. Class C construction. Cost not stated. Los Angeles, Cal. Architects, Dennis and H. H. Witt, Ray Bldg., L. A. Owners name withheld. The building will be erected at the northwest corner of 21st and Hope streets. There will be five stores and a moving picture theatre on the first floor and a total of 93 rooms and 12 bath rooms on the upper floors. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot and cold running water. Interior finish will be largely pine. Bath room will have copper floor and tile wainscot. Exterior of the building will be faced with cement plaster. Metal window sash and frames are specified. Plans are complete and figures will be called for shortly.

STORES AND OFFICES—4 story and

base, brick and steel, \$75,000. Santa Ana, Orange Co., Cal. Architects, Metcalf & Davies, 43 American avenue, Long Beach. Owner, W. H. Spurgeon. The building will be erected on a corner site, covering an area of 100x125 feet. There will be five stores besides the entrance on the first floor. Upper floors will be subdivided into a total of 100 offices. Interior will be finished in pine and hardwood with marble and tile wainscot and tile floors in the hall and lobby. There will be steam heat, elevator service and a vacuum cleaning system. Metal window sash and frames are specified. The exterior of the building will be faced with pressed brick and terra cotta. Patent store fronts will be installed. Plans are complete and now out for figures.

APARTMENT HOUSE—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owner, Mrs. George J. Ley. The building will be erected on a corner site and will cover an area of 60x115 feet. Plans show 106 rooms arranged in suites of two and three rooms with private baths. Interior finish will be of pine with some hardwood floors and veneer. All suites will be equipped with wall beds. There will be steam heat, an automatic elevator, vacuum cleaning system and hot water system. Marble and tile will be used in the entrance vestibule. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

CHURCH—2 story and base, reinforced concrete, \$25,000. Glendora, Los Angeles Co., Cal. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, Methodist Episcopal Church of Glendora. The building has been designed in the Gothic style and will cover an area of 75x100 feet. Plans provide for a main auditorium seating 500 people, with an adjoining lecture hall seating 200 people. The two rooms may be thrown together by means of sliding doors. Besides these features there will be 23 class rooms, two department lecture halls, social hall and pastor's study. Interior finish will be of pine throughout. A plenum system of heating and ventilation will be installed. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

chitects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. S. H. Van Nuys. Contractors, Alta Planning Mill Co., 520 Garry St., L. A. Contract price, \$26,000.

PORTLAND AND OREGON.

WAREHOUSE—2 story and base, brick and steel, \$30,000. Portland, Ore. Architect, Aaron Gould, Worcester Bldg., Portland. Owners, National Ice Co. The building will be erected at the corner of East First and Stark streets, and has been designed for a cold storage plant. No interior finish has been specified. There will be special machinery and equipment. A large freight elevator will be installed. Specifications provide for metal window sash and frames. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

STABLES AND SHOP—2 story and base, reinforced concrete, \$60,000. Albino, Ore. Architects, Emil Schuch & Sons, Portland. Owners, Star Sand Co. The building will cover a ground area of 100x150 feet, and will be absolutely fireproof. Basement will be used for wagon storage, first floor for stables and a blacksmith's shop, and the second floor for a wagon shop and storage space. Metal window sash are specified. There will be concrete doors and fireproof roof. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

Contracts Awarded.

MUNICIPAL DOCK NO. 1—Timber and concrete construction, \$200,000. Portland, Ore. Engineers, Portland Harbor Commission. Owner, City of Portland. Contractors, Lewis A. Hicks Co., Rialto Bldg., S. E. Contract price, \$210,000.

SEATTLE AND WASHINGTON.

PASSENGER STATION—1 story and base, Class A construction, \$500,000. Spokane, Wash. Architects, Architectural Department of W. Ry. and N. Co., Spokane. Owners, Oregon-Washington Railroad and Navigation Co. This work was mentioned in the columns when plans were first prepared. The building will be of fireproof construction and will cover an area of 152x300 feet. Only the central part will be four stories high. Exterior of the building will be faced with pressed brick, cut stone and terra cotta. Plans and specifications can be secured from J. R. Holman, care of the owners at Spokane. Bids are now being taken and will be opened on August 20th.

MAUSELUM—1 story, reinforced concrete, \$25,000. Snohomish, Wash. Architect, W. Marlaby Somerville, White Bldg., Seattle. Owners, Northwest Mausoleum Co. The building will be similar in construction to a number of other mausoleums built by the same company. There will be 21 receptacles. Exterior of the building will be faced with cement plaster and cut stone. Plans will be completed shortly and figures will be called.

LIBRARY—2 story and base, reinforced concrete, \$20,000. Bremerton, Wash. Architect, H. H. Ginnold, Eppler Bldg., Seattle. Owners, City of Bremerton. The architect has just been commissioned to prepare these plans and details of construction cannot be

given at this time. The building committee have decided to erect a fireproof building. The structure is a gift of the Carnegie Library Association. Complete details will be given in these columns shortly.

TO INCREASE GOVERNMENT PROJECT.

ORLAND (Glenn Co.), August 8.—The Department of the Interior at Washington in a recent communication sent to F. S. Reager, Secretary of the Water Users' Association of the Orland Unit, requested him to take steps to see whether the capital stock of the Association could not be increased.

A meeting of the Directors and stockholders has been called for October 7th, when the advisability of increasing the present capital stock of \$750,000 to \$1,050,000 will be decided.

This would provide for an increase of the shares from 15,000 to 21,000, and would mean an extension of the irrigated area from 14,000 acres to 20,000 acres.

TIMBER LAND IN SISKIYOU OPENED.

The Secretary of Agriculture has just notified District Forester Dufalos of the approval of the sale of 2,000,000,000 feet of National Forest timber

from the Klamath National Forest in Siskiyou County. The area involved lies north of the Klamath River, between Hornbrook and Happy Camp. The sale of this timber depends upon the construction of seventy-two miles of railroad to tap the main line of the Southern Pacific at Hornbrook, and the timber will not be sold until transportation is assured.

The area has been divided for sale purposes into three units, no two of which will be sold to the same operator. The upper unit contains 295,000,000 feet, made up of 36 per cent Douglas fir (Oregon pine), 22 per cent yellow pine, 22 per cent sugar pine, 13 per cent white fir, and the rest red fir and cedar. The middle unit contains 388,000,000 feet, made up of 65 per cent Douglas fir, 19 per cent sugar pine, 11 per cent yellow pine, and the remainder white fir and incense cedar. The lower unit contains 1,000,000,000 feet, made up of 68 per cent Douglas fir, 21 per cent sugar pine, 4 per cent yellow pine, and the remainder white and red fir, incense and Port Orford cedars. The stumpage rate in the upper unit is \$3.75 per thousand for sugar pine, \$2.75 per thousand for yellow pine, \$1.25 per thousand for Douglas fir, and 75c per thousand for other species. In the middle and lower unit the stumpage rate is \$2 per thousand for sugar pine, \$1 per thousand for yellow pine, and 50c per thousand for other species. Periods of from twenty to twenty-five years will be allowed for the removal of the timber in each unit.

In addition to the timber on National Forest lands in this area, there is considerable private stumpage which would make additional freight for a railroad, as well as large copper deposits in the vicinity of Happy Camp. The showing of freight that this locality can make should justify the construction of the necessary transportation, and it is expected that capital will become interested in this proposition.

Plans for a railway into this region, outlined in the past, have been for a line from Eureka, Humboldt County, to connect with the Southern Pacific, forming a link between the rich district, which in the past has been comparatively isolated, and the Sacramento Valley, also Jackson and Klamath Counties, Oregon.

TO BEAUTIFY THE PANAMA CANAL.

There is a happy growing tendency to seek the collaboration of the architect and the artist in giving new beauty to engineering works as the condition will allow. This is particularly true in regard to the dams and reservoirs of waterways and work for water supply, and excellent results have been obtained in the treatment of certain of the great dams, such, for instance, as that for the supply of New York at Croton and of Boston at Wachusett. In this connection we are pleased to learn that the Fine Arts Commission has submitted to Congress plans for the beautification of the Panama Canal, in which are embodied landscape effects designed to render artistic the lock, and the approaches to the canal—Scientific American.

Frank Neidick

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

**Bind your copies of the Building and Industrial
News in PERMANENT BOOK FORM**

We have succeeded at last in securing a really practical binder. The Building and Industrial News contains a great deal of technical and statistical information that many of our readers find worth saving for future reference. There is no better way of preserving it than using the "BIG BEN" BINDER

which preserves the magazine in permanent book form. This binder is handsome and durable, and makes the permanent filing of magazines as easy as filing ordinary papers. It opens flat like a regular book, and comes in fine art cloth with the name of our Journal stamped in gold on the front cover and back. For persons who desire to

Save These Valuable Articles

this binder is just the thing, as it holds several numbers of our Journal and can be used again indefinitely year after year, simply by taking out the old Journals and inserting the new ones as they come to you.

By making special arrangement with the manufacturers of this best binder that has ever been put on the market, we are able to furnish them to you for **ONLY \$1.00 EACH.**

Merely send us your name and address and say: "Send us your binder. I enclose \$1.00," and we will send the binder promptly all charges prepaid.

Send in your orders now and begin saving the statistical and technical information, articles and valuable data, that will be published in The Building and Industrial News this year.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that go into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.
